EXECUTIVE SUMMARY

The preparation of the Ministry of Communications' Sector Medium-Term Development Plan, 2018-2021 was guided by the President's Coordinated Programme of Economic and Social Development Policies 2017-2024 dubbed 'Agenda for Jobs', the 2017 State of the Nation's Address as well as Sections 1, 10 and 11 of the National Development Planning (System) Act 1994 (Act 480) which enjoins Ministries and Sector Agencies to undertake development planning functions in consultation with the National Development Planning Commission (NDPC) in accordance with the Civil Service Law, 1993 (PNDC Law 327). The preparation of the Plan was also influenced by the United Nations Sustainable Development Goals (Agenda 2030), and the African Union Agenda (Agenda 2063). This was to ensure synchronization of the plan with regional and international policies as well as serve as a fulcrum to achieving the goals and targets enshrined in those documents.

The Plan is composed of seven chapters with chapter one focusing on performance review of the implementation of the 2014-2017 Sector' Plan under the Ghana Shared Growth and Development Agenda (GSGDA) II, to ascertain extent of progress within the period, challenges encountered and lessons learnt. Chapter two highlighted on development issues arising from the implementation of the GSGDA II and juxtaposing it with current ICT industry issues. Chapter three looked at Development Projections, Goal, Adopted Objectives and Strategies. Chapter four is pivoted on Programme of Action for 2018-2021 and Chapter five is comprised of an Annual Action Plans developed to guide the implementation of the 2018-2021 Sector Medium-Term Development Plan (SMTDP). Finally, Chapter five states the Monitoring and Evaluation Plan developed to monitor progress of implementation and to periodically assess performance, including a Communication Plan developed to inform and educate the citizenry on government policies, programmes and activities within the communications' sector aimed at improving the general well-being of all Ghanaians.

Summary of Achievements: 2014-2017

The medium-term policy interventions under the GSGDA II, 2014-2017 aimed at promoting rapid development and deployment of the national ICT infrastructure; strengthening the institutional and regulatory framework for managing the ICT sub-sector; and increasing the use of ICT in all sectors of the economy. In sequel, the period witnessed the completion of the Eastern Corridor fibre optic project where 780km fibre cable was laid from Tamale to Yendi linking 27 towns along its route. The landing of five (5) submarine cables namely SAT-3, GLO 1, MAIN ONE, ACE and WACS in the period also significantly improved broadband connectivity. Further, the

implementation of the policy objective of strengthening the institutional and regulatory framework saw the construction of Ultra-Modern Office Complex in 2015 which is currently housing the Ministry, NITA, GIFEC and the National Primary Data Centre which was also completed in 2015. To foster innovation, creativity as well as generate employment, particularly for the youth was the establishment of the Accra Digital Centre in 2016. In the area of developing an enabling policies to facilitate growth and use of ICTs, the following policies were developed: Type Approval Policy, Interconnect Clearinghouse Policy, review of ICT for Accelerated Development Policy, review of the Cyber Security Policy and Strategy, review of the Draft Broadcasting Bill aimed at strengthening and sanitizing the broadcasting industry, among others. The enabling environment created led to an increase in mobile penetration rate from 127% in 2015 to 136.34% in 2016. The proportion of internet service subscribers also increased from 66.3% as at August 2015 to 70.6% in 2016.

The e-Transform Ghana Project became effective on September 19, 2014. The project development objective is to improve the efficiency and coverage of government service delivery using information and communication technology (ICT). The project consists of four components: i) enabling environment for electronic government and business; ii) support for upgrading national identification system of Ghana, and providing online verification services; iii) scaling up applications to improve service delivery in priority sectors; and iv) project management. The project's intended closing date is June 30, 2019. Some of the achievements of the Project within the period were: the establishment of the Ghana Internet and Security Centre to ensure internet security of government data and e-Applications, advancing the process of developing guidelines for the Public Key Infrastructure (PKI) and Certification Authorities (CAs) which was to review additional technologies for secure electronic transactions, establish the role of the private sector and the need for a marketplace for electronic certificates. Others were; capacity building for Open Dta and Big Data Analytics and the commencement of the deployment of e-Immigration Systems at Tema, Takoradi (sea port), Paga, Elubu (land Borders), Kotoka International Border and Ghana Immigration Service Headquarters. The intervention was to regulate safe entry into and exist from Ghana. The project also supports Public Procurement Authority (PPA) to develop electronic system for government-wide procurement in Ghana. Scope requirements definition was done under eGhana Project.

The achievements indicated were not without some challenges, which includes inadequate interest and expertise in use of ICTs in service delivery, low quality of experience and service in mobile telephony, high cost of access to information and telecommunications infrastructure and services and lack of harmonization of ICT policies and strategies within the public sector. Others are; delays in release and in some cases the non-release of budgetary allocations for the ICT sector.

CHAPTER ONE

PERFORMANCE REVIEW/PROFILE/CURRENT SITUATION/BASELINE

1.1 INTRODUCTION

The Chapter describes the profile and current situation of the Ministry of Communications. It further presents the Vision, Mission, Core Values and Functions of the Ministry. It continued with analysis of performance of the Ministry, Departments and Sector Agencies implementing its programmes and projects under the Thematic Areas: Infrastructure and Human Settlements Development, and Transparent and Accountable Governance under the Ghana Shared Growth and Development Agenda (GSGDA) II, 2014 – 2017.

The analysis of the Sector's performance takes into consideration current development issues facing the Sector; institutional capacity needs as well as analysis of cross-cutting issues such as gender equality, poverty, inequality and social protection. It also includes: population dynamics, employment and Information and Communication Technology. The analysis of these issues examined their inherent risks/challenges and opportunities and implications for the Sector's new Medium-Term Development Plan.

The review was also to enable the Ministry identify the challenges, issues and opportunities available for future planning during implementation of GSGDA II, 2014-2017 that may have implications on the 2018-2021 plan period, chapter three comprised development projections, goal, objectives and strategies, chapter four focused on Programme of Action for the 2018-2021 Plan, chapter five delineates the annual action plans for implementing the Plan and finally chapter six accounts for monitoring and evaluation of performance, and ultimately a Communication Plan for informing on success and challenges encountered in implementation of the 2018-2021 plan.

The Chapter concluded with identification of lessons learnt and key development issues requiring attention in the implementation of the Sector's Medium-Term Development Plan, 2018-2021.

1.2 VISION, MISSION, CORE VALUES AND FUNCTIONS

The Ministry in the implementation of its sector plan was guided by the following Vision, Mission, Core Values and Functions:

1.2.1 VISION

To become a world class ICT policymaking body employing topnotch innovative skills in a knowledge-based economy.

1.2.2 MISSION

To facilitate the development of a reliable and cost-effective world-class communications infrastructure and services, driven by appropriate technological innovations and accessible by all citizens to enhance the promotion of economic competitiveness in a knowledge-based environment.

1.2.4 CORE VALUES:

The Ministry was guided by the under-listed core values in the discharge of its mandate:

- Efficiency and Effectiveness
- Openness, Transparency and Accountability
- Innovativeness and Creativity

1.2.3 FUNCTIONS:

- Initiate and formulate ICT policies taking into account the needs and aspirations of the people.
- Coordinate, monitor and evaluate the efficiency and effectiveness of the performance of the Communications Sector.

- Develop appropriate regulations to protect consumers and stimulate competition.
- Provide reliable and timely meteorological data to weather-sensitive sectors of the economy.

1.3 SECTOR PERFORMANCE REVIEW (GSGDA, 2014-2017)

The importance of Telecommunications/ICTs for sustainable development cannot be underestimated; it cuts across all the Sustainable Development Goals and are an enabler for growth and development. Since the inception of 2014, the Telecommunications/ICTs industry has continuously registered significant progress.

The Table below (Table 1) summarizes the achievements of the Ministry of Communications and its sector agencies during the implementation of the Ghana Shared Growth and Development Agenda II (2014-2017). Achievement of the Ministry covers general administration, ICT/Telecommunication policy developments and reviews, infrastructure development, human and institutional capacity development, data management and protection issues and climatological monitoring issues.

1.4 Analysis of Existing Situation

The analysis of sector's existing situation took into consideration current development issues facing the sector, institutional capacity needs as well as analysis of cross-cutting issues such as information and communication technologies, climate change mitigation, migration, gender equality, poverty, inequality and social protection, science, technology and innovation (ICT), among others.

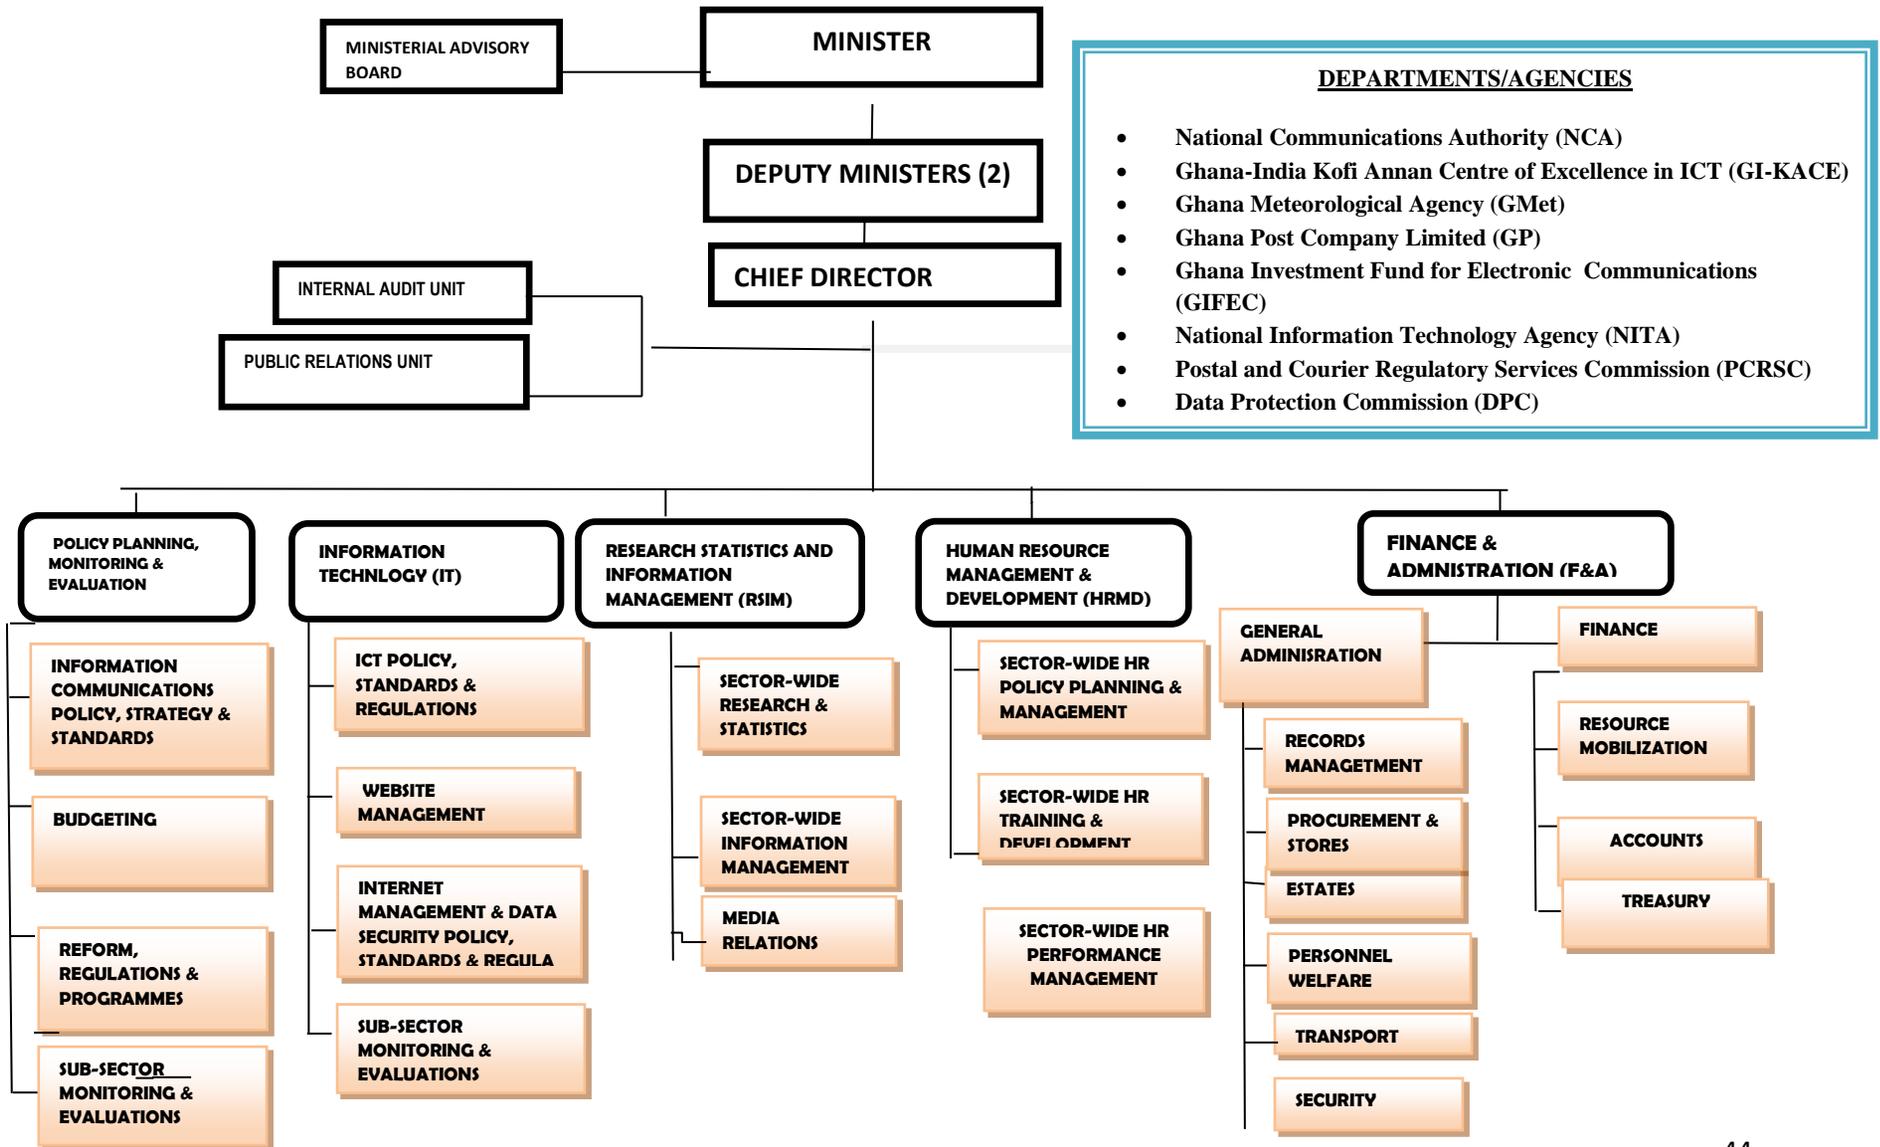

1.6.1 Institutional capacity

The Ministry of Communications is headed by a political leadership comprised of a Minister and supported by two Deputy Ministers. There is also an administrative head who is a technocrat, a Chief Director. To assist the Chief Director in the performance of his administrative functions are four line Directors responsible for Finance and Administration, Policy Planning, Monitoring and Evaluation, Human Resources, and Research and Information Management respectively. The Ministry also has a technical Director in Charge of Information Technology. The Ministry has the apex responsible for the development, deployment, adoption and utilization of information and communications infrastructure and services. This they do by facilitating the development of enabling policies and regulations for growth and development of the communications sector.

The Departments and Agencies under the Ministry of Communications are as follows:

- National Communications Authority (NCA)
- Ghana-India Kofi Annan Centre of Excellence in ICT (GI-KACE)
- Ghana Meteorological Agency (GMet)
- Ghana Post Company Limited (GP)
- Ghana Investment Fund for Electronic Communications (GIFEC)
- National Information Technology Agency (NITA)
- Postal and Courier Regulatory Services Commission (PCRSC)
- Data Protection Commission (DPC)

Figure 1. 1:Organizational Chart of the Ministry (HQ)

1.4.1.1 HUMAN RESOURCE CAPACITY

The current human resource capacity of the Ministry of Communications and its sector Agencies are as stated in the table below.

1.4.1.2 INFRASTRUCTURE AND FACILITIES

The Ministry has an ultra-modern 7th Floor office complex located along the Alhaji Diouf Street, near Parliament House. The structure also houses the National Primary Data Centre, NITA and GIFEC. The structure also provides Conference Rooms on each floor, except the 7th Floor that has been converted into a Canteen for workers around the area. All the Agencies under the Ministry have permanent office accommodations. The challenge however is inadequate equipment. GMet has serious communications equipment gap. For instance, the Agency has only one Automatic Weather Observation System (AWOS) located at Kotoka Airport which serves the whole nation – it is even old and would soon be expected to be replaced. It is expected that there should be one each at the Tamale, Takoradi and Kumasi Airports. Computers and its accessories, and scanners are inadequate affecting the implementation of the Smart Workplce programme. Again, almost all the agencies do not have a dedicated vehicle and other resources required for carrying out effective monitoring and evaluation excercises.

Stated in the table below is the satus of equipment and facilities in the Ministry and its Agencies.

Equipment

1.5 ANALYSIS OF CROSS CUTTING ISSUES

1.5.1 Information and Communication Technology (ICT)

Countries all over the world are increasingly using Information and Communication Technologies (ICTs) to transform their economies. There are indeed compelling examples of how ICTs have benefitted firms, individuals and governments. They do so by significantly reducing the cost of economic and social transactions: the cost of searching for and acquiring information, bargaining and making decision, and monitoring and enforcing transactions. They have indeed been used to inject efficiency into public sector service delivery across the developed and most developing countries and Ghana cannot be an exception.

It is in this respect that the government of Ghana through the Ministry of Communications has embarked on a digital inclusion agenda to develop and promote the widespread use of ICT infrastructure and services. The e-Transform Project under the Ministry of Communications is employing the use of ICTs in some beneficiary institutions such as: Ghana Immigration Service, Birth and Death Registry, Ghana Registrar-General's Department, Judicial Services of Ghana to provide services to the public. The Smart Workplace portals creates a seamless interaction and workflow amongst government agencies. The fibre optic network infrastructure and mobile telecommunications have also increased affordable access to internet and enhanced citizens' knowledge and participation in governance. The eServices Support Portal also ensures the integration of ICT into government business processes to achieve greater efficiency and effective service delivery to citizens.

The challenge for the Ministry in this area is the low quality of experience and service in use of mobile telephony despite significant improvements over the years. Akin to this was the high cost of services and inadequate ICT infrastructure which has created a digital gap between the haves and have-nots. Finally, inadequate funds have also constrained most of the Ministry's development projects.

1.5.2 Science, Innovation and Technology

The use of information and communication technologies (ICTs) has no limitation. It cuts across all disciplines and is multisectorial in nature. For instance, in the area of science, technology and innovation, it can be used in designing smart buildings. Using ICT smart grids can be implemented in energy generation and power consumption, ICT can control transmission and distribution of energy. Micro-

sensor Wireless Network is one of the most popular technologies among the technologies that gained recognition and approval in the 21st century. Further, wireless sensor network applications are been used in commercial or human centric applications, environmental monitoring, military applications and robotics just to mention a few.

The transformational reach of ICTs can also be seen in the area of education. For instance, the collaborative Network Connectivity Project of the National Information Technology Agency (NITA) and the Ghana Investment Fund for Electronic Communications (GIFEC), being implemented particularly in the rural areas has immensely improve upon access to quality education. Rural folks are thus more able to access educational and research materials from any part of the world. The migration of public data/information to the National Data Centre has also improve data security and reduced cost of access to both public and private instotutions that are housing their data at the National Data Centre. Looking ahead, the system will provide the foundation to support future security initiatives such as Smartcard-based authentication, network access control technologies, device-based authentication to meet the future requirement for e-governance initiatives like National ID Card, e-Services, E-Passport, e-Payment Gateway, e-Procurement, e-Immigration-Justice-Parliament and other e-Government documents applications where so required.

1.5.3: Climate Change

ICT is contributing in almost all fields of human life. ICT enhance the capability and functionality of our daily routine life activities and serving mankind in its best.

Information and Communication Technology plays a pivotal role in monitoring, mitigation and adaptation of Climate changes challenges. These ICT technologies includes Geographical Information System (GIS), Wireless Sensor Networks (WSN), Mobile Technology (MT), Web based applications, Satellite Technology, Remote Sensing (RS). Weather patterns are changing intensively due to change in temperature globally. ICTs are enabling tools if integrated strategically can improve efficiency and effectiveness of efforts doing in climate change mitigation and adaptation; it includes knowledge centers, community radio, mobile phones and interactive media. ICT can help vulnerable community to reduce the risk related to climate changes by education and awareness at lowest level of community, sharing practical and theoretical knowledge, empowering community to access the knowledge and relevant information applicable locally to save lives.

ICTs also assist in analyzing the causes and effects of climate change. In fact, observation and early warning capabilities are of critical importance for many vulnerable countries. ICTs will be instrumental in helping to develop new, climate-friendly technologies that can help economies grow sustainably and reduce emissions in the years ahead. However, we do not always have to think of huge investments and large scale projects. Each of us can significantly reduce our carbon footprint in our daily lives by using smart ICTs. For example, instead of traveling to business meetings we can use new video-conferencing technology.

ICTs are clearly important tools, catalysts, and instruments that can contribute to the preservation of our environment and the stabilization of the world's climate. But like all tools, success depends as much on how we use them as who has them.

1.5.4 Food Security

To help the poor farmers and to support the agricultural sector in tribal area ICT based project eArik (e-agriculture) was initiated in 2007. The purpose of this project is to sharing the climate smart agricultural practices among the farmers plus food security. A knowledge center equipped with digital devices like Computer, printer, scanner, internet, TV and phone, is established in the community. Agricultural Professionals, computer instructor and farmer facilitator are also contributing in this knowledge center each of above facilitate farmers according to his/her expertise. . A web portal www.earik.org contains information regarding crop cultivation, agricultural practice, farmer welfare program, day to day market information and weather forecast. Mobile phone and laptops are use in the fields for recording and updating information. Emails and web cams are used to communicate to each other. E-Arik staff regularly visits the fields and observes crop conditions, pests and disease possibilities then update this information using ICT.

However, ICT to some extent has contributed to the Greenhouse gasses which affects the climate. For instance, electronic gadgets which are burnt, electronic waste generated at the end of use of ICT gadget and carbon dioxide produced from the electronic devices we use either at home or office.

1.5.5: Population Dynamics

Ghana's population is a very youth one according to the 2010 population census. As such the use of ICT equipment is predominately used by the youth as against the elderly. Most of the elderly lack the understanding due to frequent innovations and technicalities that comes with ICT.

According to an in-depth evaluation of the impact of ICT on youth published in the 2003 World Youth Report prepared by the United Nations, ICT has changed the way young people interact socially, as digital communication has increasingly replaced traditional forms of interaction. ICT offers youth autonomy from families with access to vast virtual social networks that provide more instantly-gratifying, but less personal interactions.

Information and Communication applications such as e-Learning have enabled young people to access education remotely irrespective of geographical location at a comparatively reduced cost. This has reduced the number of delinquencies including robbery, thievery, teenage pregnancies and also early childbirths among idle young folks and increased their prospects of employment and improved well-being in future.

ICTs have also helped greatly in the communication system for the disabled who now have the opportunity to communicate through electronic communication boards and specialized computers software.

1.5.6 Employment

Information and communication technologies also offer opportunities for youth empowerment and education, particularly in societies where resources are limited. Researches has shown that the youths in various locations can use ICT to maintain cultures, gain knowledge, develop skills and generate income. According to the 2005 World Youth Report section on youth in civil society, "ICT is increasingly being used to improve access to education and employment opportunities, which supports efforts to eradicate poverty. ICT currently provides lucrative employment to lots of young men and women in the private sector. The Accra Digital Centre currently provides one thousand jobs to young adult and nurturing thousands of them in innovative use of ICTs. In the medium-term, the sector is expected provide more jobs than any other in Ghana.

The four main areas ICT had an effect on employment include Manufacturing, Shop work, Banking, Office work.

1.6: Increase in Employment Opportunities:

There are many new job opportunities created due to the introduction of ICT:

- Network managers/Administrators – these are the people who keep the networks running for all the users and see to the taking of backup copies.
- Website designers – these are the people who design and create websites for others, as well as keep them up-to-date.
- Development staff – these include system analysts and programmers who develop software programs.
- Increase in the number of delivery staff – as more goods are bought online.
- Increased demand for programmers – programs are required as more tasks are performed by computers.

1.7 ICT had both positive and negative effects on employment.

1.7.1 Positive Effects of ICT on Employment

- Fewer people needed to complete the same amount of work.
- Increased number of people working from home using IT equipment hence prompt response and delivery of work.
- More automation in factories due to the introduction of robots – assembling, packing, welding, painting, etc.
- More availability of part-time works as many organization needs to be staffed 24/7.
- More variation in tasks undertaken and staff need to be flexible and well trained to cope with this.
- Fewer ‘real’ meetings as ‘video conferencing’ is used to reduce travel time and travel costs.
- Increase in the number of technical staff needed such as network engineers, programmers, web designers, etc.

1.7.2 Negative Effects of ICT on Employment

- Many jobs, where number of people employed have been reduced due to introduction of robots/automation.
- Many manual repetitive jobs such as paint spraying, welding, packing goods, assembly work in work have been replaced by robots.

- Continual need for training as IT systems change.

1.8: Summary of Issues Identified under GSGDA II

The table below outlines the key issues identified under the performance review and the situation analysis linked to its corresponding thematic areas:

Table 1. 20: Summary of Identified Issues

Thematic areas of GSGDA II	Identified issues (from performance review and profile)
Infrastructure and Human Settlements	Inadequate ICT infrastructure base across the country <i>Limited and obsolete equipment/tools</i> <i>Frequent fibre cuts</i> <i>Poor road network to transport ICT equipment</i> <i>Vehicle for courier</i>
	High cost of providing ICT services
	Poor quality of ICT services
	Insufficient institutional and regulatory framework to support ICT development
	Difficulties associated to application for official documents including passport, driving license, vehicle registration, taking consignment from the ports.
	Insufficient ICT professional in the public sector.
	Limited use of ICT as a tool to enhance management and efficiency of business.

Transparent, Responsive and Accountable Governance	Low public engagement
	Inadequate and unreliable data for decision making.
	Unattractive conditions of work for ICT professionals/technical staff.
	Limited access to public information.

Development Issues

- Lack of a sense of ownership by the District Assemblies
- Non-payment of services provided to MDA's/MMDA's depriving NITA of the needed revenue for the purchase of bandwidth to improve the quality of our services.
- Increase cost of Network management as network expands.
- Inadequate Technical human resource to run our operations.
- Lack of funds to meet the incremental cost of Network Consumables
- Inadequate Meteorological Communication Equipment
- Inadequate skilled human resource
- Lack of equipment
- Inadequate funds
- Inadequate and obsolete Vehicle
- Inadequate supply of Power
 - Unstable electric power
 - Frequent cut of fiber optic cables by land developer, contractors and encroachers.
 - Poor road network to transport ICT Network Equipment's.
 - Land litigation and high compensation.
 - High incremental cost of ICT materials and equipment.
- Sustainability of GIFEC projects

- Limited Community support for GIFEC's project
- Successive plan for the Community Information Centers
- Low level of digital literacy among the population

Key Challenges and Lessons Learnt

Key Challenges

The following were the key challenges encountered during the implementation of the 2014-2017 sector medium term development framework.

- Lack of power supply in some rural communities
- Inadequate ICT infrastructure base across the country
- Inadequate budget allocation to ICT
- Inadequate budget releases for ICT development
- Inadequate public awareness and expertise on potential of ICTs

Lessons Learnt

The under-listed were the lessons learned during the implementation of the 2014-2017 Sector Medium-Term Development Plan and this would inform the preparation of the 2018-2021 sector medium-term development plan.

- Created Sustainability and Partnership Directorate
- Increase in sustainable partnership
- Creation of zonal offices to enhance operations

- GMet have been able to manage with the communication equipment we currently have to its very best to deliver their core mandate which is weather services.
- The lack of Manpower has forced the staff to work excess hours.

CHAPTER TWO

DEVELOPMENT ISSUES FOR 2018-2021

2.0 Introduction

This chapter outlines the development issues identified from the performance review and situational analysis with implication for the next medium-term plan and appropriately linked to the identified issues and development dimensions in the medium-term development policy framework; Agenda for Jobs – Creating prosperity for all. The chapter also indicates how the issues identified from the Agenda for Jobs, 2018-2021, have been prioritised using the criteria provided in the NDPC guidelines to ensure effective and efficient implementation.

2.1 Harmonisation of Identified Development Issues of GSGDA II with Agenda for Jobs, 2018-2021

This section seeks to harmonise the development issues identified from the performance and situational analysis with that in the new Medium-Term Development Policy Framework – Agenda for Jobs, 2018-2021 to ensure continuity in programming.

Table 2. 1: Identified Development Issues under GSGDA II and Agenda for Jobs, 2018-2021

GSGDA II, 2014-2017		Agenda for Jobs, 2018-2021	
THEMATIC AREAS	ISSUES	DEVELOPMENT DIMENSION	ISSUES
Infrastructure and Human Settlements	Inadequate ICT infrastructure base across the country	Environment, Infrastructure and Human Settlements	Inadequate ICT infrastructure base across the country
	High cost of providing ICT services		Poor quality of ICT services

	Inefficient institutional and regulatory framework to support ICT development		Low broadband wireless access
	Difficulties associated to application for official documents including passport, driving license, vehicle registration, taking consignment from the ports.		Limited use of ICT as a tool to enhance the management and efficiency of business and provision of public services
	Insufficient ICT professionals in the public sector		
	Limited use of ICT as a tool to enhance management and efficiency of business		
Transparent, Responsive and Accountable Governance	Weak capacity for public dialogue	Climate Vulnerability and Change	Vulnerability to climate change
	Limited access to public information		Low institutional capacity to adapt to climate change and undertake mitigation actions
	Inadequate and unreliable data for decision making		
	Unattractive conditions of work for ICT professionals/technical staff		

The table below presents the output of the harmonisation of the adopted development issues with the Development Dimensions in Agenda for Jobs, 2018–2021.

Table 2. 2: Development Dimension and adopted Issues of SMTDP of MoC

DEVELOPMENT DIMENSIONS 2018-2021	ADOPTED ISSUES
Environment, Infrastructure and Human Settlement	Inadequate ICT infrastructure base across the country
	Poor quality of ICT services
	Inadequate online privacy and security of data.
	Low broadband wireless access
	Limited use of ICT as a tool to enhance the management and efficiency of business and provision of public services
Governance	Low public engagement
Climate Vulnerability and Change	Vulnerability to climate change
	Low institutional capacity to adapt to climate change and undertake mitigation actions

2.2 Prioritisation of Development Issues

Following harmonization of outstanding and current issues arising from in-depth analysis, the Ministry noted that due to resource constraints, it would not be able to implement all identified issues, hence the need to prioritise by giving credence to issues with high socio-cultural and economic impact on Ghanaians.

- Inadequate ICT infrastructure base across the country
- Limited use of ICT as a tool to enhance the management and efficiency of business and provision of public services
- Poor quality of ICT services
- Low broadband wireless access
- Inadequate online privacy and security of data.
- Vulnerability to climate change
- Low institutional capacity to adapt to climate change and undertake mitigation actions
- Low public engagement

2.2.1 Application of potentials, opportunities, constraints and challenges (POCC) analysis

The section analysis the identified issues for addressing in the medium-term plan, 2018-2021 to ascertain its potential, opportunities, constraints and challenges.

Table 2. 3: Application of POCC

Issues to be addressed	Potentials	Opportunities	Constraints	Challenges
Limited use of ICT as a tool to enhance the management and efficiency of business and provision of public services	<ul style="list-style-type: none"> ▪ Human Resource ▪ Computers ▪ Internet ▪ Laptops ▪ Conference rooms ▪ Office space 	<ul style="list-style-type: none"> ▪ Public ▪ Telcos/ Postal Operators / Aviation ▪ MDAs / MMDAs ▪ Global information age ▪ Educational/ Training Institutions ▪ Youthful Populations ▪ Conventions and treaties 	<ul style="list-style-type: none"> ▪ High attrition rate ▪ Limited competences ▪ Obsolete equipment ▪ Attitude/resistance change ▪ ICT generational gap 	<ul style="list-style-type: none"> ▪ Cyber crime ▪ Encryption ▪ Legal frameworks ▪ Cyber Terrorism ▪ High cost of ICT equipment

Issues to be addressed	Potentials	Opportunities	Constraints	Challenges
<p><i>Conclusion: There is limited use for ICT tool to enhance management and businesses in the country, though there are available skilled personnel and equipment to address ICT generational gap. However there are some challenges to be addressed, such as high attrition rate, obsolete equipment and regulatory framework to meet the expectation of the public and to enable the Ministry go along with global information age.</i></p>				
<p>Poor quality of ICT services</p>	<ul style="list-style-type: none"> ▪ Modern equipment ▪ Professional ICT personnel ▪ Data center ▪ Broadband Policy and Strategy, 2012 	<ul style="list-style-type: none"> ▪ General Public ▪ ICT investments ▪ ICT Markets; MNOs ▪ Strong Regulators 	<ul style="list-style-type: none"> ▪ Poor internet connections ▪ Obsolete equipment ▪ Inadequate ICT infrastructure ▪ Weak enforcement 	<ul style="list-style-type: none"> ▪ Hacking ▪ Fiber Cuts ▪ Unstable power supply ▪ Restricted software
<p><i>Conclusions: Notwithstanding the poor quality of ICT services in the country, there are available modern equipment and professional ICT personnel to take advantage of the increasing investments in the sector driven by global technological trends in the use of ICTs. Further, the country has strong regulators such as the NCA, DPC, NITA and Cybersecurity Centres to ensure secured use of ICTs and to overcome challenges such as hacking, fibre cuts.</i></p>				
<p>Inadequate ICT infrastructure base across the country.</p>	<ul style="list-style-type: none"> ▪ Fibre optics platform ▪ Communication masts ▪ Computers/accessories ▪ Internet ▪ GMet Radar ▪ Automatic weather stations ▪ NITA, GIFEC 	<ul style="list-style-type: none"> ▪ MNOs ▪ Availability of communication accessories/gadgets ▪ Social media 	<ul style="list-style-type: none"> ▪ Inadequate fibre optic cables ▪ Inadequate professionals ▪ High cost of investment in ICT equipment ▪ Poor maintenance culture 	<ul style="list-style-type: none"> • High cost of ICT equipment • Land litigation • Fibre cuts • Misconception about effects of ICTs (masts, satellite)
<p><i>Conclusions: Though the country has the capacity to facilitate development and deployment of ICT infrastructure and radar to enable timely and reliable prediction of weather conditions, the ICT infrastructure base is woefully inadequate because of the high cost of ICT equipment, land litigations and frequent fibre cuts. The Ministry can however, create the enabling environment for its agencies and MNOs to expand their infrastructure base as well as carry out sensitization programmes to erode the misconceptions surrounding erecting of masts.</i></p>				

Issues to be addressed	Potentials	Opportunities	Constraints	Challenges
Low broadband wireless access	<ul style="list-style-type: none"> ▪ Type Approval Labs ▪ Spectrum Analysers ▪ Guidelines on Broadband ▪ Broadband Policy and Strategy 2012 ▪ National Data Centres ▪ Fibre Optics 	<ul style="list-style-type: none"> ▪ ICT Investments ▪ ICT Treaties and Conventions ▪ Global information age 	<ul style="list-style-type: none"> ▪ Obsolete equipment ▪ Outdated policy on Broadband 	<ul style="list-style-type: none"> ▪ Country's Landscape ▪ Fibre Cuts
<p><i>Conclusions: In spite of efforts at improving access to broadband through development of a National Broadband Policy and Strategy, establishment of a National Primary and Secondary Data Centres and the construction of 808.34km optic fibre cables across the Eastern Corridors of the Country, there is still limited access to broadband wireless connectivity because of obsolete equipment, outdated broadband policy framework and strategies, the country's undulating landscape affecting network access to hard-to-reach communities and frequent fibre cuts.</i></p>				
Vulnerability to climate change	<ul style="list-style-type: none"> ▪ Strong institutional capacity (GMet) ▪ Modern equipment for weather forecast ▪ Availability of University and research institutes ▪ Human resource 	<ul style="list-style-type: none"> ▪ Mass media (social media, media houses) to broadcast climatic change prediction. ▪ Availability of Information to Agric Sector and Aviation. ▪ Technical /Professional personnel 	<ul style="list-style-type: none"> ▪ High attrition rate ▪ Inadequate equipment 	<ul style="list-style-type: none"> ▪ Legal framework ▪ High cost of equipment ▪ Inappropriate human behavior contributing to climate change.

Issues to be addressed	Potentials	Opportunities	Constraints	Challenges
		provided by the universities		
<p><i>Conclusions: The country has a meteorological agency with qualified human resources to provide timely and reliable meteorological data. However, high attrition rate of qualified staff, inadequate and high cost of weather prediction equipment, coupled with ineffective legal framework has left the country vulnerable to climate change. The country can, notwithstanding the above, take advantage of Ghanaians' high attraction to social media, electronic media and the high number of tertiary institutions to generate and provide timely and reliable weather-sensitive information to the general public.</i></p>				
Low institutional capacity to adapt to climate change and undertake mitigation actions.	<ul style="list-style-type: none"> ▪ Presence of Universities and research institutes ▪ Human resource ▪ Disaster mitigation institutions (NADMO, NGOs & CSOs) ▪ National digital property addressing system 	<ul style="list-style-type: none"> ▪ Political commitment ▪ Media institutions ▪ Social Media 	<ul style="list-style-type: none"> ▪ Low inter-sectorial collaboration ▪ Poorly resourced disaster mitigation institutions ▪ 	<ul style="list-style-type: none"> ▪ Weak legal framework ▪ Illegal mining operations ▪ Weak regulatory bodies ▪ Poor town planning
<p><i>Conclusions: There is low institutional capacity to take mitigation actions to facilitate adaptation to climate change, though the country has human resource, universities, research and disaster management institutions to mitigate the effects of climate change. Further the use of social media platforms and the Media institutions to communicate climate changes to the public. However, there are still challenges which include: Weak legal system, Poor Town Planning, low inter-sectorial collaborations.</i></p>				
Low public engagement	<ul style="list-style-type: none"> ▪ Human resource ▪ Internet ▪ Smart phones 	<ul style="list-style-type: none"> ▪ Public ▪ Conferences ▪ Online portals 	<ul style="list-style-type: none"> ▪ High cost of engagements 	<ul style="list-style-type: none"> ▪ Low public interest and attitude to change ▪ right time and venues

Issues to be addressed	Potentials	Opportunities	Constraints	Challenges
	<ul style="list-style-type: none"> ▪ Computer ▪ Conference rooms ▪ Office space ▪ Public address systems 	<ul style="list-style-type: none"> ▪ Meet- the- press ▪ Mass Media ▪ NCCE ▪ Ministry of Information(Policy dialogue) 	<ul style="list-style-type: none"> ▪ Inappropriate channel of communication ▪ Inappropriate message ▪ Bureaucratic barriers 	<ul style="list-style-type: none"> ▪ poor road network ▪ generational gap
<p><i>Conclusions: The public is not effectively engaged as a result of the cost involved, inappropriateness of the communication channels, the type of messages giving to the public, poor road network, bureaucratic barriers and many more. However, the availability of qualified personnel, access to internet, smart phones, computers, offices, public address system and conference rooms to improve the engagement of the public.</i></p>				
<p>Inadequate online privacy and security of data.</p>	<ul style="list-style-type: none"> ▪ Human resource ▪ Internet ▪ Smart phones ▪ Computer ▪ Office space 	<ul style="list-style-type: none"> ▪ Data protection ▪ Cyber security center ▪ Child on line policy 	<ul style="list-style-type: none"> ▪ Weak enforcement ▪ Poor internet connectivity ▪ Obsolete equipment ▪ Inadequate ICT infrastructure 	<ul style="list-style-type: none"> ▪ Inadequate Legal frameworks ▪ Cyber crime ▪ Cyber terrorism ▪ Fiber cut ▪ Inadequate ICT legal professionals
<ul style="list-style-type: none"> ▪ <i>Conclusion: Online privacy and security of data is a problem though we have human resource, internet, computers, data protection centres, cyber security centres, Inadequate Legal frameworks, cyber-crime, cyber terrorism, fiber cut, inadequate ICT legal professionals to deal with the issue. Weak enforcement, poor internet connectivity, obsolete equipment and inadequate ICT infrastructure are all challenges facing data security in the country.</i> 				

2.2.2 Impact Analysis

The issues identified and prioritised through POCC analysis were further taken through impact analysis to ensure that it will have the necessary impact on the society as a whole. Assessing the issues identified, it was evident that addressing them would have a positive impact on the socio-economic development of the nation.

Firstly, there is limited use for ICT tool to enhance management and businesses in the country, though there are available skilled personnel and equipment to address the ICT generational gap. However, there are some challenges to be addressed, such as high attrition rate, obsolete equipment and adequate regulatory framework to meet the expectation of the public and to enable the Ministry go along with global information age. With improved use of ICTs in provision of service delivery such as the provision of e-Gates and automation of processes at the Ghana Immigration Services, the automation of services at the ports, automation of passport acquisition processing, the e-Payment system have all facilitated the flow of service delivery in the country. An optimal use of ICTs would enhance job opportunities, increased productivity and wages and salaries, and ultimately improved standard of living of most Ghanaians.

Secondly, notwithstanding the poor quality of ICT services in the country, there are available modern equipment and professional ICT personnel to take advantage of the increasing investments in the sector driven by global technological trends in the use of ICTs. Further, the country has strong regulators such as the NCA, DPC, NITA and Cybersecurity Centres to ensure secured use of ICTs and to overcome challenges such as hacking, fibre cuts high cost of access to ICT services. With the development of the Conformance Assessment (Type Approval) Polices and the establishment of the National Cyber Security Centre and National Data Centre, and the existence of a vociferous Consumer Protection Agency has led to an increased use of information and communication technologies.

Thirdly, though the country has the capacity to facilitate development and deployment of ICT infrastructure and radar to enable timely and reliable prediction of weather conditions, the ICT infrastructure base is woefully inadequate because of the high cost of ICT equipment, land litigations and frequent fibre cuts. The Ministry can however, create the enabling environment for its agencies and MNOs to expand their infrastructure base as well as carry out sensitization programmes to erode the misconceptions surrounding erecting of masts.

Fourthly, in spite of efforts at improving access to broadband through development of a National Broadband Policy and Strategy, establishment of a National Primary and Secondary Data Centres and the construction of 808.34km optic fibre cables across the Eastern

Corridors of the Country, there is still limited access to broadband wireless connectivity because of obsolete equipment, outdated broadband policy framework and strategies, the country's undulating landscape affecting network access to hard-to-reach communities and frequent fibre cuts. To overcome this challenge the Ministry of Communications through its Universal Access and in collaboration with the National Investment Fund for Electronic Communication (GIFEC) is constructing telephone masts and building Community Information Centres (CICs) across the country particularly in the underserved and unserved communities of the country.

Again, the country has a meteorological agency with qualified human resources to provide timely and reliable meteorological data. However, high attrition rate of qualified staff, inadequate and high cost of weather prediction equipment, coupled with ineffective legal framework has left the country vulnerable to climate change. The country can, notwithstanding the above, take advantage of Ghanaians' high attraction to social media, electronic media and the high number of tertiary institutions to generate and provide timely and reliable weather-sensitive information to the general public.

Further, there is low institutional capacity to take mitigation actions to facilitate adaptation to climate change, though the country has human resource, universities, research and disaster management institutions to mitigate the effects of climate change. Further the use of social media platforms and the Media institutions to communicate climate changes to the public. However, there are still challenges which include: Weak legal system, Poor Town Planning, low inter-sectorial collaborations.

Finally, the public is not effectively engaged as a result of the cost involved, inappropriateness of the communication channels, the type of messages giving to the public, poor road network, bureaucratic barriers and many more. However, the availability of qualified personnel, access to internet, smart phones, computers, offices, public address system and conference rooms to improve the engagement of the public.

2.2.3 Sustainability analysis of the issues (internal consistency/compatibility)

The adopted issues for implementation in the medium-term plan were analysed to ensure their internal consistency while identifying inconsistencies for mitigation. To achieve this, the issues were listed horizontally and vertically and their interactions assessed.

Table 2. 4: Sustainable prioritised issues as categorised under Development Dimensions

DEVELOPMENT DIMENSION	FOCUS AREAS OF MTDP 2018-2021	ADOPTED SUSTAINABLE PRIORITISED ISSUES
Environment, Infrastructure and Human Settlement	Information, Communication, Technology	<ul style="list-style-type: none"> ▪ Low broadband wireless access ▪ Poor quality of ICT services ▪ Limited use of ICT as a tool to enhance the management and efficiency of businesses and provision of public services> enhance the management and efficiency Inadequate online privacy and security of data
	Climate Variability and Change	<ul style="list-style-type: none"> ▪ Vulnerability to climate change ▪ Low institutional capacity to adapt to climate change and undertake mitigation actions.

CHAPTER THREE

DEVELOPMENT PROJECTIONS, GOAL, ADOPTED OBJECTIVES AND STRATEGIES

3.0 Introduction

This chapter provides the development projections for the ministry and its departments and agencies during the medium-term (2018-2021) and also outlines the goals, adopted objectives and strategies to be used in achieving the needed development within the sector. The adopted objectives and strategies will form the basis for the programmes and projects to be pursued within the period (2018 – 2021).

3.1 Development Projections

The Sector Development Projections for the Ministry of Communications Sector Medium-Term Development Plan (SMTDP) 2018 is directly linked to the national development goals and objectives of the National Medium Term Development Policy Framework, Agenda 2030, Agenda 2063, and current national priorities of Government. The projections were derived from lessons learned and challenges encountered during the implementation of GSGDA II, 2014-2017 and current national and global trends. These are particularly hinged on the following:

- historical sector development trend analysis,
- increased sector policy targeting,
- efficient use of available development resources,
- commitment to achieve sector development goals and objectives of this Plan
- enhanced institutional capacity for improved service delivery, and
- high level of political commitment to sector/national development.

The development projections for the 2018-2021 OAMOJ Plan are classified under *the Ministry, its Departments and Agencies* and they are as follows:

Ministry of Communications

- Continue with the implementation of Girl-in-ICT initiative by training and mentoring girls in various ICT programmes

- Continue with the implementation of Girl-in-ICT initiative by training and mentoring girls in various ICT programmes.
- Successful completion of the eTransform project by end of 2020 with the underlisted underlisted outcomes:
 - Automation of company registration and certification at the Ghana Revenue Authority;
 - Successful completion of the eImmigration Project at the Kotaka Internation Airport, 3 land and 2 sea ports;
 - Complete the authomation of
 - Improved functionality of the Accra Digital Centre
 - Improved functionality of Data Protection Capacity

National Communications Authority (NCA)

National Information Technology Agency (NITA)

Ghana Investment Fund for Electronic Communications (GIFEC)

Ghana Postal Services (GP)

Postal and Courier Regulatory Services Commission (PCRSC)

Data Protection Commission (DPC)

Ghana Meterological Services (GMet)

3.2 ADOPTED DEVELOPMENT ISSUES, THEMATIC GOALS, OBJECTIVES AND STRATEGIES, 2018-2021

This section outlines the adopted goals, policy objectives and strategies the Ministry is going to implement over the period 2018-2021. The National Medium Term Development Policy Framework (*Agenda for Jobs*) identifies four strategic goals that would guide development of the country. Based on the key development issues identified and in line with the mandate and function of the Ministry, two of the goals have been adopted, namely: Build a prosperous society; and maintain a stable, united and safe society. Table 9 below, outlines the goals, objectives, strategies and issues for 2018-2021

Table 3. 1: Adopted Development Issues, Thematic Goals, Objectives and Strategies, 2018-2021

THEMATIC AREA	FOCUS AREA	ISSUES	POLICY OBJECTIVES	STRATEGIES	IMPLEMENTING AND COLLABORATING AGENCIES	GLOBAL /REGIONAL LINKAGES
Goal: To safeguard the natural environment and ensure a resilient built environment						
		Inadequate ICT infrastructure base across the country	Expand the digital landscape	10.2.1 Build an integrated national ICT digital infrastructure (National ID system, addressing system, interoperability of	GIFEC, NITA, Ghana Post, NCA, MOC, ADC, KACE	SDG Target 9.c

THEMATIC AREA	FOCUS AREA	ISSUES	POLICY OBJECTIVES	STRATEGIES	IMPLEMENTING AND COLLABORATING AGENCIES	GLOBAL /REGIONAL LINKAGES
				<p>payments and telecommunications systems, citizen's services centre nationwide using government infrastructure such as post offices, Community Information Centres, etc.)</p> <p>10.2.3 Develop and implement regulations to facilitate public private partnerships (PPPs)</p> <p>10.2.6 Deepen national internet availability and accessibility especially in schools (citizen digital index)</p> <p>10.2.9 Establish innovation hubs and promote a software and applications industry</p> <p>10.2.11 Promote deployment of an e-voting system for national, parliamentary and constituency elections</p> <p>10.2.12 Ensure adequate digital capability to support production and use of ICTs for development</p>		<p>SDG Target 17.17</p> <p>SDG Target 9.c, 16.10</p> <p>SDG Targets 9.c, 16.10</p> <p>SDG Targets 9.c, 16.10, 16.7</p> <p>SDG Targets 9.c, 16.10</p>

THEMATIC AREA	FOCUS AREA	ISSUES	POLICY OBJECTIVES	STRATEGIES	IMPLEMENTING AND COLLABORATING AGENCIES	GLOBAL /REGIONAL LINKAGES
				10.2.13 Promote the establishment of ICT parks across the country (SDG Targets 9.c, 17.8)		

CHAPTER FOUR

DEVELOPMENT PROGRAMMES AND SUB-PROGRAMMES OF THE MDA

4.0 INTRODUCTION

4.1 PROGRAMMES AND SUB-PROGRAMMES

Table 4. 1: MDA’s adopted goal

ADOPTED OBJECTIVES	ADOPTED STRATEGIES	PROGRAMMES	SUB-PROGRAMMES
10.1 Enhance application of ICT in national development	10.1.1 Position the country as a regional ICT hub (SDG Target 9.c) 10.1.2 Mainstream ICT in public sector operations (SDG Target 17.8) 10.1.3 Improve telecommunications accessibility (SDG Targets 9.c, 17.8) 10.1.4 Create opportunities for entrepreneurship in ICT (SDG Targets 9.c, 17.8) 10.1.5 lease itizes access to data platforms (SDG Targets 9.c, 17.18) 10.1.6 Collaborate with the private sector to increase the broadband, bandwidth and speed of connections nationwide (SDG Target 17.17) 10.1.7 Accelerate investment in development of ICT infrastructure (SDG Target 17.17) 10.1.8 Improve the quality of ICT services, especially internet and telephony (SDG Target 9.c) 10.1.9 Develop and maintain online database for all categories of properties and provide secure data access (SDG Target 16.10) 10.1.10 Develop and integrate identification coding schemes for landed properties and online tracking services for registered properties (SDG Target 16.10)	Management Administration and	NITA, GIFEC, MMDAs

<p>10.2 Expand the digital landscape</p>	<p>10.2.1 Build an integrated national ICT digital infrastructure (National ID system, addressing system, interoperability of payments and telecommunications, utilizes services nationwide using government infrastructure such as post offices, Community Information Centres, etc.) (SDG Target 9.c) 10.2.2 Provide regulatory framework to use national ICT digital infrastructure as a platform for e-government services (SDG Targets 9.c, 17.14) 10.2.3 Develop and implement regulations to facilitate Public-Private Partnerships (PPP's) (SDG Target 17.17) 10.2.4 Create a favourable environment to promote e-commerce and offline cashless payments (SDG Target 10.5)</p> <p>10.2.5 Provide real-time information to all segments of the population and economy (SDG Targets 16.10, 17.19) 10.2.6 Deepen internet availability and accessibility nationally especially in schools (citizen digital index) (SDG Target 9.c, 16.10) 10.2.7 Increase internet capacity and quality training in and out of school (SDG Target 9.c) 10.2.8 Promote business process outsourcing and IT enabled services (SDG Targets 9.c, 16.10) 10.2.9 Establish innovation hubs and promote a software and applications industry (SDG Targets 9.c, 16.10) 10.2.10 Develop and use ICT as a platform to increase the flow of information on employment and teleworking opportunities (SDG Targets 9.c, 16.10) 10.2.11 Promote deployment of an e-voting system for national, parliamentary and constituency elections (SDG Targets 9.c, 16.10, 16.7) 10.2.12 Ensure adequate digital capability to support production and use of ICTs for development (SDG</p>	<p>Communications Infrastructure Development</p>	<p>NITA, GIFEC, MoC, DPC</p>
--	---	--	------------------------------

	Targets 9.c, 16.10) 10.2.13 Promote the establishment of ICT parks across the country (SDG Targets 9.c, 17.8)		
7.1 Enhance climate change resilience	7.1.1 Ipleet Ghaas oitets ude Pais Cliate Ageeet (COP21) (SDG Targets 13.a, 16.8) 7.1.2 Collaborate with international partners to have more access to the Green Climate Fund (\$30 billion Global Fund) for climate change purposes (SDG Targets 13.a, 16.8) 7.1.3 Develop climate-resilient crop cultivars and animal breeds (SDG Target 2.4) 7.1.4 Promote and document improved, climate-smart, indigenous agricultural knowledge (SDG Targets 2.4, 16.6) 7.1.5 Improve and harmonise agricultural research, including application of climate models (SDG Targets 2.4, 2.a) 7.1.6 Promote climate-resilience policies for women and other vulnerable groups in agriculture (SDG Targets 1.5, 13.1, 13.2, 13.b, 16.6) 7.1.7 Develop coordinated response to climate change challenges through linkages between research, industry and government (SDG Targets 13.2, 16.6) 7.1.8 Manage climate-induced health risks (SDG Targets 1.5, 16.6) 7.1.9 Develop climate-responsive infrastructure (SDG Target 9.1) 7.1.10 Mainstream climate change in national development planning and budgeting processes (SDG Targets 11.b, 13.2)	Meteorological Services	Min. of Aviation, Min. of Agric, GAA, GCAA, MESSTI

DEVELOPMENT DIMENSION	FOCUS AREAS OF MTD 2018-2021	ADOPTED SUSTAINABLE PRIORITISED ISSUES
Environment, Infrastructure and Human Settlement	Information, Communication, Technology	<ul style="list-style-type: none"> ▪ Low broadband wireless access ▪ Poor quality ICT services ▪ Limited use of ICT as a tool to enhance the management and efficiency of businesses and provision of public services ▪ Inadequate online privacy and security of data
	Climate Variability and Change	<ul style="list-style-type: none"> ▪ Vulnerability to climate change ▪ Low institutional capacity to adapt to climate change and undertake mitigation actions.

4.2 PROGRAMME OF ACTION

This section provides details on the impact of the programmes on the society. To ensure that the programmes that have been adopted for implementation would have the needed impacts, the programmes were subjected to a prioritisation matrix showing its environment, social, economic and spatial impact.

Table 4. 2: Prioritisation Programme Matrix

Programme

Criteria

	Social impact (educational, health, etc.)	Economic Impact (e.g. employment generation, poverty reduction)	Environmental impact (e.g. climate change, green economy, etc.)	Spatial impact (e.g. nationwide / selected region)	Total Score	Average Score	Rank
Management and Administration	2	2	0	2	6	1.50	4 th
ICT Capacity Development	3	3	1	2	9	2.25	2 nd
ICT Infrastructure Development	3	3	2	2	10	2.50	1 st
Meteorological Services	1	2	3	1	7	1.75	3 rd
Postal and Courier Services	1	2	0	1	4	1.00	5 th
Data Management Services	0	2	0	1	3	0.75	6 th

Table 4. 3: Programme of Action of the Ministry of Communications

Development Dimensions: Environment, Infrastructure and Human Settlement														
Adopted MoC's Goal: The Ministry envisage Ghana as a free, united, development-oriented knowledge society based on attitudinal change towards adaptation and innovative use of ICTs and its services.														
Adopted Objectives	Adopted strategies	Programmes	Sub-programmes	Projects/ activities	Outcome/ Impact Indicators	Time frame				Indicative Budget			Implementing Agencies

CHAPTER FIVE

ANNUAL ACTION PLAN OF THE MINISTRY OF COMMUNICATIONS

This section outlines the 2018-2021 development Operations (Annual Action Plan) to be executed by the Ministry. It establishes a direct linkage between Adopted NMTDPF Goal, the Programmes and Sub-programmes, planned activities, their location, timeframe for execution and plan implementation partners. It also provides some set of indicators that will help access progress during implementation.

Table 5. 1: 2019 Action Plan of the Ministry of Communications

Programmes & Sub-programmes	Activities (Operations)	Baseline	Output Indicators	Quarterly Time schedule				Indicative Budget			Responsibility	
				1 st	2 nd	3 rd	4 th	GoG (GHC)	IGF	Donor	Lead	Collaborating
Management and Administration (MoC-Headquarters)	Organise quarterly Audit Committee meetings	Audit Committee	Minutes of Audit Committee meetings	Jan.	Apr.	Jul.	Sep.	40,000			D/F&A	Ag. Chief Director Principal Internal Auditor, Chief Accountant
Management and Administration (MoC-HQs)	Prepare 2020 Budget Estimates	Standing Budget Committee constituted	Budget preparation workshop/meeting reports				Jul.	20,000			PPME/ F&A	HRM, RSIM, Accounts Chief Internal Auditor
			2020 Budget Estimates completed.				Sep.	10,000				

	Maintenance & rehabilitation and upgrade of existing office assets.	Estate Officer	Annual Assets Register prepared				Nov.	5,000			F&A	IT Accounts Chief Internal Auditor PPME, HRM, RSIM,

IMPLEMENTATION, MONITORING AND EVALUATION

6.0 Introduction

This chapter outlines the monitoring and evaluation processes to be utilised in the implementation of the Ministry’s Medium Term Development Plan (MTDP 2018-2021). It provides the indicators for monitoring, the process of data collection and analysis, reporting arrangements and communication strategies. The chapter also provides the evaluations and participatory monitoring and evaluation arrangements for the plan period.

6.1 Monitoring Matrix

The Ministry as part of efforts to ensure the effective monitoring of all outcomes expected from the implementation of the Medium-Term Development Plan, has developed a list of indicators. These indicators have been outlined in a matrix format and provides amongst others a definition of the indicators, the baselines and targets and the frequency of data collecting for reporting. Table 6.1 provides the monitoring matrix for the period 2018-2021.

Table 6. 1: Monitoring Matrix, 2018-2021

Development Dimension: Environment, Infrastructure and Human Settlements										
Goal as adopted in SMTDP 2018-2021: To safeguard the natural environment and ensure a resilient built environment										
Policy Objective: Expand the digital landscape										
Indicators	Indicator Definition	Indicator Type	Baseline 2017	Targets				Disaggregation	Monitoring Frequency	Responsibility
				2018	2019	2020	2021			

Existence of Interconnect rate.	MNOs charges – interoperability rate per minute	Outcome	MNO = 0.04 ICH = 0.0056	International Wholesale Carrier rates MNO rates	Annually	Dir. Regulatory Admin.				
Existence of numbering plan.	Existence of Mobile to Mobile (M2M) numbering Scheme.	Output	Numbering Plan - 05x - 02x - 03x, - Short code - Toll Free - Premium numbers	Numbering Plan - 05x - 02x - 03x, - Short code - Toll Free - Premium numbers	Numbering Plan - 05x - 02x - 03x, - Short code - Toll Free - Premium numbers	Numbering Plan - 05x - 02x - 03x, - Short code - Toll Free - Premium numbers	Numbering Plan - 05x - 02x - 03x, - Short code - Toll Free - Premium numbers	MNO Internet Providers (Long-Term Evolution Providers)	Annually	Dir. Regulatory Admin.
Proportion of Numbering Audits to total number of audits	Times of Numbering Audits to total audits	Output	Numbering Audit = 2	2/8	2/8	2/8	2/8	MNO BWA (Broadband Wireless Access)	Bi-Annual	Dir. Regulatory Admin.
Number of Electromagnetic Field (EMF) monitoring exercise	Electromagnetic Field (EMF) emissions	Outcome	EMF Monitoring = Nil	EMF Monitoring = Nil	EMF Monitoring = 24 out of 72 Selected areas	EMF Monitoring = 24 out of 72 Selected areas	EMF Monitoring = 24 out of 72 Selected areas	Broadcasters Service Providers with Radio	Bi-Annual	Dir. Regulatory Admin. Dir. Engineering

Proportion of Quality of Service (QoS) Monitoring	Quality of Service conducted in all districts.	Output	QoS Monitoring = 216/216	216/864	216/864	216/864	216/864	District Capitals	Quarterly	Dir. Regulatory Admin.
Policy Objective: To improve ICT infrastructure in rural areas										
Number of Rural Telephony sites built	Rural telephony sites completed	Output	199 sites built	200/800	200/800	200/800	200/800	Districts Towns Villages	Quarterly & Annually	Dir. Operations
Number of government institutions connected to the internet	Government institutions digitised and equipped with IT systems	Output	30 institutions	40/160	40/160	40/160	40/160	Regional Districts Towns	Quarterly	Dir. Operations
Number of CICs connected	Community Information Centres (CICs) equipped and connected to the internet	Output	70 CICs equipped	65/260	65/260	65/260	65/260	Districts Towns Villages	Quarterly Annually	Dir. Operations
Number of schools supported	Schools equipped with	Output	70 schools	100/400	100/400	100/400	100/400	Regional	Quarterly	Dir. Operations

	computers and accessories									
Number of communities connected	Server connected to facilitate eServices - E-Agric - eTransaction- eCommerce - eProcurement	Output	4 pilot communities	44/176	44/176	44/176	44/176	District Towns Villages	Quarterly & Annually	Dir. Operations
Number of D4I project-support entrepreneurs and communities	Entrepreneurs supported with Zeepay kiosks	Output	Entrepreneurs = 60 Communities = 5	Entrep.= 40 Communities = 10	Regions Districts	Quarterly & Annually	Dir. Operations			
Policy Objective: To promote electronic transactions for public and private businesses										

Number of MDAs/MMDAs Connected e-Government Network	Number of MDAs/MM DAs to the e-Government Network	Output Indicator	MDAs = 0/55 MMDAs = 0/245	10/55	25/55	10/55	10/55	Ministries, Departments & Agencies Metro. Municipal & District Assemblies Regions	Quarterly & Annually	CTO
Number of: -MDAs -MMDAs reached	Number of MDAs/MM DAs to eWorkspace	Output Indicator	MDAs = 45 MMDAs = 0	10/55 80/245	- 80/245	- 50/245	- 35/245	Ministries, Departments & Agencies Metro. Municipal & District Assemblies Regions	Quarterly & Annually	CTO
Number of MDAs/MMDAs	Number of MDAs/MM DAs connected to ePayment	Output Indicator	MDAs = 5 MMDAs = 0	15/55 90/245	15/55 80/245	15/55 50/245	10/55 25/245	Ministries, Departments and Agencies Metro, Municipal and District Assemblies	Quarterly and Annually	CTO
Number of MDAs/MMDAs	Number of MDAs/MM DAs connected to eServices Portal	Output Indicator	MDAs = 5 MMDAs = 0	15/55 70/245	15/55 70/245	10/55 60/245	10/55 45/245	Ministries, Departments and Agencies	Quarterly and Annually	CTO

								Metro, Municipal and District Assemblies		
Number of MDAs/MMDAs	Number of MDAs and MMDAs connected to Smart workspace solution	Output Indicator	MDAs =12 MMDAs=0	9/55 70/245	9/55 60/245	8/55 60/245	7/55 55/245	Ministries, Departments and Agencies Metro, Municipal and District Assemblies	Quarterly and Annually	CTO
Number of postal/ courier licences renewed	Annual renewal of licences by registered operators	Output	105	110	120	130	140	Int. Large Int. Medium Inter. Small Domestic Small Domestic Medium Domestic Small	Quarterly Annually	Director, Licensing and Regulations
Number of new courier operators licensed	Postal/Courier operators registered and licensed	Output	17	10	10	10	10	Int. Large Int. Medium Inter. Small Domestic Large	Quarterly Annually	Director, Licensing and Regulations

								Domestic Medium Domestic Small		
Number of publications of Operators in good standing	Annual publication of names of operators with renewed licences.	Output	2 publications	2 publications	2 publications	2 publications	2 publications	Daily Graphic And Ghanaian Times	Quarterly Annually	Director, Licensing & Regulations
Number of Publications of unlicensed operators	Annual publication of names of operators unlicensed	Out come	52 published list	19	19	19	19	Media	Quarterly Annually	Director, Licencing & Regulations
Number of Offices established	New offices established in three regions	Output	0	0	1/3	1/3	1/3	Kumasi Takoradi Tamale	Quarterly Annually	Executive Secretary
No. of International Conferences attended	Ghana's representation on WAPCO, PAPU and UPU	Output	5	4	5	5	5	WAPCO Report PAPU Report UPU Report	Annually	Executive Secretary

6.2 Data Collection, Collation and Analysis

Gathering data is an essential part of accessing information on the implementation of programmes and projects outlined in the MTDP as well as provide information for monitoring and evaluation process. Data gathered provides a platform for analysis to arrive at a result that will help inform decision making. Given the crucial nature of data collection, the Ministry will design data gathering templates for its agencies and departments as well as regional and district offices for data collection on interventions of the Ministry. Table 6.2 provides the data collection matrix that outlines the data collection period and method, level of disaggregated and the anticipated results.

Table 6. 2: Data collection matrix, Ministry of Communications

Indicator	Data collection period	Data collection method	Data disaggregation	Results
Ghana Investment Fund for Electronic Communications (GIFEC)				
Number of Rural Telephony sites built	October to December 2019	Field visits to verify the number	Districts Towns/Villages	200 Communities benefitted in 2018 and 200 more will benefits by December 2019
Number of government institutions connected to the internet	September 2019	Field visits	Districts Towns/Villages	30 institutions benefitted in 2018, 30. more will benefit in 2019
Number of people trained	June, 2019	Field visits	Districts Towns/Villages	17,000 people were trained in 2018 and 20,000 more people to be trained
Number of CICs connected	July, 2019	Field visits	Districts Towns/Villages	100.CICs got connected to the internet as of 2018 and 100 CICs will benefit in 2019

Number of communities covered in the selected regions	October to December 2019	Field visits	Districts Towns/Villages	5 communities were piloted in 2017 and the other regions will benefit in 2019
National Communications Authority (NCA)				
Existence of Interconnect rate.	TBD	Benchmarking	MNOs, BWA	Standardized Interconnection rate
Existence of numbering plan.	June	Discussions and Regulations	MNO, BWA	Ensure even allocation of numbering blocks.
Proportion of Numbering Audit to total number of Audits	Jan-Jun, Jul, Dec	Forms	MNO, BWA	Management of Numbering Resource
Number of Electromagnetic Field (EMF) monitoring exercise	Mar-Jul, Sept-Nov	Spectrum Analyzers	Broadcasters, Service Providers with Radio Frequency	Regulation of EMF emitting devices to ensure they emit within their respective limits
Proportion of Quality of Service (QoS) Monitoring	Quarterly	Drive Test, Network Monitoring System (NMS)	All District Capitals	Enforced Quality of Service Standards by MNOs
Postal and Courier Services Regulatory Commission (PCRSC)				

Number of postal/ courier licences renewed	December 31	Licences renewed	International Domestic	105 operators renewed their licences
Number of Courier operators registered	December 31	New registration numbers/new licences	International Domestic	10 new operators were registered and licensed
Publication of operators in good standing	Second quarter	Newspapers	Dailies	2 publications in the dailies
Number of Publications in the media	Second quarterly	Media	Print/Electronic	19 publications were made in the electronic media
Number of Offices established	December 31	Office address	Locations	No office was established
Number of Conferences attended	December 31	Reports	Regional/Continental/World	5 conferences were attended
National Information Technology Agency (NITA)				
Number of MDAs/MMDAs Connected	June	-Paper Questionnaires	MDAs/MMDAs	Easy access to Government network
Number of: -MDAs -MMDAs reached	March	-Paper Questionnaires	MDAs/MMDAs	Eliminate the use of paper and human interface in Government transactions
Number of MDAs/MMDAs	December	-Paper Questionnaires	MDAs/MMDAs	Easy Payment of Government Services

Number of MDAs/MMDAs	December	-Paper Questionnaires	MDAs/MMDAs	Citizen Easy Access to essential Government Services
Number of MDAs/MMDAs	December	-Paper Questionnaires	MDAs/MMDAs	Eliminate the use of paper and human interface in Government transactions
Ghana Meteorological Services (GMet)				
Lead time of early warning	Daily	Observation	By zones, by Agric activity By Aviation By Marine	To provide adequate time to the weather event
Establish Change in Climate	Monthly		By zones	Reduce change in climate change
Accuracy rate of early warning	Daily	Observation	National	Close to perfection of Event
Timeliness	Daily	Observation	National	Adequate time to Event
Percentage Change in station data received at headquarters	Daily	Observation Recording	National	Reduce loss of data

Dissemination of Data over GTS	Weekly		National	Provide information across the country
Compliance rate with WMO Standards	Annually		National	Attain Set Standard
No. of automatic weather stations installed			National regional	Collect data relating to weather.
Accuracy of forecasts produced.	Daily		National	Accurate weather produced
Database updated Daily	Daily		National	To have readily available data
Subscription Paid	Annual		National	Affiliation to International Organisation
Certification obtained	Annual		National	Operated within Quality management standards
No. of seasonal forecast issued	Annual		National regional	To inform and Educate
No. of workshops organised	Seasonal		National	

No. of Bulletins Published	Monthly		National	To inform and Educate
No. of TV presentations			National	To inform and Educate
Law House Project completed		Site inspection report		100% completed
Number of Regional residential bungalows renovated		Site inspection report	Regional	100% completed
Number of Regional Office buildings renovated		Site inspection report	Regional	100% completed
Number of records staff trained		Training reports	Male Female	50% of males 50% of females
Records system of the Ministry automated		Procurement report, Questionnaire	Department/Agency	
Sector policy framework completed		Questionnaire	Policy documents	
Number of Research on policy and socio-economic issues in justice delivery conducted		Questionnaire	Research documents	

Outcomes of research implemented	2018-2021	Implementation report		
Official vehicles maintained.	2018-2021	Inventory		

Data Validation

Validating data gathered through primary and secondary means, is essential for ensuring that all errors or duplications are removed to ensure the authenticity of the data. The process also allows for stakeholders to buy into the process and own the outcome of the process. The PPME Division of the Ministry shall ensure that data validation workshops/meetings are organised with stakeholders.

Data Analysis

Analysis data gathered from different sources is essential to allow for better interpretation of the results. The PPME Division of the Ministry shall ensure that data gathered or received are rigorously analysed to ensure accurate results are produced and communicated to stakeholders. The PPME Division would utilise software like SPSS, Excel, etc. The analysis would present the performance of the Ministry in relation to the implementation of the MTDP as well as highlight areas that require further attention and proffer solutions.

6.3 Reporting Arrangement

Reporting to stakeholders is an essential element of any M&E system. The PPME Division of the Ministry will ensure that all stakeholders are well informed on the progress of implementation of all programmes and projects undertaken during the year. This is expected to help them make informed decisions based on current data and trends. The PPME Division will report on progress on quarterly and annual basis using the format providing by the National Development Planning Commission in the Planning Guidelines (2018-2021). Fig. 6.1 provides the quarterly and annual progress report format.

Figure 6.1: Quarterly and Annual Progress Reports Format

Title Page

- i. Name of the MDA
- ii. Time period for the M&E report

Introduction

- i. Summary of achievements and challenges with the implementation of the SMTDP
- ii. Purpose of the M&E for the stated period
- iii. Processes involved and difficulties encountered

M&E Activities Report

- i. Programme/Project status for the quarter or year
- ii. Update on funding sources and disbursements
- iii. Update on indicators and targets
- iv. Update on critical development and poverty issues
- v. Evaluations conducted; their findings and recommendations
- vi. Participatory M&E undertaken and their results

The Way Forward

- i. Key issues addressed and those yet to be addressed
- ii. Recommendations

6.4 Dissemination and Communication Strategy

Communicating results of a process or the process itself to stakeholders is crucial for their appreciation and buy-in. It is therefore paramount that a communication strategy is outlined to guide the way in which different products are communicated to the varied stakeholders of the Ministry. The PPME Division will ensure that the communication strategy is develop and the various outputs well communicated to the key stakeholders. Table 6.3 provides a detail breakdown of the communication strategy for the plan period

Table 6.3: Communication Activity Matrix

6.4 Dissemination and Communication Strategy

Table 6. 3: An example of communication activity matrix

Activity	Purpose	Audience	Method/Tool	Timeframe	Responsibility
National Communications Authority					
Determine Wholesale interconnect rate	Ensure that all MNOs and International Carriers have a standardizes termination rate	NCA, International Carriers, MNOs	Stakeholder Deliberations	Annually	NCA
Implement Machine to Machine (M2M) numbering Scheme.	Ensure adequate regulation of M2M interactions.	Internet Service Providers, BWA, MNOs	Policies, International Regulations, Stakeholder Deliberations	June	NCA

Conduct Numbering Audit	Management of Numbering Resource within a regulated framework	MNO, BWA	Forms	Bi-annual	NCA
Coordinate Frequency along the borders of the country.	To Minimize cross-border frequency interference.	Regulators from Neighboring Countries, MNOs, BWAs, Broadcasters	Spectrum Monitoring, Stakeholder Deliberations	Quarterly	WRC
Coordinate National Preparation for World Radiocommunication Conference (WRC)	Review, and revise the Radio Regulations and the international treaty governing the use of the radio-frequency spectrum.	WRC Participants, Telecom Stakeholders and Regulators	Conferences	Sept - Nov	WRC
Organise Consumer Outreach	Awareness creation on Regulator Practices and Consumer Rights	Public	Fora, Outreach	Quarterly	NCA
Conduct nationwide Electromagnetic Field (EMF) monitoring exercise	To Regulate EMF emitting devices to ensure they emit within their respective limits	Broadcasters, Service Providers with Radio Frequency	Spectrum Analyzers	Bi annually	NCA
Conduct Quality of Service (QoS) Monitoring for Voice and Data	Enforce Quality of Service Standards by MNOs	MNO, BWA	Drive Test, Network Monitoring System (NMS)	Quarterly	NCA

National Information Technology Agency					
Connect MDAs / MMDAs to the e-Government Network Operating Service.	Introduction of MDAs/MMDAs to e-Gov.net	MDAs/MMDAs	Forums Workshops	25 th – 29 th March,2019 10:00 am - 5:00pm	Chief Technology Agency (CTO)
Rollout ePayment	Introduction of MDAs/MMDAs to ePayment Rollout	MDAs/MMDAs	Forums Workshops	25 th – 28 th February,2019 8:30 am – 2:00PM	Chief Technology Agency (CTO)
Support eServices Payment	Introduction of MDAs/MMDAs to ePayment Rollout	MDAs/MMDAs	Forums Workshops	15 th – 17 th July,2019 8:30 am – 2:00PM	Chief Technology Agency (CTO)
Support Smart WorkPlace Solution	Introduction of MDAs/MMDAs to Smart WorkPlace Solution Rollout	MDAs/MMDAs	Forums Workshops	8 th – 12 th April,2019 8:30 am – 2:00PM	Chief Technology Agency (CTO)
Data Protection Agency					

Youth Sensitization	The Commission aims to increase awareness on Data Protection nationally by targeting the youth and engaging them in activities that can promote good Data Protection practice in Ghana with regards to Globalization ,Digitization and Social media	Youth	Debates Quiz Theatre Arts (e.g. Drama) Social media (e.g. Facebook, Twitter, WhatsApp etc.)	January to December 2018	Director of Finance & Administration & Director Legal & Operations
Public Engagement	To enlighten people about their rights to privacy and data protection	Public	TV Radio Print (e.g. Newspaper, Flyers etc.) Global Week event	January to December 2018	Director of Finance & Administration & Director Legal & Operations

6.5 Evaluation

Table 15: Evaluation Matrix Evaluation Criteria Evaluation Questions Data Needed

Evaluation Criteria	Evaluation Questions		Data Needed	Data Sources	Data Collection Methods
	Main Questions	Sub-Questions			
National Communications Authority					
Relevance	Why the need for the projects?	Will these projects benefit the Country?	World Interconnect rates, KPIs	Industry evaluation reports, reports from ITU, MNOs, Broadcasters, BWAs, Service Providers	Call sheets, Forms, stakeholder forums, questionnaires.
Efficiency	What is the cost and time for the implementation of the projects?	What resources will be needed? What time frame is required?	World Interconnect rates, KPIs	Industry evaluation reports, reports from ITU, MNOs, Broadcasters, BWAs, Service Providers	Call sheets, Forms, stakeholder forums, questionnaires.
Effectiveness	Will the projects improve technology and communication use in the country?	Will the projects reduce the time and costs spent in communicating?	World Interconnect rates, KPIs	Industry evaluation reports, reports from ITU, MNOs, Broadcasters,	Call sheets, Forms, stakeholder forums, questionnaires.

				BWAs, Service Providers	
Impact	How many people have access to ICT services?	Has the use of ICT increase productivity?	World Interconnect rates, KPIs	Industry evaluation reports, reports from ITU, MNOs, Broadcasters, BWAs, Service Providers	Call sheets, Forms, stakeholder forums, questionnaires.
Sustainability	How will the available ICT resources enhance continuity of the projects?	What resource plans are in place to sustain the projects? What implementation strategy and enforcement will be in place?	World Interconnect rates, KPIs	Industry evaluation reports, reports from ITU, MNOs, Broadcasters, BWAs, Service Providers	Call sheets, Forms, stakeholder forums, questionnaires.
Ghana Investment Fund for Electronic Communication					
Relevance	Why the need for the projects?	How will the projects serve the needs of beneficiary communities? Are the projects the appropriate one for	Number of people served User experience	GIFEC reports	Survey

		the problem identified?			
Efficiency	Will GIFEC commit the resources in a timely manner to produce results?	How much will be spent on the project? How long will it take for the project to be implemented? How much is the project in the market?	Project cost Time	GIFEC reports	Questionnaire
Effectiveness	Will the project achieve the results that it set to achieve?	Will the people able to make calls easier?	User experience	GIFEC	Questionnaire
Impact	What difference will the project make in the lives of the beneficiaries	Has the project made life easier for the beneficiaries? How will the project change the lives of the beneficiaries?	Monitoring and evaluation report	GIFEC	Questionnaire

Sustainability	To what extent is the project likely to continue after GIFEC support?	How will the project stand the test of time? What measures have been put in place to make the project survive on its own?	Status report	GIFEC	Questionnaire
National Information and Technology Agency (NITA)					
Relevance	Why need for the projects?	How can this project benefit government institutions?	Number of MDAs/MMDAs User Experience	Progress & Evaluation Report	Electronic/Paper Questionnaires ie mail Phone Calls Social Media
Efficiency	What will be the time taken to implement? What is the cost for the implementation of the project?	What equipments will be needed? *cost of equipments *Duration	Cost and Time per MDA/MMDAs	Progress & Evaluation Report	Electronic/Paper Questionnaires ie mail Phone Calls Social Media

Effectiveness	Will it completely digitize the work place?	Will it eliminate the use of paper at work?	Number of MDAs/MMDAs User Experience	Progress & Evaluation Report	Electronic/Paper Questionnaires ie mail Phone Calls Social Media
Impact	Will it improve productivity at work?	Will the use of paper be a thing of the past?	Number of MDAs/MMDAs User Experience	Progress & Evaluation Report	Electronic/Paper Questionnaires ie mail Phone Calls Electronic Questionnaires ie mail Social Media
Sustainability	Will Government have a sustainability plan for the project?	Will Government be able to maintain the project in terms of finance and Human resource?	Number of MDAs/MMDAs User Experience	M&E Report	Electronic/Paper Questionnaires ie mail Phone Calls Social Media
Postal and Courier Regulatory Commission					

Relevance	How important is the renewal of licenses?	How does license renewal help create sanity in the postal market? Is licensing the appropriate means by which the sector could be sanitized?	Number of licenses renewed	PCSRC (L & R)	Licenses renewed
Efficiency	Did PCSRC process renewals and new issuances timely?	How many renewals were completed within ten working days? Averagely how long did it take for a renewal to be completed?	Number of licenses renewed in every ten day period	PCSRC (L & R)	Subscription payment dates
Effectiveness	Did the publication archive its set goal?	Is the illegal operators list getting shorter?	Illegal operators list	PCSRC (L&R)	Illegal operators list Number of new issuances

Impact	How many operators are on the operators' list	How many new operators have been licensed out of the illegal operators list? Is application for new licence increasing?	Monitoring and evaluation report	PCSRC (L&R)	Operators Data Base
Sustainability	Is the Commission seeing a steady increase in its IGF?	Is the illegal operators' list exhausted? Can the Commission account for every operator active in the sector?	Accounts Report Monitoring	PCSRC (L&R)	Monitoring reports
Data Protection Commission					
Relevance	Why the need for the various projects?	What is the benefit of completing these projects to stakeholders?	Number of registered companies	DPC Annual Report Registrar General's Dept. database	Telephone calls Social media platforms (e.g. Twitter, Facebook and WhatsApp) • Electronic mails

Efficiency	What is the cost and time for implementing these projects?	How can waste be minimized in implementing these projects?	Number of registered companies	DPC Annual Report Registrar General's Dept. database	<ul style="list-style-type: none"> • Telephone calls Social media platforms (e.g. Twitter, Facebook and WhatsApp) • Electronic mails
Effectiveness	Will these projects improve productivity?	What tools will be used to implement these projects?	Number of registered companies	DPC Annual Report Registrar General's Dept. database	<ul style="list-style-type: none"> • Telephone calls Social media platforms (e.g. Twitter, Facebook and WhatsApp) • Electronic mails
Impact	How knowledgeable will the public be about Data privacy matters?	Will Data Controllers be able to carry out compliance assessment?	Number of registered companies	DPC Annual Report Registrar General's Dept. database	<ul style="list-style-type: none"> • Telephone calls Social media platforms (e.g. Twitter, Facebook and WhatsApp) • Electronic mails
Sustainability	Does the Commission have a sustainability plan?	Are there skilled personnel and technical resources?	Number of registered companies	DPC Annual Report Registrar General's Dept. database	<ul style="list-style-type: none"> • Telephone calls Social media platforms (e.g. Twitter, Facebook and WhatsApp) Electronic mails

6.5 Evaluation

One key feature of the Ministry's development effort is a strong commitment to conducting evaluations. The PPME Division will assess the performance of each project when completed to ascertain if the intervention has achieved its original objectives and assess the overall changes caused by the intervention.

The Ministry will adopt the following processes in the conduct of all its evaluation;

- 1) Assess the need for an evaluation.
- 2) Develop clear ideas on the rationale and objectives of the evaluation.
- 3) Determine the type of evaluation to undertake.
- 4) Specify the methods, scope and timing of the evaluation.
- 5) Identify and analyse stakeholders.
- 6) Consider the costs involved (budget).
- 7) Prepare the Terms of Reference (TOR) and contractual agreement based on items 1 to 4. The preparation of the evaluation exercise will start with the elaboration of the TOR. This will be prepared by the PPME Division in collaboration with stakeholders.
- 8) Discuss the TOR with key stakeholders. The Ministry will always have a broad consultation and agreement on the TOR that will form the basis of each evaluation.
- 9) Recruit a consultant or a team in accordance with the provisions of the Procurement Act, Act 663 of 2003.
- 10) Commission the evaluation.
- 11) Constitute a technical committee to review the work and reports of the consultant.
- 12) Disseminate the results and act on the findings and recommendations.

The Ministry shall during the plan period conduct Mid-Term and Terminal Evaluations as well as other Evaluations as needed.

6.6 PARTICIPATORY MONITORING AND EVALUATION

Participatory Monitoring and Evaluation (PM&E) refers to the practice where all key stakeholders are directly involved in the M&E design and implementation process. PM&E is a valuable tool that the Policy Planning Monitoring and Evaluation Department (PPME) would use to capture perceptions and assess whether interventions have met the expectations of the general public especially of the poor and vulnerable in society. The Ministry will adopt the **Participatory Rural Appraisal (PRA)** and **Citizens Report Card (CRC)** approaches to solicit the views and opinions of the general public on the implementation of interventions.

Annex 1: Situation Analysis of Monitoring and Evaluation of the Office of the Attorney General and Ministry of Justice

<p>SMTDP</p>	<p>The 2014 -2017 sector medium term development plan of the Office of Attorney-General and Ministry Of Justice was approved by the National Development Planning Commission. This plan was used during the four years’ implementation period. The activities and projects were largely implemented during the planned period.</p>
<p>HUMAN RESOURCES</p>	<p>The Ministry has assigned five Assistant Research Officers to conduct monitoring and evaluation exercises of the sector. The officers responsible for monitoring and evaluation lacks the adequate skills to perform the assigned task, therefore the need to give them the needed training to discharge their duty effectively and efficient. The stakeholders identified for the preparation of the Ministry’s monitoring and evaluation plan lacked the needed skills to prepare the plan which contributed to the delay in preparing the plan which affected the implementation schedule.</p> <p>Four of the assigned officers had taken basic courses in monitoring and evaluation at the Civil Service Training Centre but the officers still require the needed skills in Monitoring and Evaluation to work. The Officers lack skills in areas like database management, development planning, facilitation skills, team and consensus-building techniques and they would require report writing skills to enable them work efficiently. The PPMED requires adequate office space to accommodate staff in the unit.</p>
<p>MATERIAL RESOURCES</p>	<p>The monitoring and evaluation unit requires logistics such as computers, printers, cameras photocopiers and scanners since the monitoring and evaluation unit lacks some of the material resources to run it programs and activities in the ministry effectively those available are in adequate. Currently, the five Officers assigned to monitor and evaluate activities and programmes of the Ministry are housed in the research office. The monitoring and evaluation unit lack computers, printers, cameras, photocopier machines and scanners but share computers with their research department and it always delay work. The unit does not have a vehicle to run it activities</p>

	effectively and the internet connectivity is not reliable which slows down work. These kinds of challenges impede the process of monitoring and evaluation exercise.
FINANCIAL RESOURCES	There is always a delay in releases from Ministry of Justice and when there is release, it is inadequate to carry out Monitoring and Evaluation.
RECOMMENDATIONS	<ul style="list-style-type: none"> • The officers should be given the needed training to enable them work. • Adequate logistics should be provided to enable officers discharge their work efficiently • Ministry of Finance should release funds on time for the Ministry to carry out M&E activities • Officers assigned to conduct M&E activities should be motivated

Annex 2: Internal consistency matrix for the analysis of adopted issues

No	ISSUES	1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Adopted Issues Adopted Issues	Revenue under performance due to leakages and loopholes, among other causes	Tax burden on business	Informality and lack of an effective legal, regulatory and institutional regime for the creative arts industry	Ineffective monitoring and evaluation of implementation of development policies and plans	Weak research capacity of MDAs and MMDAs	High perception of corruption among public office holders and citizenry	Misappropriation of funds by public office holders	Increase in and diversification of economic crimes including Money laundering, tax evasion, cyber-crime	Abuse of discretionary powers	Poor documentation and record keeping	Decline in public confidence in the Legal System	High cost of justice and slow pace in getting judgment	Protracted pre-trial detention	Lack of technical training and know-how among many judges and state attorneys to handle specialty cases
1	Revenue under performance due to leakages and loopholes, among other causes	√	√	√	√	√	√	√	√	√	√	√	√	√	√
2	Tax burden on business	√	√	√	√	√	√	√	√	√	√	√	√	√	√
3	Informality and lack of an effective legal, regulatory and institutional regime for the creative arts industry	√	√	√	√	√	√	√	√	√	√	√	√	√	√
4	Ineffective monitoring and evaluation of implementation of development policies and plans	√	√	√	√	√	√	√	√	√	√	√	√	√	√
5	Weak research capacity of MDAs and MMDAs	√	√	√	√	√	√	√	√	√	√	√	√	√	√
