KWAHU SOUTH DISTRICT ASSEMBLY

MEDIUM TERM DEVELOPMENT PLAN (2018 – 2021)

ACKNOWLEDGMENT

I would like to recognize the immense support and contribution of various Stakeholders such as

the Traditional Authorities, Area Council Chairpersons, Community Leaders and all other

Departments and Agencies operating within the Kwahu South District in putting together the

District Medium Term Development Plan (Agenda for Jobs 2018-2021). Special thanks should

be given to the District Planning Team that led the preparation of the District Medium Term

Development, Plan Agenda for Jobs (2018-2021).

I would however like to urge all the Citizens and Institutions within the District to holistically

join in the implementation of this Plan in order to contribute to the progress and development of

the entire Kwahu South District.

Finally, I wish to acknowledge the technical and secretarial support provided by the District

Planning Coordinating Unit (DPCU) in putting together the District Medium Term Development

Plan, Agenda for jobs (2018-2021).

HON. EMMANUEL ATTA OFORI

DISTRICT CHIEF EXECUTIVE

KWAHU SOUTH DISTRICT ASSEMBLY

MPRAESO

KWAHU SOUTH DISTRICT ASSEMBLY, DMTDP 2018-2021

EXECUTIVE SUMMARY

Background and Context of the Plan

Ghana's present development, administrative and managerial system supported by Legislative Instruments such as the 1992 Constitution, Local Government Service Act, 2003(Act 656), Local Governance Act 2016 (Act 936), National Development Planning (System) Act 1994 (Act 480) and National Development Planning Commission Act 1994 (Act 479), has mandated Metropolitan, Municipal and District Assemblies (MMDAs) to play deliberative, legislative and executive roles and functions. The MMDAs are thus charged to compose programs and activities into comprehensive and well packaged development plans that would contribute to societal transformation by enhancing poverty reduction, wealth creation, employment generation, popular participation, improving standards of living and elimination of hunger and deprivation.

Following this mandate, the MMDAs since 1996, have consistently been preparing and implementing a series of Medium Term Development Plans, spelling out their development agenda and programs of action in line with national policy aspirations and community needs. The maiden Medium Term Development Plan spanning (1996-2000), concentrated on the Thematic Areas of the Ghana – Vision 2020 Development Agenda (namely; Human Development, Infrastructure Development, Rural Development, Urban Development and Social Development among others).

Following the change in Government in 2000 which resulted in change in policy direction, the second Medium–Term Development plan paid significant attention to the thematic areas of the Ghana Poverty Reduction Strategy (GPRS I) (namely: Human Resource Development and Basic Services, Vulnerability and Exclusion, Good Governance, Production and Gainful Employment as well as District Micro Economy). This phase of the development planning and implementation which started in 2002 was scheduled to end in December 2005.

The third Medium Term Development Plan which spanned from 2006-2009 was in line with the Growth Poverty Reduction Strategy (GPRS II). Its thematic areas included Private Sector

Led Competitiveness, Human Resource Development and Good Governance and Civil Responsibility.

The fourth phase of the MTDP spanned from the period 2010 to 2013 in line with the Ghana Shared Growth and Development Agenda (GSGDA I). This strategic framework is developed with seven thematic areas including (Ensuring and sustaining macro-economic stability, Enhancing competitiveness in Ghana's private sector, Accelerated Agricultural modernization and sustainable natural resource management, Infrastructure, Energy, and Human settlement Development, Human Development, productivity and Employment, Transparent and Accountable Governance as well as Oil and Gas Development).

Again, the fifth phase of the MTDP spanned from the period 2014 to 2017 which was also in line with the Ghana Shared Growth and Development Agenda (GSGDA II). This strategic framework was developed with seven thematic areas including (Ensuring and sustaining micro economic stability, Enhancing competitiveness in Ghana's private sector, Accelerated Agricultural modernization and Sustainable natural resource management, Infrastructure, Energy, and Human settlement Development, Human Development, productivity and Employment, Transparent and Accountable Governance as well as Oil and Gas Development).

The current phase of the MTDP spans from the period (2018-2021), and it is in line with the new policy framework i.e. Agenda for Jobs (2018-2021). The strategic framework has five dimensions which include social development, economic development, infrastructure, energy and human settlements development, as well as governance and public accountability and International relations

It is in this context that this development plan has been prepared by the Kwahu South District Assembly to span the period 2018-2021. The Plan provides the context of the planning process, major areas of focus, resources required and the estimated financial undertaken involved as well as the expected impact of the proposed projects and programs.

However, to effectively implement this plan, it is imperative for the District to mobilize enough human and financial resources (internal and external sources). The District also needs political commitment to realize the District goals.

Rationale and Objectives

The overall goal of the plan development process is to put in place a package of proposals and interventions that would propel the growth and transformation of the District in response to the dimensions of the National Development Planning Framework i.e. Agenda for Jobs (2018-2021) for the Kwahu District. Specifically, the plan seeks to realize the following objectives:

- To undertake a thorough review of the achievements and performance of the implementation of MTDP-2014-2017 under GSGDA II.
- To prepare and document a detail District Development Profile.
- To identify the core development issues in the District as bases for intervention and planning.
- To formulate an elaborate District Program of action.
- To establish a well-functioning Plan implementation and management arrangements.
- To evolve an effective and efficient system for Plan implementation, monitoring and evaluation.

Approach and Methodology

The DPCU employed a participatory approach to the Plan preparation process through the adoption of participatory rural appraisal and Community Needs Assessment methods. For data of quantitative nature, the DPCU applied appropriate scientific approaches in capturing data sources that provided valid and acceptable conclusions.

In tackling data requiring pure qualitative interpretations, Focus Group Discussions and workshop sessions were employed for collection, collation and analysis. Specific institutions and organizations that have direct bearing on District development issues and concerns were consulted for relevant information. Periodic and systematic stakeholder workshop sessions were organized to discuss, approve and validate at various stages of the plan preparation process. These sessions were attended by relevant key stakeholders in the development efforts

of the District, where issues were thoroughly discussed through dialogue and consensus building.

Plan Preparation Process

The major activities undertaken during the plan preparation process are discussed as follows:

i. Review of Implementation of the MTDP 2014-2017

This segment entailed the assessment of performance of the District with regards to the implementation of the MTDP (2014-2017), in terms of actual implementation as compared to the planned programs and projects. The assessment was also extended to examine and determine the impact of the current plan on the local economy as well as good governance.

ii Preparation of the District Development Profile

The review section discussed significantly, the preparation of the District development situation. The District Planning Coordinating Unit reviewed and updated the District profile in line with the development planning processes and the NDPC planning guidelines, this component began with comprehensive data collection and analysis. Data was collected to cover the entire spatial dimensions of the District. Notably, data on economic, demography, geophysical, environment, tourism, spatial interaction, human settlement, social, culture, governance and fiscal management among others were collected. The documentation and analysis of these data resulted partly in the identification of the Districts key development issues and priorities.

iii Formulation of District Development Proposals

This component constitutes the initial proposals for interventions with the ultimate intention of reversing the District's development problems and enhancing social welfare. As part of this component, the DPCU coordinated the formulation of District development goals, derivation of objectives and strategies. Again, the projection of development parameters and needs assessments to illustrate the proposals in a development framework formed an integral part of this segment. The District development proposals were composed in line with the broad development dimensions of the National Development Policy Framework (NDPF) 2018-2021.

iv Development of Program of Action

Under this section, the District Development proposals outlined in the previous section were contextualized into a meaningful and usable structure to aid effective and efficient implementation, monitoring and evaluation. The Team adopted the logical framework as a tool for putting the proposals into usable format. This section included the medium term and annual programs of action of the District.

v Preparation of Implementation, Monitoring & Evaluation Arrangements

This section did largely emphasize the establishment of financing plan and institutional systems for seeing through the implementation of the programs of action for the planned period. It also included systems for tracking the implementation of the plan and for evaluating the impacts of the programs and projects on the lives of the people and the local economy as a whole.

x. Public Hearing Sessions: Throughout the plan preparation, two levels of public hearing were conducted. The first, after updating District profile and community needs assessment, the DPCU conducted public hearing for all identified stakeholders to review and validate the communities gathered. And before the Plan was finalized, another public hearing was organized for honorable Assembly members and other key stakeholders to know the content of the plan and to make final inputs into it. This was to ensure high level sense of ownership of the plan and as a result increase the degree of success of its implementation.

Structure of the Plan

This Medium Term Development Plan is structured into six mutually reinforcing sections thus providing an effective logical presentation of the broad developmental dimensions as indicated in the NMTDF (2018-2021) Agenda for jobs. The introduction aspects included background of MTDP preparation in Ghana, the rationale for the plan preparation, approach and methodology and the plan preparation processes.

Chapter One reviewed the performance of the 2014-2017 District Medium Term Development Plan with findings indicating that 60% of projects and programs were implemented,25% were partially implemented and 15% were ongoing and therefore have

been rolled over to the next planning period which is (2018-2021), analysis of the current situations and the socio economic challenges and potentials in the District was also done.

Chapter two discussed the District development priorities based on the development dimensions of the NDPF (2018-2021). The prioritized issues were subjected to the POCC, Impact and sustainability analysis.

Chapter three presented the Developmental projections, adopted development goals, objectives and strategies.

Chapter four discussed the District Developmental Programs and Sub-programs and the formulation of the Programs of Action (POA) and Indicative Financial Strategy required to implement the activities in the plan for the period of (2018-2021), a total amount of GHC13,891,034.36 was estimated to be required for the implementation of two hundred (200) projects, programs and activities. The total cost is divided among the various development dimensions which include Economic Development (GHC1,101,300.80), Social Development (GHC3,732,654.00), Infrastructure and Human Settlement Development (GHC1,621,302.00) and Governance and Accountability (GHC2,701,546.00). This chapter also includes the prioritization of the POA. Maps were also included to provide a pictorial view of the spatial projections by the various sectors, which were all combined to present a Map of the future desired state of the District.

Chapter five presented the District Annual Action Plans from (2018-2021), this includes the various projects and programs the District intends to implement within the planning period. It also includes the Monitoring and Evaluation activities to be implemented with the planning period.

Chapter six discussed the plan implementation, monitoring & evaluation arrangements and the communication strategies of the Medium Term Development Plan (2018-2021).

CHAPTER ONE

PERFORMANCE REVIEW AND ANALYSIS OF CURRENT SITUATION

1.0 Introduction

The Kwahu South District Assembly (KSDA), as well as all other District Assemblies in Ghana prepared a 4- year Medium Term Development Plan (DMTDP) spanning from 2014-2017 under the Ghana Shared Growth and Development Agenda (GSGDA II). Based on the prioritized problems, needs/aspirations of the people in the District, various projects and programs were earmarked for implementation within the period to achieve set goals and objectives as indicated in the Seven Thematic Areas of the Ghana Shared Growth and Development Agenda (GSGDA II). The period for the implementation of the DMTDP 2014-2017 has elapsed, paving the way for the preparation of the 2018-2021 DMTDP as mandated by the Local Governance Act, 2016, Act 936, the National Development Planning Systems Act, 1994, Act 480 and the National Development Planning (System) Regulations, 2016, L.I 2232.

This MTDP was prepared by the Kwahu South District Assembly to facilitate the socioeconomic development of the District. It is to direct the District's course of development towards its vision.

The District vision, mission, functions and core functions were adopted from the National vision as stated in the Agenda for Jobs, 2018-2021: "Create an optimistic, self-confident and prosperous nation, through the creative exploitation of our human and natural resources, and operating within a democratic, open and fair society in which mutual trust and economic opportunities exist for all."

1.1.1 Vision Statement

An effective, efficient and accountable District that provides quality and accessible services in a democratic environment that promotes development.

1.1.2 Mission Statement

Kwahu South District Assembly exists to improve the quality of life of the people in the District through effective mobilization and judicious utilization of resource.

1.1.3 Core values

The core values of the Kwahu South District Assembly are in consonance with that of the Local Government Service and guides how services should be rendered to our clients. They are the winning culture that defines the attitudes and behaviors required by staff in order to realize our Vision. The values include the following: *Client-oriented, Diligence. Discipline, Accountability, Equity, Integrity, Innovativeness, Team Work, Timeliness and Transparency.*

1.1.4 Functions

The functions of the Kwahu South District Assembly are in line with the Local Governance Act, 2016, Act 936 sections 12 and 13, which states the functions of the District Assembly as follows:

- exercise political and administrative authority in the district;
- promote local economic development; and
- provide guidance, give direction to and supervise other administrative authorities in the district as may be prescribed by law
- be responsible for the overall development of the district;
- formulate and execute plans, programs and strategies for the effective mobilization of the resources necessary for the overall development of the district;
- co-ordinate, integrate and harmonize the execution of programs and projects under approved development plans for the district
- promote and support productive activity and social development in the district and remove any obstacles to initiative and development;
- sponsor the education of students from the district to fill particular manpower needs of the district especially in the social sectors of education and health,
- initiate programs for the development of basic infrastructure and provide municipal works and services in the district;
- be responsible for the development, improvement and management of human settlements and the environment in the district;
- in co-operation with the appropriate national and local security agencies, be responsible for the maintenance of security and public safety in the district;
- ensure ready access to courts in the district for the promotion of justice;
- act to preserve and promote the cultural heritage within the district;
- execute approved development plans for the district;
- guide, encourage and support sub-district local structures, public agencies and local communities to perform their functions

• Monitor the execution of projects under approved development plans and assess and evaluate their impact on the development of the district and national economy in accordance with government policy.

1.2 Performance Review of Implementation of District Medium Term Development Plan (DMTDP) 2014-2017

The Kwahu South District Assembly's performance in the implementation of the GSGDA II (2014-2017), was reviewed to determine the progress made, lessons learnt and the way forward.

The assessment of implementation of proposed programs and projects in the DMTDP (2014 – 2017), therefore categorized projects and programs into fully implemented, partially implemented or on-going.

The exercise constituted a comprehensive review of reports submitted over the four-year period to the Assembly by Decentralized departments, Departments and Agencies meant to measure progress in the implementation of programs and projects outlined in Annual Action Plans of the 2014-2017 DMTDP. The departmental reports and other participatory monitoring and evaluation activities undertaken formed the basis, District Quarterly and Annual Progress Reports which were the main source of documents for the performance review. Other sources of information for the review include participatory evaluation reports, baseline study/survey reports. *Table 1 below shows the District's performance for the planned period*.

1.2.1 Summary of Performance Review of Projects and Programmes

A careful study of table 2 reveals that, some set targets were not achieved due to the untimely release of funds or lack of commitment on the part of the District Assembly to implement fully, planned programs and projects. Some projects and programs were partially implemented leading to partial achievement of set objectives accordingly.

Out of a two hundred and twenty (220) total projects, one hundred and seventy seven (177) projects and programs had been successfully implemented throughout the planning period of DMTDP 2014-2017, Forty-three (43) programs and projects which are ongoing and recurrent have been rolled over throughout the planning period started.

It is therefore imperative to further weigh the outstanding projects against current needs to determine their relevance to the development of the people.

1.2.2 Fiscal Performance

The District Assembly obtains its revenue for development from different sources. These include the Internally Generated Fund (IGF), District Assemblies Common Fund (DACF), releases from Government of Ghana Grants (GOG) which comes to support specific programs/projects and funds provided by Development Partners to support projects such as Community Water Sanitation Program (CWSP), Social Investment Fund (SIF), District Development Facility (DDF), etc. *Table 2 and 3 below show total releases from Government of Ghana*.

Table 2: Total Releases from Government of Ghana

| | | MENTS (wages | | | | |
|--------|--------------|----------------|--------------|---------|---------------|-----------------|
| Year | Requested as | Approved as | Released | Deviati | ons | Variance |

1.2.2.1 Release of Funds

The release of funds has improved over time. However the main issue is the DACF deductions at source, which serves as an inconvenience to the District Assembly, by hindering the period of project implementation as well as obtaining value for money on all projects.

Also, the table above gives a poor indication of the District's performance with regards to the acquisition of IGF, however arrangements are being put in place to improve the District's Internally Generated Funds (IGF). A Revenue mobilization Taskforce has been instituted as part of efforts to improve IGF generation. Again, stakeholder consultation exercises are being held periodically to improve IGF.

1.2.2.2 Adequacy of Funds

The funds received in the District in the period under review were inadequate compared to the programs/projects proposed for implementation in the Annual Action Plans. This affected the achievements of set targets. The deductions at source in terms of the DACF affected the quantum of money that was received for development projects and programs.

1.2.2.3 Utilization of Funds in Accordance With the Budget

During the period under review, the District Assembly managed to exercise some fiscal discipline. However, some projects/programs were implemented outside the annual budgets under compelling and urgent circumstances. In future, efforts would be made to observe strict compliance with budgets in order to achieve the objectives of the DMTDP.

1.2.2.4 Other challenges with Regards To Disbursements

Disbursements made at source on behalf of the District are sometimes outside the annual budgets of the Assembly. This affects implementation of the annual budget to achieve expected results.

1.3 Key Problems/Issues Encountered During Implementation of the DMTDP (2014 – 2017)

In the course of implementing the DMTDP (2014 - 2017) some major problems were encountered. Notable among these were;

- 1. Delays in the implementation of some projects due to factors such as:
 - (i) Untimely release of funds.
 - (ii) Delays in the implementation of projects caused by contractors.

- (iii) Inability of the District Assembly to honor payment certificates for projects.
- (iv) Delays in the procurement process for works, goods and services.
- 2. Apart from GES, DHMT and MOFA, majority of decentralized departments lacked accurate information on their activities.
- 3. Some completed projects are not being utilized to derive expected benefits due to the unavailability of furniture and other facilities essential for operating such structures.

1.4 Lessons Learnt Which Have Implication for the 2018-2021 DMTDP

- 1. Lack of commitment on the part of the District Assembly to implement planned programs/projects resulted in the non achievement or partial achievement of set goals and objectives.
- 2. Proper attention should be paid to contract management to ensure timely completion of projects/programs and to cut down on cost.
- 3. There is the need for strong collaboration among District stakeholders at all levels (planning, programming, implementation monitoring and evaluation) to ensure that projects are properly executed to meet the needs of the people.
- 4. Subsequent development plans should be disseminated to all stakeholders especially sector departments for regular reference and implementation of programs
- 5. Quarterly reports from the departments should be submitted on time as well as reflect the status of implementation of subsequent MTDP.
- 6. The integrated Project Monitoring Team comprising personnel from sector departments should be adequately resourced to ensure regular monitoring and supervision of the implementation subsequent Medium Term Development Plans.

1.5 Analysis of Existing Situation/Compilation of The District Profile

1.5.1 Institutional Capacity Needs

In order to effectively develop and implement a DMTDP, there is the need to assess the existing human and material capacities as well as to attain the support of the political stakeholders. Therefore, the capacity of the DPCU to prepare and implement the DMTDP was assessed with regards to the availability of requisite skills, logistics and financial resources. *The Table below illustrates the institutional capacity needs of the District Assembly*.

Table 5: DPCU Capacity and Management Index

| Indicators | | | | | | | | | | | | | |
|--------------------------------|----|----|----|----|---------------------------------------|----|----|----|----|----|----|------------------------------|------------------|
| | A | В | С | D | E | F | G | Н | I | J | K | Total Indicator scores | Indicator Av. |
| 1. Qualifications of personnel | 8 | 7 | 10 | 9 | 8 | 8 | 7 | 9 | 6 | 9 | 10 | 91 | 8.3 |
| 2. Staff Compliment | 7 | 9 | 8 | 10 | 10 | 10 | 6 | 7 | 8 | 8 | 9 | 92 | 8.4 |
| 3. M&E skills & Knowledge | 8 | 6 | 6 | 8 | 5 | 7 | 7 | 5 | 7 | 7 | 7 | 73 | 6.6 |
| 4. Availability of Funds | 9 | 8 | 5 | 6 | 5 | 6 | 8 | 8 | 5 | 8 | 5 | 73 | 6.6 |
| 5. Utilization of Funds | 7 | 9 | 7 | 8 | 4 | 5 | 9 | 6 | 7 | 6 | 6 | 74 | 6.7 |
| 6. Timely access to funds | 7 | 5 | 6 | 7 | 8 | 7 | 6 | 8 | 5 | 5 | 7 | 71 | 6.5 |
| 7. Leadership | 9 | 7 | 7 | 6 | 7 | 8 | 7 | 7 | 6 | 7 | 8 | 79 | 7.2 |
| 8. Management | 7 | 8 | 8 | 8 | 7 | 7 | 8 | 9 | 8 | 6 | 5 | 81 | 7.4 |
| 9. Workload | 8 | 6 | 6 | 9 | 6 | 9 | 4 | 10 | 5 | 5 | 7 | 75 | 6.8 |
| 10. Motivation | 6 | 5 | 5 | 7 | 7 | 7 | 6 | 7 | 6 | 7 | 6 | 69 | 6.3 |
| 11. Equipment | 6 | 9 | 7 | 5 | 7 | 6 | 9 | 5 | 7 | 8 | 5 | 74 | 6.7 |
| Total individual | | | | | · · · · · · · · · · · · · · · · · · · | | | | | | | | |
| scores | 82 | 79 | 75 | 83 | 74 | 80 | 77 | 81 | 70 | 76 | 75 | T=852 | T=77.5 |

N.B Total score for 11 people = 852

Average total score = 852/11=77.5

Index = 77.5/11 = 7.0

The interpretation for Index 7.0 means the District has a high capacity and management performance.

As indicated in the assessment above, the District Assembly has a DPCU with capacity which composed of heads of departments who are qualified and readily available to contribute their expertise to ensure a successful implementation of the Plan.

However the DPCU is faced with the issue of inadequate logistics and funds to ensure a timely implementation of its mandate. Despite the limitations which sometimes hinder the performance of members, the DPCU is able to pull through and get work done with the support of Management and the District Chief Executive who is the political head of the District Assembly.

1.5.2 Decentralized Departments in the District

Departments in the Kwahu South District comprise the following:

DEPARTMENTS

Central Administration
Finance Department
Ghana Education Service
Agricultural Department
Physical Planning department
Department of Social Welfare and Community
Development
Department of Trade and Industry
Works Department
Births and Deaths Registry
National Disaster Management Org.
(NADMO)
District Health Services
Information Service Department

Table 5 assesses human and logistical capacity needs of departments of the Assembly.

DISTRICT PROFILE AND ANALYSIS OF CURRENT SITUATION 1.6 Physical and Natural Environment

The Kwahu South District is one of the twenty-six (26) District Assemblies in the Eastern Region of Ghana. It was established in 1988 under L.I 1988, Act 1742. Mpraeso is the District Capital. The District shares common boundaries with Kwahu East to the North, Asante-Akim South to the West, the Kwahu West Municipality and East Akim District to the South and Fanteakwa District to the East. Specifically, it lies between latitudes 6°35" N and 6° 45"N and longitude 0° 55" W and 0° 20"W. The current size of Kwahu South District is 602km².

The strength of Kwahu South District lies in two major identified development areas of comparative advantage. These areas are agricultural and tourism sectors. Therefore, development plans of the Assembly have been geared towards improving the two identified areas with the aim of trickling down development in other sectors.

The District has the advantage of experiencing mixed climatic conditions that may have both positive and adverse implications for its development but could also be used strategically by making the right choices at the right time.

Relief and Drainage

The District lies within three physiographic regions namely the Southern Voltarian Plateau consisting of a series of escarpments Notable among them is the Kwahu Scarp rising from 220m to 640m above sea level. This scarp has two prominent mountainous peaks namely the Odweanoma and Apaku. The second physiographic region is the Forest Dissected Plateau which consists of steep sided Birimian rocks rising to heights up to 240m above sea level. The third physiographic region, the Plains, stretches into the Southern Voltaian Plateau, rising from 60m to 150m above sea level. Among the major rivers that drain the District are the Afram and Pra rivers. The river Afram is a major tributary of the Volta and flows through the northern border of the District with the Afram Plains. The Pra River takes its source from Kwahu Twenedruase and flows through Kwahu Praso where it leaves the District.

Climatic Conditions

Kwahu South District lies within the wet semi equatorial region. It experiences the double maxima rainfall pattern namely major and minor seasons. The major rainy season starts from April, reaching its peak in July. On the other hand, the minor rainy season starts from September, ending in October/November. Annual average rainfall is between 350mm and 500mm. Rainfall intensity however, decreases towards the Voltarian basin. Mean monthly temperature ranges from as high as 30°c in the dry season to about 26°c in the wet season. It is worthy to note that the relatively higher altitude has moderating influence on the local temperature. Relative humidity ranges between 75% and 80% (Meteo Abetifi). This climatic pattern is good for food crop production and forest development. Table 6 and 7 show the climatic data for 2015-2016 and key indicators of rainfall pattern in the District.

Table 6: Climatic Data for 2016-2017

| Year | Data | Total |
|------|-------------------------|-------|
| 2016 | Rainfall(mm) | 1,870 |
| | No of rain days | 124 |
| 2017 | Rainfall(mm) | 1,425 |
| | No of rain days | 135 |
| 2016 | Average Rainfall(mm) | 467.5 |
| | Average No of rain days | 31 |
| 2017 | Average Rainfall(mm) | 356.3 |
| | Average No of rain days | 34 |

3.5 Annex 6: Potential Climate Impacts and Proposed Adaptation and Mitigation Strategies

| | ential Climate Impacts and | | |
|---|--|---|--|
| Sectors | Potential Climate | Adaptation Strategies | Affected |
| | Change Vulnerability | | Communities |
| Agriculture | 1. Harvest failures from improper adaptive strategies 2. Reduce biological productivity and loss of forest cover 3. Progressive loss of nontimber forest products 4. Increased land degradation and loss of cropable land 5. Reduction in livestock size and nutrition. | i. Development of drought tolerant and flood resistant varieties. ii. Breeding of early or extra early maturing genotypes iii. Educating farmers to plant in low population densities so as to reduce competition for scarce or limited soil moisture v. Encourage farm level adaptation such as shift in planting dates and modifying the amount and timing of fertilizer application vi. Enhancing food security measures by storing food in national banks | Adawso, Pitiku , Kwahu Amanfrom Etc |
| Marine ecosystem and coastal zone infrastructure | 1.Disruption of sources of livelihoods e.g. fishing and agriculture 2. Population displacement 3. Invasion and destruction of mangrove ecosystem, coastal wetlands and beaches along with their associated economic and social importance such as being sites for migratory birds 4. Risk to life, structures and property | i.Providing efficient mechanisms for disaster management. ii. Planting mangrove belts to provide flood protection iii. Improving drainage facilities; iv. Establishing setback policies for new developments | New Jerusalem, Kwahu Praso, AdawsoP etc |
| Human Health and Settlement | i. Possibility of emergence of new disease vectors in some areas | i. Establishing setback policies for new developments ii. improving drainage facilities | Kwahu Amanfrom, Adawso, Nkyenene, Pitiku etc |
| Energy and | i. Disruption in industry | i. Promote and develop | Mpraeso, Bepong |

| Industry | productivity due to possible crises in the energy sector | energy efficient technologies | Atibie. |
|---------------------------------|---|---|--------------------------------------|
| Financial Services | i.Higher risk of property insurance ii. Possible disruption of banks' lending portfolios . iii. Disruption in the supply of raw materials e.g from agriculture, fisheries and forestry | i.Promote and develop alternative energy sources such as biomass, wind, biomass, mini-hydro etc. ii. Promotion of energy conservation especially in large energy consuming industries. iii. Monitor and control emissions from industries and transport sectors | Mpraeso, Bepong Atibie |
| Biodiversity | i. Alteration of vegetation structure possibly reduce biological productivity ii. Alteration of species (flora and fauna) composition in the different ecological zones | i.Ensure the cultivation of species in the environment that they are adapted to. ii. Establish land use plan for hot spots iii. Reafforestation | Obomeng, Mpraeso, Nkyenekyene. |
| Water Resources and wetlands | i.Disruption of fishing activities ii. Reduction in underground Water levels iii. Drying up of river courses resulting from forest losses in headstream areas iv. Threat to biodiversity e.g. migratory birds v. Loss of biological diversity | i.Provide alternative skill training for fishing communities ii.Devise flood/drought early warning systems | Adawso, Amanfrom, Nketepa |

Vegetation

The District lies within the semi-deciduous forest zone. The vegetation is dense in terms of tree coverage with most trees shedding off their leaves in the dry season. Trees of economic value like Miliciaexcelsa (Odum), Sterculiarhinopetala (Wawa), Entandrophragmacylindricum (Sapele), etc are found in the forest. The forest is made up of three layers namely the upper, middle and lower layers. A greater part of the natural vegetation has been altered due to man's activities on the land. This infringes on the sustainable development principles of the District, hence a bane to development.

The forest however, remains in their natural state in the reserve areas. Among them is the Southern scarp forest (146.38km²), Oworobong South forest (41.75km²) reserves to mention but a few.

Demographic Characteristics

The District has a population of 80,755 as indicate by the table 3.6 of which 39,667 are males representing 49.1 percent and 41088 are females representing 50.9 percent. It can also be observed from the table that rural population (58,951) exceeds the urban population (21804). This implies that District development should be skewed towards the rural areas to enhance their capacities and their main economic activities should be improved.

Sex ratio

The sex ratio (the number of males per100 females) of the District stands at 90.3 percent which shows the predominance of females over males in the District. It also implies that for every 100 females there is a corresponding 90 males.

Table 7: Population size by locality of residence by District and sex ratio

| | All Localit | ies | Urban | | Rural | |
|--------------------------------|-------------|---------|--------|---------|--------|---------|

Population Pyramid

Figure 1 gives a graphical presentation of age-sex structure of the District. The figure shows a youthful structure that is characteristic of a developing country such as Ghana. The figure on the age-sex structure is broad based, comprising of concentration of children at younger ages. Figure 2.1 shows that a large new cohort is born every year as displayed at the bottom of the pyramid (ages 0-4 years). As cohorts age, they inevitably lose members either through death or migration or both. This is shown by the narrowing of the population at its peaks. Another feature of the District population pyramid is that females in the oldest age groups form the substantial majority than the males.

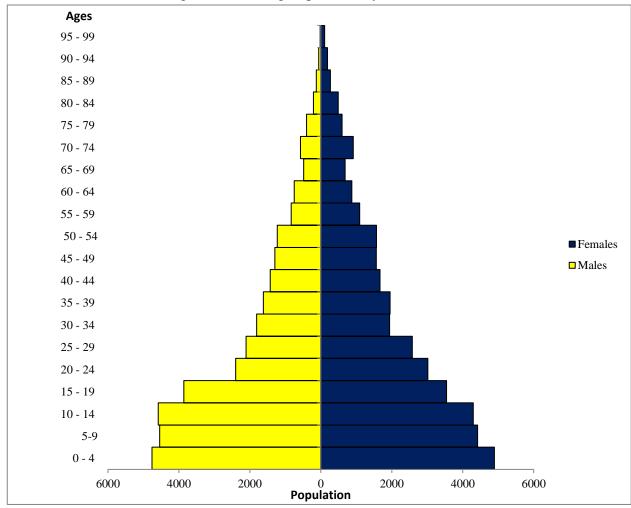

Figure 1: Showing Population Pyramid of Kwahu South District

Source: Ghana Statistical Service

Ethnicity and Culture

Kwahu South District is a heterogeneous community predominated by the Kwahus who form 63.9% as evidenced in 2010 PHC. Other significant tribes are Ewes-10.5%.Dangme -7.7% Ashantis-2.9%.

As a people, Kwahus are Akans. They are well noted for celebration of Easter when all well meaning citizens come back home to join their relatives to celebrate the occasion. The occasion is also used to resolve family problems. Funerals are also well celebrated. These could be developed to serve as tourist attractions.

Table 8 shows population by religion and sex in the District. Most of the people in the District are Christians. Other religious faiths such as Islamic and Traditional religions are also practiced It can be seen from the table that out of the total population enumerated 55435 representing 79.5 percent are Christian of which Pentecostal/Charismatic constitutes a majority of 31 percent followed by other Christians representing 21.7 percent .Protestant (Anglican, Presbyterian, Methodist, Lutheran etc) also recorded 19.8 percent and the Catholic accounted for 6.9 percent. It is of interest to know that those with no religious affiliation accounted for 12.2 percent of the population in the District of which the males dominated. Islam on the other hand also constitutes 6.5 percent and traditionalist accounted for 1.2 percent .Also in the Christianity categories is only the Catholic category where the males dominated females the rest have females outnumbering the males. The males dominated the females in both Islam and Traditional religion.

Table 8: Religious Affiliation and Sex

| | | | Percent | |
|-------------------------------------|--------|-------------------|---------|--------|
| Religion | Number | Both Sexes | Male | Female |
| Total | 69,757 | 100.0 | 100.0 | 100.0 |
| No Religion | 8,544 | 12.2 | 16.0 | 8.9 |
| Catholic | 4,823 | 6.9 | 7.0 | 6.8 |

Economy of the District

The economy of the Kwahu South District Assembly is predominantly agrarian, offering over 44.7% employment to the working population. Other sectors of the economy are service and industry which are mainly small scale. Majority of farmers in the Kwahu South District practice subsistence farming. The rocky and hilly topography of the land does not allow much mechanization to be practiced. In low lying areas along the Aframriver however, some agric mechanization have started. Crops such as plantain, cassava, cocoyam, yam, etc are grown in areas such as Bepong, Ntomem, Asakraka and KwahuPraso. Vegetables like onions, garden eggs, tomatoes and pepper are grown in communities such as Nketepa, Adawso, Amarte and Kwahu Amanfrom. With respect to grains, the commonest ones grown by farmers include maize and beans. Fruits like banana, oranges and pineapple are grown at Bepong, Totem and their environs.

Households in Agriculture

An agricultural household can be described as a household that engages generally in agricultural activities or at least a member of the household engages in agricultural production even if not earning from agricultural activity alone.

Table 9 shows the distribution of size of household by agricultural activity, urban and rural for the District. A total of 10,616 households are engaged in agricultural activities in the District. Nearly 95 percent of these households are engaged in crop farming making it the most predominant agricultural activity in the District followed by livestock rearing constituting 37.6 percent. The least predominant agricultural activities in the District are tree farming (0.5%) and fish farming (0.1%) where less than one percent of the agricultural households are engaged in. Seventy percent of all households in the rural areas of the District are engaged in agricultural activities. Approximately 95 percent of these agricultural households are engaged in crop farming whereas less than one percent of these households are into fish farming. Less than half of the households engaged in agricultural activities (47.2%) are the urban areas where crop farming is the most dominant agricultural activity.

Table 9:Size of Households by agricultural activities

| | | | Urban | Rural |
|-----------------------------------|--------|---------|---------|---------|
| | Number | Percent | Percent | Percent |
| Total Households | 16,725 | 100.0 | 100.0 | 100.0 |
| Households engages in Agriculture | 10,616 | 63.5 | 47.2 | 70.0 |
| Crop Farming | 10,034 | 94.5 | 93.6 | 94.8 |
| Tree Planting | 58 | 0.5 | 0.5 | 0.6 |
| Livestock Rearing | 3,989 | 37.6 | 28.0 | 40.2 |
| Fish Farming | 9 | 0.1 | 0.2 | 0.1 |

Source: Ghana Statistical Service

Commercial Activity

The main economic activity of the people in the District is pottery apart from farming, as most women are engaged in pottery making particularly grinding bowls: shallow dishes with strong, inverted rims and ridges on the interior used to grind vegetables using a small wooden pestle. Petty trading is also very common as most of the populace engage in small scale buying and selling.

Mineral Resources

The District is endowed with some mineral resources of economic importance and quantity. Notable among them are gold, bauxite, manganese, granite stone and clay. The bulk of these mineral resources remain untapped. See table 10 for the locations of these untapped resources.

Table 10: Minerals an

d Their Locations

| No | Type of resource | Location | |
|----|------------------|---|--|
| 1 | Bauxite | Mount Odweanoma | |
| 2 | Gold | Besease, Odumase, Obomeng, Asikam, Aduhema, | |
| | | Mota and KwahuPraso | |
| 3 | Manganese | Mount Odweanoma | |
| 4 | Granite stone | Nkyenekyene, Amate, New Oworobong | |

Source: Field Survey- January, 2017

Small Scale Industries

The economy of the District is dominated by small scale industries which is characterized by over reliance on indigenous knowledge and resources. Sole proprietorship, family ownership and use of labor intensive technology are some of the basic features of this sector. Some small scale industrial activities engaged in by the people include fitting, welding, carpentry and cassava processing, Local gin (Akpeteshie) production, oil palm production as well as tailoring, basketweaving, beads making and batik tie- dye. Table 11 shows the categories of small scale industries in the District.

Table 11: Types of Small Scale Industries

| Category of Small Scale Industries | Industries | | | |
|---|--|--|--|--|
| Agro-based | Milling, gari processing, distillery/brewery, | | | |
| | fishing/fish mongering, grass cutter rearing. | | | |
| Wood-based | Carpentry, charcoal burning. | | | |
| Clothing | Tailoring, seamstress | | | |
| Service | Hair dressing, restaurants/chop bars, guest | | | |
| | houses | | | |
| Repairs | Bicycle repairing, motor cycle repairers, tyre | | | |
| | vulcanizing, car repairing, welding, | | | |
| | blacksmithing | | | |
| Metal based | Black smith, welding | | | |
| Art based | Beads making, basket, weaving | | | |
| Detergent | Soap making | | | |

Source: District Baseline Survey- January, 2017

General Problems of Small Scale Industries

- Inadequate working capital
- Unreliable energy supply
- High cost of inputs
- Lack of organized unions

High cost of credit facilities

Market Infrastructure

Available market infrastructure in the District consists of the physical places where periodic buying and selling takes place. Table 12 shows the market infrastructures in the District.

Table 12: Market infrastructure and facilities

| TYPE OF MARKET (Daily/Weekly) | LOCATION | CONDITION | MARKETS THAT NEED FURTHER DEVELOPMENT | AVAILABILI TY OF LORRY PARKS |
|-------------------------------------|------------|-----------|---------------------------------------|---------------------------------------|
| Daily | Mpraeso | Good | Yes | Good |
| Twice a Week | Bepong | Good | Yes | Bad |
| Weekly | Nketapa | Good | Yes | No |
| Weekly | KwahuPraso | Poor | Yes | Bad |
| Weekly | Ntomem | Good | Yes | No |

Source: District Base line Survey, 2017

Financial Institutions & Economic Activities

Financial Institutions play key roles in the mobilization of resources in the District. An analysis of financial institutions gives an indication of how local people utilize credit for internal development. The financial Institutions include Ghana Commercial Bank, Kwahu and Odweanoma rural banks, First Allied Bank, First National and GN Bank in the District; Table 13 shows economic activities in the District.

Table 13: Economic Activities in the District

| Type of activity | Formal/informal | Produce/products derived from activity |
|------------------|-----------------|--|
| Agriculture | Informal | Maize, Cassava, Vegetables/ Legumes, |
| Manufacturing | Informal | Beads, Soap making and other craftmanship. |

| Utilities | Formal | Electricity, Water services |
|---------------------------------|------------------|---|
| Construction | Formal | Masonry, Carpenters, |
| Trading | Informal | Farm Produce, Provisions, Chemical, Cloths, Mobile Phone & Accessories, Drinkables, Food vendor etc |

Local Economic Development Issues

Local Economic Development (LED) is a process that brings together resources from within and outside the community to address these challenges and to promote economic growth in a systematic and organized manner at the local level. LED does not just happen; a local community

needs to research its own economic strengths, agree upon a common strategy and organize itself to implement the strategy. In our global environment today, successful and economically vibrant communities depend upon being able to adapt to fast-changing national and international market forces.

LED focuses on the District's potential and identifies specifically what local stakeholders can and need to do to ensure their local community reaches its potential. The present era of globalization has been accompanied by an increasing interest in the role played by localities in economic development and employment creation.

The Kwahu South District Assembly is regarded as the Tourism hub of the country. It is a District that can boast of many Tourist sites. It is also regarded as the home of the famous Paragliding event. The Tourists potentials vary from high mountains to renowned rocks and many more. The District receives close to ten thousand tourists in a year. The District also has the Volta Lake in its catchment area. The abundance of bamboo and favorable weather conditions among others are regarded as the strength of the District.

In response to this trend the Kwahu South District Assembly (KSDA) has developed a number of programs to support its local constituents in promoting decent work at local level through a Local Economic Development (LED) approach. The KSDA understands LED as: "a participatory development process that encourages partnership arrangements between the private and public stakeholders of a defined territory that enable the joint design and implementation of a common development strategy by making use of the local resources and competitive advantage, with the final objective of creating decent jobs and sustainable economic growth for all". Participatory approaches have the main advantage of encouraging bottom-up solutions to the problems.

To this end, the Assembly has embarked on many activities to ensure that the objectives of LED is achieved.

Notable among these activities are listed below;

- > Training and provision of funds to the disadvantaged in society to enable them start up business to improve their living standards.
- ➤ Providing Technical Assistance for small business enterprises, and support for small business associations to strengthen their governance for delivery of effective services
- > Creating enabling environment to foster growth of businesses.
- > Training programs for entrepreneurs, hoteliers, etc on a regular basis to build their capacities.

Challenges

The challenges confronting LED efforts in the District include

- Lack of funds to undertake the LED activities.
- ➤ Inadequate LED expertise in the District.
- ➤ Lack of LED understanding among constituents.

Food security

The District as an agrarian local economy has relatively food available for consumption throughout the year. Factors including favorable rainfall patterns and rich soil fertility influence the availability of food in the District.

Table 15 shows the domestic food supply of key staple food as at 2017. The table indicates that the District production in the major crops such as maize, cassava, plantain, cocoyam and yam exceeded the required consumption demand. This implies that there was available food to feed the households. Access to food in the District is more likely to be secured with favorable rainfall patterns and improved agricultural technologies.

Table 15: Domestic Food Supply and Demand of Key Staples (2016/2017)

| Commodity | | Domestic tion(MT) | Production Available for Human Consumption(MT) | | Estimated District Consumption(MT) | | Deficit/ Surplus(MT) | |
|-----------|------|----------------------|--|-------|---------------------------------------|------|-------------------------|--------|
| | 2016 | 2017 | 2016 | 2017 | 2016 | 2017 | 2016 | 2017 |

Governance

The Local Governance Act, 2016, Act 936 establishes the District assembly as the highest political and administrative authority with the mandate to initiate development and coordinate all activities aimed at achieving sustainable development within the area of its jurisdiction.

The institution of chieftaincy plays a vital role as a Traditional Authority. Abene is the seat of the Paramount Chief who has divisional chiefs directly responsible to him in the governance of the people in the communities in the Kwahu South District. Assembly and Unit Committee members cooperate with the chiefs in the development of their respective communities. The Kwahu Traditional Council office is at Mpraeso.

The District Assembly is headed by the District Chief Executive who serve as the political head and the District Coordinating Director who serves as the Administrative head. The Assembly has a total membership of 38 Out of this number, 11 representing 1/3 of membership have been appointed by government in accordance with Act 936. A total number of 7 established subcommittees (comprising of 5 statutory and 2 additional) function as operating arms of the Executive Committee and assist in the implementation of specific activities of the Assembly.

Sub-District Structures

Town/Area Councils are instrumental in local level development. The District has Six Area Councils (Obomeng/Mpraeso/Atibie, Adwaso, Kwahupraso, Obo / Twendurase, Bepong and Asakraka) and several Unit Committees. These structures are responsible for development activities at the lowest local level. Table 16 shows the Area Council analysis.

Table 16: Area Councils Analysis Matrix

| Name of Area Council | Nature of office in | No. of staff | | Source of Funds | Head |
|------------------------|---------------------|--------------|------------------|--------------------|------------|
| | use III | employed | staff at work | runus | Quarters |

State of Participation of Stakeholders (the Citizenry)

In the context of public participation, a stakeholder can be defined as any person, or group, who has an interest in the projector could be potentially affected by its delivery or outputs. The citizenry including civil society groupings, departments and agencies in the District are offered the opportunity to actively participate in public projects planning and implementation through development communication strategies such as public hearing, stakeholder forums, periodic review meetings and site or walking tours.

However, the communal spirit among the people in most of the communities is fading out hence affecting communal ownership of development projects.

Security Situation

The District is relatively peaceful and everybody is doing his/ her normal business. There are no major security issues within the District with the Fulani herdsmen who are mostly concentrated in the neighboring District of Kwahu East, Chieftaincy issues are mostly peacefully resolved with the paramount chief located at Abene who resolves all chieftaincy issues .

However armed robbery cases are on the rise within the District which is a major concern for the security agencies within the District and this issue can partly be blamed on the inadequate police personnel currently available within the District. The District has an oversight security committee comprising of security agencies and chaired by the District Chief Executive. This oversight security committee collaborates favorably with the traditional council, opinion leaders and District Disaster Department in the prevention and management of security trigger issues.

Social Services

Recreation and tourism

Kwahu South District with her capital town, Mpraeso, has an active social atmosphere which attracts a mix of cultures from far and near, especially during Easter festivities and times of funeral. The District also accommodates some tourism potentials including Paragliding at Mountain Odweanoma, Nkofieho Cave of life at Twendurase.

The development of these potentials in the District is constrained by lack of funds. The immediate development of these potentials coupled with the provision of good access roads and the provision of support infrastructure such as rest houses and spots will to a large extent contribute to the development of the area because KSD has a vast water body too as an advantage. Tables 18 and 19 shows the tourism potentials and hotels respectively in the District.

Table 4: Tourism potentials in the District

| NAME | LOCATION | PLANS TO EXPLOIT POTENTIALS | | |
|-----------------------|------------|---|--|--|
| Mountain Odweanoma | Atibie | To expand the Take off for paragliding, construction of rest rooms to accommodate tourist | | |
| Nkofieho Cave of life | Twendurase | To develop the cave to attract tourist to the caves | | |

1.2.9 Educational Development

An efficient and functional Educational sector is paramount to the development of the entire District, as education and literacy contribute greatly to the Development of every society. There is however more room for improvement in this sector.

Enrolment Rates

The capacity of the educational system to enroll students of a particular age group is very important as it indicates the general level of participation in a given level of education. This section discusses both the Gross and Net enrolment rates of the District.

Gross Enrolment Rates (GER)

Gross enrolment rate shows the total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year. It can also indicate the extent of averaged and under-aged enrolment in our schools.

Net Enrolment Rates (NER)

The NER refers to the enrolment of the official age group for a given level of education expressed as a percentage of the corresponding population. The NER indicates the extent of coverage in a given level of education of children and youths belonging to the official age group corresponding to the given level of education. Table 20 shows the GER and NER for the various educational levels.

Table 20: Gross and Net Enrolment Rates in the District.(PUBLIC & PRIVATE)

Educational Infrastructure

Decent School infrastructure in any locality is the vehicle that provides the people with equitable access to quality education. The provision of quality education will therefore be a myriad without improved infrastructure and dedicated teachers. Table 21 and 22 show a snap shot of the educational infrastructure and available teachers.

List of Educational Infrastructure and Location

| Type of infrastructure | Number | Location(s) |

General Setbacks in the educational sector

The District's educational development is hindered by the following problems;

- Inadequate vehicles for monitoring
- Inadequate funds for office management
- Inadequate furniture for Basic and Senior High Schools
- Inadequate dormitories for Senior High Schools
- Congestion at the District Education Office due to the non-completion of the office accommodation.
- Inadequate teachers quarters.
- Inadequate classrooms for Basic and Senior High Schools

Education Facility Map of Kwahu South District, Ghana.

1.10 Health Sector Development

This section discusses health service delivery in the District. It covers the health facilities, HIV & AIDS response, and the various decentralized sub-districts.

The vision of the Kwahu South District Health Administration is to have a healthy population to enhance development of Kwahu South District. The Kwahu South District Health Administration exists contribute to socio-economic development by promoting health and vitality through access to quality health for all people living in Kwahu South using motivated personnel. The Disrict Health Department has the following values; People Centeredness, Professionalism, Teamwork, Innovation/excellence, Discipline, Integrity and Evidence-based decision making.

Objectives

- 1. Increase geographical access to basic services.
- 2. Provision of quality health care in all health facilities during outreaches in the Kwahu South District.
- 3. Partnership between the health sector, communities, other sectors, private providers, allopathic and traditional health care providers.
- 4. Increase resources in the health sector and distribute equitably and efficiently.
- 5. Bridge inequality gap in access to quality health services with emphasis on the deprived Sub-District.
- 6. Improve efficiency of all levels of the health sector.
- 7. Increase financial access to health care with special focus on sustainable financial arrangements that protect the deprived.

Reproductive and Child Health

Objectives for 2017

- 1. To detect and effectively treat high risk conditions arising during pregnancy and delivery.
- 2. To improve early initiation of breastfeeding after delivery (i.e. within 30 minutes after delivery) to 100%
- 3. To improve upon access to long term methods on Family Planning services.
- 4. To increase coverage in family planning service to 40% by the end of 2018.
- 5. To improve upon adolescent health services in the District by the end of 2018.
- 6. To support and organize the Association of People Living with HIV/AIDS.

Health Services and Infrastructure

Health is one of the important sectors in the District. The District has two systems of health services delivery – the orthodox and the traditional systems. These systems play complementary roles in delivery of health services. The orthodox system has both private and public health service providers. There is an improvement in the health service sector within the District due to the immergence of new health facilities in the District.

Table 24: Health facilities

| Facility | Public | Private | Mission |
|----------------|--------|---------|---------|
| Hospital | 1 | 2 | 0 |
| CHPS | 22 | 0 | 1 |
| RCH/FP | 1 | 0 | 0 |

Disease Prevalence (Top 17 OPD Morbidity Cases)

The major diseases in the District ranked in terms of most prevalent include:

- Malaria
- Upper Respiratory Tract Infections
- Rheumatism and other joint Pains

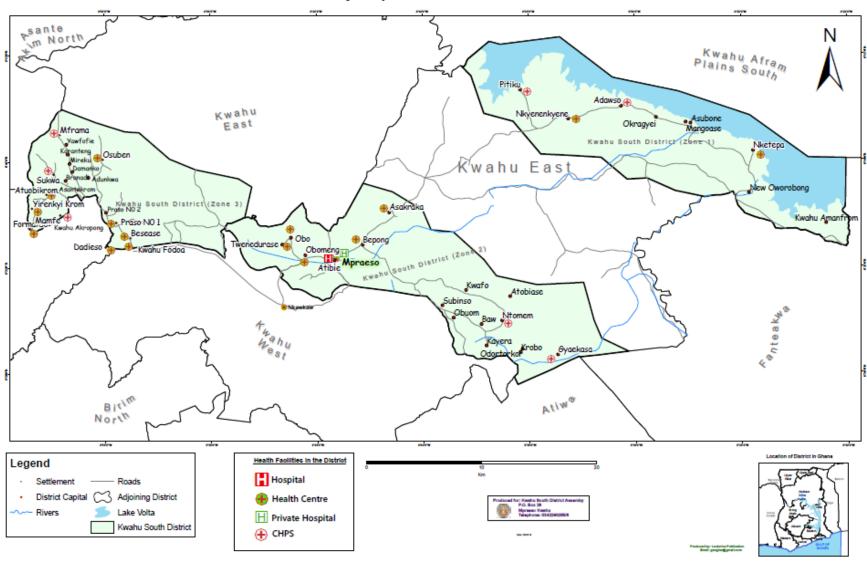

- Skin Disease
- Diarrhoea Diseases
- Intestinal Worms
- Anaemia
- Hypertension
- Acute Urinal Tract Infections
- Home injuries(Home accidents and Injuries)
- Acute Eye Infections
- Vaginal Diseases
- Gynaecological conditions
- Domestic Violence
- Other Acute Ear infections
- Other oral conditions
- Transport injuries(Road traffic accidents)

Health Issues with implications for the 2018-2021 Planning Period

Analysis of the data on health within the District indicates a number of issues which are to be rectified to improve the health situation within the District and they include the following;

- Limited number of CHPs compounds to cater for the health needs of communities located within the interior of the District which are far from major towns.
- Inadequate furniture and tools in existing health facilities such as hospitals, Clinics, CHP compounds etc.
- Ineffective NHIS system due it's limited coverage on drugs and other health services.
- Inadequate health personnel posted to the District

Health Facility Map of Kwahu South District, Ghana.

1.11 Water and Sanitation

Water and sanitation are basic services that add quality to human life. Accessibility to potable water and adequate sanitation facilities will impact positively on human health.

A growing nuisance in the District is inaccessibility to basic sanitation. This manifests itself in terms of getting places to dispose off refuse and excreta. The three main facilities available to households in the District are the public toilet (WC,,Pit/Pan), pit latrine and KVIP (GSS, 2010 PHC)).

The existing number of public KVIPs and WC in the District Twenty-three (23) and seven(7). These few toilet facilities are supposed to service the existing and ever growing population in the District. There is therefore the need to provide toilet facilities the meet the need of the future population.

It must be emphasized however that, the available toilet facilities in the District are skewed towards the urban communities. Therefore, more emphasis should be placed on rural communities in terms of toilet provision especially household toilets. Since sanitation has a greater impact on health, there is the need to pay heed to sanitation requirement of the future population.

Water is said tobe life but however the District is faced with inadequate access to water in communities within the outskirts of the District such as Obo, Twenedurase, Nketepa etc due to the inability of the Ghana Water Company to extend their pipes to such communities. A total number of 26 boreholes have been drilled within the District but however this doesn't seem enough to meet the demand for water by the citizenry, therefore efforts are being put in place to drill more boreholes to meet the increasing demand for water within the District.

1.12. Gender Analysis

Promoting gender equality, women rights and empowerment of women are the core values of the development of every society and Kwahu South is no exception.

Table 27:.Gender analysis matrix

| Sn | Gender concerns/issues | Indicators | No/% | Implications |
|----|------------------------|----------------------|-------|--------------------------|
| 1 | A. Women's lack of | Percentage of female | 44.0% | This shows that less |
| | access to resources. | -headed households | | than 50% of women |
| | | | | head households in the |
| | | Male - 58% | | District. Therefore less |
| | | Female – 44% | | women are empowered |
| | | | | in terms of access to |
| | | | | resources to efficiently |
| | | | | manage households. |
| | | | | |
| | | | | |

| Sn | Gender concerns/issues | Indicators | No/% | Implications |
|----|--|----------------------------------|----------------|---|
| 2 | A.Relative Lower literacy rate among women | literacy rate amongst Females | 48.2% | 48 females out of every sampled 100 female population aged-15yrs+ are literate |
| | | | 51.8% | Over 51 males out of every sampled 100 male population aged-15yrs+ are literate). |
| | | | | This implies that Females in the District are lagging behind their male counterparts in terms of literacy by about nine per cent. |
| 3 | A. High maternal | Maternal mortality | 47% | 47% of the deaths |
| | mortality B. Poor health of | | among aged 15- | among women aged group 15-19yrs in the |
| | mothers and low | | 19 yrs | District are due to |
| | access to health | | | pregnancy |
| | services | | | complications. This |
| | | | | could be attributed to the fact that most of these |
| | | | | females used illegal |
| | | | | means to abort |
| | | | | pregnancies which may |
| | | | | resulted in their death. |
| | | | | Efforts are therefore being made to construct |
| | | | | more CHPS compounds |
| | | | | and Health centres. |
| 4 | A. High economically | Number of | Male- | 53% of the economically |
| | active women labor | economically active | 47% | active populations in the District are women. |
| | force. B. Burden of household | women population | Female- | This represents a higher |
| | work | | 53% | development potential |
| | | | | and if efforts are put in |
| | | | | place to economically |
| | | | | engage this workforce, the development |
| | | | | fortunes of the District |
| | | | | will be enhanced. |
| 6 | A. Higher vulnerability | HIV Prevalence: | High | The risk of HIV |
| | to HIV & AIDS | | | incidence in the area is |
| | | | | still high, particularly for |
| | | | | female who are more |

| Sn | Gender concerns/issues | Indicators | No/% | Implications |
|----|---|----------------|-------------|--|
| | | | | vulnerable. |
| 7 | | | | |
| , | A. Limited efforts by institutions to fully mainstream gender concerns in their business and development agenda B. Low representation of women in political and managerial positions | | 8/40 Low | The representation of women at the General Assembly is only 9 per cent(3/34). Gender issues that are mainstreamed in the development agenda are limited to areas such as maternal mortality, HIV and related cases |
| | | mainstreaming: | | |

Table 27 shows the gender analysis matrix in the District. From the issues discussed in the table 27, it is imperative to recommend the following measures to empower women;

- Example 2 Capacity building of mothers to economically empower them is a priority.
- > Promote and empower women's participation in political and decision making processes
- Adopt and treat gender issues as cross-cutting issues
- ➤ Reduce the household work burden on women so that they work efficiently in the formal sector.
- Institute male and female separate periodic meetings to discuss issues affecting each sex

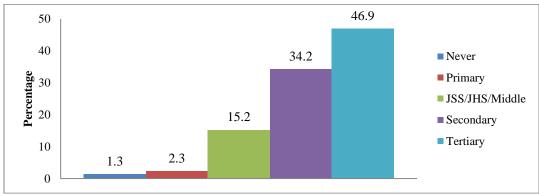

1.13 ICT and Telecommunication

The District has one Post Office at the District capital – Mpraeso and One completed ICT Centre at Obomeng and an uncompleted one at Mpraeso. The District has access to almost all the major communication services including Vodafone, MTN, Tigo and Airtel. However, some of the rural communities still lack access to these networks.

Internet Usage

As indicated by figure 2 below, percentage of internet usage increases with increase in the level of education in the District. Majority of population who use internet facility in the District are persons with tertiary education (46.9%). This is followed by persons with secondary education (34.2%) and persons with JHS/JSS/middle school (15.2%). However, little over one percent of persons with no education (1.3%) also use the internet.

Figure .2: Distribution of Internet Use by Level of Education

Source: Ghana Statistical Service

The role of communication in the District's development cannot be over emphasized as it is the major medium of social, cultural, economic and spatial integration-an effective mechanism for socio-economic development through information dissemination. Other means of telephone services which can be promoted to enhance communication is solar or electricity dependent radio phone systems. The ICT centre is used primary to train pupils at basic schools and hence promote technology based education.

1.14 Energy

Electricity Company of Ghana provides, less than 50% of communities with the national grid of Electricity. Few of the communities communities that are connected includeMpraeso, Obo, Obomeng, Bepong, Atibie, KwahuPraso, Asakraka, Asikam, Adawso, Nketapa.

Majority of the people in the rural area largely depend on fuel wood as source of energy for domestic and commercial purposes.

Currently, the presence of electricity in above name communities is helping the small scale industries like the Corn Mills, Cold Stores, Welding Shops, Hair Dressing Saloons, and Electronic Shop, other commercial and residential consumers. The District currently consumes 423kw per month and can boost of 4496 meters with the single phase meters stands at 4372 and 124 three phase meters. The future prospects, is to extend power to all the communities within the District in the next ten years. But, challenges face by consumers and service provider are difficulty for consumers to pay their bills due to economic hardship in the District.

1.15 Settlement Systems

The settlement system in the District can be described as either chained of communities or dispersed. Most of the urban communities are almost inseparable and hence can be described as chained-communities whereas the rural communities are scattered on their farmlands. The average household size in the District is 4.1 (GSS, 2010 PHC).

Transportation System

Roads

There are some road networks in the District that are un-tarred. The main means of transport is by, taxis, mini buses, large mummy trucks and a few salon cars. There has been significant improvement in the state of the roads within the District in recent times, which has improved accessibility to certain towns but there is still more work to be done as certain roads are in a very deplorable state, which makes such communities inaccessible in the rainy season.

River Transportation

River transportation is another major form of transportation in the District due to the presence of the Afram river, therefore in order to cross the river to communities in the Afram Plains .one has to pick a river transport such as boats, canoes etc due to the importance of these communities in the production of food and fish. The large volumes of fish and food stuff are therefore transported by canoes, ferry and engine boats. Similarly, large cargo trucks and Benz buses are sometimes used to convey food items from the river banks to the District capital and other parts of the region The river however has a lot of tree stumps that pose danger to this system of transportation but can be enhanced and used as means of tourist attraction when developed.

Localities and communities

The District comprises of over fifty (50) communities. The top fifteen (15) major settlements include Mpraeso, Obo, Obomeng, Bepong, Atibie, KwahuPraso, Asakraka, Asikam and Adawso. The rest are Nketapa, Formanso, Ntomem, Twendurase, KwahuAmanfromand Besease.

Housing Conditions

Housing is an important aspect of every District's infrastructure, for it does not only depict the state of the infrastructural development of every town/settlement in the District but also forms an important source of accommodation for the inhabitants and tourist who may visit the District.

The total housing stock in the District is 14,087 constituting 3.3 percent of the Eastern regional quota of 431,697(PHC, 2010). The distribution of housing units varies within the type of locality in the District with the rural areas proportions higher than those of urban areas. The urban housing

units in the District is 3,451 constitute 24.5 percent whiles 10,636 housing units can be located in the rural areas constituting 75.5 percent of the District quota.

The types of dwelling units in the District as per 2010PHC ranges from separate housing unit to other types of dwelling units. Compound houses constitute the highest and the most common type of dwelling unit in the District. It accounts for more than half of all the dwelling units in the District with 52.6%, followed by separate houses with 37.2% and the third most common dwelling unit is semi-detached house which constitutes 5.2% in the District. Other dwelling units, flat/apartment, both hut/building(same or different compound), tent, improvised home (kiosk/container etc), living quarters attached to office/shop and uncompleted building in total constitute 10.4 percent of the total dwelling units in the District.

Settlement Functional Matrix Analysis/ Scalogram Analysis

The Scalogram Analysis has being adopted here to identify the presence or absence of essential services and facilities within the District. This is a non-statistical tool that arrays facilities and service by their ubiquity and ranks settlements by functional complexity on a matrix. By this, the settlements are ranked based on the different types of facilities available.

The various services and facilities are assigned weights in accordance with the level of function or importance within its defined sector, a centrality index is taken to be 100 and a total centrality index which represent the degree to which each of the settlements provide functions to people in other areas was then calculated. Settlements with total centrality scores of 4000 and above formed the first hierarchy. Settlements with total centrality scores of 3000 and above formed the second hierarchy while the third level comprises settlements with centrality indices of 2000 and above. The 4th level settlements had total centrality scores of between of 1000 and above while the 5thlevel settlements comprised of settlements with total centrality scores of below 1000. The table ... shows the Functional Matrix for the District. Table 27 illustrates the settlement functionality matrix.

Table 28: Settlement Functionality Matrix (Scalogram)

1.2.17 Vulnerability Analysis

The Vulnerability Analysis looks at important issues concerning vulnerability in relation to it's contributory factors as well as its relation to some sections of the population such as women and children, persons with disabilities, HIV positive persons, disaster situations, the extreme poor and the destitute. The District abounds with a number of factors that predispose its population to one risk or the other. Most of these factors are natural while others are manmade.

A significant feature of the District is the unavailability of cattle, goats, sheep and poultry to serve as an alternative social security against periods of drought, unlike other parts of the country where such arrangements exist. Other phenomenon of significant threat to the people includes fire outbreaks and flooding. Sometimes whole villages are burnt down by fire disaster. The building pattern and the roofing materials in most of the communities including some of the food storages predispose the communities to the risk of fire outbreaks. It is significant to mention that in the situation of fire outbreak, the impact is quit serious.

The factors mentioned above make the District very vulnerable to acute food shortages, fire disaster, anchor infection and other diseases including HIV/AIDS, which make the Vulnerable Groups such as women, children, the aged, the physically challenged etc endangered. Women and Children are less resilient to the risk of acquiring sicknesses. Women lack equal access to productive resources such as land as their male counterparts. They are the least educated in the formal sector and the worst placed in terms of opportunities for alternative sources of employment. However, women constitute a greater proportion (54%) of the economically active population in the District.

Further studies of the social setup of the indigenous people reveals a sense of declining family ties and this has negative implications on the traditional social security system especially for the aged, the physically challenged, Orphans and persons infected with HIV/AIDS. There is a growing feeling of individualism among the people and this gradually weakens the social security system.

1.2.18 Disability

Persons with disability are defined as those who are unable to or are restricted in the performance of specific tasks/activities due to loss of function of some part of the body as a result of impairment or malformation.

The proportion of persons with disability to the total population in the District is 5.8 percent which is higher than the regional (Eastern) average of 3.6 percent (GSS, PHC 2010). The District

is prone to all the forms of disability including sight, hearing, speech, physical, intellectual and emotional impaired. Figure .3 shows the forms of disability the District is prone to.

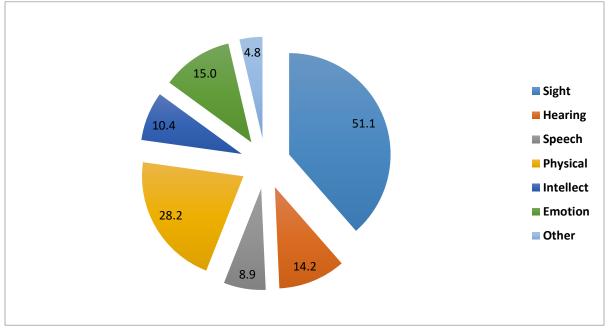

Figure 3: Distribution of Disability Type by Sex

Source: Ghana Statistical Service

Disability has generally been stigmatized in Ghana, especially in traditional settings, where the Kwahu South District is no exception. Parents of children with disability hide them from the eyes of the public. Persons with Disability (PWDs) would not usually be allowed to participate in some social activities. Also, the physical, emotional, psychological and social well being of the PWD is affected by disability.

This therefore, constraints the movement of the elderly and reduces their interaction with others. This eventually results in social exclusion including participation in schooling.

Data on persons living with various forms of disabilities (pwd) in the Kwahu South District

Presently, there are 215 recorded persons living with various forms of disabilities in the Kwahu South District. Out of this figure, 97 are male and 118 are female. Out of the 215 persons living with disabilities in the District, 148 are physically challenged, 27 are visually impaired, 37 are deaf and dumb whiles 3 falls within the special needs category. A tabular presentation is shown below.

Table ... Types of Disability in the District

| | Type of | Disability | | |
|------------|----------|------------|---------|-------|
| Physically | Visually | Deaf and | Special | Total |
| challenged | impaired | Dumb | Needs | |
| 148 | 27 | 37 | 3 | 215 |

(1) Age Distribution

The table below gives the age distribution of PWD's in the District.

| Age Group | Frequency |
|-----------|-----------|
| 0-20 | 50 |
| 21-40 | 65 |
| 40-60 | 62 |
| Above 61 | 38 |

(2) Kind of Support

Persons living with Disabilities in the Kwahu South District received support under the following categories as illustrated in the table below.

| Kind of support | No. |
|---------------------|-----|
| Business support | 187 |
| Educational support | 22 |
| School placement | 3 |
| Medical support | 3 |

(3) Occupation

Majority 68 PWDs constituting 31.63% in the Kwahu South District are traders, 39 of them cited farming as their occupation whiles 27 of the PWDs mentioned are students. This was followed by tailors, shoemakers, hairdressers, phone repairers, mason and proprietor representing 12, 5, 2, 1, 1, and 1 respectively. However, 59 of PWDs, representing 27.44% of the total PWDs population in the District are not in any active work or schooling.

1.2.19 Climate Change, Disaster and Green Economy

Kwahu South District lies within the wet semi equatorial region. It experiences the double maxima rainfall pattern namely major and minor seasons. The major rainy season starts from April, reaching its peak in July. On the other hand, the minor rainy season starts from September,

ending in October/November. Annual average rainfall is between 1,580mm and 1,780mm. Rainfall intensity however, decreases towards the Voltarian basin. Mean monthly temperature ranges from as high as 30°c in the dry season to about 22°c in the wet season. It is worthy to note that the relatively higher altitude has moderating influence on the local temperature. Relative humidity ranges between 75% and 80%.

Vulnerability to natural disasters can be linked to economic, political and social factors. The economic situation of individuals, communities or even nations can greatly influence their vulnerability to natural disasters. For individuals, vulnerability may be driven by preference to stay in hazardous sites because of its low *economic price* and the less probability of eviction. Hence people of low income levels in the District choose to reside along the river banks. Most of these communities lack the means for effective early warning signals, institutional and human resource capacities to adapt and even prepare for natural disasters.

Analysis of the current situation of the District revealed that flooding is one of the factors that predispose the people to the risk of food insecurity and can be prevented by introduction of irrigation and modern types of agric and aquaculture. Crop failure is common during severe drought periods and during prolonged dry seasons and the people who are mostly peasant farmers suffer severe forms of hunger and malnutrition.

Communities in the District are largely prone to flood, fire and river transportation related accidents. Table 29 Shows disaster prone areas in the District.

Table 29: Disaster prone areas in the District

| No | Community | Type of Disaster |
|----|----------------|--|
| 1 | Pitiku | 1.Disruption of sources of |
| 2 | Adawso | livelihoods e.g. fishing and |

31 Avenu Source: Kwahu South District- NADMO, 2017

All the areas are along the Afram River.

The prevention mechanisms that need to be implemented to avoid or manage disaster situations in the District include;

- ❖ Public education on disasters and awareness creation
- Creating of fire belt around peoples farms

- Tree planting in disaster prone areas
- Clean up exercises
- Creation of proper drainage system
- ❖ Strengthening emergency system plans and procedures in the event of disasters
- Enforcing bye-laws to institute building plans and prevent the construction of buildings in water ways and flood prone areas.

3.5 Potential Climate Impacts and Proposed Adaptation and Mitigation Strategies

| Sectors | Potential Climate | Adaptation Strategies | Affected |
|---|---|---|---|
| | Change Vulnerability | | Communities |
| Agriculture | 1. Harvest failures from improper adaptive strategies 2. Reduce biological productivity and loss of forest cover 3. Progressive loss of nontimber forest products 4. Increased land degradation and loss of cropable land 5. Reduction in livestock size and nutrition. | i. Development of drought tolerant and flood resistant varieties. ii. Breeding of early or extra early maturing genotypes iii. Educating farmers to plant in low population densities so as to reduce competition for scarce or limited soil moisture v. Encourage farm level adaptation such as shift in planting dates and modifying the amount and timing of fertilizer application vi. Enhancing food security measures by storing food in national banks | Adawso, Pitiku , Kwahu Amanfrom Etc |
| Marine ecosystem and coastal zone infrastructure | 1.Disruption of sources of livelihoods e.g. fishing and agriculture 2. Population displacement 3. Invasion and destruction of mangrove ecosystem, coastal wetlands and beaches along with their associated economic and social importance such as | i.Providing efficient mechanisms for disaster management. ii. Planting mangrove belts to provide flood protection iii. Improving drainage facilities; iv. Establishing setback policies for new | New Jerusalem, Kwahu Praso, AdawsoP etc |

| | being sites for migratory birds 4. Risk to life, structures and property | developments | |
|---------------------------------|--|---|--|
| Human Health and Settlement | i. Possibility of emergence of new disease vectors in some areas | i. Establishing setback policies for new developments ii. improving drainage facilities | Kwahu Amanfrom, Adawso, Nkyenene, Pitiku etc |
| Energy and Industry | i. Disruption in industry productivity due to possible crises in the energy sector | i. Promote and develop energy efficient technologies | Mpraeso, Bepong Atibie. |
| Financial Services | i.Higher risk of property insurance ii. Possible disruption of banks' lending portfolios . iii. Disruption in the supply of raw materials e.g from agriculture, fisheries and forestry | i.Promote and develop alternative energy sources such as biomass, wind, biomass, mini-hydro etc. ii. Promotion of energy conservation especially in large energy consuming industries. iii. Monitor and control emissions from industries and transport sectors | Mpraeso, Bepong Atibie |
| Biodiversity | i. Alteration of vegetation structure possibly reduce biological productivity ii. Alteration of species (flora and fauna) composition in the different ecological zones | i.Ensure the cultivation of species in the environment that they are adapted to. ii. Establish land use plan for hot spots iii. Reafforestation | Obomeng, Mpraeso, Nkyenekyene. |
| Water Resources and wetlands | i.Disruption of fishing activities ii. Reduction in underground Water levels iii. Drying up of river courses resulting from forest losses in headstream | i.Provide alternative skill training for fishing communities ii.Devise flood/drought early warning systems | Adawso, Amanfrom, Nketepa |

| areas iv. Threat to biodiversity e.g. migratory birds v. Loss of biological diversity | | |
|---|--|--|
|---|--|--|

1.2.20 HIV and AIDS Profile

The prevalence rate of HIV in the District still remains high (1.58). The most at risk group include

- a) Women
- b) Children
- c) Sex workers
- d) The youth
- e) Workforce in construction works.

One the most influencing factors that expose the people of the area to the risk of HIV is Easter festivities as it brings thousands of people of different cultures and characters from all over the country to the area.

In collaboration with the District Directorate of Health Services, the District Assembly has formed an Association of People Living with HIV & AIDS (PLWHA). Presently, membership of the PLWHA stands at 42 which consist of 32 females and 10 males.

The District is also benefiting from the Multi-Sectoral HIV&AIDS Programme (MSHAP) with funding from Ghana AIDS Commission. Under this programme, proposals of NGOs and CBOs are evaluated and selected to undertake HIV&AIDS activities.

The District AIDS Committee is the structure established to oversee and coordinate HIV & AIDS activities in the District.

Table 30: Beneficiary NGOs in the District.

| LOCAL NGOs IN | LOCATION OF | ROLE OF NGOs IN | TARGET |
|--------------------|-------------|------------------------|------------------|
| THE DISTRICT | NGOs IN THE | THE DISTRICT | COMMUNITIES |
| | DISTRICT | | |
| Consolidated Child | Nkawkaw | Public education, | KwahuPraso 1&2 |
| Care Foundation | | condom distribution | Besease, Asikuma |
| (CCCF) | | counseling and testing | |
| Oboomma Rural | Obomeng | Public education, | Adawso, |
| Action Programme | | condom distribution | Nkyenenkyene, |
| | | counseling and testing | Pitiku, Brebesua |
| Save the Poor | Mpraeso | Public education, | District wide |
| International | | support for the | |
| | | vulnerable | |
| Plan Ghana | Mpraeso | Support for the poor | District Wide |
| International | | and vulnerable to | |
| | | continue their | |
| | | education | |

The District AIDS committee in collaboration with HIV implementing partners and District Health services need to pursue proactive measures to prevent, manage and coordinate HIV response in the District. These may include

- HIV sensitization, Counseling and Testing.
- Coordinate HIV activities through review meetings.
- Form and support Persons Living with HIV grouping.
- Conduct community based outreach program.
- Promote condom use and safe sex practices
- Intensify education and condom promotion during Easter festivities.

1.2.21 Poverty, Inequality and Social Protection

Poverty is a predominant factor in the District, although it may not be easy to define due to the fact that different groups of people look at it from different perspectives. It is however important to mention that there are certain common characteristics in the perceptions offered by the different groups of people. It is against this background that an attempt is being made to provide an understanding or definition of poverty by the District Assembly.

The Planning Team has however come up with a definition which sees poverty as "persons who lack the basic necessities of life and are unable to take part in decision making." Table 31 analyses the various poverty pockets in the rural and urban centers of the District.

Table 31: Pockets of Poverty/Location/Characteristics

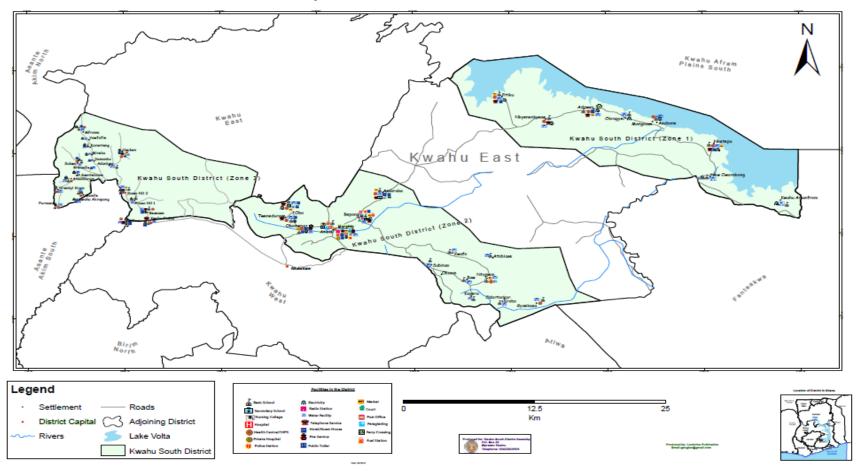

| POVERTY POCKET | LOCATION | CHARACTERISTICS |
|-------------------|---|--|
| Pocket 1 | Adawso, Amartey, etc | Frequent bushfires Fishing communities Practice subsistence farming Poor soil fertility Unreliable rainfall pattern Lack of storage facilities |
| Pocket 2 | KwahuPraso, Atuobikrom, Osubeng, Mframa, etc | Practice subsistence farming Poor educational infrastructure High STIs, HIV and AIDS Inadequate credit facilities High rate of post harvest loses |
| Pocket 3 | Bepong, Asakraka, etc | High population High rate of teenage pregnancy High STIs, HIV and AIDS Enjoy pipe borne water |
| Pocket 5 | Monsie, Asakraka, Asikam, etc | Poor feeder road condition Practice subsistence farming Poor soil fertility Environmental degradation Inadequate school infrastructure Inadequate health facilities Inadequate water and sanitation facilities |

Source: District Poverty Mapping 2017

Poverty and inequality are manifested in various ways and an analysis of the economic, social and political factors that cause poverty, inequalities and weak social protection was conducted. The parameters used included children in difficult situations, people in disaster prone areas, food security, people living with disabilities and sanitation statuses among others.

KWAHU SOUTH DISTRICT BASE MAP

Map of Kwahu South District, Ghana.

Narration on Map

It can be observes from the Map above that the District is quite developed with the availability of socio-economic services such as schools, hospitals, banks and so on

- Facilities and services

Facilities such as schools, hospitals, clinics etc are easily accessible to the general public with the District, however these facilities are not evenly distributed with a majority of these facilities concentrated within the major towns such as Mpraeso, Obomeng, Atibie etc,

-Accessibility to public infrastructure.

There are a great number of public infrastructure available in the District such as schools, hospitals, financial institutions, religious organizations etc which are easily accessible to the general public. However these facilities are not evenly distributed with a majority of these facilities concentrated within the major towns such as Mpraeso, Obomeng, Atibie etc,

-Type of road network

There are various types of roads within the District and these include major, minor roads, footpaths etc The major roads are mainly concentrated within the major towns and these roads are mostly in a good state however the major roads to communities in the outskirts of the District are not in a great state especially roads leading to communities along the Afram River such as Nketepa, Kwahu Amanfrom etc and these roads need tobe worked upon

-Type of transportation available.

The District has various forms of transportation which are mainly road transportation such as the use of taxi, mini vans, Cargo trucks etc but the main form of transportation used within the District are taxi's and mini vans.

1.3 Summary of Key Development Issues

An analysis of the key development issues peculiar to the Kwahu South District was prepared from the performance review and district profiling, which were categorized under the various thematic areas of the Ghana Shared Growth and Development Agenda (GSGDA2014-2017).

Table 4: Summary of Key Development Issues of GSGDA II

| Thematic areas of GSGDA II | Key identified issues.(as harmonized with |
|---|--|
| | inputs from performance review, profiling) |
| .Accelerated Agricultural Modernization | -Low income levels among farmers and |
| And Sustainable Natural Resource | Artisans |
| | -Low levels of modern farming technologies |
| Management | -Low Agricultural productivity |
| | -Lack of appropriate storage facilities -Inadequate access to agricultural extension |
| | services |
| | -Forest destruction and chain saw operators |
| | -Depletion of fishing resources |
| | -Loss of soil fertility due frequent fire |
| | outbreaks |
| Enhancing Competitiveness In Ghana's Private Sector | -Underdeveloped tourist potentials |
| Private Sector | -Bad access roads linking farm settlements to |
| | market centers |
| | -Inadequate street lighting systems |
| | -Lack of credit facilities to farmers and traders |
| | -Poor entrepreneurial skills among micro, |
| | small and medium enterprises |
| | -Poor marketing systems |
| | -High cost of hospitality service |
| Infrastructure, Energy and Human | -Inadequate access to potable and safe drinking |
| Settlements Development | water |
| | -Limited access to electricity at rural settings |
| | -Lack of comprehensive settlement planning |
| | schemes |
| | -Lack of street and property addresses |
| | -Inadequate sanitation facilities |
| | -Limited access to ICT |
| | -Inadequate skills in land use management |

| Human Development, I | Productivity and | -Inadequate Health infrastructure |
|--------------------------|------------------|---|
| Employment | | -High HIV Prevalence. |
| | | -Inadequate Educational Infrastructure |
| | | -Inadequate community and social friendly |
| | | centers |
| | | -Poor condition of existing school facilities |
| | | -Low enrolment of girls |
| | | -Lack of support facilities such as Science |
| | | laboratories, workshops for technical students, |
| | | computer laboratories |
| | | -Inadequate disability friendly facilities |
| | | -High level of youth unemployment |
| | | -High gender disparity at all levels of |
| | | education |
| | | -Limited education on child rights |
| | | -Low rate of school enrolment in rural areas |
| Transparent and Accounta | able Governance | -Inadequate accommodation facilities for staff. |
| | | -Weak capacity of sub-district structures |
| | | -Limited knowledge of the Disability Act |
| | | -Limited participation and lack of proper |
| | | coordination between public, private sector and |
| | | civil society organizations |
| | | -Weak internal revenue mobilization |
| | | -Deplorable state of the District Assembly |
| | | Office complex |
| | | -Lack of offices for sub district structures. |

1.3 Community Needs and Aspirations

Community needs assessments were conducted to identify the various needs of the people in various area councils which comprises of communities within the District. This was done in line the Guidelines for the conducting public hearings as indicated in Annex 11 NMTDPF (2018-2021)

, various needs and problems were identified and they include the following:

Community needs and Aspirations of Mpraeso, Atibie and Obomeng Area Council

| • | eus and Aspirations of Mpraeso, Atible and Obomeng Area Council | | | |
|---------------------------|--|----------------------------------|--|--|
| Date of Public Hearing | Identified Issues and Concerns | Participants | | |
| 9/12/2017 | -Inadequate entrepreneurial skillsamong citizens.Inadequate credit facilities to farmers and | Total participants=40 28 Females | | |
| | traders -Ineffective marketing systems | 12 Males | | |
| | -Unexplored tourist sites within the District. | | | |
| | -High cost of hotel bills -Limited access to potable drinking waterLack of settlement planning schemes and District Layout. | | | |
| | -Limited number of street and property addresses. | | | |
| | -Inadequate sanitation facilities District Wide. | | | |
| | -Limited access to ICT | | | |
| | -Inadequate knowledge and skills in land use and management | | | |
| | -High HIV prevalence rate | | | |
| | -Inadequate disability friendly facilities. | | | |
| | .Rise in the unemployment rate within the District. | | | |
| | -Inadequate education on child rights. | | | |
| | -Lack of effective coordination between public sector, private sector and civil society organizations. | | | |
| | -Inadequate internal revenue generation. | | | |
| | -Inadequate accommodation for DA staff. | | | |
| | -Inadequate number of well trained staff at sub-district level | | | |
| | -Inadequate office accommodation for sub- | | | |

| | district structures. | |
|---|---|--|
| Obo, Twenedu | rase Area council | |
| Date of Public Hearing | Identified Issues and Concerns | Participants |
| Hearing 13/12/2017 Date of Public Hearing 15/11/2017 | Unexplored tourist sites within the Twenedurase. -High cost of hotel bills -Limited access to potable drinking waterLack of settlement planning schemes and District LayoutLimited number of street and property addressesInadequate sanitation facilities District Kwahu Praso Area council Identified Issues and concerns 1.Low farm yields resulting in low farmer income from farm yields. 2.Lack of modern agricultural technologies to increase crop yield. | Total participants=45 26 Females 19 Males Level of Participation Total participants=60 35 Females 25 Males |
| | 3.Inadequate storage facilities 4.Low number of agric extension officers 5. Ineffective marketing systems 6.Inadequate credit facilities to farmers and traders 7.Ineffective marketing systems 8. Existence of poor roads within farming communities 9. Limited access to ICT 10Inadequate Educational Infrastructure 11.Inadequate social centers 12.Inadequate furniture and supporting facilities for schools 13Low enrolment of girls. 14.Inadequate disability friendly facilities. 15.Rise in the unemployment rate within the District. | |

| | Bepong Area Council | |
|---------------------------|---|---|
| Date of Public Hearing | Identified Issues and Concerns | Participants |
| 4/11/2017 | 1.Limited number of health infrastructure. 2.High HIV prevalence rate 3.Inadequate Educational Infrastructure 4.Inadequate social centers 5.Inadequate furniture and supporting facilities for schools 6.Low enrolment of girls into schools. 7.Inadequate disability friendly facilities. 8.Rise in the unemployment rate within the District. 9.Inadequate education on child rights. 10.Low rate of school enrolment in rural areas 11.Inadequate accommodation facilities for staff. Of schools. | Total participants=50 20 Females 30 Males |
| | Adawso Area Council | |
| Date of Public Hearing | Identified Issues and Concerns | Participants |
| 23/11/2017 | 1.Inadequate Educational Infrastructure 2.Low enrolment of girls into schools. 3.Inadequate disability friendly facilities. 4Rise in the unemployment rate within the District among the youth. 5. Reduction in fish production. 6Existence of poor roads within farming communities 7. Limited access to potable drinking water 8.Low farm yields resulting in low farmer income from farm yields. 9.Lack of modern agricultural technologies to increase crop yield. 10.Inadequate storage facilities 11.Low number of agric extension officers | Total participants=47 34 Females 13 Males |

1.4 <u>Harmonization of Community needs and aspirations with Identified Key Development</u> Problems/Issues from review of Performance and Profile

Identified summarized needs and aspirations of the communities were harmonized with the summarized key development gaps emerging from the performance review and district profile. Each community needs and aspirations were matched against the summarized key development gaps and scored. The linkage between the identified development gaps and the community needs and aspirations has been analyzed and scored based on the scale of 0-2 where:

Table 5: Scoring

| Definition | Score |
|----------------|-------|
| Strong linkage | 2 |
| | |
| Weak linkage | 1 |
| _ | |
| No linkage | 0 |
| | |

A high score would indicate a strong linkage between community needs and aspiration and key development issues which has implications for 2018-2021, where as a lower score would imply a weak linkage which indicates new or emerging concerns which should be considered for resolving in the future.

Table 6: Key Development Issues under GSGDA II with Implications for 2018-2021

| Community needs and | Identified key development gaps/ | Score |
|--------------------------------------|--|-------|
| aspirations | problems/issues (from Performance and | |
| | Profile) | |
| 1.Low farm yields resulting in low | -Low income levels among farmers and | 2 |

| organizations. | | |
| 36.Inadequate internal revenue | -Weak internal revenue mobilization | 2 |
| generation. | | |
| TOTAL | | |
| AVERAGE SCORE | | 56/36=1.7 |

N.B It can be observed from the table that ,a high average score of 1.7 implies that there is a strong linkage between community needs and aspiration and key development issues which has implications for 2018-2021, therefore resources should be challenged to resolve these issues in order to lead to the development of the entire District.

Table 7: Key Development Issues under GSGDA II with implications for 2018-2021

| Thematic Areas of GSGDA II | Key development issues under GSGDA with implications for 2018-2021 | |

| Enhancing Competitiveness In Ghana's Private Sector | Underdeveloped tourist potentials Lack of credit facilities to farmers and traders Poor entrepreneurial skills among micro, small and medium enterprises Poor marketing systems High cost of hospitality service Bad access roads linking farm settlements to market centers Inadequate street lighting systems |
| Infrastructure, Energy and Human Settlements Development | Inadequate access to potable and safe drinking water Limited access to electricity at rural settings Lack of comprehensive settlement planning schemes Lack street and property addresses Inadequate sanitation facilities Limited access to ICT Inadequate skills in land use management Inadequate Health infrastructure Poor condition of existing school facilities Inadequate Educational Infrastructure |
| Human Development, Productivity and Employment | High HIV Prevalence. Inadequate community and social friendly centers Poor condition of existing school facilities Low enrolment of girls Lack of support facilities such as Science laboratories, workshops for technical students, computer |

| | laboratories Inadequate disability friendly facilities High level of youth unemployment High gender disparity at all levels of education Limited education on child rights Low rate of school enrolment in rural areas | |
|--|--|--|
| Transparent and Accountable Governance | Inadequate accommodation facilities for staff. Of the DA Weak capacity of staff of sub-district structures Limited knowledge of the Disability Act Limited participation and lack of proper coordination between public, private sector and civil society organizations Weak internal revenue mobilization Deplorable state of the District Assembly Office complex Lack of offices for sub- districts structures. | |

Table 8 Identified Development Issues Under GSGDA II and Agenda For Jobs

| GSGDA II (2014-2018) | | AGENDA FOR JOBS (2018-2021) | | |
|--|---|-------------------------------|--|--|
| Thematic Areas | Issues | Developme nt Dimensions | Issues | |
| Accelerated Agricultural Modernization and Sustainable Natural Resource Management | -Low income levels among farmers and Artisans -Low levels of modern farming technologies -Low Agricultural productivityLack of credit facilities to farmers and traders -Lack of appropriate storage facilities -Inadequate access to agricultural extension services -Forest destruction and chain saw operators -Depletion of fishing resources -Loss of soil fertility due frequent fire outbreaksUnderdeveloped tourist potentials. | Economic Developme nt | -High cost of production inputs -Inadequate development of and investment in processing and value additionLow application of technology especially among smallholder farmers leading to comparatively lower yieldsLack of credit for agricultureWeak extension services deliveryLow skills development Poor tourism infrastructure and service | |

| Enhancing Competitiveness In Ghana's Private Sector | -Poor entrepreneurial skills among micro, small and medium enterprises -Poor marketing systems -High cost of hospitality service Bad access roads linking farm settlements to market centers -Inadequate street lighting systems | Economic Developme nt | High cost of electricity tariff. Inadequate and unreliable electricity. Limited supply of raw materials for local industries from local sources. Limited number of skilled industrial manpower. Support Entrepreneurship and SME development. Enhance Domestic Trade Poor marketing systems |
|--|--|-----------------------------|---|
| Infrastructure, Energy and Human Settlements Development | -Limited access to electricity at rural settings -Lack of comprehensive settlement planning schemes -Lack of street and property addresses Inadequate sanitation facilities | Social Developme nt | -Poor quality of education at all levelsHigh number of untrained teachers at the basic levelTeacher absenteeism and low levels of commitmentPoor linkage between management processes and schools operationInadequate funding source for educationGaps in physical access to quality health careUnmet needs for mental health servicesWide gaps in health service dataHigh fertility rate among adolescentPoor agricultural practices which affect water quality. |

| | | | -Increasing demand for household |
|------------------------|----------------------------|---------------|---|
| | | | water supply. |
| | | | -Inadequate access to water services |
| | | | in urban areas. |
| | | | -Unsustainability of sanitation and |
| | | | health services. |
| | | | -Unequal spatial distribution of the |
| | | | benefits of growth. |
| | | | -Poor quality of services for children |
| | | | and families. |
| | | | -Weak social protection systems. |
| | | | -Inadequate opportunities for persons |
| | | | with disabilities to contribute to |
| | | | society, |
| | | | -Lack of physical access to public |
| | | | and private structures for PWD's. |
| | | | and private structures for 1 WD 3. |
| | | | -Limited opportunities for youth |
| | | | involvement in national development |
| | -Limited access to | Environmen | -Loss of forest cover. |
| Infrastructure, Energy | electricity at rural | t, | -Poor demarcation of conservation |
| and Human Settlements | settings | Infrastructur | -Illegal farming and harvesting of |
| Development | -Lack of comprehensive | e And | plantation timber Forest fires |
| _ | settlement planning | Human | -Environmental degradation |
| | schemes | Settlements | -Destruction of forests and farmlands. |
| | -Lack of street and | | - Improper disposal of solid and liquid |
| | property addresses | | waste. |
| | Inadequate sanitation | | -Improper management of E-waste. |
| | facilities | | -Inappropriate farming practices |
| | -Limited access to ICT | | -Over exploitation and inefficient use |
| | -Inadequate skills in land | | of forest resources |
| | use management | | Low economic capacity to adapt to |
| | Inadequate Educational | | climate change. |
| | Infrastructure | | -Poor quality and inadequate road |
| | -Inadequate Health | | transport network. |
| | infrastructure | | -Limited use of ICT as a tool to |
| | | | enhance the management and efficiency |
| | | | of businesses. |
| | | | -Inadequate ICT infrastructure across |
| | | | the country. |
| | | | -Low adoption of energy efficiency |
| | | | technology. |
| | | | -Inadequate ,reliable and |
| | | | comprehensive data on land ownership |
| | | | -Protracted land disputes. |
| | | | 1 Totaleted fand disputes. |

| | | | and service provision between urban and rural settlementsGrowing housing deficit -Poor and inadequate rural infrastructure and services |
|--|--|---|--|
| Human Development, Productivity and Employment | -High HIV PrevalenceInadequate community and social friendly centersInadequate access to potable and safe drinking water | Governance, Corruption And Public Accountabil ity | -Low level of participation in Local Governance by the CitizenryInadequate developmental initiatives by MMDA's due to low IGF mobilizationInadequate funding to organize town hall meetings regularly. |
| | -Poor condition of existing school facilities -Low enrolment of girls -Lack of support facilities such as Science laboratories, workshops for technical students, computer laboratories -Inadequate disability friendly facilities -High level of youth unemployment -High gender disparity at all levels of education -Limited education on child rights -Low rate of school enrolment in rural areas | | |
| Transparent and Accountable Governance | enrolment in rural areas -Inadequate accommodation facilities for staff of DA. -Weak staff capacity of sub-district structures -Limited knowledge of the Disability Act -Limited participation and lack of proper coordination between public, private sector and civil society organizations | Governance, Corruption And Public Accountabil ity | -Low level of participation in Local Governance by the CitizenryInadequate developmental initiatives by MMDA's due to low IGF mobilizationInadequate funding to organize town hall meetings regularly. |

| -Lack of offices for sub | |
| districts structure | |

1.5 Adopted Development Dimensions and Issues of SMTDP of MMDA

The issues in both the GSGDA II(2014-2017) and the Agenda for Jobs92018-2021) were matched to identify if there were similarities, issues in GSGDA which were found to be similar with those of Agenda for jobs(2018-2021) were then adopted and replaced with those of the Agenda for Jobs(2018-2021) together with their corresponding goals, sub-goals and focus areas. These in addition to others were identified as relevant new development issues from the Agenda for Jobs. This is presented in table 9

Table 9: Adopted Development Dimensions and Issues of SMTDP of MMDA

| DMTDP | ADOPTED ISSUES | GOAL | FOCUS AREA |
|--------------------|---|------------------------------------|---|
| DIMENSIONS | | | |
| 2018-2021 | | | |
| Economic | High cost of electricity | Build a | -Private Sector |
| Development | tariff. | prosperous | Development. |
| | -Inadequate and unreliable electricitySupport Entrepreneurship and SME developmentEnhance Domestic Trade - Poor marketing systems -High cost of production inputs -Inadequate development of and investment in processing and value additionLow application of technology especially among smallholder farmers leading to comparatively lower yieldsLack of credit for agricultureWeak extension services delivery Poor tourism infrastructure and service. | society | -Agriculture and rural development -Fisheries and aquaculture developmentTourism and creative arts development. |
| Social Development | -Poor quality of education at all levels.-High number of untrained | CREATE OPPORTUNITIES FOR ALL | - Education and Training. |
| | teachers at the basic levelTeacher absenteeism and low levels of commitment. | | - Health and health services. |

| | Τ = | | | |

| Governance, Corruption and Accountability | -Low level of participation in Local Governance by the CitizenryInadequate developmental initiatives by MMDA's due to low IGF mobilizationInadequate funding to organize town hall meetings regularly. | Maintain a stable, united and safe society | - | Local Government and decentralization. Development communication |

CHAPTER TWO: DEVELOPMENT PRIORITIES

2.1 Introduction

This chapter of the plan presents the major development priorities identified during the planning process in the District. The chapter begins with the analysis of the Area and Town Councils related development priorities as gathered during the interface meeting between the Planning Team and the Area Councils in the District which were compared to similar issues under the Agenda for Jobs (2018-2021) for adoption. This is followed by determining the ranks and weights of each adopted issue identified according to the guidelines of the NMTDPF(2018-2021).

2.2 Key Development Priorities

The adopted key development issues under the Agenda for Jobs include the following:

| AGENDA FOR JOBS (2018-2021) | | | | |
|-----------------------------|---|--|--|--|
| Development Dimensions | Issues | | | |
| | -High cost of electricity tariff. | | | |
| Economic | -Inadequate and unreliable electricity. | | | |
| Development | -Support Entrepreneurship and SME developmentEnhance Domestic Trade | | | |
| | - Poor marketing systems | | | |
| | -High cost of production inputs | | | |
| | -Inadequate development of and investment in processing and value addition. | | | |
| | -Low application of technology especially among smallholder farmers leading to comparatively lower | | | |
| | yields. | | | |
| | -Lack of credit for agriculture. | | | |
| | -Weak extension services delivery. | | | |
| | - Poor tourism infrastructure and service. | | | |
| Social Development | -Poor quality of education at all levels. | | | |
| • | -High number of untrained teachers at all levels. | | | |
| | -Teacher absenteeism and low levels of commitment. | | | |
| | -Poor linkage between management processes and | | | |
| | schools operation. | | | |
| | -Inadequate funding source for education. | | | |

| | -Gaps in physical access to quality health careWide gaps in health service dataPoor agricultural practices which affect water qualityIncreasing demand for household water supplyUnsustainability of sanitation and health servicesUnequal spatial distribution of the benefits of growthPoor quality of services for children and familiesLack of physical access to public and private structures for PWD'sLimited opportunities for youth involvement in national development |
|---|--|
| Environment, Infrastructure And Human Settlements | -Loss of forest coverDestruction of forests and farmlands Improper disposal of solid and liquid wasteInappropriate farming practices -Low economic capacity to adapt to climate change -Poor quality and inadequate road transport networkLimited use of ICT as a tool to enhance the management and efficiency of businessesInadequate ICT infrastructure across the country -Inadequate ,reliable and comprehensive data on land ownership -Disparities in access to infrastructure and service provision between urban and rural settlementsPoor and inadequate rural infrastructure and services |
| Governance, Corruption And Public Accountability | -Low level of participation in Local Governance by the CitizenryInadequate developmental initiatives by MMDA's due to low IGF mobilizationInadequate funding to organize town hall meetings regularly. |

| Citizenry | | | | | | | | |
|---|--------|--------|--------|--------|-------|----------|----|------------------------|
| -Inadequate ICT infrastructure across the country | (18) | 2 (10) | 3 (12) | 1 (3) | (8) | 2 (2) | 53 | 10 th |
| Poor quality of education at all levels. | 2 (12) | 1 (5) | 5 (20) | 3 (9) | 4 (8) | 3 (3) | 57 | 7 th |
| -Lack of physical access to public and private structures for PWD's | (24) | (10) | 3 (12) | (3) | 2 (4) | 2 (2) | 55 | 8 th |
| Increasing demand for household water supply | 5 (30) | 3 (15) | 2 (8) | 1 (3) | 2 (4) | 6 (6) | 66 | 3 rd |
| Low economic capacity to adapt to climate change | 6 (36) | 3 (15) | 4 (16) | 5 (15) | 2 (4) | 1 (1) | 87 | 1 st |

From the table above, it can be seen that the major issues prioritized are the low economic capacity of adapt to climate change, poor marking systems, increasing demand for house hold water supply etc, which are all needed to improve the quality of live of the citizenry of the District . Also, there is the need to ensure the expansion of telecommunications and the energy sector due to the upsurge of telecommunications globally, therefore electricity and telecommunication networks should be extending to the rural communities to improve the lives of the citizenry.

Again, provisions to ensure the efficient management of sanitation within the District was of concern to the Citizenry, therefore efforts should be put in place to ensure the proper management of sanitation facilities.

2.4 POCC Analysis of Key Development Issues

This section scans the District potentials and opportunities that can be used to address its development issue, it also takes into consideration the District constraints (internal weaknesses) and the external treats (challenges) that are capable of hindering the District's efforts in addressing the identified developmental issues. This analysis is organized around four (4) prioritized sectors of the National Medium Term Development Policy Framework (NMTDPF) **2018-2021**, that are peculiar to the Kwahu South District and they are as follows:

Table 10; Application of POCC to the Prioritized Needs under the Goals of the NMTDPF, 2018-2021

| Issues to be Addressed | Potentials | Opportunities | Constraints | Challenges | | | |
|--|--|---|---|---|--|--|--|
| Goal: Build a Prosperous Society | | | | | | | |
| Lack of credit for agriculture | -Availability of arable lands - Availability of agrochemical stores - Availability of DADU to train farmers on modern method of farming - Availability of plant clinic | -Availability of planting for food and jobs policy to serve as a source of market for farm produce Government willingness to add value to agricultural products -Availability of government policies to increase productivity -Availability of farmers day and good packages offered during the day | -Unpredicted rainfall patternPresence of Fall Army Worm invasionLack of storage facilities -Inefficient marketing of farm products -Poor road network to convey farm products to the market | -High cost of farm inputsLack of policy to help farmers acquire credit -Unwillingness of banks and microfinance institutions to offer credit to farmers -Poor road networks | | | |
| Limited use of ICT as a tool to enhance the management and efficiency of businesses. | Availability of fertile lands Availability of extension officers Willingness of | Mandate of Government to mechanize agriculture Availability of | High illiteracy of farmers High cost of advanced farming inputs | Unwillingness of Government to subsidize moder inputs Lack of clear | | | |

| | farmers to increase productivity Availability of improved seedlings for cultivation | advanced technology in farming Availability of Government policies to encourage farmers on the usage of hi-tech in farming. | Inadequate extension officers Lack of FBOs and NGOs in agric Lack of understanding on the usage of advanced technology in farming | policies on agric modernization |
|------------------------|--|---|---|--|
| Poor marketing systems | Availability of social media to undertake online marketing Existence of committed traders and community willingness to patronize the market | Existence of Ministry of Trade and Industry. Existence of entrepreneurs to enter into public private partnership Government intention to build one factory in each District | Inadequate IGF mobilization to construct more markets. High cost of constructing a market Poor road network Lack of storage facilities Low quality of produce. | High interest rate High cost of building materials Unsuitable market prices for agric produce Lack of incentives to help private sector to thrive |

Conclusion: Government should invest and also adopt measures to attract the youth to the Agriculture sector, in order to develop the sector and reduce the high rate of unemployment in the Country.

| Poor and inadequate rural infrastructure and services | Readily available market for farm produce. Willingness of farmers to access credit Willingness of farmers to expand farms | Existence of GRATIS foundation Existence of one District one factory policy to aid in processing farm produce. Existence of technical and vocational schools Existence of technical universities Existence of Ministry of Trade and Industry | Inadequate capital Low quality produce Poor road networks Overreliance on rainwater Inadequate irrigation facilities | High cost of inputs Poor marketing of produce Unfavorable business environment |
|---|---|--|--|--|
| Support Entrepreneurship and SME development | Availability of skilled labor Availability of investment potentials Existence of cheap labor | Government's preparedness to promote SME development. Availability of planting for food and jobs policy | Poor addressing system Unwillingness of banks to grant credit to SME's Lack of collateral security | High interest rate High level of poverty Lack of policy on SME development. |

| Poor tourism infrastructure and service. | Availability of numerous tourist sites Availability of Ghana Tourism Authority in the District Serene environment for tourism to thrive Readiness of the assembly to partner potential investors in the tourism sector Existence of land for infrastructure development Availability NGO in the tourism sector Celebration of Kwahu Easter festivity Availability of | Existence of Ministry of Tourism to promote tourism development Existence of Ghana Tourism Authority and Ghana Tourism Board Existence of GIPC Availability of social media and internet connectivity. Existence of | Lack of interest to invest in the tourism sector locally Lack of capital to develop tourism Inadequate knowledge of the tourism industry by indigenes Poor road network to tourist sites | High levies of the hospitality industry Bureaucracy in acquiring license to invest in the tourism sector High cost of electricity |
|--|---|---|---|---|
| inadequate road transport network | existing road network Existence of Department of | Ministry of Roads and Highway Existence of highway | intervening obstacles (Rocks hills valleys etc) • Lack of funds to | for road construction and rehabilitation. • Weak |

| nclusion : Private Pub |
|--|
| elopment of the eco |
| CIAL DEVELOPMENT |
| |
| ues to be |
| dressed |
| al: Create opportunit |
| nited access to alth care, due to dequate health ilities especially in |
| i i ui ai ai eas |

| High level of poverty in the rural areas | Availability of fertile lands Availability Business Advisory Centre in the District Existence of DADU to train farmers on good farming practices Availability of community development office | Existence of LEAP Existence of NGOs in poverty eradication Government policy to establish one District one factory Existence of technical and vocational schools | Inadequate market to purchase farm produce High unskilled labor Lack of entrepreneur skills | High cost of farm input High cost of doing business Lack of manufacturing industries High interest rate Bureaucracies in establishing businesses |
|---|--|--|---|--|
| High rate of unemployment due to the lack of processing factories to employ the teeming youth | Availability of land Readiness of the assembly to partner private investors Availability of both skilled and unskilled labour Availability of farming raw materials to feed the industries | Government policy to establish one District one factory Existence of technical and vocational schools Existence of Ministry of Trade and Industry and Ministry of employment | Inadequate capital Inadequate entrepreneur and innovation skills Lack of irrigation | High interest rate Poor road network High cost of doing business |

| Unwillingness of Low cost of Existence of Inadequate Inadequate |
|---|
|---|

| trained teachers to be posted to rural areas | leaving at the rural areas Presence of GES Presence of NGOs interested in supporting education | Ministry of Education Availability of training institutions in the country | electricity connection to most rural areas • Lack of teachers quarters • Lack of telecommunicatio n network in most rural areas | financial resources to motivate rural teachers by the government • Lack of implementation of 20% increment to teachers in rural areas |
|---|---|--|---|---|
| Limited access to medication due to restrictions in NHIS coverage | Existence of DHMT Availability of raw materials to be used to manufacture traditional drugs Presence of NHIS office in the District | Existence of Ministry of Health Availability of donor support Presence of government policy to review the NHIS | High illiteracy rate especially in the rural areas | Untimely release of funds to NHIS secretariat High cost of drugs |
| Limited disability friendly facilities | Existence of association of physically challenged Existence of District Works Department | Presence of government policy to all MDA and MMDAs to make sure all facilities are disability friendly | Lack of funds Lack of NGOs and FBOs and CBOs in disability issues | Untimely release of funds High cost of construction materials |

| Availability of | Presence of | |
|-----------------|-------------|--|
| disability fund | Ghana | |
| | Federation | |
| | Association | |

• Conclusion: Capacity building exercises should be conducted periodically to improve service delivery standards in the various sectors such as health, education etc, in order to provide prompt and effective services as a means of improving the standard of living of the Citizens in the District.

| educational | | |
| sector | | |

Conclusion: 1.Basic Social Amenities such as schools, hospitals, markets and other recreational facilities should be made available to all to improve the standard of living of the Citizens in the District.

2.Stakeholders should ensure that environmental conditions in the District always meet the standards of the EPA and sanctions are placed against defaulters of such laws.

| Issues to be | Potentials | Opportunities | Constraints | Challenges |
|--|---|---|--|---------------------------|
| Addressed | | | | |
| Goal: Maintain | a stable, united and safe so | ociety | | |
| Non functioning of District sub structures | Availability of ceded revenue items to the area councils Existence of area councils Existence of unit committee members Existence of National Service Personnel's and Youth Employment Agency personnel's to | Existence of MLG&RD Existence OHLGS Presence of many policies geared towards deepening decentralization | Low committed attitude of assembly towards Area councils operations Lack of staff Lack of office accommodation Low capacity of unit committee members and Assembly members Lack of incentives to members | Weak political commitment |

| Low level of participation in local governance by the citizenry | serve as supporting staffs Existence of Assembly members Existence of DACF Availability of Assembly Members, chiefs and opinion leaders Presence of unit committee Existence of community development unit and information service department to help in mobilization Availability of information centres, information van and FM stations -Availability of rated | Presence of many policies geared towards deepening decentralization Existence of FOAT Existence of NGOs -Existence of consultants | Inadequate funds to organize regular town hall meetings Weak community response to meetings High illiteracy rate Lack of motivation for participants | High political division between citizenry Untimely release of fund to organise such programs -Migration of property |

| | | | | |
| | | | | |
| | | | | |

Conclusion: Measures should be put in place to promote transparency and accountability by organizing periodic townhall and stakeholder meetings to boost public confidence in the Local Governance System

2.5 Impact Analysis

The impacts of the issues considered as priorities from the POCC analysis were assessed with the following criteria to facilitate their prioritization:

- i. Significant linkage effect on meeting basic human needs/rights e.g. immunization of children and quality basic schooling linked to productive citizens in future, reduction of gender discrimination linked to sustainable development;
- ii. Significant multiplier effect on economic efficiency, e.g. attraction of investors, job creation, increases in incomes and growth.
- iii. Impact on: a. The different population groups (e.g. girls, aged, disabled); b. Balanced development; c. Natural resource utilization; d. Cultural acceptability; e. Resilience and disaster risk reduction; f. Climate change mitigation and adaptation; g. Institutional reforms.
- iv. Opportunities for the promotion of cross-cutting issues such as a. HIV and AIDS in terms of the target groups in the District for targeted interventions e.g. elimination of stigmatization; b. Gender equality with respect to practical and strategic needs and interests; c. Nutrition.

2.6 Impact Analysis

ECONOMIC DEVELOPMENT-Build a Prosperous Society

| Prioritized Development | Analysis crite | | | | | |

| organize town hall meetings | | | | | | |
| regularly. | | | | | | |

Summary of Impact Assessment;

It can be observed from the table above that the prioritized issues that have been subjected to the Impact Analysis have a great impact on meeting basic human needs/rights, multiplier effect on the economic efficiency, the different population groups and as well as has an effect on cross cutting issues. Therefore from the analysis, though all identified issues are of significant importance, more resources and attention should be given to issues with higher scores and ranks such as poor road network to improve accessibility to certain towns within the District, nonfunctioning District sub structures, low level of participation in local governance by the citizenry, inadequate developmental initiative by the Assembly due to low IGF mobilization, Inadequate basic infrastructure and social services in the deprived areas and so on in order to improve the lives of the citizenry and ensure the development of the District holistically.

2.7 <u>Sustainability analysis of the issues (internal consistency/compatibility)</u>

The Sustainability Analysis involves assessing the internal consistency/compatibility of the prioritized issues to determine how they relate to or support each other to achieve the objectives of the DMTDP. Where the relationship is positive, it draws attention to the fact that the issues should be addressed holistically. On the other hand, where the relationship is negative, there is a need to reconsider the issues adopted

.8 Compatibility Matrix of Key Development Issues Annex 12: Compatibility Matrix - Build a Prosperous Society

| | Prioritized Issues | Lack of credit for agricultur e | Low application of technology especially among smallholder farmers leading to comparativel y lower yields | Low output of farm produc t and low prices for farm produc t. | Poor marketin g systems | Inadequate developme nt of and investment in processing and value addition | Support Entrepreneursh ip and SME development | Underdevelop ed tourism and limited attention to the development of tourism at the local level | . Inadequate economic activities in the rural areas due to inaccessibilit y |
|------|--|--|---|---|----------------------------------|--|--|--|---|
| No . | | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| 1 | Lack of credit for agriculture | | + | + | + | + | + | 0 | + |
| 2 | Low application of technology especially among smallholder farmers leading to comparatively lower yields | + | | + | + | + | + | 0 | |
| 3 | Low output of farm product and low prices | + | + | | + | + | + | + | + |

| | C C | | | | | | | | |
|---|--|---|---|---|---|---|---|---|---|

REPORT ON THE SUSTAINABILITY TEST (SEA) OF PROJECTS TO BE IMPLEMENTED TO RESOLVE THE ADOPTED ISSUES FROM THE AGENDA FOR JOBS (2018-2021)

The Sustainability test would be conducted on various projects to be constructed within the Medium Term Plan period (2018-2021) to identify their impact on social/cultural, economic and natural resource factors, which constitute the three components of sustainability.

Indicators would also be used to measure the effect of the Project on the three components of sustainability and therefore in situations where the project strongly works against the objective or aim under the three sustainability components, efforts would be put in place to redesign the project to support the objective to be attained under the three components of Sustainability

A) <u>Type of Project</u>: Construction of market infrastructure in communities such as Kwahu Praso, Mpraeso_etc, would be subjected to the Sustainability Test to identify their effect on Natural Resources, Economic and Social/ Cultural factors.

i. Effect on Natural resources

The construction of market facilities in various communities within the District would lead to the destruction of protected areas and wildlife which have to be destroyed in order to ensure the construction of the market facility, this would also lead to adverse effects such as the degradation of land, therefore measures would have to be put in place to redesign the project to reduce it's negative effect on the environment such as provisions for the planting of trees, inclusion of drainage facilities in the project design to prevent flooding and also the construction of a market facility requires the use of a great amount of energy and therefore alternative sources of energy such as the use of fossil fuel, biomass etc would have to be tapped into to ensure the efficient use of energy. Efforts would also be put in place to prevent emission of pollutants during project construction, as well as to ensure the efficient use of raw materials including the recycling of materials.

ii.Effect on socio-cultural conditions:

The construction of a market in various communities within the District would support various social and cultural conditions such as the involvement various stakeholders in the project design and implementation to give it a local character as well as to ensure the acceptance of the project by the locals, the project would also serve as a source of job creation and income generation which would improve the lives of the citizenry in the communities, gender and vulnerability issues would also be addressed since a great number of women would be engaged in trading activities. The market facility would also attract the provision other infrastructure such as transport, water etc but however sanitation issues would have to be addressed due to the poor waste disposal system in various communities within the District such as the provision of final waste disposal sites close to such market facilities, placement of waste bins at vantage points etc, in order to reduce the outbreak of epidemics and other health issues.

lii Effect on The Economy:

The construction of the market would lead to the local economic growth since the raw materials and man power would be sourced from the communities were the project would be constructed

B) <u>Type of Project:</u> Construction of CHPs compounds in communities such as Besease, Ntomem, Bepong etc, would be subjected to the Sustainability Test to identify their effect on Natural Resources, Economic and Social/ Cultural factors.

i.Effect on Natural resources

The construction of CHPs compounds in various communities within the District would lead to the destruction of protected areas and wildlife which have to be destroyed in order to ensure the construction of the CHPs compounds, this would also lead to adverse effects such as the degradation of land, therefore measures would have to be put in place to redesign the project to reduce it's negative effect on the environment such as provisions for the planting of trees, inclusion of drainage facilities in the project design to prevent flooding and also the construction of CHPs compounds requires the use of a great amount of energy and therefore alternative sources of energy such as the use of fossil fuel, biomass etc would have to be tapped into to ensure the efficient use of energy. Efforts would also be put in place to prevent emission of pollutants during project construction, as well as to ensure the efficient use of raw materials including the recycling of materials.

ii.Effect on socio-cultural conditions:

The construction of CHPs compounds in various communities within the District would support various social and cultural conditions such as the involvement various stakeholders in the project design and implementation to give it a local character as well as to ensure the acceptance of the project by the locals, the project would also improve the lives of the citizenry by providing various health services, as well as serve as a source of job creation and income generation for both men, women and the vulnerable which would improve the lives of the citizenry.

The construction of CHPs compounds in various communities within the District would also ensure the provision of other infrastructure such as transport, water etc but however sanitation issues would have to be addressed such as the provision of adequate sanitation facilities and effective waste disposal systems, in order to reduce the outbreak of epidemics and other health issues.

iii.Effect On The Economy:

The construction of the CHPS compound would lead to the local economic growth since the raw materials and man power would be sourced from the communities were the project would be constructed .

8.1 Sustainable prioritized issues as categorized under themes and goals

The conduct of the sustainability analysis , resulted in the sustainable prioritized issues, which is presented as shown in Table 11 below

Table 11: Sustainable prioritized issues as categorized under themes and goals.

| DEVELOPMENT DIMENSION | FOCUS AREAS OF MTDP | ADOPTED SUSTAINABLE |
|---|---|--|
| | 2018-2021 | PRIORITIZED ISSUES. |
| ECONOMIC DEVELOPMENT | -Agriculture and rural development | -High cost of production inputs -Inadequate development of and investment in processing and value additionLow application of technology especially among smallholder farmers leading to comparatively lower yieldsLack of credit for agricultureWeak extension services delivery |
| | Industrial transformation | -Weak expenditure management and budgetary controls. -High cost of electricity tariff. -Inadequate and unreliable electricity. |
| | Private Sector Development | Support Entrepreneurship and SME developmentEnhance Domestic Trade |
| | Tourism and creative arts development. | -Limited exploitation of potentials in the tourism sector |
| ENVIRONMENT, INFRASTRUCTURE AND HUMAN SETTLEMENTS | - Transport Infrastructure ; road, rail, water and air. | -Poor quality and inadequate road transport networkDisparities in access to infrastructure and service provision between urban and rural settlementsPoor and inadequate rural infrastructure and services |
| | - Human settlements and housing. | -Inadequate ,reliable and comprehensive data on land ownership |

| | | Growing housing deficit |
|--------------------|---|--|
| | Rural development Information communication technology | -Loss of forest coverDestruction of forests and farmlands Improper disposal of solid and liquid wasteLow economic capacity to adapt to climate change -Limited use of ICT as a tool to enhance the management and efficiency of businessesInadequate ICT infrastructure across the country |
| SOCIAL DEVELOPMENT | - Education and Training | -Poor quality of education at all levelsHigh number of untrained teachers at the basic levelTeacher absenteeism and low levels of commitmentPoor linkage between management processes and schools operationInadequate funding source for education. |
| | Disability and development Health and health services. | Lack of physical access to public and private structures for PWD's Gaps in physical access to quality health care. -Wide gaps in health service data |
| | - Water and sanitation | -Poor agricultural practices which affect water qualityIncreasing demand for household water supplyUnsustainability of sanitation and health services. |
| | - Poverty and inequality. | Unequal spatial distribution of the benefits of growthPoor quality of services for children and families |

| GOVERNANCE, CORRUPTION AND PUBLIC ACCOUNTABILIY | - Local Government and decentralization. | Low level of participation in Local Governance by the Citizenry. -Inadequate funding to organize town hall meetings regularly. |
|---|--|---|
| | - Development communication | -Inadequate developmental initiatives by MMDA's due to low IGF mobilization |

CHAPTER THREE: DEVELOPMENT PROJECTIONS, DISTRICT DEVELOPMENT GOAL, OBJECTIVES AND STRATEGIES

3.1 INTRODUCTION

This chapter assesses the development projections for the medium term. It also highlights the adopted goals and sub-goals as well as adopted objectives and strategies from NMTDPF 2018-2021.

3.1.1 Demographic Projections

Demographic Projections for Kwahu South District

The demographic projections were done based on the assumption that, the population growth rate of 2.1% shall remains unchanged over the plan period

| Years | Population | Active | Sex | | Age | Land | Density |
|-------|------------|--------|-------|--------|-----------------|-------------------|-------------------|
| | | Labour | Male | Female | Dependency | Area | |
| | | Force | | | Ratio | | |
| 2018 | 82626 | 35584 | 40608 | 42018 | 87.83 (GSS,2010 | 602km^2 | 137km^2 |
| | | | | | PHC) | | |
| 2019 | 84536 | 36367 | 41579 | 42957 | | 602km^2 | 140km^2 |
| 2020 | 86468 | 37139 | 42545 | 43923 | | 602km^2 | 143km^2 |
| 2021 | 87881 | 37927 | 43601 | 44280 | | 602km^2 | 145km^2 |

3.1.2 Revenue and Expenditure Projections

It is apparent to identify the current state of the District, as well as to forecast into the future, there is therefore the need for financial projections to be made into the future with regards to revenue and expenditure projections for the Medium Term Plan preparation period of (2018-2021) Table 37, gives the expected amount from the local revenue base to cater for the expenditure Table 39. shows expenditures projections from the various sources of revenue.

Table 37: Revenue Projection

| Revenue Projection | 2018 | 2019 | 2020 | 2021 |
|---------------------------|------------|------------|------------|------------|
| Rates | 165,500.00 | 169,640.00 | 173,882.00 | 178,237.00 |
| Lands | 57,100.00 | 58,528.00 | 59,992.00 | 61,492.00 |
| Fees | 101,400.00 | 103,935.00 | 106,534.00 | 109,198.00 |
| License | 145,000.00 | 148,728.00 | 152,446.00 | 156,258.00 |

3.1.3 Employment Estimates

This section looks at the situation of the District economic sector such as the active labor force, types of employment available etc, which therefore enables us to make projections into the future, which will lead to the growth and development of the entire District.

Assumptions

It is very apparent to understand that the future is very uncertain and change is the only constant thing in life. Therefore, the following assumptions were made to substantiate the projections made.

- The proportion of the labour force of the total population (42%) remains constant.
- The will be percentage increase of 1.9 per cent in the proportion of active labour force in throughout the planned period.
- The 94.7 per cent employed active labour force (GSS, 2010 PHC) in the District will remain the same as 2014..
- Revenue projection is based on an annual 10 per centage increase for the planned period.

Table 41:Projections for Employed Labour Force

| Year | Active | Employed | | Unemployed | | |
|------|---------------------|----------|--------|------------|-------|--|
| | Labour Force | 1 0 | | | | |
| | | % | No | % | No | |
| 2014 | 32459 | 94.7 | 30,739 | 5.3 | 1,720 | |
| 2015 | 33076 | 95.0 | 31,422 | 5.0 | 1,154 | |
| 2016 | 33704 | 95.5 | 32,187 | 4.5 | 1,517 | |
| 2017 | 34344 | 96.0 | 32,970 | 4.0 | 1,374 | |

The trend indicates that whereas the number of employed persons is expected to increase that of the unemployed is likely to decrease by at decreasing figures.

Table 42:Projected Structure of District Economy (%)

| | Agriculture | Industry | Service |
|--------|-------------|----------|---------|

| Year | | | |
| 2018 | 65 | 6 | 29 |
| 2019 | 65.5 | 6.5 | 28 |
| 2020 | 65.5 | 6.5 | 28 |
| 2021 | 65.5 | 6.5 | 28 |

Source: KDSA, 2017

3.1.4Public-Private Partnership

The private sector is said to be the engine of growth. However, industrial activity is very low in the District. Many industrial activities found in the District are micro and small-scaled using rudimentary technology. To promote vigorous industrial activity in the District, the following interventions should be implemented:

- Assist micro/small scale industry schemes to expand and use more modern methods of production
- The District is mainly agricultural based and hence agro-processing/agri-business should be encouraged. The Assembly can do this by making available the necessary and requisite infrastructure/environment, which would encourage local people to invest in the industrial sector.
- Educate and build the capacity of entrepreneurs in the District.

Basic Health Services

Identifying the health needs of the people in the District is mandatory as this will ensure effective Planning to meet the health needs, as well as to institute policies which will improve the quality of live of the citizenry. Distinguishing between individual needs and the wider needs of the community is important in the planning and provision of local health services.

Health needs

The World Health Organization (**WHO**)'s definition of health is stated as: "Health is a state of complete physical, psychological and social well being and not simply the absence of disease or infirmity". Therefore, the Health needs of the District consists of wider social and environmental determinants of

health, such as deprivation, housing, diet, education and employment. This wider definition allows us to look beyond the confines of the medical model based on health services, to the wider influences on health in the District.

Table 43: Health Needs

| Influences on Health in the District | Health Needs to Curtail the situation |
|---|---|
| Environmental: housing, education, socio- | Ensuring decent housing, increase access to |
| economic status and pollution | education, improving socio-economic status and |
| | checking pollution of various forms |
| Behaviour: diets, smoking, exercise | Maas functional health education |
| Genes: inherited health potential | Health education, disease prevention, diagnosis, |
| | treatment, rehabilitation and terminal |
| Health Care: including primary, secondary and | Provision of health centres and clinics with |
| tertiary preventions | adequate staff to man such facilities in the District |

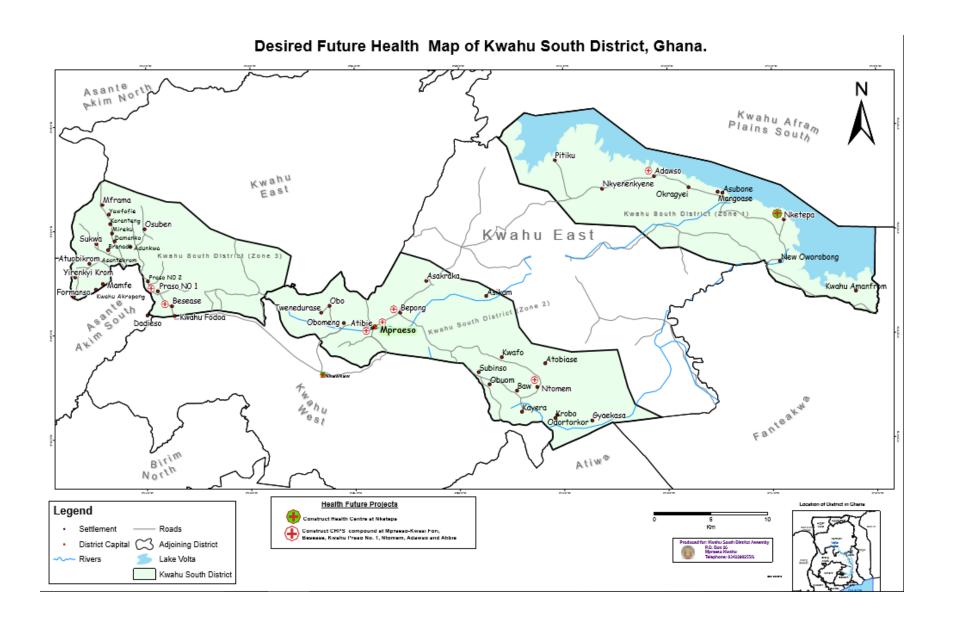

Table 44: Health Facility Requirements

| | | - | _ | | | | | | |
|-------|------------|----------|----------|----------|---------|----------|----------|----------|---------|
| Years | Projected | Number | Standard | Number | Backlog | Number | Standard | Number | Surplus |
| | population | of | | of | | of | | of | |
| | | doctors | | doctors | | nurses | | nurses | |
| | | existing | | required | | existing | | required | |
| 2018 | 82626 | 7 | | 16 | 9 | 199 | | 165 | 34 |
| 2019 | 84436 | 7 | 1;5000 | 16 | 9 | 199 | 1;500 | 169 | 30 |
| 2020 | 86468 | 7 | | 17 | 10 | 199 | | 172 | 27 |
| 2021 | 87881 | 7 | | 17 | 10 | 199 | | 175 | 24 |

Assumption: The existing number of health practitioners will remain constant over the planned period. Due to the issue of shortage of personnel, not all of the backlogof the various health practitioners will be provided within the plan period.

Other health need of the people could include the following;

- Health education to curtail the spread of preventable diseases such as malaria, bilharzias, cholera and diarrhea.
- Educating mothers on nutritional requirements to curtail the incidence of malnutrition among the other five
- Intensifying HIV prevention and management programs to reduce the high prevalence

.1.5 Education Needs Assessment

The educational needs of a population vary depending on the culture and level of development. The educational needs of a predominantly young and growing population as pertains in the District are definitely different from one that is aging. Whilst the former would require more training facilities for its growing youth, the later may need more facilities for life long and continuous education.

Notwithstanding this, there are certain basic educational needs that cut across all cultures regardless of their levels of development. Certainly, every District needs school educational infrastructure like schools, training equipments and teachers, educational needs assessment is necessary for several reasons including evaluation of educational system, comparative analysis and measurement of quality.

Types of Educational Needs

Educational needs vary with time. Rapidly changing technology affects educational needs as well. The educational needs of the District within the plan period include the provision of schools (basic), teacher and classrooms. Educational need vary according to the type and level of education. Schools in the District should be provided with material requirements. Table 45 illustrates the educational infrastructural needs of the District over the planned period.

Projections on various Sectors of Education

Assumption

The following are the assumption made so far as the educational sub-sector is concerned;

- ✓ The population growth rate will remain constant throughout the plan period
- ✓ The teacher pupil ratio will correspond to the increasing enrolment pattern

The District currently had 3702 pupil at the kindergarten level. Using the teacher- pupil ratio of 1:25 148 teachers are needed but the District had 169 meaning the District has 21 excess of teachers. The District will continue to have excess of teachers until the end of 2019 plan period when the teacher –pupil ratio will be at par.

There are currently 9145 pupils enrolled in primary schools in District. Using the teacher-pupil ratio of 1:35 261 teachers are required whiles 399 are existing in the District. This indicates that there are 138 teachers in excess in primary schools in the District.

Notwithstanding this excesses the rural areas in the District are encountered with inadequate teachers since the distribution of teachers are skewed towards the urban areas of the District. All things being equal the District will continue to have excess of teachers up to 2020 plan period but will have a backlog of 4 teachers in 2021.

Enrolment in the Junior High School stand at 3866 students. Similarly using the teacher-pupil ratio of 1:25 155 teachers are required but the District has 303 in the JHS indicating an excess of 148 teachers.

In totality the District has excess of teachers at levels of basic education up to 2020 plan period.

Assumptions:

- The existing number of schools of the various levels will remain the same over the plan period
- The existing number of teachers will remain the same over the plan period

1.6 Housing Needs Assessment

Housing refers to the physical structure that mankind uses for shelter and the environment of that structure including all necessary services, facilities and equipment and devices needed or desired for the physical and mental health and social will-being of the family and individual. Housing performs physical, social and economic functions.

Housing is an important aspect of every District's infrastructure, for it does not only depict the state of the infrastructural development of every town/settlement in the District but also forms an important source of accommodation for the inhabitants and tourist who may visit the District.

The total housing stock in the District is 14,087 constituting 3.3 percent of the Eastern regional quota of 431,697(GSS,2010 PHC). The population, average household size and current housing stock are some the element used in the projections as shown in table 46.

Table 46: Housing Needs Assessment

| Year | Area | Total Stock | Number | Housing | |
|------|-------|-------------|----------|----------|------|
| | | | Existing | Required | Gap |
| 2018 | URBAN | 15855 | 3964 | 4622 | 658 |
| | RURAL | | 11891 | 13866 | 1975 |
| 2019 | URBAN | 16331 | 4083 | 4710 | 627 |
| | RURAL | | 12069 | 14130 | 2061 |
| 2020 | URBAN | 16821 | 4206 | 4800 | 594 |
| | RURAL | | 12250 | 14398 | 2148 |
| 2021 | URBAN | 17324 | 4332 | 4891 | 559 |
| | RURAL | | 12434 | 14672 | 2238 |

Source: DPCU, KSDA, 2017.

Assumptions:

- There will be an average annual increment of 3.0% in housing stock in urban areas and 1.5% in rural areas
- Existing housing stock will remain constant.
- Average Household size in the District is 4.1: Urban(3.8) and rural (4.2) -(GSS, 2010 PHC)

3.1.7 Water and Sanitation Need Assessment

Water and sanitation are basic services that add quality to human life. Accessibility to potable water and adequate sanitation facilities will impact positively on human health. In view of this it is important to assess the water and sanitation needs of the future population of the District.

Water Needs Assessment

As the District population continues to grow, water needs in terms of household and small scale rural industrial consumption will increase as well. This thus, calls for water needs assessment of the population. The various sources of potable drinking water are pipe borne water system and boreholes for the urban and rural communities respectively. In assessing the water needs of the District, the threshold population to the water sources was taken into consideration. The standard in terms of piped water and borehole is 400 people per each sources of water.

Table 47: Water Requirements

| Year | Population | Boreholes Required |
|------|------------|---------------------------|
| 2018 | 75,804 | 189 |
| 2019 | 77,244 | 193 |
| 2020 | 78711 | 198 |
| 2021 | 80207 | 201 |

Source: DPCU, KSDA, 2017

Assumptions

- The existing number of public stand pipes and borehole will remain constant.
- Number of persons per one borehole is 400.

Sanitation Requirements

A growing nuisance in the District is inaccessibility to basic sanitation. This manifests itself in terms of getting places to dispose off refuse and excreta. The three main facilities available to households in the District are the public toilet (WC,Pit/Pan), pit latrine and KVIP (GSS, 2010 PHC)).

The existing number of KVIPs and WC in the District Thirty-five(35) and fifteen(15). These few toilet facilities are supposed to service the existing and ever growing population in the District. There is therefore the need to provide toilet facilities the meet the need of the future population.

It must be emphasized however that, the available toilet facilities in the District are skewed towards the urban communities. Therefore, more emphasis should be placed on rural communities in terms of toilet provision especially household toilets. Since sanitation has a greater impact on health, there is the need to pay heed to sanitation requirement of the future population.

Table 48: Sanitation Requirements

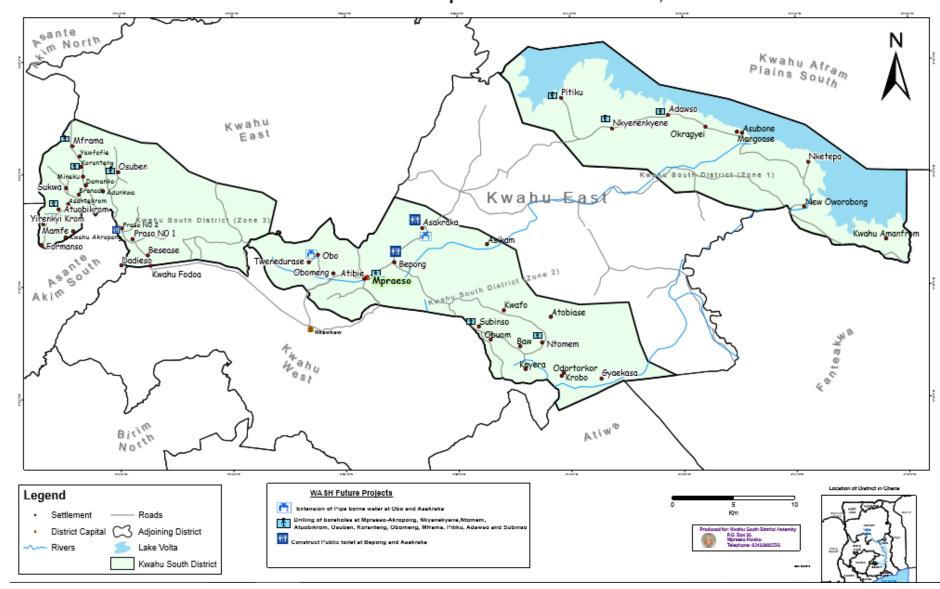

| Year | Population | KVIP | Household Toilet |
|------|------------|----------|------------------|
| | | Required | |
| 2018 | 75,804 | 10 | 16000 |
| 2019 | 77,244 | 10 | 17,000 |
| 2020 | 78711 | 10 | 18,000 |
| 2021 | 80207 | 10 | 19,000 |

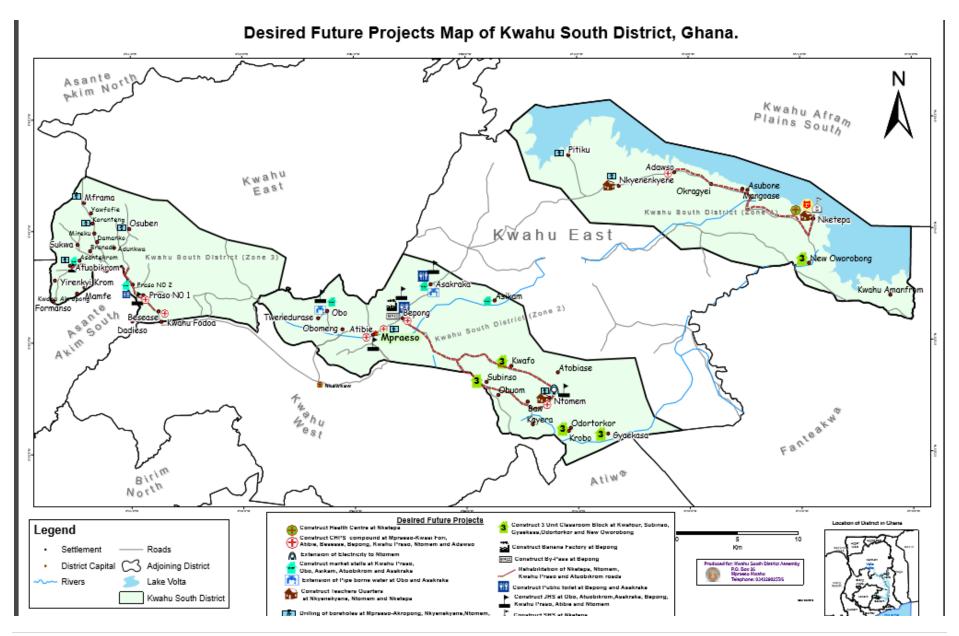

Sources: KSDA,2017

Assumption

• The number of households in the District(16,725) as per 2010 PHC will increase by 3% per annum.

Desired Future WASH Map of Kwahu South District, Ghana.

3.2 District Development Goal

The Kwahu South District goal was formulated in accordance with the guidelines of the NMTDPF(2018-2021), and as such reflects the National goal in general. Therefore, having in mind the current situation, the needs and aspirations of the District, the District's goal for the 2018-2021 plan period is directed towards: "Improving the quality of lives of the citizenry, through the development of the human capacity to effectively manage the available natural resources and all sectors of the local economy in a stable and secure environment under a democratic governance system that promotes private sector investment".

3.2.1 Goal Compatibility Analysis

However, in order to determine the degree of compatibility of the District's goal and that of the National Goal, there is the need for a compatibility analysis of these two goals. This is to ensure that, in the long run the achievement of the District's goal would also lead to the achievement of the National goals of:

- Create Opportunities for all.
- Build a prosperous society.
- Safeguard the natural environment and ensure a resilient built environment
- Maintain a stable, united and safe society.
- Strengthen Ghana's role in international affairs

Adopted District Development Goals

| GOVERNANCE, CORRUPTION AND PUBLIC ACCOUNTABILITY: | infrastructure across the country -Inadequate ,reliable and comprehensive data on land ownership -Disparities in access to infrastructure and service provision between urban and rural settlementsGrowing housing deficit -Poor and inadequate rural infrastructure and services -Low level of participation in Local Governance by the CitizenryInadequate developmental | Maintain a stable, united and safe society |
|---|---|--|
| | initiatives by MMDA's due to low IGF mobilizationInadequate funding to organize town hall meetings regularly | |

3.4 ADOPTED DISTRICT GOALS

With reference to the table above, it can be observed that the appropriate goals to adapt according to the NDPC Guidelines for the preparation of the District Medium Term Development Plan (2018-2021), include the following:

- 1. Build a Prosperous Society
- 2. Create opportunities for all
- 3. Safeguard the natural environment and ensure a resilient built environment
- 4. Maintain a stable, united and safe society

3.5 ADOPTION OF OBJECTIVES AND STRATEGIES

Relevant corresponding policy objectives and strategies of the Agenda for Jobs were adopted based on the sustainable prioritized adopted developmental issues, which were subjected to Strategic Environmental Assessment in order to determine their sustainability. This is to ensure that the adopted District goal corresponds to the National goal as stated in the Agenda for Jobs.

COMPOUND MATRIX RECORD SHEET

Goal: Build a prosperous society, Objective; Ensure energy availability and reliability

| POVERTY ENVIRONMENT | REASON | SCORE |
|--|---|-------|
| DIMENSION | | |
| Natural Resource | | |
| Environmental Degradation | The Score is positive because energy availability and reliability will prevent environmental degradation such as the felling of tress etc | + |
| Water pollution | There is no significant interaction between ensuring energy availability and reliability and water pollution. | 0 |
| Conservation of biomass | Ensuring energy availability and reliability results reduces deforestation and conserves biomass | + |
| Land pollution | Ensure energy availability and reliability reduces land pollution | + |
| Indiscriminate use of agro chemicals | There is no significant interaction between ensuring energy availability and reliability and indiscriminate use of agro chemicals | 0 |
| Socio-cultural Issues | | |
| Conservation of sacred grooves for tourism purposes. | Ensure energy availability and reliability prevents the destruction of sacred grooves | + |
| Rate of teenage pregnancies | Ensure energy availability and reliability reduces teenage pregnancy by providing a source of entertainment to the youth. | + |
| Reduction in mortality rate | Ensure energy availability and reliability ensures the use of technology to reduce the mortality rate | + |
| Promotion of school attendance, retention | Ensuring energy availability and | + |

| and completion at basic level. | reliability provides a conducive environment to promote school attendance. | |
|--|--|---|
| Reduction in HIV and AIDS | Ensuring energy availability and reliability ensures the use of technology to reduce the HIV and AIDS infections | + |
| Economic Issues | | |
| Youth employment | Ensuring energy availability and reliability to promote youth employment. | + |
| Poor road network | Ensuring energy availability and reliability ensures the efficient construction of roads. | + |
| High level of poverty | Ensuring energy availability and reliability reduces high level of poverty. | + |
| Low sources of revenue to DA | Ensuring energy availability and reliability promotes economic activity thereby increasing the DA sources of revenue | + |
| Level of agricultural productivity | Ensuring energy availability and reliability increases agricultural productivity. | + |
| Institutional | | |
| Access to information | Ensuring energy availability and reliability improves access to information | + |
| Participatory local governance | Ensuring energy availability and reliability promotes participatory local governance. | + |
| Maintenance of peace and security | Ensuring energy availability and reliability promotes maintenance of peace and security. | + |
| Strengthening of sub-district structures | The objective also strengthens sub-district structures | + |

| Enhanced local service delivery | The objective also enhances local service | + |
|---------------------------------|---|---|
| | delivery. | |

Goal: Build a prosperous society, Objective; Ensure improved skills development for industry.

| POVERTY ENVIRONMENT DIMENSION | REASON | SCORE |
|--|--|-------|
| Natural Resource | | |
| Environmental Degradation | The objective provides alternative sources of revenue generation therefore prevents environmental degradation such as the felling of tress etc | + |
| Water pollution | There objective prevents water pollution by reducing overreliance on water resources. | + |
| Conservation of biomass | The objective reduces over reliance of forest reserves thereby conserving biomass | + |
| Land pollution | The objective provides adequate skills in order to reduce land pollution. | + |
| Indiscriminate use of agro chemicals | The Objective provides alternative sources of revenue generation and reduces the indiscriminate use of agro chemicals | + |
| Socio-cultural Issues | | |
| Conservation of sacred grooves for tourism purposes. | The Objective provides alternative sources of revenue generation and reduces indiscriminate use of agro chemicals | + |
| Rate of teenage pregnancies | The Objective provides alternative sources of revenue and thereby reduces teenage pregnancy. | + |
| Reduction in mortality rate | The objective provides income to people to afford quality healthcare services. | + |
| Promotion of school attendance, retention | The objective provides income to people | + |

| and completion at basic level. | to promote school attendance. | |
|--|--|---|
| Reduction in HIV and AIDS | The objective provides income to people to promote economic self reliance. | + |
| Economic Issues | | |
| Youth employment | The objective provides income to people to promote youth development | + |
| Poor road network | There is no significant linkage between the objective and poor road network | 0 |
| High level of poverty | The objective reduces high level of poverty by providing income to people. | + |
| Low sources of revenue to DA | The objective does not result in low sources of revenue but rather promotes economic activity thereby increasing the DA sources of revenue | - |
| Level of agricultural productivity | The objective reduces over reliance on agricultural productivity. | + |
| Institutional | | |
| Access to information | The objective improves access to information thereby improving the knowledge and skills of people | + |
| Participatory local governance | The objective promotes participatory local governance. | + |
| Maintenance of peace and security | The objective promotes maintenance of peace and security. | + |
| Strengthening of sub-district structures | The objective also strengthens sub-district structures | + |
| Enhanced local service delivery | The objective also enhances local service delivery. | + |

CHAPTER FOUR

DEVELOPMENT PROGRAMMES AND SUB-PROGRAMMES

4.1.0 Introduction

This chapter in the District Medium Term Development Plan (DMTDP), focuses on the preparation and implementation of the Program of Action, which is a compilation of all the activities and programs the District intends to implement within the period of (2018-2021). Again, the Program of Action seeks to lay the foundation upon which the long term development aspirations of the District can be met. The Program of Action states the programs and activities to be executed, the lead and collaborating agencies in charge of program implementation, monitoring, and evaluation, the timeframe, budget for program implementation etc. The Program of Action therefore promotes a cross departmental/ sectoral approach to finding solutions to the identified shortfalls and problems in the District.

The following sections of the DMTDP were taken into consideration in the formulation of the Program of Action and they are as follows:

- The Profile of the District;
- Sections of the MTDPF (2018-2021) where DAs have been identified as either lead or collaborating agencies;
- Inputs from the various decentralized Departments and Sector Agencies, District Town and Area Councils etc
- Mainstreaming/Integrating cross cutting issues in District Programs;
- Local economic development; and Public Private Partnership programs etc

The DPCU adopted the policy objectives, strategies, goals and issues and reviewed them together with the programs and sub-programs, based on the mandate and functions of the Assembly in line with the Local Governance Act, 2016, Act 936 and L.I1961. The table below illustrated the programs and subprograms..

5.4 PRIORIZATION OF PROGRAMS

An intra and inter sectoral approach was adopted in formulating the PoA. This was to facilitate the District's multi-sectoral approach in the implementation and coordination of the PoA in relation to synergy and resource efficiency. The prioritization was guided by the a criteria which included i. Impact nationally (economic, social, environment); ii. Impact spatially (e.g. nationwide/ selected region); iii. Have reliable source of funding; iv. Have identified target group(s).

Each criteria was awarded a score which ranged from 0-3 against each broad activity. The definition of the score is stated below:

Table 12: Definition of score

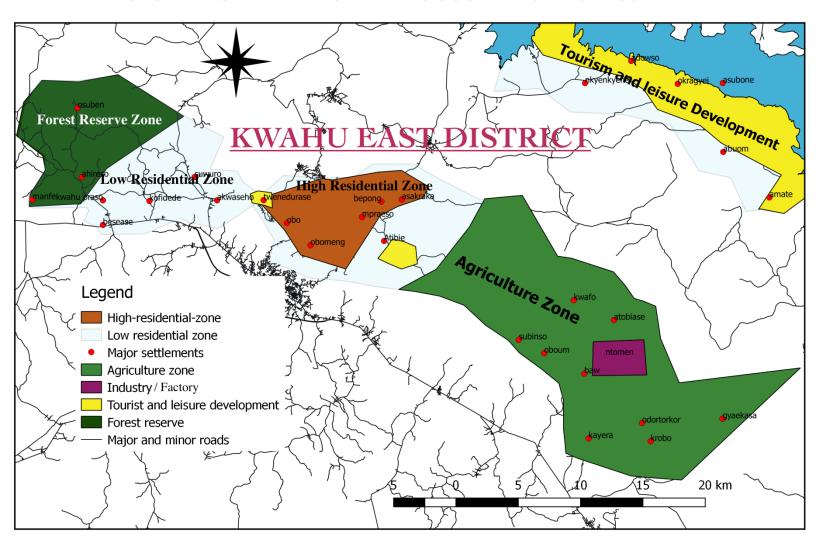

| Definition | Score |
|----------------------------|-------|
| Very strong results/impact | 3 |
| Average results | 2 |
| Weak results | 1 |
| No results | 0 |

Table 13: Prioritization Program Matrix

| Program | Criteria | | | | Total | Aver | Ran |
|---------------------|-------------|-------------|---------------|------------|-------|------|-----------------|
| | | T | 1 | 1 | score | age | k |
| | Social | Economic | Environmenta | Spatial | | | |
| | impact | Impact | 1 | impact | | | |
| | (educationa | (e.g. | Impact (e.g. | (e.g. | | | |
| | l, health, | employment | climate | nationwide | | | |
| | etc.) | generation, | change, green | / selected | | | |
| | , | poverty | economy, | region) | | | |
| | | reduction) | etc.) | | | | |
| P2. Social Services | 3 | 3 | 2 | 3 | 11 | 2.8 | 2 nd |
| Delivery | | | | | | | |
| P3. Infrastructure | 3 | 3 | 3 | 3 | 12 | 3 | 1 st |
| Development And | | | | | | | |
| Management | | | | | | | |
| P1. Management And | 3 | 3 | 2 | 3 | 11 | 2.8 | 2 nd |
| Administration | | | | | | | |
| P4. Economic | 3 | 3 | 2 | 2 | 10 | 2.5 | 3 rd |
| Development | | | | | | | |
| P5. Environmental | 3 | 2 | 3 | 3 | 11 | 2.8 | 2 nd |
| Management | | | | | | | |

N.B From the table above, it can be observed that the program Infrastructure development and management was ranked the first due to it's importance and impact on the four criteria's , this was followed by Social Services Delivery, Management and Administration and Environmental Management which were all raked second and then Economic Development was ranked third because of the impact it has on the four stated criteria above.

FUTURE DESIRED MAP OF KWAHU SOUTH DISTRICT ASSEMBLY

Narration on Map

• Tourism and leisure Development

The Map of the future desired state of the District indicates that tourism and leisure development should be concentrated mainly in the north of the District where there are many unexplored tourist attractions such as the Ntemkyem water falls and various wildlife reserves, the presences of the Afram river could also be harness for various water sports and leisure activities, also there are selected communities within the District such as Atibie where the Mt Odweanoma is located and also Mystic cave which is located at Twenedurase, this is marked by the colour yellow on the legend.

• Agricultural Zone

The eastern side of the District which includes various agricultural communities such as Bepong , Ntomem, Gyaekasa etc should be earmarked for agricultural activities due to the availability of land suitable for agriculture as well as intensive agricultural activities currently ongoing there. The Banana Factory under the One District One Factory, which the District intends to construct should be located at Ntomem due to the availability of the raw material banana to feed the factory. This is marked by the color pale Green on the legend.

• Urban Growth and Development

Urban growth and development should be concentrated in the center of the District, due to the concentration of human settlements in the center where towns such as Mpraeso, Atibie, Bepong, Obomeng etc are located, this is indicated as the high residential zone in the legend and marked with the color brown, how ever urban growth can be extended to surrounding communities close to the high residential zone, and this is indicated as the low residential zone on the legend and is marked by the color pale blue.

• Forest Reserve

The western side of the District where communities such as Osuben, Mframa, Ahwereso etc should earmarked for forest reserves due to the presence of untapped flora and fauna, this is marked by the color deep green.

3 Indicative Financial Strategy

| Program | Total Cost | Expected Rever | nue | | | | Gap | Summary of resource | Alternative |
|---|---------------|----------------|-----------|------------|--------|---------------|------------|---|--|
| C | (2018-2021) | GOG | IGF | Donor | Others | Total Revenue | | mobilisation strategy | course of action |
| P1. Management and Administration | | | | | | 4,302,828.56 | | Computerization of Data on properties across the District; Computerization of Data on Businesses across the District | Seek support from Embassies and other High Commissions |
| | 4,734,231.56 | 2,823,248.56 | 1,479,580 | 0.00 | | 1,502,626.50 | 431,403.00 | using the IBES data | in the country |
| P2. Social Services Delivery | 3,732,654.00 | 3,533,178.8 | 128,528 | 0.00 | | 3,661,706.8 | 70,947.2 | Sensitization of the public on the need to pay rates on immovable properties; Sensitization of the public on home burials | NGOs will be contacted with proposals to seek assistance to supplement in the development process. |
| P3. Infrastructure Development and Management | 1,621,302.00 | 1,231,002.36 | 260,000 | 0.00 | | 1,491,002.36 | 130,299.64 | Intensify the acquisition of building permit by developers; | |
| P4. Economic Development | 1,101,300.80 | 460,000 | 50,000 | 572,219.04 | | 1,082,219.04 | 19,081.76 | Organize a meeting with occupants of Assembly stores and sign a Tenancy Agreement with them. | |
| P5. Environmental Management | 2,701,546.00 | 2,549,800 | 68,360 | 0.00 | | 2,618,160 | 83,386.00 | Intensify public education prior to Easter festivities on payment of rates to Assembly | |
| Grand Total | 13,891,034.36 | 10,597,229.72 | 1,986,468 | 572,219.04 | | 13,155,916.76 | 735,117.6 | | |

NB: The GOG is made up of funds from the DACF and the DDF

IGF thus the Internally Generated Fund

Donor thus monies received directly from foreign source.

The Assembly to judiciously spend the above revenue on prioritized projects and programs to ensure that development gets to the people and better the living standard of the constituents. The GIFMIS platform will go a long way to regular the inflow of resources and the utilization of the resources available to the Assembly.

INDICATIVE FINANCIAL STRATEGY

The implementation of stated programs and projects in the DMTDP (2018-2021) which spans for four years is expected to cost GH¢13,891,034.36 thirteen million, eight hundred and ninety one thousand Ghana cedis, thirty six pesewas out of the total amount, the District Assembly is expected to bear 35 per cent (35%) amounting to GHC4,861,862.03 from various sources of Internally Generated Funds(IGF) and the remaining 65 per cent(65%) which amounts to GHC9,029,172.33 would be catered for from external sources such as the DACF, District Development Facility (DDF), GETFUND and the Private Sector.

Also, it is expected that additional support would come from Civil Society Organizations, local communities, Traditional Authorities, as well as the citizenry, to ensure a successful implementation of the Plan. The District has also identified a number of strategies to help improve it's revenue mobilization and they include the following;

- Harnessing the District's tourism potentials as a source of revenue generation.
- Engaging in a Public Private Partnership (PPP) with NDIGIS to revaluate and collect property rates and Business Operating Permit to improve internally generated funds.
- Collaborating with an NGO called APDO to embark on citizen engagement in transparency and accountability programs to impact on citizens perception on the need to pay rates and levies.
- .Collaborating with the Ministry of Special Development Initiative for projects related to the One-District, One-Factory and the one-constituency, one million dollar initiative.
- Preparation of a District lay out to ensure proper planning and development to prevent and control any form of disaster.
- Scaling up the street naming and property addressing system project to create accurate database for budgeting and monitoring of revenue collection.
- Engaging in partnership with the private sector to explore tourism sites in the District to generate revenue.
- Building the capacity of revenue collectors on strategies for revenue mobilization, set targets, monitor performance and implementing the reward and sanction system.
- Develop fundable project proposals for submission to International Financing Partners for consideration and funding.

CHAPTER FIVE

DISTRICT ANNUAL ACTION PLAN

5.1 Introduction

The District Annual Action Plan basically states into details the programs and activities to be implemented within a specific time period. These are actions to be taken by the public and private sectors in the implementation of the projects selected from the **NMDDPF** (2018-2021). The Annual Action Plan indicates specific projects to be implemented in the consecutive years of the plan period. It also indicates the Location, Timeframe, Annual Budgets and Implementing Agencies for that specific project.

5.2 Annual Action Plan Matrix

The Annual Action Plan Matrix comprises of projects and activities, with their timeframes, locations, budgets and implementing agencies . The criteria adopted in selecting the projects into the Annual Plan include.

- Projects with high potential for employment generation and high poverty reduction potential
- Projects that would satisfy the needs as well as improve the lives of the people
- Projects that support the basic infrastructure
- Activities and projects with the potential to empower the vulnerable
- Activities and projects that would attract private sector investment into the District.

Table 5.6 presents the Matrix of the Composite Annual Action Plans.

Composite Annual Action Plan with Indicative Budget.

CHAPTER SIX

MONITORING AND EVALUATION

6.1 Introduction

As efforts to ensure the effective implementation of the DMTDP(2018-2021) in order to ensure the overall development of the District, a Plan Implementation Committee (PIC) comprising the core management team of the Assembly and the relevant heads of department will be constituted for monitoring the implementation, evaluation of progress and possible review of the Plan. The DPCU will be the technical secretariat for managing the plan implementation. The Head of the DPCU will liaise with the Heads of Department in monitoring the progress made in the MTDP(2018-2021) implementation. Ultimately, the Unit will be responsible to the District Chief Executive on matters relating to planning in the District.

All the implementing partners will be supported to generate data and report on progress periodically. The DPCU will collate monitoring reports of implementing departments and agencies for presentation at quarterly, half-yearly and annual review meetings. The DPCU will be trained in linking progress reports to resource allocation.

Therefore, in order to track progress and make adjustments for smooth implementation of the DMTDP, an M&E matrix containing inputs, outputs, outcomes and impacts and their corresponding activities for each DMTDP objective have been outlined . It summarizes the overall monitoring and evaluation plan by including a list of methods to be used in collecting data as well as the linkage of the DMTDP to the National Development Framework.

Table 15: Monitoring Results Matrix

| GOAL 1: BUILD A P | ROSPEROUS SO | CIETY | | | | | | | | |
|--|---|---------------|----------------|-----------|------|-------|------|--------------------------------|---------------------|------------------------------|

STRATEGY FOR DATA COLLECTION, COLLATION, ANALYSIS AND USE OF RESULTS MATRIX

6.2.1 Data collection, collation

Data for Monitoring and Evaluation will be collected on the basis of the indicators and activities identified in the core indicators and the results matrix for the assessment of the socio-economic impact of projects and programs initiated to improve the living standards of the people. The two main sources of data are Primary and Secondary. Non-existing data would be collected to augment existing data from primary sources. A Questionnaire would be prepared and administered to gather data on demographic, socio-economic, revenue, expenditure, gender issues, environmental concerns as well as other important data using the indicators specified in the results matrix.

Existing data to be collected from the secondary sources would primarily be obtained from various files, reports from departments, speeches, NGOs, MDAs, RPCU, NDPC, GSS among others. In most cases, secondary data required will be requested for through official correspondence while some will be sourced from the official websites of the Ministries, Departments and Agencies concerned. The primary and secondary data collected would be reviewed and validated before they are collated and analyzed. There would also be an assessment of programs and projects for their level of achievement of set goals and objectives.

6.2.2 M&E Information System

Appropriate IT-based monitoring information system would be adopted to ensure effective storage and retrieval to assess the impact of programs and projects implementation in the District. The Planning Unit will collaborate with the MIS Unit to set up a functional M&E Information System with a dedicated desk officer who shall be responsible for data entry, update and retrieval.

6.2.3 Data Analysis and Use

The collected and collated data will be of no use if it is not analyzed for us to draw conclusions and also used as basis for future decision making. The analysis of the available data will therefore take various forms in order to enable the general public to appreciate it. The tools for data analysis will mainly be excel and Statistical Package for the Social Scientist (SPSS). To this end, the capacity of DPCU members will be built on these tools to promote their usage.

The results of the analysis will be presented in both tabular and pictorial forms which will include graphs, maps, pie charts, bar charts tables, etc. The results will help to assess whether the target set will be achieved or not and the necessary actions needed to be taken will be prescribed. The results of the data analysis and the lessons learned will also be used to review the Annual Action Plans to reflect the reality on the ground.

6.2.4 Quarterly and Annual Progress Reporting Format

To ensure efficient and effective implementation of projects and programs in the DMTDP, the DPCU will prepare and submit situational, quarterly and annual progress reports on project implementation and M&E activities to stakeholders. The content and context of reports to each of the stakeholders will however be guided by the data needs and responsibilities of the given stakeholder. To this end, the quarterly and annual progress reports will be presented consistent with the sixth schedule of L.I 2232 as in Table 6.3.

Table 6.2: Format for M&E reporting

Title Page

- i. Name of MMDA
- ii. Time period for M&E report

Introduction

- i. Summary of achievements and challenges with the implementation of the DMTDP
- ii. Purpose of M&E for the stated period
- iii. Processes involved and difficulties encountered

M&E Activities Report

- i. Programme/Project status for the quarter or year
- ii. Update on funding sources
- iii. Update on indicators and targets
- iv. Update on critical development and poverty issues
- v. Evaluations conducted; their findings and recommendations
- vi. Participatory M&E undertaken and their results

The Way Forward

- i. Key issues addressed and those yet to be addressed
- ii.Recommendations

6.3. Dissemination and Communication Strategy

In order to carry along all the stakeholders in the implementation, monitoring, evaluation and review of the DMTDP, a number of dissemination and communication strategies have been outlined for implementation. The strategy is intended to inform and create awareness on the plan, promote dialogue and generate feedback from stakeholders on the performance of the Assembly. The framework of dissemination and communications strategy shall include the following among other things while the details are outlined in Table 6.4:

- i. Arrangements for distribution of the quarterly and annual progress reports
- ii. Creation of awareness:
 - a. Through announcements, discussions and broadcast in the local news media (including local FM stations) on the DMTDP, Annual Progress Reports, etc.
 - b. On the roles and expectations of the stakeholders in the implementation of the District programmes to improve their living conditions
- iii. Organisation of meetings with stakeholders who must then take messages back to their constituencies.
- iv. Holding workshops and community meetings at central locations.
- v. Use of social media such as whatsapp and Facebook as well as KSDA Website.
- vi. Strengthening of Client Service Unit to act as an interface between the Assembly and the general public in respect of complains and feedbacks
- vii. Establishment of Development Communication Committee chaired by the Presiding Member
- viii. Use of interactive radio discussions to create awareness on interventions in the Plan, their performance and seek feedback from the general public.

6.3.1Dissemination of Annual and Quarterly Progress Report

To ensure efficient and effective implementation of projects and programs in the DMTDP, the DPCU will prepare and submit demand driven, quarterly and annual progress reports on project implementation and M&E activities to Management, Development Partners, the General Assembly, RCC, NDPC, OHLGS, MDAs and other relevant stakeholders. Pursuant to the schedule fifteen of L.I 2232, the timelines for submitting quarterly and annual progress reports shall be end of April, July, October and January. The content and context of reports to each of the stakeholders will be guided by the data needs and responsibilities of the given stakeholder.

Table 17: **Communication Activity Matrix**

| Activity | Target Audience | Purpose | Method/Tools | Timeframe | Responsibilities |
|---|---|--|---|---|---------------------------------------|
| General Assembly and Sub-Committee Meetings | Assembly members, HODs, CBOs, NGO's , Sector Agencies. | 1.To create awareness of the DMTDP, AAP & Budget 2.To disseminate Government policies and gather information for planning purposes. | Power point presentations, meetings with audiovisuals | Quarterly | DCE/DCD/DPO |
| Public forum/Town hall meetings | Traditional authorities, citizens of the community, CBOs, Sector Agencies, Development partners etc | 1.To disseminate Government policies and gather information for planning purposes. 2.To access public perception on the performance of the DA. 3. To ensure transparency and accountability. | Community durbars, drama, Radio discussions. | Quarterly | Media Group, DPCU, DCE, PRO etc |
| Information sharing through electronic media | All users of social media. | 1.To ensure transparency and accountability.2. To access public perception on the performance of the DA | KSDA Facebook page, District Assembly Web site Radio Discussion Notice Board News coverage. | Weekly and Quarterly, Annually | PRO,MIS/HOD's/ DPCU |
| Submission of Annual and Progress reports | 1.RDPC 2. NPCU 3. DPs | Reporting on the status of implementation of the DMTDP (2018-2021)and M&E activities | Submission of hard & soft copy reports through the RPCU | End of: April, July, October & January as mandated | DPCU,DCE, DCD etc |
| Sensitization and consultations | Assembly Members, CBO's, citizens of the communities. | To disseminate Government policies and gather information for planning purposes. 2.To access public perception on the performance of the DA. 3. To ensure transparency and accountability. | Community durbars ,radio discussions, audio visuals, power point presentations etc | Quarterly | DPCU,DCE,DCD, PRO etc. |

6.5 Participatory Monitoring and Evaluation (PM&E)

Participatory M&E (PM&E) refers to the practice where all key stakeholders are directly involved in the M&E design and implementation process. It is a valuable tool used to capture perceptions and assess whether interventions have met these expectations, especially of the poor and the vulnerable in society. The Assembly will provide update on the implementation of its PM&E activities in all the quarterly and annual progress reports which will be disseminated to all major stakeholders. The PM&E tools will enable the Assembly to among other things:

- Promote judicious use of resources
- Create an information base for future evaluation
- Provide for the definition of more relevant local indicators
- Identify problems and proffer timely solutions
- Maintain good standards

6.5.1 PM&E Tools

The Assembly will employ a variety of Social Accountability methods such as Citizens' Report Cards and Community Score Cards to ascertain the outcome and impact of service provision that emanate out of the DMTDP. All major stakeholders will also be involved in the monitoring of ongoing physical and non-physical projects including site meetings and handing over/taking over meetings. The following are PM&E tools that will be adopted in the course of implementing the DMTDP (2018-2021):

- i. Participatory Rural Appraisal.
- ii. Citizen Report Card.
- iii. Community Score Card.
- iv. Participatory Expenditure Tracking Surveys
- v. Citizens' Perception Survey

FINAL PUBLIC HEARING ON DMTDP (2018-2021)

Name of District: Kwahu South District Assembly Region: Eastern

Name of Town/Area Council: Mpraeso, Atibie and Obomeng Area Council.

Venue: Kwahu South District Assembly Hall Date:10th May,2018.

- a. **Medium of invitations**: Invitation Letters, issuance of announcements for participation by the officers of the District Information Service,
- b. **Invitees**: Assembly Members, Traditional Authorities, Representative of Market Women, Association of PWD's, members of the Atibie Zongo Community, Local Council of Churches, NGOs, Heads of Departments/Agencies, Association of Artisans, the General Public.
- c. **Identifiable Representations at hearing**: Assembly Members, Presiding Member, District Chief Executive, Local Chairman and Secretary of Ghana Federation of the Disabled, Constituency Chairmen of NPP, Representatives of NGOs, Association of Artisans, Heads of Departments, Agencies and Units, Representatives from various NGO's within the District.
- d. Total Number of Persons at hearing: 150
- e. **Gender Ratio/Percentage represented**: Males:67 (45%), Females 83 (55%)
- f. Language(s) used at hearing: English and Twi
- g. Major Issues at Public Hearing:
 - ➤ High light of development programs and projects for 2018-2021
 - > Spatial Distribution of development Programs and Projects
 - Estimated cost of development programs and projects, sources of funding, funding gaps and measures to address the gaps
 - ➤ Role of stakeholders in implementing the programs and projects in terms of community support in project implementation and funding.
 - Processes for community-led, self-help projects
 - Role of stakeholders in project implementation, Monitoring and Evaluation

h. Main controversies and major areas of complaints:

- > Limited development of the tourism potentials of the District.
- ➤ Inadequate agricultural development especially ineffective marketing mechanisms for agricultural produce.
- ➤ Unbalanced spatial distribution of development projects which seem to be concentrated in the major towns such as Mpreaso, Bepong, Obomeng, Obo and Atibie.
- ➤ Inadequate funding for the support of beneficiaries of skilled training.
- Low patronage of market facilities due to road-side trading.
- ➤ Poor development controls leading to unauthorized structures in major communities such as Mpreaso, Bepong, Obomeng, Obo and Atibie.

i. Proposals for the resolution of the above controversies and complaints:

- Regarding the issue of limited development of tourism in the District, attendees were informed about the efforts Management of the District Assembly was putting in place to attract local and foreign investors to develop that sector.
- ➤ The Government Flagship Programs such as the One District One Factory, Planting for Export and Rural Development (PERD) and so on were elaborated upon to educate the public of their importance of serving as a source of market and promotion of the Agricultural sector within the District.
- Concerns of the alleged unbalanced project distribution within the District was addressed, and the proponents were informed that all project and programmes were extracted from the priority areas identified in the District Development Plans and efforts would be made to ensure equity in the distribution of projects within the District.
- > Trained artisans were assured of support be it financially or otherwise to enable them start their own businesses.
- ➤ Evacuation exercises would be organised periodically as a measure to stop traders from trading on the side of roads and also the market queens were tasked to educate their members on the disadvantages and dangers of trading along the streets and roads within the District.
- ➤ The Physical Planning Department and Works Department were going to be resourced with Motorbikes and other logistics to enable them embark on quarterly monitoring exercises to identify owners of unauthorised temporal structures who would be sanctioned and appropriate measures taken against them.

j. Unresolved questions or queries: All questions were duly addressed

- k. At what level are these unresolved problems going to be resolved and why: No outstanding problems and issues.
- 1. A Brief Comment on General Level of Participation: The Final hearing was well attended, with attendees actively participating and making important contributions to ensure a successful public hearing.
