х

EXECUTIVE SUMMARY

The District Medium Term Development Plan (DMTDP) 2018-2021, was prepared under the policy document prepared by National Development Planning Commission(NDPC). This guideline directs and guide what to do and how it should be implemented.

The preparation of the 2018-2021 Medium Term Development Plan (DMTDP) involved various processes/stages and stakeholders. Firstly, we reconstituted the District Planning and Coordinating Unit (DPCU). Hitherto the membership was eleven (11) However, per the directives from NDPC, the current membership was scaled up to twenty-three (23).

After, the DPCU was reconstituted with appointment of the three (3) DPCU members as frontline officers to play a leading role in the preparation of the plan. This was followed by collection and collation of primary and secondary data from the Area Council, institutions, NGOs, FBOs, opinion leaders and traditional authorities. In brief, community interface was carried out to solicit needs and aspirations. The DPCU also took their time to train the six area council members on how to prepare their Area Council plans (community plans) and Action Plans. We further took them through problem tree analysis to enable them appreciate the effects of the problem in the district. The problem tree analysis was to help link development challenges to citizen involvement and assembly operations.

The DPCU tasked the six Area councils to prioritize their needs and prepare their community plans according to their scale of preferences for onward submission to the District Assembly for documentation. The DPCU also did performance review for 2014-2017 plan, so also was the District profile. Lesson Learnt form the performance review, review of the profile and situational analysis informed the DPCU to chart the District desired future.

The DPCU also looked at the District economy such as the rainfall pattern, the climatic range, humidity, the location of the district, other districts that it shares boundary with and the major road networks across the district.

Moreover, the DPCU also studied the role played by the District Assembly in local economic development, like operation of Tractor services, extension of electricity to newly developed areas, establishment of Business Advisory Centre (BAC) to give business advice to the people, drilling and mechanization of boreholes to give good drinking water to the people of the district.

As if that is all, sanitation improvement plan has been reviewed to make the district free from open defecation. The population growth, migration birth rate, death rate dependency ratio, economic active and inactive population and the growth rate of the population compared to their neighbouring district as well the regional growth rate were analysed. Settlement patterns such as linear, dispersed and nucleated settlements were also analysed.

Major sectors like Agriculture sector, education and health sectors were not left behind. The DPCU did a great job in situation analysis of the above mentioned sectors to ascertain their performances as well as underperformances and lessons learnt can be built on in the future.

The tourism sector, water and sanitation management were also dwelled on for rapid economic growth. Gender mainstreaming, child labour issues especially in cocoa growing communities were also analysed for effective planning. Harmonization of issues from performance review of 2014-2017 MTDP, the district profile and adopted issues leading to POCC analysis was also carried out.

Finally, guidelines for preparation of the plan aided the DPCU to choose relevant goals, sub goals, objectives, strategies among others in both program of Action (POA) and 2018 Annual Action Plan. We concluded by elaborating on the financial indicative plan, monitoring and evaluation plan and communication strategies.

1.0 CHAPTER ONE

1.0.1 VISION STATEMENT

The Afadzato South Assembly has a vision to become the epitome of sustainable development and a first class District Assembly in Ghana. This vision plays significant role in planning and administrative activities of the district.

1.0.2 MISSION STATEMENT

The Afadzato South District Assembly exists to improve both social and economic life of her people through efficient and effective resource mobilization, maintaining a strong agricultural base for further industrial development, being a leading tourist centre in Ghana and preserving cultural heritage of her people and the Region at large.

1.0.3 DEVELOPMENT GOAL OF THE ASSEMBLY

The District's development goal is "to accelerate the economic growth of the District towards poverty reduction through creation of the enabling environment for private investment". This Goal aims at ensuring massive infrastructural development (road, education, water and sanitation, health etc), good governance, agriculture modernization (provision of raw materials), provision of qualified labour force (human resource development) and orderly human settlement development among others.

1.0.4 CORE VALUES

The guiding principles of the District are Accountability, Client-oriented, Creativity, Diligence, Discipline, Equity, Integrity, Innovativeness, Timeliness and Transparency.

1.0.5 FUNCTIONS OF THE ASSEMBLY

Afadzato South District Assembly is mandated to perform a number of functions. This is stipulated by the Local Governance Act, 2016 (Act 936) and other legal documents. The Assembly:

- ➢ Is responsible for the overall development of the District
- Exercises political and administrative authority in the District and provides guidance, gives direction and supervises other administrative authorities.
- Promotes and supports productive activity and social development in the District.
- Is responsible for the development of infrastructure and provide district works and services such as water, educational, health facilities, etc.
- Is responsible for the development, improvement and management of human settlements and the environment and sanitation.
- In co-operation with appropriate national and local security agencies is responsible for the maintenance of security and public safety in the District.
- Is responsible for the preservation and promotion of cultural heritage within the Municipality.
- Has the responsibility to guide and support sub- district structures, other public agencies and local communities to perform their functions.
- Promotes and encourage other persons or bodies to undertake development projects, monitor, assess and evaluate their impact on the development of the District and national economy.

1.0.6 PERFORMANCE REVIEW OF THE 2014-2017 MTDP

The existing MTDP for 2014-2017 was reviewed to ascertain the level of performance of implementation of programmes and projects and the reasons for successes and failures during the planned period. The review focused on the performance of the previous plan with respect to the strategies adopted, availability of funds, community participation, acceptability and among other things.

The formulation of the District Plan was anchored on the seven pillars of the National Policy Framework which represents the National Development Policy Framework - Ghana Shared Growth and Development Agenda (GSGDA) II for 2014-2017 with the following themes: Ensuring and sustaining micro economic stability; Enhancing competitiveness of Ghana's private sector; Accelerated agriculture modernization and sustainable natural resource management; Oil and gas development; Infrastructure and human settlement development; Human development, productivity and employment and Transparent and accountable governance. Reduction of poverty through policies aimed at narrowing all forms of inequalities and with the hope of achieving the target set in the Millennium Development Goals (MDGs) was the focus of the National Policy Framework.

Assessment of the performance of the plan revealed that the District focused mainly on four areas of the GSGDA themes during the period under review. These were Accelerated Agricultural Modernization and Sustainable Natural Resource Management, Human Development, Productivity and Employment, Transparent and Accountable Governance, and Infrastructure and Human Settlement Development. The assessment further revealed that some of the proposed projects/programmes earmarked for implementation were not completed or implemented.

Some constraints and challenges faced by the District during the implementation of the plan included inadequate and delay in the release of the DACF and DDF, poor Internally Generated Fund (IGF) mobilization and inadequate information on some

projects/programmes, including that of the GETFund. Adequate resources were, therefore, required to be committed to the District towards achievement of its development objectives for the 2014-2017 medium term plan period.

Funding from both internal and external sources were utilised for the implementation of the plan under review. These were the District Assemblies' Common Fund (DACF), District Development Facility (DDF), MP's Common Fund, Internally Generated Fund (IGF) and GETFUND. The table 1.01 below shows the performance review of the 2014-2017 DMTDP:

Programmes	Sub-programme	Extent of implementation of all programmes	Policy outcome indicator.	Baseline (2013)	DMTDP Target (2014- 2017)	Achieve ments	Remarks.
Thematic Area: Ens	suring and sustaining macroeconomic	stability.					
	mprove fiscal revenue mobilization a	and management.					
Create and maintain a reliable computer- based revenue database system.	Intensify supervision of all revenue collection and training of revenue collectors.	Fully implemented	Improvement in IGF.	1	4	96%	Implemented
	Organise Public education on rates /fees payment consciousness.	Implemented.	Public Education forum organized.	3	8	95%	Implemented
	Acquired three motorbikes for revenue mobilization.	Not fully implemented.	One motorbike acquired.	1	3	33.3%	Not fully implemented
	celerated Agriculture Modernization						
	VES; Promote livestock and poultry	development for food	security and income gener	ration. 2 Promot	e Agriculture I	Developmer	t.
To enhance Agricultural Production and productivity.	National farmer's day celebration.	Fully implemented.	National farmers day celebrated	1	4	100%	Implemented.
	Strengthen FBOs to serve as input and supply agent (training of farmers).	Fully implemented.	Farmer based organizations strengthened.	4 Agro input shops.	14	71.5%	The District Agricultural officers do not have adequate logistic support to carry out effective monitoring in the district.
	Educate and train consumers on appropriate food combination of available foods to improve nutrition.	Not fully implemented.	Number of consumers trained and educated on appropriate food combination for nutritional improvement.	280 new home gardens and back yard poultry.	445 farmers.	57%	150 farm families were educated on the various classes of food and their uses for good health

Table 1.01: Performance review of the Assembly (2014-2017)

Programmes	Sub-programme	Extent of implementation of all programmes	Policy outcome indicator.	Baseline (2013)	DMTDP Target (2014- 2017)	Achieve ments	Remarks.
	Intensify field demonstration / field trips/tours to enhance the adoption of improved technologies.	Not fully implemented.	Field Demonstration of improved technological method of farming carried.	50 field demonstratio n improved maize and ruminants were implemented	650 farmers	30%	A total number of 17 field demonstrations carried out in cowpea, maize, rice, garden eggs and cassava in eight(8) communities to teach farmers improved technologies in farming
	Provide adequate and effective extension knowledge in livestock management to men and women farmers.	Not fully executed.	Total number of men and women farmers trained in livestock management.	1720 farmers.	9914 farmers.	52%	A total of 50 visits were made to livestock farmers by AEAs
	Hold semi-annual meetings with private sector and civil organisation.	Fully implemented	Total Number of meetings held with private and civil organization.	4	65	95%	
	Identified, update, and disseminate Existing technological packages(AEAS)	Fully implemented.	Percentage of technological packages updated and disseminated.	8	48	97%	A total of 140 farm and home visits were made by Agric. Extension Agents ((AEAs). this includes 90 farm visits and 50 home visits
	Training in record keeping and financial management to men and women farmers.	Not fully implemented.	Total Number of men and women who received training in record keeping and financial mgt.	4	30	51%	Unavailability of fund was a militating factor against its implementation.

1.1.0 Analysis of Financial Tables: Personnel Emoluments

From the table above, the 2014 compensation of employees' budget performed below its targeted value. The percentage of performance was 16.90%. This was as a result of inadequate data on compensation of employees. The finance department was unable to cumulate the total monthly compensation of the assembly. The 2015 performance was 8.19% of the budgeted value. The reasons for the low performance were the same as the reasons assigned to the 2014 performance.

In 2016, the situation was taken into consideration and efforts were made to upgrade the accounts department on compensation for the various staff in the assembly. The percentage was 91.92 of the budgeted figure.

In 2014,goods and services expenditure performed at 82.06% whilst capital expenditure stood at 26.16%. The budget performed poorly against the annual budgeted figure of 4,862,214.00 of which the total expenditure was 2,133,777.21 representing 43.89%. Revenue on the other performed at approximately 44% of the budgeted figure of 4,854,204.97.

In 2015, the assembly revenue budgeted 5,123,744.00 and realised 3,069,909.40 representing 59.92%. The performance was a little over the 2014 budget performance. Expenditure on the other hand stood at 3,823,907.19 making 74.63%. This was an impressive performance compared to the previous year.

The 2016 budgeted revenue for the assembly was 6,299,697.42 and 4,008,567.72 was realised representing 63.64% of the budgeted figure. The performance of the budget was very moderate yielding. Expenditure performance was 87.53% of the total budgeted figure. This was a high yielding performance for the year.

As at July 2017, the total expenditure performance was 21.65% of the total budgeted figure for the assembly. The performance was 18.20% of the budgeted revenue of 6,445,156.57. The performance is expected to reach 60% by close of the year as per the releases so far.

The overall performance for the medium term has not been of the best. However the situation is expected to improve over the next medium term.

1.1.1 KEY CHALLENGES DURING IMPLEMENTATION STAGE.

The performance of the District for the period under review was satisfactory. Most of the projects and programmes outlined for implementation from (2014-2017) a total of one hundred and eighty eight projects,(188) majority of the projects that is 61.2% were fully implemented,22.9% were on –going, and about 15% has not been implemented but none was abandoned. The challenges we encountered during the implementation were outlined below

- Delays in releases of funds especially the District Assembly Common Fund. Also the releases of the District Development Facilities DDF was not regular.
- Too many interference from central government especially source deduction of the DDF.
- The Assembly inability to mobilize enough internally generated funds to undertake capital projects.
- Continuous review of contract sum of some projects made it difficult to work within stipulated budgets hence eating into other vital projects allocations.
- Frequent interference from the political head with projects which are not captured in the plan resulted in the implementation of projects outside the plan(MTDP 2014-2017)
- The plan was over ambitious and loaded with too many projects and programmes which cannot be implemented in the plan period.
- Lukewarm attitude of some stakeholders in project management resulted into shoddy work delivery.
- Inadequate logistics to embark on routine supervision and monitoring of projects and programmes.

1.1.2 LESSON LEARNT WITH IMPLICATION FOR 2018-2021 MEDIUM TERM DEVELOPMENT PLAN

- > There must be a thorough consultation during the plan preparation and implementation
- The Assembly should avoid implementing programmes and projects outside the MTDP if the need arises a review must be done.
- The Assembly must collaborate with other decentralized departments in the implementation of cross-cutting issues in the plan.
- Before the plan is prepared, enough consultation with the stakeholders should be carried out so that the people aspiration would be well represented.
- Annual, midyear, and quarterly reviews should be taken seriously for effective implementation of the plan.

1.1.3 ANNUAL BUDGET TREND (PAST 5 YEARS)

The annual budget obtained for the Afadzato south district was for over a 5 year period; from 2012 to 2016. Over the five years there was progressive increase in the revenue, and there was no deficit recorded; only surpluses. This shows that the District in terms of the total amount of revenue generated is largely performing well since its establishment (See Figure below).

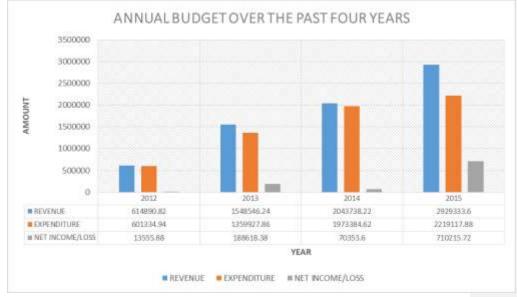

Fig 1.1: A bar chat of annual budget of Afadzato South District Assembly.

The highest revenue and expenditure recorded were for 2015, which are 2929333.60 and 2219117.88respectively and the least recorded was for 2012. In 2012, the district recorded a surplus of about 13555.88 and between that time and 2013, there was a 151% increase. Between 2013 and 2014, although not as much there was yet an increase of about 32% and a net income of about 188618.38 was recorded for 2013. From 2014 to 2015, surpluses of 70353.60 and 710215.72 were made respectively and the revenue increased by 43%.

1.2 THE DISTRICT PROFILE

1.2.0 Introduction

The Afadzato District is one of the 46 administrative districts created in 2012 with its capital at Ve-Golokuati, about 58km from Ho, 20km from Hohoe and 200km from Accra. The District was carved out of Hohoe Municipality and legally backed and governed by two main Acts namely; Local Government Act, Act 936 of 2016-`

, and PNDCL 327. The District was established by Legislative Instrument 2079 and inaugurated on 28th June 2012. The District shares boundaries with the Republic of Togo to the East, Ho West District on the southeast. The southwest of the District shares common boundary with South Dayi District; while on the northern section is Hohoe Municipal and the northwest is Kpando Municipal and North Dayi District. The total land area of the District is 553.0 square Kilometres about 3.06 % total land size of the Volta Region. Moreover, the location of the district has the potential to boost booth local and foreign trade.

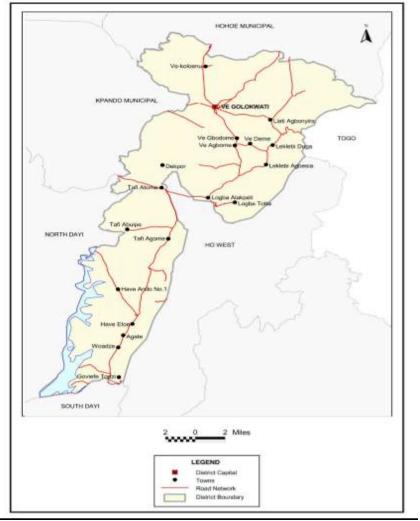

The district lies in the wet semi equatorial climatic zone. Annual rainfall is between 1,016mm-1,210mm with an average of 4-5 months dry season experienced between November and April. Temperatures are high throughout the year and range from 26° C in the coolest months to about 32° C in the hottest months usually just before the rainy season. The district is located in the forest-Savannah transitional ecological zone of Ghana. The predominant vegetation found in the district is Semi-Deciduous and Guinea Savannah Woodlands. Some timber species found in the forest include Wawa, Obeche, Odum and Mahogany.

The landform of the district is a combination of both highlands and lowlands. The low lying valley have swamps which are used for rice cultivation. The presence of Akuapim Togo Ranges in the district influence rainfall pattern in favour of agriculture whilst the availability of tourist site such as mountain "Afadza" and the waterfalls could serve as source of revenue for the district. Mountain "Afadzato", the highest mountain in Ghana (880m) is in the district. Some important rivers found in the district are River Dayi, River Koloe, and River Aflabo. Another important feature is the location of Volta Lake at the south western part of the district which boost fishing activities in the district. The District Assembly is the highest political and administrative authority in the district. It has deliberative, legislative and executive authority and is charged with the responsibility for the development of the district. The Assembly consists of 32 members comprising 10 government appointees and 22 elected members with 3 of them being females.

Generally, the District is dominated by the Ewe ethnic group. There are 11 traditional areas in the District with each being headed by a paramount chief. However, in his absence, his Right Wing Chief acts. There are several festivals celebrated to mark different events in the district of which are historic events, thanksgiving and harvest of a new crop.

1.1.1 5 (FIVE) ROLE(S) OF THE ASSEMBLY IN LOCAL ECONOMIC DEVELOPMENT.

The district assembly plays some major roles in the local economic development of the Afadzato South district. These include; establishment of business advisory centre with which they provide business advisory services to the enterprises available in the district; expansion of market structures to meet the marketing needs of the growing population; formation of business groups, provision of tractor services and helping to connect communities to the national grid.

DISTRICT MAP OF AFADZATO SOUTH

Fig 1.2: District map of Afadzato South.

1.2.1 LOCATION AND SIZE

The district is located in the middle belt of Volta Region of Ghana and lies within longitude $0^0 20$ E and $0^0 35'$ E and latitude $7^0 5'$ N and $6^0 40'$ N. The District shares boundaries with the Republic of Togo to the North East, Ho West District on Southeast. The southwest of the district shares boundary with South Dayi District; while on the northern section is Hohoe Municipal and the northwest is Kpando Municipal and North Dayi District. The total land area of the district is 553.0 square kilometres which is about 3.06% of the total land size of Volta Region. This implies that the district has adequate land size for future development. The strategic location of the district with boundaries

with Kpando Municipal, Hohoe Municipal and the Republic of Togo will enhance free flow of goods and services that has the potential to boost both local and foreign trade.

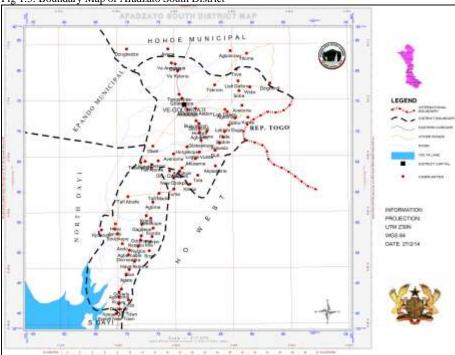

Fig 1.3: Boundary Map of Afadzato South District

Source: Afadzato South District Assembly survey, 2017

1.2.2 DEMOGRAPHY

AGE DISTRIBUTION

1.2.2.1 DEMOGRAPHIC CHARACTERISTICS OF THE DISTRICT

The total population of the district per the 2010 Population and Housing Census is 95,030 with males counting 46,272 constituting 48.7 percent whilst female counting 48,758 representing 51.3 percent. The population of the district constitutes 4.5 percent of the regional population. The district has more of its people in the rural areas (81.3%) compared to those in the urban areas (18.7%). The projected population of the district for 2014 using the regional inter censual growth rate of 2.5 is 104,894. There are 51,075 males constituting 48.7 percent whilst female (53,819) form the remaining 51.3 percent. The Afadzato South District operates with six Area Councils namely Have/Nyagbo, Logba-Tafi, Weto, Leklebi, Ve and Liati Area Councils. Population distribution in the Area Councils is as shown in Table 2.1 below.

Table 1. : Population Distribution by Area Council	Table 1. :	Population	Distribution	by	Area	Council
--	------------	------------	--------------	----	------	---------

Area Council	Population
Have/Nyagbo	11504
Logba-Tafi	23597
Weto	18827
Leklebi	14029

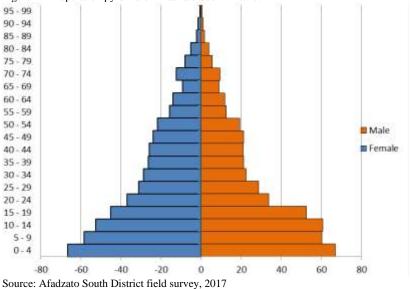

Ve	17697
Liati	9376
Total Population @ 2010 Population & Housing Census	95,030

1.2.2.2 AGE AND SEX COMPOSITION

Considering the age and sex composition in the Afadzato South District, females dominated in significant levels of the age distributions. However, available data revealed that 38.5 percent of the district population is less than 15 years (0-14 years) whilst 7.4 percent of the population is above 65 years (aged) and majority of the population (54.9%) falls within age group 15-64. This accounts for the relatively high age dependency ratio of 84.7 in the district compared to the regional figure of 81.3. This implies the district needs investments in health facilities and other infrastructure that would be beneficial to the aged and create employment for the youth to enable them cater for the aged.

The distribution presented above shows that the district is characterized by youth as 54.9 percent of the populace are within the employable age group of 15-64. However, significant proportion of this age group during data collection revealed underemployment and unemployment challenges in the district. This has therefore resulted to high dependency on the few working group in the District hence reasons for the high dependency rate in the district.

1.2.2.3 FERTILITY AND MORTALITY

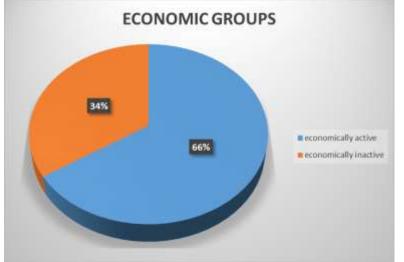

According to the 2010 PHC District Analytical Reports, the total fertility rate for a woman aged 15-49 is 3.9 children per a woman which is higher than that of our neighbouring districts, (i.e. the TFR for Kpando Municipal is 3.0, Hohoe Municipal and South Dayi District is 3.3 each). The district fertility rate is again higher than the regional average of 3.4 children per woman. The census report again indicates that per every 1000 population in the district close to ten people (9.8 people) die which is more than regional crude death rate of 8.8. There is the need for the district to carry out Family Planning and other activities that would enhance good health

1.2.2.4 ECONOMICALLY ACTIVE AND INACTIVE PEOPLE

Economically inactive people according to the international labour organization are basically those who are not part of the labour force of an economy. Hence they are neither employed nor

unemployed. The economically active people on the other hand are the part of the population of either sex who furnish the supply of labour for the production of economic goods and services. The ratio of former to the latter is known as dependency ratio which gives a measure of the pressure on the productive population and the consequent productivity growth of the economy. Approximately 66% and 34% of the population aged 15-64 years, are economically active and inactive, respectively. This depicts an economic dependency ratio of about 52%, which means that for every 100 persons who are economically active, there are 52 dependents (economically inactive) to be taken care of. A lower dependency ratio is more likely to increase productivity/growth and vice versa. A rise in the productive population will increase productive capacity and could lead to a higher long run trend rate of economic growth. The Afadzato South district can be said to have a high dependency ratio and therefore an increased burden on the economy as well as the working populace hence the need to develop means to increase productive avenues to creating jobs for the dependant population.

Source: 2010 PHC

1.2.2.5 MIGRATION

Majority of the population thus, about 74.6% are natives whilst 25.4% of the population are immigrants. The high rate of immigration recorded could cause culture infiltration in the district which could result in conflict of interest among the various ethnic groups. Again with a high percentage of natives, there is a likelihood of them contributing highly to development project as well as ensuring sustainability of these projects.

1.2.3 CULTURAL STRUCTURE

According to history, the Ewes migrated from Notsie in the Republic of Togo in the early seventeenth (17th) century to settle in their present location and many other places in the Volta Region. The essence of their migration was to escape from the tyranny of King Agorkorli. Who ruled the ancient ewes with tyrannical rules, subjected them to torture and humiliation. As a result his people devised means to escape from his tyrannical rules.

1.2.4 ETHNICITY AND LANGUAGE

The major language spoken in the district is Ewe. There are different ethnic groups found in the district. However, the major ethnic groups found in the district are the Ewes, Logba, Tafi and Nyagbo. Major dialects spoken by these ethnic groups are Ewe, Akpana, Tegbor/Bagbor and Tutrugbu respectively.

1.2.5 FESTIVALS

There are several festivals celebrated to mark different events in the district. Some of these festivals are celebrated as a sacrifice of thanks giving, to mark a historic event and the harvest of a staple crop. Festive occasions are moments of family re-union and initiation of development projects and programmes through fund raising activities. During these festivals, the cultural heritage of the people is exhibited. The major festivals celebrated in the district include;

Festival	Celebrated by Time		Purpose of celebration					
Lukusi	Ve Traditional	November	To mark their migration from their ancestral home					
	Area	every year	(Notsie).					
Agadevi	Have	June every	To mark their survival from a historic landslide					
	Traditional area	year	which occurred on 15th June, 1933 destroying severa					
		-	properties but no live was lost.					
Komabuza	Liati People		to mark their annual home coming					
Dayi Titsoke	Dayi Titsoke Tafi Traditional		to mark the crossing of River Dayi					
	area							

Table 1-1 depicting the festivals celebrated by the people of Afadzato South.

Source: Afadzato South Field Survey, 2017.

1.2.6 RELIGION

The major religious groupings that exist in the district include the following; Christians (92.9%), Islam (1.8%), Traditionalist (2.0%) and others (1.4%). However, close to two percent (1.8%) of the population do not belong to any religious group. Among the Christians, the Protestants (Anglican Lutheran etc) forms the majority (37.2%) followed by the Pentecostal/Charismatic (28.2%). The Catholics constitute

19.8 percent of the Christian groups found in the district, (2010 PHC). The harmonious relationship and peaceful coexistence among the various religious groups has contributed to peace and security the district is enjoying.

1.2.7 SETTLEMENT PATTERNS

The settlement pattern and linkages in the Afadzato South District Assembly are well defined on metal stands in the various communities easing community location. The district has a mix of linear, nucleated and dispersed settlement patterns. The linear settlements are found along the Accra-Hohoe and Have-Kpando road whilst the nucleated settlement patterns are found in urban areas in the district which includes; Have Etoe, Golokuati, Logba Alakpeti and Koloenu. The dispersed settlement patterns are common in rural areas of the district. However, some settlements in the district do not follow any layout patterns making it difficult to be accessed in times of disaster.

1.2.2 HIERARCHY OF SETTLEMENT

The analysis of the Scalogram was used to come out with the functional hierarchy of settlements in the district. For the purpose of analysis, the first 20th settlements are classified into 1st, 2nd, and 3rd order settlements based on their functional complexity using their population and available services. The following are the criteria for the classification

Level of	Order of	Number of	Settlement					
Hierarchy	Settlements	Settlements						
1 st	Above 5000	5	Koloenu, Golokuati, Have Etoe, Agate Logba Alakpeti					
			Logda Alakpeti					
2 nd	3,000 - 5,000	6	Goviefe Todzi, Leklebi Duga, Logba Tota,					
			Ve-Deme, Tafi Abuife, Ve-Agbome,					
3 rd	Below 3,000	7	Tafi Agome, Have Ando 1, Ve Gbodome,					
			Woadze, Leklebi Agbesia, Tafi Atome,					
			Liati Agbonyra,					

Table 1.3: A Table showing hierarchy of settlement of the district

Source: Afadzato South District Field Survey, 2017

The first order settlements are influenced by the concentration of population, social and other economic activities such as markets, higher educational institutions among others. The implication here is that potential natural resources areas are deficient in services and may hinder the attraction of investments. The need for services in these natural resource areas to attract population and investment cannot be over- emphasized. It is necessary, therefore, to consciously ensure that the service needs of these areas in district are met.

1.2.3 RURAL-URBAN SPLIT:

The district has about eight six (86) communities of which only five (5) have attained urban status with population of 5,000 and above. This implies that only 7.3 percent of settlements in the district are urban which goes to emphasize that the district is basically rural.

1.2.4 MARKETING ACTIVITIES IN THE DISTRICT

The district has 3 market centres for trading activities, which are deemed insufficient for marketing activities because of the growing population of the people. Apart from the growing population, the assembly is embarking on a lorry park project which is near completion and would need a market to make it more efficient and effective. Therefore, it would be helpful if the government can support the lorry park project with the needed market as it would indeed enhance the utilization of the lorry park. Marketing of products inside the district is achieved by displaying them at market centres, hawking, van hawking and through the use of community information centres. However, outside the district, products are advertised on radio and some traders cart the products to market centres outside the district. The district has economic interactions with Kpando, Hohoe and South Dayi because they share common borders.

1.2.5 POVERTY MAPPING

The below table depicts poverty pockets in the district. The order is from the worst poverty stricken to the least poverty stricken.

Pocket	Location	Characteristics/Manifestation
1 st Pocket	Have and Goviefe	✓ Feeder roads not in good shape
	areas	✓ Rugged terrain
		✓ Limited arable land
		✓ Irrigation facilities not developed
		✓ Has good rainfall pattern

 Table 1.4: Poverty Pockets in the district

Pocket	Location	Characteristics/Manifestation
		✓ Prone to rain storm disasters
		✓ Banana cultivation wide spread
2 nd Pocket	Nyagbo, Logba,	✓ Rugged terrain
	and Tafi areas	✓ Vast arable land
		✓ High incidence of bushfires
		✓ Smuggling activities prevalent
		✓ Lack of irrigation facilities in the dry season
		✓ Has many migrants
		✓ Suitable for tree cash crops e.g. cocoa and oil palm
3 rd Pocket	Liati and Leklebi	✓ Lack of good road network
	areas	✓ Two seasons of rainfall
		✓ Lack of irrigation in the dry season
		✓ High incidence of bushfires
		✓ Important cassava growing area
4 th Pocket	Ve areas	✓ Lack of good roads
		✓ Vast arable land
		✓ Has good rainfall pattern
		✓ Suitable for tree cash crops e.g. cocoa and oil palm

1.2.5.1 KEY POVERTY ISSUES

Poverty is associated with the undermining of a range of key human attributes, including health. The poor are exposed to greater personal and environmental health risks, are malnourished, have less information and are less able to access health care; they thus have a higher risk of illness and disability. Conversely, illness can reduce household savings, lower learning ability, reduce productivity, and lead to a diminished quality of life, thereby perpetuating or even increasing poverty. Poverty is often defined in absolute terms of low income, thus living on less than US\$2 a day, (WHO report). For the purpose of this survey, some poverty indicators were adopted by the district stakeholders. The indicators, causes and coping mechanisms identified are presented in the table below;

Table 1.5:	Coping	Mechanisms	s of Poverty	Situation i	n the District

Poverty Indicators	Causes of Poverty	Current Coping Mechanism
 Poor housing conditions 	• Use of manpower in	• Dependence on
Low level of formal education	agriculture	relatives and friends
Low income levels	• High birth rate	• Petty trading /

Source: Afadzato South District field survey, 2017

The following are the proposed interventions to addressing the poverty issues identified.

- Provide training in employable skills for people especially the youth and PLWDs
- Provide micro financing for small scale businesses (eg. traders and farmers)
- Establish small scale processing industries in the communities (e.g fruit processing, palm oil extraction, gari processing, soap and body cream processing)
- Develop tourist sites in the district
- Support the Family Planning Unit of the District Health Directorate to reduce birth rate
- Provide small scale irrigation schemes
- Provide both economic and social amenities in the villages such as good roads, potable water, education facilities, health facilities and proper sanitation facilities.

1.2.6 DISTRICT ECONOMY

The district economy discusses the major economic activities undertaken in the district. According to 2010 PHC district analytical report, about 64.0 percent of the population 15 years and older are economically active (employed and unemployed population) whereas the rest 36.0 percent are economically not active (those engaged in home duties, full time education, on pension/retirement, disabled/sick, too old/young and others). The major economic activities that are undertaken in the district are as follows;

1.2.7 RESOURCE ENDOWMENT

1.2.7.1 Social resource

The social resources available in the district include; youth and professional associations. Such resources serve as potentials in fostering unity among individuals to promote local and social development. These therefore need to be offered the needed support for development. The assembly however has not exploited this resource in the attempt for socio-economic development, moving forward, these associations could be encouraged to pick up task that will not only foster unity in the district but will boost revenue generation.

1.2.7.2 ECONOMIC/FINANCIAL RESOURCE

Table 1.6 depict the resource endowment in the district.						
	1. Financial institutions					
Economia/Einensial (E.a.	2. Agro-processing					
Economic/Financial (E.g. Industry/Enterprises)	3. Real estate					
mausu y/Emerprises)	4. Transport					
	5. Wholesale and retail services					
Human (E.g. Skilled and	Skilled: teachers, technicians, clerical support workers, plant and					
Unskilled labour) machine operators, health professionals, Artisans etc.						
	1. Rivers					
Natural (E.g. Forest/Agric.	2. Arable lands					
lands)	3. Forest resources					
	4. Tourist sites					
	1. Telecommunication network					
Physical (E.g. Infrastructure)	2. Road network					
rnysicai (E.g. initastructure)	3. Health facilities					
	4. Educational infrastructure					

1.2.7.3 PHYSICAL RESOURCE

The physical resources available in the district include; road network, health facilities, educational infrastructure, fuel and gas facilities and telecommunication facilities. These are the resources that are utilized by the human resources to ensure a healthy, safe and sound society as well as a long term economic growth in the district.

1.2.7.4 ECONOMIC/FINANCIAL RESOURCE

The economic resources in the district include; Financial institutions, Agro-processing industries, real estate developers and transport services. These offer economic and financial benefits to individuals, businesses and the district at large. Just like the social resources, the assembly has not exploited this resource in the attempt for socio-economic development. Moving forward, these associations could be encouraged to pick up tasks that will particularly boost revenue generation in the district.

1.2.7.5 HUMAN RESOURCE

The human resources comprise both skilled and unskilled labour. They include; technicians, clerical support workers, plant and machine operators and health professionals. These are the people who offer labour to develop the district. It is said that without human resources, all the other resources cannot be used for the development of the economy. It is therefore necessary to invest into the human resources through training and capacity building in order to ensure a better human resource for a better district and nation as a whole.

1.2.7.6 NATURAL RESOURCE

The Afadzato South district has natural resources such as Rivers, Arable lands, Forest resources and Tourist sites. In order to enhance the utilization of these natural resources, there should be measures to adopt sound and efficient conservation practices without compromising the good quality of the resources. The effective utilization of these resources and providing the needed support will go a long way to attract tourists, generate income and improve the general economic development of the local people.

1.2.8 LOCAL ECONOMIC- BASED ENTERPRISES

The local economic-based enterprises available in the district for development include; five (5) agricultural sectors, ten (10) hospitality enterprises, and three (3) tourism sites. The major activities that take place in these sectors are farming and food processing, provision of hospitality services and recreational activities. These enterprises contribute immensely to the district by providing employment for the people and serving as a source of revenue to the assembly. According to table 1.7, the assembly supports these enterprises by providing business advisory services, providing agricultural extension officers, technical advice and support and promoting some of their services on their website.

Economic-Based	Activities	No. of	Contribution to	Form of support provided to the				
Enterprises (list)	Activities	enterprises	LED	Local Economic-Based Enterprises				
	Farming and		Employment	Business advisory services				
Agriculture	Farming and food processing	5	and revenue to	Agric extension services				
-	100d processing		assembly	Tractor hiring at subsidized rate.				
			Employment	Business advisory services				
Hospitality	Lodging	10	and revenue to	Technical advice				
1 0			assembly	Publicity				
	Ladaina and		Employment	Technical support,				
Tourism	Lodging and recreational	3	and revenue to	Promotional and publicity services				
	recreational		assembly	on website				

Table 1.7 depict Economic Based Enterprises in the district.

1.3 DISTRICT NEEDS IN ENHANCING LOCAL SOCIAL AND ECONOMIC DEVELOPMENT.

The district in its quest to achieving LED has several needs; technical, business, educational, managerial, health, infrastructural and financial. Technically, the district has need for mechanization of agricultural machinery, irrigation facilities and equipment as well as technical officers. The Assembly further has need for credit facilities which could support the growth of their businesses.

As way of developing the managerial skills of individuals, the Assembly has need for building the capacity of the personnel in local economic development so that they would be developmentally oriented. They also have educational needs like entrepreneurial skill development training for assembly staff and improve the skills of students in business plan and proposal writing.

In relation to health, the district has need for more health personnel and facilities as well as accommodation for health workers especially those who have been posted from afar. It requires well equipped district hospital and trained health professionals. Infrastructural needs include good road networks, telecommunication networks, water and constant energy flow. Lastly, the district needs international donors/ local financial support for the training of the local people and also to provide technical support to the district.

ITEM/SECTOR	NEED	
Technical	Agriculture mechanization machinery	
	Irrigation facilities and equipment	
	Technical officers	
Business	Credit facilities	
Managerial	Capacity building in local economic development	
Educational	Entrepreneurial skills development of assembly staff	
	Business plan and proposal writing skills	
Health	More health personnel (Medical Doctors and Physician Assistants)	
	Health facilities (especially a district hospital)	
	Accommodation for health workers	
Infrastructure	Good road network	
	Telecommunication network	
	Water (Mechanized boreholes)	
	Energy (solar power supply)	
Financial	International donor/local financial support to train the local people and	
	provide technical support	
Others		

Others

Table 1.8 depict District's needs in enhancing local social and economic development.

1.3.0 ROLE(S) OF DISTRICT IN LOCAL ECONOMIC DEVELOPMENT

The district assembly plays some major roles in the local economic development of the Afadzato South district. These include; establishment of business advisory centre with which they provide business advisory services to the enterprises available in the district; expansion of market structures to meet the marketing needs of the growing population; formation of business groups, provision of tractor services and helping to connect communities to the national grid.

1.3.1 DISTRICT'S ECONOMIC AND SOCIAL DEVELOPMENT EXPECTATIONS

The Afadzato south district has varied and quite specific economic and social development expectations for the next five years. The economic expectations of the Assembly are developing 3 tourist sites, construction of three (3) additional markets, provide capacity building training for 1000 local businesses and to invest in large scale cassava production. These can boost the amount of IGF that contributes to the total revenue for the district. The social expectations of the District are to build a district hospital, clear all schools under tree and provide water to at least 40 communities.

Table 1.9 depict the District Economic and Social Development Expectation.

▲	· ·
ECONOMIC	SOCIAL
Development of three (3) tourist sites	Establish district hospital
Construct three (3) additional markets	Clear all school under trees
Provide capacity building for 1,000 local	
businesses	
Invest in larger scale cassava production	Provide water to at least 40 community

1.3.2 SOCIAL DEVELOPMENT NEEDS

The districts social development needs stem from the current status of some social facilities available to them. These needs can be grouped under health, educational, water, and sanitation or sanitary needs. The following tables give a summary of the current status of the facilities available to the district.

1.3.3 HEALTH

The district has 19 and 2 public and private health facilities respectively, which employs 2 physician assistants, 92 nurses, 20 midwives and 28 supporting staff. With respect to the population, it is realized that these health facilities are not enough to actively cater for all the people in the district hence the need for an additional hospital (a district hospital) and trained professional health personnel (especially doctors and physician assistants). They also need equipment to equip the existing facilities as well as the new one they are anticipating.

Table 1.10: Health facilities in the district

21	No. of health ility	Number of Personnel					
Public	private	Medical Doctors	Physician Assistants	Nurses	Midwifes	Support staff	
21	2	Nil	3	92	20	28	

Table 2.1: Number of Health Facilities by Types

Type of Health facilities	Number.
CHPS Compound	11
Health Centre	8
Clinics	3
Maternity Home	1

The table above shows the number of health facilities by types in the district, total number of CHPS compound is 11, that of health centre is amounted to 8 and Clinics and Maternity Homes are 3 and 1 respectively. This shows that the district has no Hospitals and so therefore all the referral cases from the smaller facilities should be catered for in Hospitals outside the district. With respect to the population, it is realized that these health facilities are not enough to actively cater for all the people in the district hence their need for an additional hospital (district hospital) and trained health professionals especially doctors and physician assistants.

Number of Health Facilities by Ownership

Ownership	Number	
Public	19	
Private	2	
CHAG	2	

Table 2.2 shows the number of Health Facilities by ownership.

Public facilities are nineteen (19), private facilities are two (2) and CHAG facilities are also two (2) this implies that public facilities dominated in the district. The reason associated with this phenomenon could be the district is purely rural and lack so many basic amenities, secondly majority of the people are poor and cannot afford to patronize expensive private facilities hence it is not lucrative for investors to go into private hospital business.

Table 2.3: depicted the reported cases of Malaria, Hypertension, Diabetes and Incidence of snake bite reported cases across the district.

Disease	2014	2015	2016
Malaria	21776(31.1%)	22433(28.7%)	24421(29.4%)
TB	18	32	35
Incidence of snake bite	8	4	5
Hypertension	290	896	324
Diabetes	38	51	30

Source; District Health Directorate, 2017.

From the data above, malaria cases showed a constant rises from 2014 with reported cases of 2177(31.1) and increased to 22433(28.7%) in 2015and further increased to 22421(29. 4%). Hypertension recorded 290 cases in 2014 and increased to 896 in 2015 but decreased sharply to 324 cases in 2016. That of diabetes, the trend is the same. 30 reported cases in 2014, and increased to 51 in 2015but however decreased to 30 cases in 2016. The cases of snake bite was somehow different from the other three. It recorded 8 cases in 2014 but decreased in 2015 and increased thereafter in 2016. With malaria advocacy programme going on in the district, there is a likelihood that the trend would reduce to the barest minimum.

The District Health Insurance Scheme.

NHIS	2014	2015	2016
Subscribers.	42779	48721	44103

Table 2.4 depicts District Health Insurance Scheme in the District.

The district health insurance scheme in Afadzato South district is running smoothly .The total number of health facilities accredited with NHIS in the district is 19.

From the table above, 42779 subscriber were recorded in 2014, the number increased to 48721in 2015 and decreased thereafter in 2016.

Period	2014	2015	2016	
In a day	141	161	143	
In a week	991	1134	1006	
In a month	4293	4912	4361	
In a mid-year	4293	9824	8722	
Annually.	51520	58945	52332	

Table 2.5: Number of patient that visits health facilities

Source; District Heath Directorate.

A careful study of the table shows that more patients attended the facilities in 2015 annually, in a mid-year, in a month, in a week and in a day than any other two years. Available records shows that the district recorded zero infant mortality and maternal mortality over the period.

1.3.4 AGRICULTURE SECTOR

Afadzato District thrives on primary economic activities such as agriculture which employs majority of the household population. The key agricultural activities include crop farming, livestock rearing, fish farming and agro-forestry.

The main economic activity in the district is Agriculture. The agriculture sector employs 72.8 percent of the economically active household in the district (2010 PHC). The district lies in the wet semi-

equatorial climatic zone and the forest-savannah transitional ecological zone of Ghana with annual rainfall between 1,016mm-1,210mm. The predominant vegetation found in the district is Moist Semi-Deciduous Forest and Guinea Savannah Woodlands. The main soil groups in the district are ochrosols and oxysols which support the production of both food and cash crops. The district also endowed with river bodies such as River Dayi and River Volta which is a potential for aqua culture. The presence of savannah grassland also provides grazing field for livestock keepers

1.3.4.1 CASH CROP PRODUCTION

Cocoa, oil palm, mangoes and coffee are the main cash crops grown in the district. The main production areas are located within Logba, Nyagbo, Ve and Tafi areas. Soil suitability test and other research works by Development Institute and Agriculture Department of University of Ghana Legon indicates that cocoa, coffee and oil palm could be cultivated on commercial base in the district. This implies that with the right orientation, the district could become one of the leading exporters of cocoa and coffee. On the other hand, small scale processing factories could be established to process cocoa products and also extract palm oil for both domestic and foreign markets.

Table 2.0. A Table showing major crops produced in the district.			
CROPS	PRODUCTION AREAS	ESTIMATED ACRAGE.	
RICE	VeKoloenu,Ve Golokwati,	5,000 Hectares.	
	Tafi,Agbome,Deme, Liati.		
CASSAVA	Koloenu, Golokwati, Tafi,	9,572 Hectares.	
	Logba, Liati.		
MAIZE	Koloenu,, Golokwati, Tafi,	8,498 Hectares	
	Logba, Have, Liati		
YAM	Golokwati,Tafi,Logba,	1,500 Hectares.	
	Koloenu,Agbome, Liati.		
PLANTAIN	Liati, Kwati, Tafi, Logba. 400 Hectares.		
GARDEN EGGS	Tafi,Koloenu Golokwati Hve, 44 Hectares		
OKRO	Koloenu,Kwati,Tafi, Logba 150 Hectares		

Table 2.6: A Table showing major crops produced in the district.

The Table 2.6 shows that cassava is commonly produced in the district with estimated acreage of 9,572 hectares, follow by maize with 8,498 hectares, and rice, yam, plantain, okro and garden eggs at 1500, 400,150, 44 hectares respectively. This implies that the district can expand cassava production and establish starch processing factory in the district for employment and increased incomes of farmers.

1.3.4.2 LIVESTOCK REARING

About 47.0% of households in the district engage in livestock rearing. In addition to the crop production, some households rear animals like local poultry, sheep and goats at their backyard. Each livestock keeper keeps 15 animals on the average. The dominant livestock kept in the district is Chicken constituting 63. %, followed by Goat 21%, Sheep 9%, Cattle 2%., Guinea fowl 3%, and Grass cutter 1%. Cattle rearing on the other hand are practiced along the Woadze, Tafi, and Koloenu and Have plains by Fulani herdsmen whose activities have been a worry to farmers in those areas. The major challenge facing the livestock sub-sector is lack of access to veterinary services due to short supply of the officers in the district. This implies that given adequate technical support households could earn more income from livestock rearing resulting in increased household income levels and improved well-being.

Type of livestock	Percentage.
Chicken	63
Goat	21
Sheep	9
Cattle	2

Pig	1
Grass cutter	1
Guinea fowl	3

Table 2.7, shows livestock rearing in the district. Source; Department of agriculture.

1.3.4.3 FISHING

Fish farming on the other hand, employs less than one percent (0.1%) of the total number of households employed in agriculture. The district is endowed with river bodies which makes river fishing one of the fishing activities in the district. However, due to the availability of river Dayi and Volta River along the south western part of the district, aqua culture is gradually replacing river fishing. Some of the fish farming communities include Kpeve Tornu, Adigbo Tornu and Woadze Tornu producing about

3,040 tonnes of fish per week. The fishing methods and

1.3.4.4 AGRO PROCESSING

The main crops that are processed in the district include cassava, oil palm, paddy rice and fruits. Cassava is processed locally by women into cassava dough and gari. Also, raw cassava is being processed into cassava cake in the district on a large scale with the help of Help Helpen Ghana, a Holland based NGO in collaboration with Dutch Agricultural Development and Trading Company (DADTCO) Ghana Limited, a supply chain company for Accra Brewery for the brewing of Eagle Beer. The mobile processing plant has the capacity to process up-to 7 acres of raw cassava per day. This implies that there is ready market for cassava production in the district. Kingdom Fruits farm at Tafi Abuife also process mango and pineapple into fruit juice. There are some women groups who engage in palm oil and palm kernel oil extraction.

There are various outlets that deal in farm inputs in the district. Table...below shows four of such outlets and their locations from which farm inputs are sold to farmers. They are evenly located across the district making it easily accessible to farmers.

Table 2.8. I ann input Stole in the District		
Store	Location	
Green shield	Ve Golokwati, Ve Koloenu	
Addipah chemical store	Logba	
Abu chemical store	Ve koloenu.	
Perseverance agro chemical	Liati dalekpedzi	

Table 2.8: Farm Input Store in the District

1.3.5 FOOD SECURITY

1.3.5.1 AVAILABILITY

The major staple food crops cultivated in the district includes maize, cassava, rice, yam, and plantain. Also, vegetables such as tomatoes, okro, pepper, garden eggs and spinach are produced in large quantities. The availability of cold stores has made meat and fish available at all times in the communities. In terms of food availability, the district can be said to be food secured. However, between June and July every year, food security is threatened due to the fact that most farmers would have sold their stock to reinvest in their farms.

1.3.5.2 AFFORDABILITY OF FOOD

In general, food is available in the district but prices vary with the seasons .During raining season more harvest is done hence prices go down but during dry season most farmers store their harvest awaiting good offer and therefore prices go up. So depending on the time and the favourability of the weather prices vary .Therefore, food is available in the district throughout the year and affordable.

1.3.5.3 FOOD QUALITY

The quality of farm produce in the district is good. The only challenge is high rate of illiteracy among subsistence farmers which may result in misapplication of chemicals. This is applicable only to vegetable farmers. The quality of farm produce have improved over the years due to the use of better milling machines and storage systems.

Fig: Afadzato South district Socio Economic Map

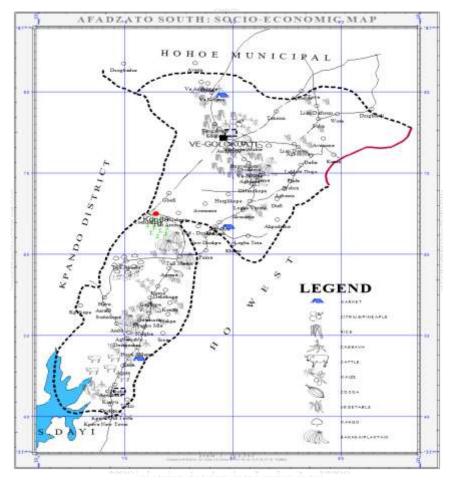

Figure 1.4: depicts the socio economic map of the district.

Source: Afadzato South District Field Survey, 2017.

1.3.6 BANKING

The only financial institution available in the district is GN Bank which operates in Ve-Golokuati, the district capital. There is no rural bank operating in the district and so people access banking services from Hohoe, about 20km away from Golokuati. Some of the Banks located at Hohoe include Ghana Commercial Bank, Agriculture Development Bank, Barclays, NIB Bank, Fidelity Bank, GN Bank and Weto Rural Bank.

This implies that access to credit facilities for investment purposes is rare. Most people are not only discouraged by the travel distance to access credit facility but also for the long time it takes for such facilities to be processed

1.3.7 MARKET

The district has three main markets with other satellite markets operated on community basis. Both merchandise and agricultural products are bought and sold in the main market. About 64.5 percent of farmers sell their produce within the district, 21.6 percent sell their produce outside the district whilst 13.9 percent sell both within and outside the district. Information on the market centres in the district is presented below. (2010 PHC). This would enhance food security and improve IGF in the District.

	Table 2.9. shows markets in the district.						
Name/town Market days Main agricultural and forest products Rank							
Ve-Koloenu Every Friday Cassava dough, maize, charcoal, rice 2 nd							
Logba Alakpeti Every 5 days Yam, fruits, maize, rice, cassava, 1 st vegetables, charcoal							
HaveEvery 5 daysRice, fruits, vegetable, cassava, yam 3^{rd}							

Table 2.9: shows markets in the district.

1.3.8 POST AND TELECOMMUNICATION

There is no postal service in the district and so the major medium for communication in the district is through the use of mobile phones telecommunication services. The proportion of the population 12 years and older who own mobile phones in the district is 36.9 percent. More males (41.9%) own mobile phones than females (32.3%). The 2010 PHC indicates that 1.6 percent of households in the district have fixed telephone lines, most of which are no more functional. The major telecommunication networks available include MTN, Tigo, Vodafone, Airtel, Expresso, and Glo. However, the functionality of these networks depends on one's location. The following table gives details of some high performing location of telecommunication networks. This helps to promote trade where traders are able to transact business and make payment for goods and services through telecom services. Furthermore, Agric Extension Officers can disseminate information to farmers through text messaging and whatap etc and among others.

Area council	List of cell network available	Remarks		
Ve	Mtn, Tigo, Glo	Networks are often interrupted by Togocel		
Liati/Afadzato	Mtn, Vodafone,	Liati Dafornu and Soba Areas have limited access always		
Leklebi	Vodafone, Mtn	Networks are frequently interrupted by Togocel		
Logba/Tafi	Mtn, Vodafone	Other networks are not reliable		
Have/Nyagbo	Mtn, Vodafone, Expresso, Tigo,	Aside general technical challenges from the service providers, there is no much interruption		
Weto	Mtn, Vodafone, Tigo			

Table 2.9 depict the location of telecommunication network in the district.

Source: Afadzato South District Field Survey, 2017

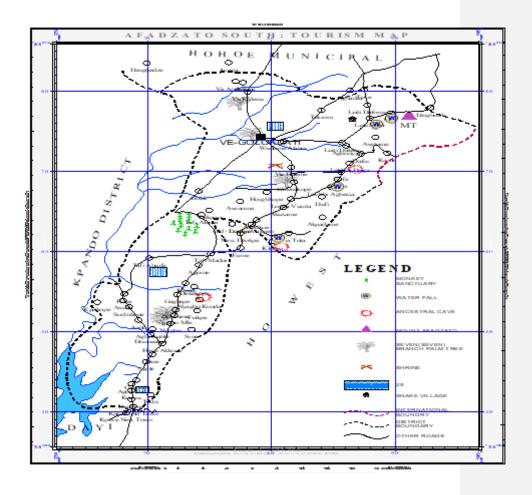

1.3.9 TOURISM

The district has a lot of sites of historical, scientific and aesthetic importance serving as potential tourist attraction sites. Some of such sites are;

- The highest peak in Ghana Mt. "Afadza" (Afadjato) located at Liati-Wote i.
- ii. The sacred and rare species of Mona Monkeys at Tafi-Atome
- iii. Stalactite and Stalagmite caves at Logba-Tota
- iv. The Tagbo falls at Liati-Wote
- Aflabo Waterfalls at Leklebi-Agbesia v.
- Akpom Waterfalls at Logba-Tota vi.
- vii. Tizo waterfall at Liati-Soba
- viii. Snake village at Liati-Soba
- Cave and tunnel at Goviefe-Todzi ix.
- The "Kente" village at Tafi-Abuife х.

For the sake of identity, most of these tourist sites are named after the towns where they are located. These tourist sites are potential sources of job creation for the economically a population, increase IGF mobilization and also reduce extreme poverty.

Figure 1.5: Tourism map of Afadzato

1.3.10 GOVERNANCE

1.3.10.1 ADMINISTRATIVE STRUCTURES

The Assembly is the highest political and administrative authority in the district. It has deliberative, legislative and executive authority and is charged with the responsibility for the development of the district. The Assembly consists of thirty (32) members comprising ten (10) government appointees and twenty (22) elected. Three (3) out of the thirty Assembly members are females. The Assembly has five Statutory Sub-Committees. The district has one Constituency-Afadzato South Constituency, twenty two (22) electoral areas, eleven (11) traditional areas and six (6) Area Councils.

So far, six (6) decentralized departments are fully operational in the district. The existing departments are; Education Directorate, Health Directorate, Community Development, Social Welfare, Physical Planning Department, Department of Agriculture, Centre for National Culture ,National Commission for Civic Education, Department of Feeder Roads, Youth Employment Agency and Non Formal Education. The existing departments are executing their mandated functions to the benefit of the

district, However, the absence of some of the Departments have created a vacuum making it difficult for certain functions to be carried out in the district.

1.3.10.2 ESTABLISHMENT AND FUNCTIONALITY OF SUB-DISTRICT STRUCTURES

The district has six Area Councils duly inaugurated and functional. The composition of each of the Area Councils consists of five elected Assembly Members and ten Unit Committee members selected from each electoral area within the administrative region of the Area Council. In all, each Area Council is composed of fifteen (15) councillors headed by a Chairman who is elected among the members, and a secretary who is employed by the Assembly. Each area council is empowered to prepare, own and implement their Annual Action Plans with support from the Assembly.

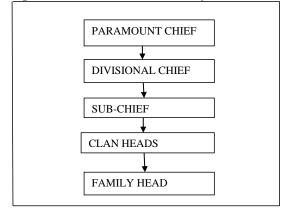

The Assembly conducts its public hearings and information dissemination through the sub-district structures. The activities of each Area Council are supported by the Traditional Authorities. To ensure the support of the traditional authorities, each area council has a representative of the traditional leaders who serves as a liaison between the council and the traditional leaders.

In terms of plan implementation, the district is likely to have maximum support from the beneficiaries of the plan. This is because the area councils are actively involved in the plan preparation stage.

1.3.10.3 TRADITIONAL AUTHORITY

There are eleven (11) Traditional Areas in the district. Each traditional area is headed by a Paramount Chief. In the absence of the Paramount Chief, his Right Wing Chief also called Regent acts on his behalf. Queen Mothers on the other hand act as women leaders in every community and the entire Traditional area. The Paramount seat is the highest throne to which all other chiefs ascend depending on their lineage to the throne. Paramount Chiefs are supported by Divisional and Sub-Chiefs from the various communities. Each traditional area has Council of Elders made up of Chiefs, Queen Mothers, Elders, Kingmakers, Assembly Members and Opinion Leaders who help to settle different forms of disputes ranging from land, family and individual disputes. :

1.3.11 SECURITY

The District Security Committee (DISEC) meets regularly to deliberate on possible security issues in the district. The Committee is composed of officer from the various security agencies in the district. The district has no police district and so is served by Hohoe Police District and Peki Police district.

There are two police stations located at Ve-Golokuati and Have. Also due to the district's proximity to Republic of Togo, there exists Ghana Immigration Service at Leklebi Kame. The district has a Fire Service Station in the district capital, Ve Golokwati

The major challenge facing the police service in the district is lack of vehicle to enhance police visibility and mobility to combat criminal activities. There is also inadequate accommodation for the staff at both Golokuati and Have. This implies that the proximity of the district to Togo is an opportunity to broaden market base of producers in the district

1.3.12 DISASTER MANAGEMENT

In disaster front, the National Disaster Management Organization has the oversight responsibility to support disaster victims and also educate communities on disaster risk reduction. The district is further divided into nine (9) disaster zones to ensure total and easy operation of NADMO. The organization conducts periodic education and sensitization activities on disaster risk reduction in communities. They also oversee the activities of Disaster volunteer Groups (DVGs). Apart from bushfires which occur in parts of the district, communities along the Volta Lake, especially at the estuary of the River Dayi, are prone to seasonal flooding, making them very vulnerable.

1.3.13 WATER AND SANITATION

According to the 2010 PHC District Analytical Report, it is observed that 35.7 percent of households use river/stream as their main source of water for drinking. A total of 420

Households representing 1.9 percent depend on sachet water as their main source of water for drinking. The survey also revealed that only 24.4 percent of households in the district use borehole and pipe borne water for drinking. In the urban areas, 44.8 percent of households drink water from river/stream whilst 33.5 percent of households in the rural areas also drink from river/streams.

The period for acute water shortage in the district is from November to April each year due to prolong dry season experienced during the period. During this period, most minor river bodies begin to dry-up making it difficult for women and children to get water for drinking and domestic use. There are only 49 boreholes that are functional in the district which implies that a lot more people do access not have to potable water.

However, according to the 2010 PHC reports, higher proportion of dwelling units in the district are roofed with metal sheets (82.9%).

Inadequate access to potable water could increase the incidence of water borne related diseases in the district. However, with the high use of metal sheets for roofing, households could be encouraged to harvest and store water during the rainy season for use in the dry season. Below is the distribution of water facilities among the area councils within the district

S/N	Name of Community	No. of Boreholes	No. functioning	No. not functioning
1	Agate	8	5	3
2	Goviefe Kowu	1	1	-
3	Goviefe Agodome	1	1	-

1.3.13.1 SANITATION

The district is faced with sanitation challenges such as open defecation, poor drainage systems, and poor solid and liquid waste disposal practices. The 2010 PHC district analytical report revealed that 38.5 percent of households in the district use public toilet (WC/KVIP/Pit/Pan) and almost thirty percent (29.5%) of household use pit latrines. In terms of waste disposal, it was observed that 67.9 percent of households dispose their solid waste on public dump sites (open space) whilst 47.7 percent of them also dispose liquid waste by throwing it onto their compound. The sanitation problem is more intense in the rural areas than to urban areas possibly due to urban population.

1.3.13.2 WASTE MANAGEMENT

The poor waste management practice may account for the high incidence of malaria in the district. With the acquisition of a permanent dump site, investors, policy makers and government could consider recycling the large volume of solid waste so as to help reduce environmental hazards of waste disposal, generate income for the industries and also create employment for the unemployed

CHALLENGES IN SOLID WASTE MANAGEMENT

- C Inadequate supply of skip containers in communities
- The frequent breakdown of the Zoom lion skip tracks
- Poor attitude of Zoom lion staff towards work

1.3.14 HOUSING

There are 18,363 housing stock in the district of which the rural housing stock forms 84.2 percent whilst the urban housing stock is 15.8 percent which implies that more households (80.5%) live in rural areas than those in urban areas (19.5%). The average number of households per house is 1.2. The average household per house in the urban areas of 1.5 is higher than that of rural areas of 1.2. On

the average, 4.2 people live in a household in the district (2010 PHC). The average room occupancy rate is 2 persons per room. About 66.8 percent of the dwellings in the district are owned by household member. The main construction materials for outer walls of dwelling units in the district are mud brick/earth (67.7%) and cement blocks/concrete (27.3%) due to the low income levels of people.

Landlords are compelled to demand high rent charges due high demand for housing units in the urban areas, especially in and around the district capital. Most houses in the urban areas have outlived lifespan and therefore prone to any form of disaster. This explains why rainstorms disasters have become the most dominant in the district over the last few years.

1.3.15 TRANSPORTATION AND ROAD NETWORK

. The major mode of transportation in the district is by road whilst a few communities along the Volta Lake travel on the water to other neighbouring villages due to their proximity to those areas. Water Transport is however not commercialized but done mostly by the fisher folks. The district capital and other major towns are linked to Accra, the national capital by the Eastern Corridor road with an average travel time of 3.5 hours. It takes approximately 1.5 hours to travel to Ho, the regional Capital. Internationally, the district is linked up to the Republic of Togo through Leklebi Kame Boarder with a second class road with an average travel time of 30 minutes. The feeder roads from the district capital to major tourist centres, market centres and farming areas are motor able all year round. However there are a few feeder roads which are reshaped periodically to make them motor able

1.3.16 ENERGY/ELECTRICITY

According to the 2010 PHC, 59.8 percent of households in the district use electricity (mains) as their main sources of lighting. Majority of households in the rural areas (60.4%) more than urban areas (57.2%) use electricity mainly for lighting, possibly because more households are found in the rural areas than urban areas. This confirms the viability of government policy on rural electrification project being implemented since 1990. The use of kerosene lamp (32.7%) is the second largest source of lighting in the district whilst 5.4 percent of households use flash light/torch for lighting which is more common in the rural areas.

In term of community access to electricity, 31.6 percent of communities in the district are not connected to the National Grid. This implies that these communities may not be able to attract any major economic investment. This also means that the types of economic activities available are limited to traditional technologies with very little output. As a temporary measure to provide light to communities without electricity, the Ministry of Energy, is supplying solar panels and lamps capable of charging phones and powering lighting systems in homes, schools and health facilities.

Again, 72.2 percent of households use wood as their main source of cooking fuel whilst 18.9 percent of households in the district use charcoal for cooking. Less than six percent (5.6%) of households in the district use gas as their main source of cooking fuel. The use of wood as main cooking fuel in the rural areas (76.9%) is predominant than the urban areas (52.5%). Also, charcoal is mostly used in the urban areas (33.6%) than rural areas (15.3%).

1.3.17 HIV/AIDS

Thirteen (13) health facilities out of 21 in the Afadzato south district provide maternity services and all the 13 render Prevention of Mother to Child Transmission (PMTCT) services as well as syphilis testing to all the pregnant women who patronize the facilities.

Only 9 out of the 18 midwives claimed to have been trained to provide services on HIV/AIDS. Meanwhile on the job training has enabled them all to provide the services. Feedbacks on referred cases were received through phone calls from treatment centres whiles few clients returned personally with the feedbacks. Apart from Have Health Centre and Logba Vuinta health centre that put clients tested HIV positive on treatment, all other facilities refer clients tested HIV positive to either the facility of client's choice or that of the service provider for treatment. About 95% of clients accept referral and go for the treatment whilst 5% refuse treatment. All pregnant women who were tested for HIV were also screened for syphilis and the women who tested positive were treated.

	2014		2015		2016 JAN-SEPT		2017 JAN-MARCH	
Tested	No.	No.	No.	No.	No.	No.	No.	No.
	tested	positive	tested	positive	tested	positive	tested	positive
PMTCT	652	28	1351	27	1107	11	101	20
CT		10		28		29	20	5
Syphilis	77	0	873	12	1082	19	22	0

Table 3.4: DEPICTING DATA ON HIV/AIDS AND SYPHILIS FROM HEAITH FACILITIES.

Syphilis testing however, stopped when test kits expired in September 2016. Unfortunately babies are not screened in any of the facilities due to the non-availability of screening materials. Testing and Counselling (CT) services are available in only 9 facilities but documentation is not properly done in most of the facilities. Service providers explained that not all who tested positive accepted to go for treatment and no documentation was seen on clients who are on treatment.

It was realized that HIV positive pregnant women were not screen for Tuberculosis due to the absence of laboratory in some of the facilities and others who had the lab just did not render the service. Adolescent health services on HIV are integrated into the general health care therefore no definite documentation exist in any of the health facility. Few facilities claimed they conducted outreach programmes on HIV where 'know your status' were done for community members but only Kpeve and Alakpeti had evidence.

CHALLENGES AND CONCERNS

- Periodic stock out of test kits at the facilities.
- Availability of expired kits.
- Difficulty to get clients to go for treatment and adherence to treatment.
- Inability to follow-up clients on treatment due to time and instability of clients.
- Gaps in documentation

1.3.18 VULNERABILITY

The purpose of risk and vulnerability analysis is to increase awareness and knowledge for decision makers and those in charge of operations of threats, risks, and vulnerabilities within their own areas of operations, as well as creating a basis for planning. Vulnerability can be defined as the diminished capacity of an individual or group to anticipate, cope with, resist and recover from the impact of a natural or man-made hazard. Vulnerability is most often associated with poverty, but it can also arise when people are isolated, insecure and defenceless in the face of risk, shock or stress. Clearly, poverty is a major contributor to vulnerability. Poor people are more likely to live and work in areas exposed to potential hazards, while they are less likely to have the resources to cope when a disaster strikes. The Ghana Living Standard Survey (GLSS 4) defines the extreme poor as those whose standard of living is insufficient to meet their basic nutritional requirements even if they devoted their entire consumption budget to food. Apart from bushfires which occur in parts of the district, communities along the Volta Lake, especially at the estuary of the River Dayi, are prone to seasonal flooding, making them very vulnerable.

1.3.19 GENDER ANALYSIS

Gender analysis is a systematic analytical process used to identify, understand, and describe gender differences and the relevance of gender roles and power dynamics in a specific context. It is a sub-set of socio-economic analysis with the purpose to reveal the connections between gender relations and the development problem to be solved. Gender in general is the relationship between males and female. It determines the socially constructed roles of relationships between men and women.

According to the 2010 PHC, females form the majority (51.3%) of the total district population compared to that of males (48.7\%). This implies that from the population perspective, women and girls are more than men and boys.

Broad age cohorts

Table 3.5: Depicting Population of Children, Youth and the Aged (Male and Female).

Age	Male population	(%)	Female population	(%)
0-14	18,795	51.4	17,778	48.6
15-64	24,426	47.5	27,029	52.5
65 and older	3,051	43.6	3,951	56.4

Source: GSS, 2010 PHC

The Table indicates that the female population is higher for age groups 15 years and older. For instance, the population 15-64 years, females constitutes 52.5 percent as against 47.5 percent for males. Similarly, for the population 65 years and older, female form 56.4 percent compared to 43.6 percent for males. On the other hand, males count more (51.4%) in the 0-14 age cohort than females (48.6%).

It is again established that out of the 22,529 households found in the district, 37.6 percent of them are headed by females whilst 62.4 percent of households are headed by males. About 58.1 percent of all

1.3.20 EDUCATION

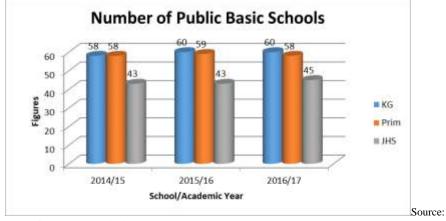

The district is divided into nine (9) circuits for effective school supervision and service delivery. There are sixty (60) Kindergartens. Primary schools are sixty (60) and forty-two (42) Junior High Schools. The District also has four (4) Senior High Schools with two (2) Technical and Vocational Education Institutions. Overview of education status in the District is shown below

Table 3.6: Number of public basic schools in the district.

Level	2014/15	2015/16	2016/17

Figure 1.5 shows the number of public basic schools in the district.

GES Afadzato South District, 2017

Chart 1.5 above indicates that at the KG level, public schools increased by 3.4% (2) from 2014/15 to 2015/16 and between 2013/14 and 2015/16 saw an increase of 11.1% (6). This steady increase over

the three year period may be ascribed to the following: At the Primary level, public schools had a slight increase of 1.7% in 2015/16 over 2014/15 academic year.

Also, JHS level, in 2013/14 it stood at 40. In 2014/15 saw an increase of 7.5% (3) and has remained constant in 2015/16.

Fig 1.6 below shows that at the private sector, KGs increase by 37.5% (3) in 2015/16 over 2014/15 figure of 8. Between the periods 2013/14 to 2015/16 indicates an increase of 83.3% (5). The private primary schools also increase steadily over the three year period. This steadily increases in private KGs and primary schools over the three year period may be attributed to the following;

Table 3.7 Number of Private Basic Schools in the district.

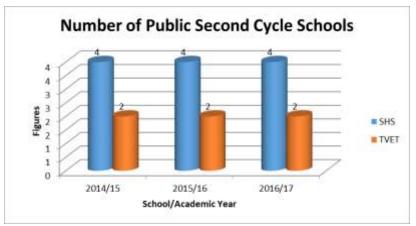

Figure 1.6 shows the number of private basic schools in the district.

Source: GES Afadzato South District, 2017

Chart 1.6 above shows that at the private sector, KGs increase by 37.5% (3) in 2015/16 over 2014/15 figure of 8. Between the periods 2013/14 to 2015/16 indicates an increase of 83.3% (5). The private primary schools also increase steadily over the three year period. This steadily increases in private KGs and primary schools over the three year period may be attributed to the following;

Figure 1.7 shows the number of public second cycle schools

Source: GES Afadzato South District, 2017

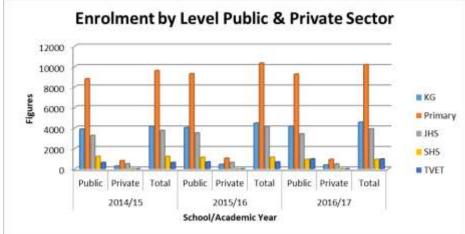

Chart 1.7 above indicates that number of public SHS in the district have seen no increase over the three year period whilst with TVET there was a decrease in 2014/15 and remained same in 2015/16.

Table 1.8: Enrolment by Level Public & Private Sector

Figure 2.0: Enrolment in public and private basic schools

Source: GES Afadzato South District, 2017.

Viewing the pictorial diagram of enrolment in public and private basic schools in the district shown in chart 1.5 above indicates a decline of 4.5% at KG and 1.9% at the primary in 2015/16 comparing to 2014/15 figure respectively.

At the public JHS the enrolment was constantly increasing over the three year period, in the same way all the levels at the private sector.

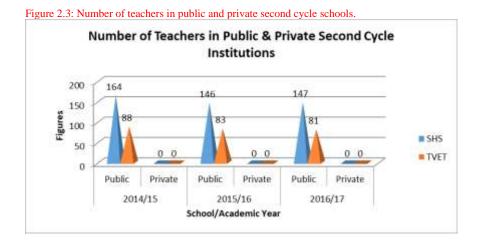

Figure 2.2: Number of teachers in public and private basic schools.

From chart 2.1 above indicates a decrease in teachers at all the level of public basic schools in the district. KG recorded 2.2%, primary 7.3% and JHS 3.2% respectively in 2015/16 over the 2014/15 academic year figure. The private sector shows a continual increase of teachers through the three year period under review.

	2014/15		2015/16		2016/17

Figure 4.7: depicts the projected school age population in the district.

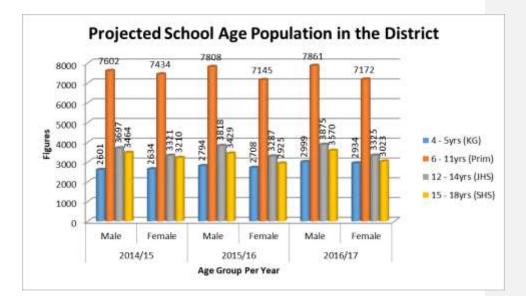

Table 4.7 and Chart 2.5 above show the age and number of school-going-children in the district. Out of 5,422 children aged 4-5 years, 2,713 (50.04%) constitute boys whilst 2,709 (49.96%) were girls. This indicates that there were more boys than girls in the Kindergarten age group. There were 14, 941 children of primary school-going-age (6 – 11 years), out which 7,701(51.54%) were boys and 7,240 (48.46%) were girls. At the junior High School, children of school-going-age (12 – 14 years) stood at 6,937. Out of this total 54.07% (3,751) were boys whilst 45.93% (3,186) were girls. Concerning the Second Cycle Institution, the total school-going-age (15 – 18 years) was 6,345 children. The percentage of male children was 54.22% (3,440) while 45.78% (2,905) were girls. It is obvious from the above that the percentage of male children expected to be in school at the correct age in the various levels exceeded that of the female (from age group 4 - 5 years to 15 - 18 years). This is likely to affect the achievement of the GPI target through all the levels (ie from Primary to SHS/TVET).

1.4 SUMMARY OF KEY DEVELOPMENT ISSUES/PROBLEMS/GAPS IDENTIFIED FROM THE SITUATIONAL ANALYSIS AND PROFILE

The Table.... shows the summary of key development issues identified during the implementation of MTDP 2014-2017 and those gaps/challenges in the profile/current situation of the District as well the issues emanating from communities during their needs assessment engagement. These issues are to form the basis for development interventions in the Medium Term Development Plan 2018-2021.

Table ...: SUMMARY OF KEY DEVELOPMENT ISSUES

Thematic areas of GSGDA II	Key Identified issues (as harmonised with inputs from the performance review, profiling and community needs and aspirations)
Ensuring and Sustaining Macro- Economic Stability	 Poor state and inadequate market facilities Weak capacity to mobilize adequate revenue for development Leakages of the revenue being collected Residents unwillingness to pay tax
Enhancing Competitiveness of Ghana's Private Sector	 Poor road network to Tourist Sites Limited hotel facilities to promote tourism High cost of credit Untapped tourism potentials Poor state of tourist sites
Accelerated Agricultural Modernisation and Sustainable Natural Resource Management	 Inadequate market for farm produce Limited storage facilities Limited access to farm inputs and implements Limited technology in farming Inadequate irrigation facilities Poor condition of access roads/no access roads to farms Limited number of extension officers Limited access to veterinary services Bush fires Illegal felling of trees Pollution of river bodies Limited appreciation of Climate Change and Green Economy Issues Climate Change and Green Economy issues not integrated into the Development Process of the district Low incomes of farmers leading to poverty Depleting timber resources Over dependent on rain-fed agriculture
Oil and Gas Development	 Weak Capacity to effectively convert the opportunities of Oil and Gas for job creation and improved incomes Poor condition of the High ways and feeder roads
Human Settlements	Poor drainage systems in the communities

	 Lack of access roads within the settlements and between settlements Soil erosion in communities Inadequate potable water facilities Broken down/uncompleted water systems in communities Poor management of water systems due to weak WSMTs Inadequate sanitation facilities Inadequate central refuse collection containers Indiscriminate damping of refuse Indiscriminate defecation Poor telecommunication service delivery Inadequate electricity coverage Unplanned communities Lack of adequate infrastructure for security personnel
Human Development, Productivity and Employment	 Inadequate teaching and learning materials Inadequate logistics at GES to ensure effective monitoring of service delivery Poor condition of some classroom blocks Inadequate School blocks Inadequate teachers bungalows Inadequate computer laboratories Inadequate computer laboratories Inadequate logistics at health facilities Inadequate logistics at health facilities Inadequate health infrastructure and support for health facilities/personnel Poor delivery of health services Lack of NHIS offices in the district Delay in releasing funds for claims payment by the NHIS Poor BECE performance Weak School Management Committees (SMCs) and PTAs
Transparent, Responsive and Accountable Governance	 Weak substructures Low participation of women in local level elections Weak prioritization of gender issues leading to the absence or little budget allocation for gender and development Few number of females completing tertiary education High incidence of poverty High unemployment among the youth Lack of residential accommodation facilities for staff of the Assembly Lack of adequate accommodation for the security agencies (Ghana Police

CHAPTER TWO

DEVELOPMENT ISSUES IN THE DISTRICT

2.0 INTRODUCTION

This Chapter of the plan links the key District development issues to the adopted and relevant National issues. The adopted national development issues were further considered before prioritizing them to develop the Potentials, Opportunities, Constraints and Challenges (POCC) analyses.

2.1 HARMONISATION OF COMMUNITY NEEDS AND ASPIRATIONS WITH IDENTIFIED DEVELOPMENT PROBLEMS/ISSUES FROM REVIEW PERFORMANCE AND PROFILING FROM 2014-2017

As indicated in Table 6.0 below, key development issues arising out of performance review and situational analysis of the District were linked and harmonized with the community needs and aspirations and relevant national development issues. This is to ensure that there is harmony between the community needs and aspiration and the identified issues from the review of performance and profile.

COMMUNITY NEEDS AND ASPIRATION.	IDENTIFIED KEY DEVELOPMENT GAPS/ PROBLEMS/ ISSUES FROM PERFORMANCE AND PROFILE.	SCORES
Market infrastructure	Poor state and inadequate market facilities	2
Improved revenue mobilization	Weak capacity to mobilize adequate revenue for development	
	Leakages of the revenue being collected	2
	Residents unwillingness to pay tax	2
	Poor road network to Tourist Sites	2
Improved access to credit facilities for High cost of credit farming		1
Development of tourist sites	Untapped tourism potentials	2
	Poor road network to Tourist Sites	2
	Limited hotel facilities to promote tourism	2
	Poor state of tourist sites	2
Improved drainage system in some communities	Soil erosion in communities	2
Agro-based processing factory in the	Limited storage facilities	1
district.	Inadequate market for farm produce	1
Improved access to agro inputs and machinery	Limited access to farm inputs and implements	2
Improved agricultural mechanisation	Limited technology in farming	2
-	Inadequate irrigation facilities	2
	Over dependent on rain-fed agriculture	1
Improved access to Agric Extension Limited number of extension officers		2
services	Limited access to veterinary services	1

Rehabilitation of area council offices	Weak substructures	2
	Low participation of women in local level elections	0
	Weak prioritization of gender issues leading to the absence or little budget allocation for gender and development	0
Expansion of LEAP programme	High incidence of poverty	2
Skilled employable youth	High unemployment among the youth	2
Accommodation for Assembly staff	Lack of residential accommodation facilities for staff of the Assembly	2
Accommodation for Police personnel	Lack of adequate accommodation for the security agencies (Ghana Police Service)	2

Key	Score
Strong relationship	2
Weak relationship	1
No relationship	0

From the Table 2.1 above, there is strong harmonious relationship between community needs/aspirations and the identified development gaps from the review of performance of the MTDP 2014-2017 and issues identified from the profile of the District. This is because most of the scores recorded in terms of the relationship between the needs and aspiration, and the issues from the Performance Review and the Profile indicated that the issues were directly linked. However, some of the issues identified as gaps from the performance review which are no longer relevant to the people were removed from the list of development priorities. The harmonised key development issues with implication for 2018-2021 is presented in a matrix under GSGDA II as indicated in Table 2.2 below.

Table 2.2: Harmonized Key development issues under GSGDA II with implications for 2018-2021

Thematic areas of GSGDA II	Key Identified issues (as harmonised with inputs from the performance review, profiling and community needs and aspirations)
Ensuring and	Poor state and inadequate market facilities

2.2 HARMONISATION OF KEY DEVELOPMENT ISSUES UNDER GSGDA II WITH IMPLICATION FOR 2018-2021 WITH THOSE OF THE NATIONAL MEDIUM-TERM DEVELOPMENT POLICY FRAMEWORK (NMTDPF, 2018–2021) UNDER THE LONG-TERM NATIONAL DEVELOPMENT PLAN (LTNDP 2018–2057). This part of the Plan establishes the degree of harmony between the list of relevant Development Issues which were considered during the implementation of Ghana Shared Growth and Development Agenda (GSGDA) II, but are still relevant to the District's development and those of the National Medium-Term Development Policy Framework (NMTDPF, 2018–2021) under the Long-term National Development Plan (LTNDP 2018 – 2057). It is to ensure continuity of relevant on-going programmes in compliance with Chapter 6, Article 35 (7) of the 1992 Constitution of Ghana, which requires Development Authorities in Ghana to ensure the continuation of development programs already initiated by successor plans. The DPCU, therefore, harmonised the issues associated with programmes and projects commenced under GSGDA II (MTDP 2014-2017) with the relevant goals of the AGENDA FOR JOB, 2018-2021 as contained in Table 2.3

2.3 PRESENTATION OF ADOPTED GOALS AND ISSUES

The DPCU adopted the following issues as presented in Table 2.4 below, categorized under the various pillars of the National Development Policy Framework 2018-2021, after harmonization of the key development issues.

Table 2.4 Adopted Goals and Issues

DMTDP	ADOPTED ISSUES	
DIMENSIONS		
2018-2021 Economic	Revenue underperformance due to leakages and loopholes, among	
Development	others	
	Weak expenditure management and budgetary controls	
	Inadequate access to affordable credit	
	Limited access to credit by SMEs	
	Low domestic saving rate	
	Inadequate and unreliable electricity	
	Poor tourism infrastructure and Service	
	Low skills development	
	Unreliable utilities	
	 Low application of technology especially among small holder farmers Erratic rainfall patterns 	
	Low level of irrigated agriculture	
	Poor storage and transportation systems	
	 Low quality and inadequate agriculture infrastructure 	
	Inadequate disease monitoring and surveillance system	
	 Inadequate disease monitoring and surveinance system Inadequate agribusiness enterprises along the value chain 	
	 High cost of credit 	
	 Low productivity and poor handling of livestock/ poultry products 	
	Poor marketing systems	
	• Inadequate development of and investment in processing and value addition	
	 Weak extension services delivery 	
Social	Poor planning and implementation of sanitation plans	
Development	Poor agricultural practices which affect water quality	
	Inadequate and poor sports infrastructure	
	Poor quality of drinking water	
	High prevalence of open defecation	
	• Increasing demand for household water supply	
	Inadequate maintenance of facilities	
	Poor sanitation and waste management	
	Poor quality of education at all levels	

• Inadequate funding sources for education	
High number of untrained teachers at the basic level	
 Inadequate use of teacher-learner contact time in schools Low participation in pape formal education 	
Low participation in non-formal education	
 Low participation of females in learning of science, technolog engineering and mathematics 	ςy,
 Inadequate and inequitable access to education for PWDs and peop with special needs at all levels 	ole
Inadequate and poor sports infrastructure	
• Poor quality of healthcare services	
• Inadequate and inequitable distribution of critical staff mix	
• Increased cost of healthcare delivery	
• Inadequate financing of the health sector	
 Inadequate coverage of reproductive health and family planning services 	ng
 High stigmatization and discrimination of HIV and AIDs 	
• Lack of comprehensive knowledge of HIV and AIDS/STIs, especial among the vulnerable groups	lly
 High incidence of HIV and AIDS among young persons 	
 Inadequate nutrition education 	
 Inadequate financial support for family planning programmes 	
 Inadequate finaletal support for family planning programmes Inadequate sexual education for young people 	
 High school drop-out rates among adolescent girls 	
 High youth unemployment 	
 Low awareness of child protection laws and policies 	
 Weak enforcement of laws and rights of children 	
• weak enforcement of laws and rights of enforcement	
• Inadequate opportunities for persons with disabilities to contribute society	to
wironment, • Inappropriate farming practices	
frastructure • Indiscriminate use of weedicides	
d Human • Over exploitation and inefficient use of forest resources	
• Low institutional capacity to adapt to climate change and underta	ke
mitigation actions	
• Inadequate institutional capacity to access global funds	
Loss of trees and vegetative cover	
 Limited capacities of local financial institutions to support Ghanai investments in oil and gas industry development 	an
 Poor quality and inadequate road transport network 	
 Inefficiencies in the procurement, management and supervision of contracts 	
Rapid deterioration of roads	
• Poor and inadequate maintenance of infrastructure	
Poor drainage system	
 Improper disposal of solid and liquid waste 	
• Difficulty in the extension of grid electricity to remote rural a	nd

	 isolated communities Inadequate, reliable and comprehensive data on land ownership Weak enforcement of planning and building regulations Scattered and unplanned human settlements Limited investments in social programmes in Zongos and inner cities Poor quality ICT services
Governance, Corruption and Accountability	 Limited capacity and opportunities for revenue mobilization Ineffective sub-district structure Poor linkage between planning and budgeting at national, regional and district levels Poor linkage between planning and budgeting at national, regional and district levels Weak involvement and participation of citizenry in planning and budgeting Weak relations between citizens and law enforcement agencies
Strengthening Ghana's role in international affairs	• Limited participation by the diaspora in development

1.5 DMTDP GOALS 2018-2021 WITH ADOPTED ISSUES

DMTDP GOALS 2018-2021	DMTDP SUB-GOALS 2018-2021	ADOPTED ISSUES
Build a prosperous society	Increase access to affordable consumer credit	 Low revenue mobilization. Inadequate permanent revenue collectors. Revenue underperformance due to leakages among others.
Create opportunities for all	 Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. Ensure healthy lives and promote well- being for all at all ages. 	 Absence of a clear policy direction in addressing educational needs of disability, vulnerable and marginalized learners. Huge gaps in geographical access to quality health care. High stigmatization and

		discrimination of HIV and AIDs/ STI especially among the vulnerable groups
Safeguard the natural environment and resilient built environment	Control Deforestation, desertification and soil erosion.	 Incidence of wildfire. Inappropriate farming practices. Indiscriminate use of weedicides. Over exploitation and inefficient use of forest resources. Inadequate irrigation facilities in the district. Inadequate storage facilities in the district.
Maintain a stable, united and safe society	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive.	 Ineffective sub-district structures Poor coordination in preparation and implementation of development plans Weak financial base and management capacity of the District Assemblies. Non-functioning of sub-district structures.
Strengthen Ghana's role in international affairs	Contribute to global effort towards a just and peaceful world	• Inability to effectively promote tourism potential and Ghanaian culture in the sub region and the world.

TABLE 6.3: SHOWS THE DMTDP GOALS 2018-2021 WITH ADOPTED ISSUES

2.4 PRIORITIZATION OF IDENTIFIED ISSUES

The adopted development issues shown above are extensive and all-encompassing making it very difficult to address within the time frame of the Plan coupled with resources challenges of the district. In view of the above, the DPCU prioritized these issues by establishing the degree of feasibility of their implementation given the available resources in terms internal strengths and weaknesses as well as external ones. Issues that require immediate attention were also considered and given priority. The prioritization was an objective assessment of each of the issues considered by applying them to the Potentials (strength), Opportunities, constraints (weakness) and challenges (threats) (POCC) analysis as presented on as follows.

2.4.1 POTENTIALS, OPPORTUNITIES, CONSTRAINTS AND CHALLENGES (POCC) ANALYSIS

The adopted issues were subjected to the analysis of the **Potentials**, **Opportunities**, **Constraints** and **Challenges** (**POCC**) of the District. This will facilitate in identifying issues with potentials and opportunities to be addressed as priorities while considering other measures to address those with constraints and challenges.

A potential of a district could be advantages and resources (within the district) which when utilized can enable the district to enhance its socio-economic development or to overcome its challenges. Opportunities on the other hand are external factors beyond the district that positively influence the development of the district. Constraints on the other side of the coin, are disadvantages emanating from internal factors such as institutional human and physical resources that act against development.eg. Regular ethnic conflict. Finally, challenges could be external factors or obstacles, (beyond the district) that may hamper smooth development effort. E.g. declining cocoa prices. In the case of Afadzato South, our challenge is climatic condition.

TABLE 2.5: POTENTIALS, OPPORTUNITIES, CONSTRAINTSCHALLENGES (POCC) ANALYSIS

Adopted Issue	Potentials	Opportunities	Constraints	Challenges
Revenue under performance due to leakages and loop- holes, among others	 vailability of revenue sources in the District e.g. markets, transport, landed property rate, commercial centers, Assembly assets etc. xistence of DA fee- fixing resolution xistence of business register xistence of Town/Area Councils to collect ceded revenue 	 xistence of Government laws on financial management e.g. FAR xistence of revenue mobilization consultants 	 nadequate revenue collectors nadequate logistics for revenue collection eak capacity of Assembly to prosecute offenders 	 ery slow legal system to prosecute offenders nadequate trained revenue collectors in the Local Government Service

BUILD A PROSPEROUS SOCIETY

Conclusion: This issue can be effectively addressed by harnessing the opportunities that exist and exploring new ways of the existing potentials. The current challenges can be addressed by adopting pragmatic procedures that will enhance collection system and block leakages. The Assembly can also outsource the collection of some of the revenue items to a private entity to address this challenge.

Conclusion: This problem can be effectively addressed by harnessing the existing potentials and opportunities to
--

nationally.

Adopted Issue	Potentials	Opportunities	Constraints	Challenges
		 xistence of Government policies on SMEs development will encourage more Institutions to give out credit to support the Sector xistence of donor support for capacity building in the sector addressed by using the opportu- ent will gradually eliminate the ch 		Unstable macroeconomic environment reduces the ability of Institutions to give enough credit credit
Low domestic saving rate	 he willingness of people to grow their SMEs is an opportunity to improve the culture of savings vailability of BAC to train and advise businesses on how to grow their businesses 	• ational Poverty Reduction Programs such as LEAP etc. will reduce pressure on household income and hence increase savings	• nadequate budgetary allocations towards Poverty Reduction	• educed funding for the REP

and improve savings				
Conclusion: This problem can be addressed	by capitalizing on the eagerness of	f the people to grow th	eir busir	nesses the
need toward savings as the most reliable mean	ns to build capital.			

Adopted Issue	Potentials	Opportunities	Constraints	Challenges
Inadequate and unreliable electricity	 otentials exist for the extension of in the district ommitment of the Assembly to invest in Rural Electrification Program 	Availability of Oil and Gas domestically will guarantee reliable in power generation and supply Availability of partners to invest in the development of the alternative local electrification schemes	Weak capacity to develop alternative electricity generation schemes	Climate change could lead to reduced flow of water reducing the power generation capacity
		harnessing the existing potential et to climate change could affect to Availability of Ghana Tourism Authority with requisite skills to support the sector's growth Existence of private sector to support tourism development		
				from Government to develop the sites

Adopted Issue	Potentials	Opportunities	Constraints	Challenges
Low application of technology especially among small holder farmers	 illingness of farmers to adopt improved technology vailability of District Directorate of Agriculture with requisite skills 	 vailability of Agricultural Research Institutes and Universities Availability of private investors in the sector vailability of improved technology 	 imited number of Agricultural Extension Officers ow literacy level of farmers ow income of farmers 	ow market for farm produce limate change
	ssue of low application of tec portunities are enough to add	chnology especially among small ress existing constraints.	holder farmers can b	e solved as the
Low level of irrigated agriculture	• vailability of the Lake for irrigation	 vailability of Agricultural Research Institutes and Universities vailability of Irrigation Development Board to support dam construction 	 igh initial capital requirement eak capacity to build dams ow income of farmers 	ow market fo produce limate change

Conclusion: The problem can be positively addressed as there are enough potentials and opportunities to rely on.

92

Poor storage and transportation systems	Assembly to improve storage and transportation systems igh demand for improved storage facilities vailability of District Works Department with skilled personnel	overnment agricultural policy (Planting for Food and Jobs) supports this issue	• nadequate funds	• ow investment of private capital in storage and transportation systems
opportunities exist	problem of poor storage and t t to deal with it.	ransportation systems can	be addressed as e	nough potentials and

Adopted Issue	Potentials	Opportunities	Constraints	Challenges
Inadequate agribusiness enterprises along the value chain	 xistence of BAC to develop capacity of businesses igh volumes of agricultural produce igh market for value added products and services 	 vailability of technology which can be deployed xistence of external funding for the sector 	 ow budgetary allocations to support the sector igh cost of available technology igh level of illiteracy 	• windling donor support funds
proposed solution	s. The constraint can be re	essed in view of the adequate p solved through increased budg networking by the Assembly to	getary provisions and a	
Inadequate start- up capital for the youth	• vailability of bank to offer credit for business development	• xistence of Government policies on SMEs development	• eak capacity of SMEs to attract existing	• nstable macro- economic environment

	• vailability of BAC to train and advise businesses on how to attract credit	• xistence of donor support for capacity building in the sector	credit facilities igh cost of credit 	reduces the ability of Institutions to give enough credit
Conclusion: The	problem of inadequate star	t-up capital for the youth ca	n be addressed by th	e Assembly by taking

Conclusion: The problem of inadequate start-up capital for the youth can be addressed by the Assembly by taking advantage of the existing potentials and opportunities while working assiduously to minimise the constraints and challenges.

CREATE OPPORTUNITIES FOR ALL

Adopted Issue	Potentials	Opportunities	
Poor	• Existence	• Existence	•
agricultural practices	of District Agriculture Directorate	of Water Resources Commission with requisite personnel to provide guidance to Assembly	alo
which affect water	Assembly has the power to zone and rezone		• mo
quality			• app
Conclusi	on: The issue of poor agriculture practices which affect water quality can be	e addressed as there exist a number of opportunities and potentials to address	

Adopted Issue	Potentials			Opportunities	
Poor quality of drinking water	• of water sources (surface and underground)	Availability	•	of Ghana Water Company and other related institution	Existence
	• spare parts	Availability	•	of Donor Funds	Availability
	• of trained mechanics	Availability			
Conclusion: The	issues of poor quality of drinking water can be addressed as en	nough potential	s exi	ists to pursue the issue. The challenges and constraints	can be dealt with
Poor sanitation and waste management	• of the Environmental Health and Sanitation Unit	Existence	•	of zoomlion services	Existence
	• of land for final disposal site	Large scale	•	of Donor partners	Existence
	• of DA's bye-law	Availability			

Conclusion: Thi Poor quality of education at all levels Inadequate funding sources for education High number of untrained teachers at the basic level Teacher absenteeism and low levels of commitment	 s issue can be addressed by providing adequate sanitation facilities and manage Presence of a number of school blocks Available reading materials High school enrolment at the basic level Presence of SMCs, PTAs, Circuit Supervisors. Community support Availability of trained teachers Availability of labour Existence o Education Directorate 	 ment skills to improve sanitation situation throughout the Assembly. A num Presence of Donor support (Plan Ghana) GoG support e.g. GETFunds, ETC D/A support Presence of banking institution Capitation Grant. Assistance of National Service scheme in education Existence of Teacher Training Colleges in the Region
Conclusion: Pot	entials and opportunities exist to improving education to enhance academic per	formance in schools in the district. The constraints and challenges can be ma
Low participation of females in learning of science, technology, engineering and	 Availability of educational infrastructure Availability of science and technical teachers 	 High premium on technical education Availability of financial support for science and technical education for females
mathematics Conclusion: Opt	portunities and potentials exist for the issue to be addressed. Constraints can be	managed through the provision of appropriate teaching and learning materia
	ogy, engineering and mathematics.	
Inadequate and inequitable access to education for PWDs and people with special needs at all levels	 Availability of educational infrastructure Availability of DACF Availability of teachers with skills on to handle people with special needs Presence of Social Welfare Department 	 Government policy support disability education Presence of NGOs
	adequate and inequitable access to education for PWDs and people with special	needs at all levels in the district can be tackled through the opportunities an
	ly educational infrastructure, enforcement of disability laws etc.	
Inadequate and poor	Availability of land for the development of sports stadium	Government policy support sport development
sports infrastructure	High interest of Assembly and residents for Sport Development	Presence of Ministry of Youth and Sport
		Presence of private individual investors in the sector

Conclusion: Opt	portunity and potentials exist for this to be tackled. The constraints and challen	ges can be handled	by prioritizing it and working assiduously with partners t
Poor quality of healthcare	Availability of Trained Health Staff	ř.) supports eg systems for Health, UNICEF etc.
services	High commitment of the Assembly to improve health service delivery	Availability of N	ational CHPS Policy
Inadequate and	Availability of District Health Directorate with trained staff	Existence of Nur	ses and Midwifery Training Schools in the Region etc.
inequitable			
distribution of			
critical staff			
mix			
Conclusion: Th	e issue of poor quality of healthcare services and inadequate and inequitable d	listribution of critic	cal staff mix can be resolved if it the advantage of the exis
health staff.	to issue of poor quarty of neurineare set nees and madequate and medinable e	insurroution of critic	
Inadequate	Availability of Health Insurance Scheme	Presence of NGC) supports eg Plan Ghana etc.

		District						
CONCLUSION	CONCLUSION: The issue can be addressed by harnessing the opportunities and potentials available in the district whiles							
the constraints	and o	challenges can be ma	anageo	l for full participation b	y the d	iaspora in the develop	ment of the Dis	trict.

2.5 IMPACT ANALYSIS

The development issues were subjected to pre-feasibility assessment by analysing each based on the potentials, opportunities, constraints and external challenges. After that, the issues which have passed the prefeasibility were subjected to further checks to ascertain the possible impacts of the issues and among others. Each of the issues were considered to determine their linkage effect on meeting basic human needs/right as well as their multiplier effect on economic efficiency by assessing whether the intervention could lead to the attraction of investors to the district; create jobs and increase household income and expand local economic development. Also, the issues were also analysed on the basis of their ability to positively change the lives of the people, ensure balanced development, promote the sustainable utilisation of natural resources, enhance positive cultural values, promote climate change mitigations and adaptations and achieve strong and effective institutional reforms in the district. Issues such HIV and AIDS, gender and nutrition were also prioritized.

	MMDAs		

DMTDP GOALS 2018-2021	ADOPTED ISSUES	Criteria for Impact Analysis
	Inadequate maintenance of facilities	
	Poor sanitation and waste management	Institutional reforms, impact on different population groups and Balanced development
	Poor quality of education at all levels	
	Inadequate funding sources for education High number of untrained teachers at the basic level	Impact on different population groups, Balanced development & Significant multiplier effect on economic efficiency
	Low participation in non-formal education	
	Low participation of females in learning of science, technology, engineering and mathematics	Gender equality with respect to practical and strategic needs and interests
	Inadequate and inequitable access to education for PWDs and people with special needs at all levels	impact on different population groups & Significant multiplier effect on economic efficiency
	Inadequate and poor sports infrastructure Poor quality of healthcare services	impact on different population groups and Balanced development & Significant multiplier effect on economic efficiency
	Inadequate and inequitable distribution of critical staff mix Inadequate capacity	Institutional reforms
	Increased cost of healthcare delivery Inadequate financing of the health sector Inadequate coverage of reproductive health and family	Impact on different population groups and Balanced development & Significant multiplier effect on economic efficiency
	planning servicesHighstigmatizationanddiscrimination of HIV and AIDs	Prevent HIV and AIDS infection and elimination of stigmatisation
	High incidence of HIV and AIDS among young persons	Prevent HIV and AIDS infection and elimination of stigmatisation
	Inadequate food safety training and services	Nutrition
	Inadequate nutrition education	Nutrition & Impact on

DMTDP G 2018-2021	OALS	ADOPTED ISSUES	Criteria for Impact Analysis
			different population groups
		Inadequate financial support for family planning programmes	
		Inadequate sexual education for young people	
		High school drop-out rates among adolescent girls	Impact on different population groups & Institutional reforms
		High youth unemployment	Institutional felorins
		Low awareness of child protection laws and policies	-
		Weak enforcement of laws and rights of children	
		Inadequate opportunities for persons with disabilities to contribute to society	Impact on different population groups & Institutional reforms
		Weak social protection systems	Institutional reforms &Gender equality with respect to practical and strategic needs and interests
		Inadequate and limited coverage of social protection programmes for vulnerable groups	Impact on different population groups & Institutional reforms
		Inadequate opportunities for persons with disabilities to contribute to society	Impact on different population groups & Significant multiplier effect on economic efficiency
		Inappropriate farming practices	Natural resource utilisation,
		Indiscriminate use of weedicides	Resilience and disaster risk
		Over exploitation and inefficient use of forest resources	reduction & Climate change mitigation and adaptation
		Low institutional capacity to adapt to climate change and undertake mitigation actions Inadequate institutional capacity to access global funds	Institutional reforms
		Limited capacities of local financial institutions to support Ghanaian investments in oil and	on economic efficiency &
		gas industry development Poor quality and inadequate road transport network	
		Inadequate investment in road transport infrastructure provision and maintenance	Significant multiplier effect on economic efficiency, Institutional reforms & Balanced development

DMTDP 0 2018-2021	GOALS	ADOPTED ISSUES	Criteria for Impact Analysis
		Inefficiencies in the procurement, management and supervision of contracts	Institutional reforms
		Rapid deterioration of roads	Significant multiplier effect on economic efficiency, Institutional reforms & Balanced development
		Inadequate facilities for PWDs in the transport system	Impact on different population groups & Significant multiplier effect on economic efficiency
		High incidence of road accidents	
		Poor and inadequate maintenance of infrastructure	Impact on different population groups & Significant multiplier effect on economic efficiency
		Poor waste disposal practices	Impact on different population groups, Significant multiplier effect on economic efficiency & Institutional reforms
		Poor drainage system	Impact on different
		Poor landscaping	population groups,
		Improper disposal of solid and liquid waste	Significant multiplier effect on economic efficiency & Resilience and disaster risk reduction
		Difficulty in the extension of grid electricity to remote rural and isolated communities	Impact on different population groups & Significant multiplier effect on economic efficiency
		Weak enforcement of planning and building regulations	
		Inadequate human and institutional capacities for land use planning	
		Scattered and unplanned human settlements	Impact on different population groups, Significant multiplier effect on economic efficiency & Balanced development
		Limited investments in social programmes in Zongos and inner cities	Impact on different population groups, Significant multiplier effect on economic efficiency & Balanced development
		Poor quality ICT services	

DMTDP GOALS	ADOPTED ISSUES	Criteria for Impact
2018-2021		Analysis
	Limited use of ICT as a tool to enhance the management and efficiency of businesses and provision of public services Inadequate ICT infrastructure across the country	Significant multiplier effect on economic efficiency & Balanced development
Governance, Corruption and Accountability	Ineffective sub-district structurePoorlinkagebetweenplanningandbudgetingatnational,regional and district levelsweakinvolvementandWeakinvolvementandparticipationofplanningandbudgetingudgeting	Significant multiplier effect on economic efficiency & Balanced development
	Weak relations between citizens and law enforcement agencies	
Strengthening Ghana's role in international affairs	Limited participation by the diaspora in development	Significant multiplier effect on economic efficiency
international affairs		

2.6 SUSTAINABILITY ANALYSIS OF THE ISSUES (INTERNAL CONSISTENCY/COMPATIBILITY)

The prioritised issues with positive significant impacts were subjected to strategic environmental analysis to ascertain the sustainability of the District Assembly's Medium Term Plan, 2018-2021. This involved assessing the internal consistency design to establish the relationship between the prioritized adopted issue and the four sustainability criteria of the SEA consisting of the Natural Resources, Socio-cultural Issues, Economic Issues and Institutional Issues. The issues were also subjected to compatibility assessment to determine how they relate to or support each other to achieve the objectives of the MTDP. Where the relationship was positive, it drew attention to the fact that the issues should be addressed holistically. Contrarily, where the relationship was negative, the issues adopted was reconsidered. The detailed application of the internal consistency/compatibility analysis is presented in Table 2.7 below:

TABLE: 2.7 SUSTAINABILITY TEST

Description of Activity: provision of Irrigation Systems			
CRITERIA – BASIC AIMS AND OBJECTIVES	INDICATORS	PERFORMANCE MEASURE	
1.5.0.1.1 EFFECTS ON NATURAL RESOURCES			
Protected Areas and Wildlife: should be conserved, and these resources should be enhanced where practical.	Sensitive areas shown on maps	(0) 1 2 3 4 5	
Biodiversity: protection and conservation of biodiversity		(0) 1 2 3 4 5	
Degraded Land : Areas vulnerable to degradation should be avoided, and already degraded land should be enhanced.	Vulnerable areas shown on maps	(0)1 2 3 4 5	
Dsertification: Reduce the incidence of desertification		(0)1 2 <mark>3 4</mark> 5	
Energy: The Activity should encourage efficient energy use, and maximize use of renewable rather than fossil fuels.	Quantity and type of fuel/energy to be identified	(0) 1 2 3 4 5

Regulation/Compliance: PPP should ensure best practice and
compliance with environmental/industry standards and guidelines.

Description of Activity: Improvement of Roads and Transport Infrastructure			
CRITERIA – BASIC AIMS AND OBJECTIVES	INDICATORS	PERFORMANCE MEASURE	
1.5.0.1.3 EFFECTS ON NATURAL RESOURCES			
Protected Areas and Wildlife : should be conserved, and these resources should be enhanced where practical.	Sensitive areas shown on maps	(0) 1 2 3 4 5	
Biodiversity: protection and conservation of biodiversity		(0) 1 2 3 4 5	
Degraded Land : Areas vulnerable to degradation should be avoided, and already degraded land should be enhanced.	Vulnerable areas shown on maps	(0)1 2 3 4 5	
Desertification: Reduce the incidence of desertification		(0)1 2 3 4 5	
Energy: The Activity should encourage efficient energy use, and maximize	Quantity and type of	(0) 1 2 3 4 5	

use of renewable rather than fossil fuels.	fuel/energy to be identified	
Pollution : Discharges of pollutants and waste products to the atmosphere, water and land should be avoided or minimised.	Quantity /type of pollutants and waste to be identified	(0) 1 2 <mark>3</mark> 4 5
Use of Raw Materials: All raw materials should be used with maximum efficiency, and recycled where practical.	Quantity and type of materials	(0) 1 2 3 4 5
Rivers and Water bodies : should retain their natural character and reduce water stresses especially those affecting internationally shared basins	Minimum flows/ water levels to be set	(0) 1 2 3 4 5
Sea level rise: Reduce vulnerability to sea level rise (eg high temperature rise, emissions, etc.)		1 2 3 4 5
Food security: Enhancement of soil fertility		(0) 1 2 3 4 5
EFFECTS ON SOCIAL AND CULTURAL CONDITIONS		
Local Character: and cohesion of local communities should be and enhanced where practical.	Opinions of local communities to be assessed	(0) 1 2 3 4 5
Health and Well-being : The Activity should benefit the work force, and local communities in terms of reduction in the incidence of vector, water, and air borne diseases and generally health and well-being.	Number of People exposed to water borne disease, or lacking adequate food and shelter to be assessed	(0) 1 2 3 4 5
Women and children: Improve livelihood of women and children.	Number of women to be empowered	(0) 1 2 3 4 5
Job Creation: The activity shouldcreatejobs for local people particularly women and young people.	Number of people to be employed	(0) 1 2 3 4 5
Participation : Active participation and involvement of local communities should be encouraged (especially vulnerable and excluded sections).	Level of participation proposed	(0) 1 2 3 4 5
Access to Land: Activity should improve access to land.	Number of the poor to be assisted	(0) 1 2 3 4 5
Access to Water: Activity should improve access to water.	Number of the poor to be assisted	(0) 1 2 3 4 5
Access to Transport: Activity should improve access to transport.	Number of the poor to be assisted	(0) 1 2 3 4
Sanitation: Activity should improve sanitation.	Number of the poor to be assisted	(0) 1 23 4 5
Equity: Adverse and beneficial impacts from development should be distributed equitably and should not discriminate against any groups, especially vulnerable and excluded people.	Number of the poor to be to benefit on equitable terms	(0) 1 2 3 4 5
Vulnerability and Risk: of drought, bushfire, floods crises and conflicts and epidemics should be reduced.	Occurrence to be noted and monitored	(0) 1 2 3 4 5
EFFECTS ON THE ECONOMY		
Growth : The PPP should result in development that encourages strong and stable conditions of economic growth.	Economic Output to be evaluated	(0) 1 2 3 4
Use of local materials and services : The PPP should result in the use of raw materials and services from local industries where possible.	Description of sources	(0) 1 2 3 4 5
Local Investment of Capital: Development should encourage the local retention of capital and the development of downstream industries, utilising local raw materials, products and labour.	Description of investment strategy	(0) 1 2 3 4 5
INSTITUTIONAL ISSUES		
Adherence to democratic principles		(0) 1 2 3 4 5
Human Rights		(0) 1 2 3 4 5
Access to information		(0) 1 2 <mark>3</mark> 4 5
Regulation/Compliance: PPP should ensure best practice and compliance with environmental/industry standards and guidelines.		(0) 1 2 3 4 5

Health and Well-being : The Activity should benefit the work force, and local communities in terms of reduction in the incidence of vector, water, and air borne diseases and generally health and well-being.	Number of People exposed to water borne disease, or lacking adequate food and shelter to be assessed	(0) 1 2 3 4 5
Women and children: Improve livelihood of women and children.	Number of women to be empowered	(0) 1 2 <mark>3</mark> 4 5
Job Creation: The activity shouldcreatejobs for local people particularly women and young people.	Number of people to be employed	(0) 1 2 <mark>3</mark> 4 5
Participation : Active participation and involvement of local communities should be encouraged (especially vulnerable and excluded sections).	Level of participation proposed	(0) 1 2 3 <mark>4</mark> 5
Access to Land: Activity should improve access to land.	Number of the poor to be assisted	(0) 1 2 <mark>3</mark> 4 5
Access to Water: Activity should improve access to water.	Number of the poor to be assisted	(0) 1 2 3 4 5
Access to Transport: Activity should improve access to transport.	Number of the poor to be assisted	(0) 1 2 3 4 5
Sanitation: Activity should improve sanitation.	Number of the poor to be assisted	(0) 1 2 3 4 5
Equity: Adverse and beneficial impacts from development should be distributed equitably and should not discriminate against any groups, especially vulnerable and excluded people.	Number of the poor to be to benefit on equitable terms	(0) 1 2 3 4 5
Vulnerability and Risk: of drought, bushfire, floods crises and conflicts and epidemics should be reduced.	Occurrence to be noted and monitored	(0) 1 2 3 4 5
EFFECTS ON THE ECONOMY		
Growth : The PPP should result in development that encourages strong and stable conditions of economic growth.	Economic Output to be evaluated	(0) 1 2 3 4 5
Use of local materials and services : The PPP should result in the use of raw materials and services from local industries where possible.	Description of sources	(0) 1 2 3 4 5
Local Investment of Capital: Development should encourage the local retention of capital and the development of downstream industries, utilising local raw materials, products and labour.	Description of investment strategy	(0) 1 2 3 4 5
INSTITUTIONAL ISSUES		
Adherence to democratic principles		(0) 1 2 3 4 5
Human Rights		(0) 1 2 3 4 5
Access to information		(0) 1 2 3 4 5
Regulation/Compliance: PPP should ensure best practice and		
compliance with environmental/industry standards and guidelines.		(0) 1 2 3 <mark>4</mark> 5

Table 2.9 COMPATIBILITY MATRIX RECORD SHEET

No.	Score	Reason for (in)compatibility
1&2	(X)	Roads will increase access to markets
1&3	(X)	Roads will enhance access to irrigation sites
1&4	(X)	Roads will enhance training programmes by facilitating easy movement of people and training materials
1&5	(X)	Road construction will facilitate movement of drilling materials
1&6	(X)	Roads will increase access to tourism sites
1&7	(X)	Roads will facilitate easy movement of building materials
2&3	(X)	Markets will provide convenient space for the sale and storage of irrigation
		products
2&4	(0)	No significant interaction
2&5	(0)	-Do-
2&6	(X)	Markets will promote the attraction of tourists
2&7	(X)	Markets will facilitate construction by making available all building materials
3&4	(X)	Training will enhance efficient and appropriate use of irrigation facilities
3&5	(X)	Boreholes will provide water for irrigation development
3&6	(0)	No significant interaction
3&7	(0)	No significant interaction
4&5	(X)	Training will enhance efficient and sustainable use of boreholes
4&6	(X)	Training will enhance local participation in tourism development
4&7	(0)	No significant interaction
5&6	(X)	Boreholes will provide potable water that will promote tourism development
5&7	(X)	Boreholes will provide water that will enhance construction of buildings
6&7	(X)	Buildings such as rest houses, motels, etc will facilitate tourism development by providing adequate accommodation and other supporting infrastructure

2.7 SUSTAINABLE PRIORITISED ISSUES AS CATEGORISED UNDER THEMES AND GOALS

The impact analysis established the impact of the issues with respect to their linkage effect on meeting basic human needs/rights, multiplier effect on economic efficiency, ability to impact on different population groups, promote balanced development; natural resource utilisation; cultural acceptability; resilience and disaster risk reduction; climate change mitigation and adaptation; enhance Institutional reforms among others and the application of sustainability tools to establish their compliance against the SEA Tools, a list of sustainable prioritized issues were ascertained including all the issues that passed through various texts. These sustainable prioritized issues are therefore categorized under the various themes of the National Medium Term Policy Framework and aligned to their respective Focus Areas as presented in Table 2.10.

Table 2.10: Sustainable price		

DEVELOPMENT DIMENSION	FOCUS AREAS OF MTDP 2018-2021	ADOPTED SUSTAINABLE PRIORITISED ISSUES	
Economic Development	STRONG AND RESILIENT ECONOMY	Revenue underperformance due to leakages and loopholes, among others	

		Weak expenditure management and budgetary controls
-	INDUSTRIAL	Inadequate and unreliable electricity
	TRANSFORMATION	Limited local participation in economic development
	PRIVATE SECTOR	Limited local participation in economic development
	DEVELOPMENT	Inadequate access to affordable credit
		Low domestic saving rate
-	AGRICULTURE AND RURAL	Low level of irrigated agriculture
	DEVELOPMENT	Poor storage and transportation systems
		Low quality and inadequate agriculture infrastructure
		Inadequate disease monitoring and surveillance system
		Inadequate agribusiness enterprises along the value chai
		Inadequate start-up capital for the youth Lack of credit for agriculture
		Low productivity and poor handling of livestock/ poultry
		products Poor marketing systems
		Inadequate development of and investment in processing
		and value addition
		Weak extension services delivery
	TOURISM AND CREATIVE	Poor tourism infrastructure and Service
	ARTS DEVELOPMENT	Low skill development
		Unreliable utilities
Social Development	EDUCATION AND	Poor quality of education at all levels
Social Development	TRAINING	Inadequate funding sources for education
		Low participation of females in learning of science,
		technology, engineering and mathematics
		Teacher absenteeism and low levels of commitment
		Inadequate use of teacher-learner contact time in schools
		Low participation in non-formal education
		Inadequate and inequitable access to education for PWDs
		and people with special needs at all levels
		Lack of physical access to public and private structures for
		PWDs
	HEALTH AND HEALTH	Poor quality of healthcare services
	SERVICES	Inadequate and inequitable distribution of critical staff
		mix Inadequate capacity
		Increased cost of healthcare delivery
		Inadequate financing of the health sector
		High stigmatization and discrimination of HIV and AIDs
		Lack of comprehensive knowledge of HIV and
		AIDS/STIs, especially among the vulnerable groups
		High incidence of HIV and AIDS among young persons
	FOOD AND NUTRITION SECURITY	Inadequate nutrition education
	POPULATION	Inadequate financial support for family planning
	MANAGEMENT	programmes
		Inadequate sexual education for young people

	WATER AND SANITATION	Poor planning and implementation of sanitation plans
		Poor agricultural practices which affect water quality
		Poor quality of drinking water
		High prevalence of open defecation
		High user fee for sanitation services
		Increasing demand for household water supply
		Poor planning for water at MMDAs
		Inadequate maintenance of facilities
		Poor sanitation and waste management
	POVERTY AND INEQUALITY	Unequal spatial distribution of the benefits of growth
	CHILD AND FAMILY	Ineffective inter-sectoral coordination of child protection
	WELFARE	and family welfare
		Limited coverage of social protection programmes
		targeting children
		Low awareness of child protection laws and policies
		Weak enforcement of laws and rights of children
		Inadequate opportunities for persons with disabilities to
		contribute to society
	GENDER EQUALITY	Gender disparities in access to economic opportunities
		Gender disparties in access to economic opportunities
	SOCIAL PROTECTION	Weak social protection systems
		weak social protection systems
	DISABILITY AND	Inadequate opportunities for persons with disabilities to
	DEVELOPMENT	contribute to society
		Lack of physical access to public and private structures for
		PWDs
	EMPLOYMENT AND	High levels of unemployment and under-employment
	DECENT WORK	amongst the youth
	SPORTS AND RECREATION	Inadequate and poor sports infrastructure
Environment,	ENVIRONMENTAL	Improper disposal of solid and liquid waste
Infrastructure and	POLLUTION	improper disposar or solid and inquid waste
Human Settlement	DEFORESTATION,	Inappropriate farming practices
Human Settlement	DESERTIFICATION AND	Indiscriminate use of weedicides
	SOIL EROSION	Over exploitation and inefficient use of forest resources
	CLIMATE VARIABILITY	Low institutional capacity to adapt to climate change and
	AND CHANGE	undertake mitigation actions
		Inadequate institutional capacity to access global funds
		Loss of trees and vegetative cover
	TRANSPORT	Poor quality and inadequate road transport network
	INFRASTRUCTUR:ROAD,	Inadequate investment in road transport infrastructure
	RAIL, WATER AND AIR	provision and maintenance
		Inefficiencies in the procurement, management and
		supervision of contracts
		Rapid deterioration of roads
	INFORMATION	Poor quality ICT services
	COMMUNICATION	Inadequate ICT infrastructure across the country
	TECHNOLOGY (ICT) SCIENCE, TECHNOLOGY	•
	AND INNOVATION	Limited collaboration between public research institutions and businesses on product, service and process innovation
		Low application of technology especially among small
		holder farmers
	ENERGY AND PETROLEUM	Limited capacities of local financial institutions to support
	2. 2ROT MUDIEIRODEUM	Ghanaian investments in oil and gas industry development
		Ghanaian investments in on and gas industry development

	1	
		Difficulty in the extension of grid electricity to remote
		rural and isolated communities
	DRAINAGE AND FLOOD CONTROL	Poor waste disposal practices
		Poor drainage system
	INFRASTRUCTURE MAINTENANCE	Poor and inadequate maintenance of infrastructure
	LAND ADMINISTRATION AND MANAGEMENT	Inadequate, reliable and comprehensive data on land ownership
	HUMAN SETTLEMENTS AND HOUSING	Weak enforcement of planning and building regulations Inadequate spatial plans for regions and MMDAs
		Inadequate human and institutional capacities for land use
		planning
		Scattered and unplanned human settlements
		•

CHAPTER THREE

DEVELOPMENT PROJECTIONS, ADOPTED GOALS, OBJECTIVES

AND STRATEGIES

3.0 INTRODUCTION

This chapter focus on the development projections, development goals of the District Assembly for the plan period from 2018-2021, policy objectives and strategies which have been adopted from the NMTDPF to improve upon the living standards of the people in the District.

3.1 DEVELOPMENT PROJECTIONS

Development projection is an essential tool adopted to forecast the district future needs in terms of population, infrastructure and other basic necessities of life. An increase in population implies increase in demand for social services, facilities, food security and many others. Projection was therefore made for these social services and infrastructure alongside the population to know the threshold population for the facilities especially in the area of health and education.

3.2 POPULATION

The total population of the District per the 2010 population and housing census is 95,030 with males constituting 46,275 which represent 48.7 percent whilst female counting 48,758 which constituting 51. 3 percent. However, the Volta Regional Analytical Report of the 2010 PHC does not contain annual growth rate for the District and therefore the Regional annual growth rate of 2.5 percent was adopted. The projected population of the district using the regional inter censual growth rate of 2.5 percent is 112,097 with male and female component of 54,992 and 57,105 respectively.

Year	Population				
теаг	Male	Female	Total		
2010	46,275	48,758	95,030		
2017	54,992	57,105	112097		
2018	56,332	58,265	114,597		
2019	57668	59590	117,258		
2020	59039	60,932	119,971		
2021	62314	64708	127022		

Table 3.1: Population Projection (2010, 2017-2021)

Source: DPCU, 2017

3.2.1 HEALTH

Health sector projection was made for hospital, doctors, midwives and nurses that will be required during the period with due consideration to health service delivery standards:

- Hospital-Population Ratio =1:75,000
- Doctor-Patient Ratio =1:20,000

• Nurse (Enroll nurses, midwives & community health nurses): Patient ratio =1: 600

Table 8.1 shows that only one hospital is needed during the plan period as the population of the District is above the threshold of 75,000. And is not up to the threshold population for providing two hospitals during the plan period.

Table 3.2: Demand for Hospital

Year	Population	Existing	Required	Backlog
2017	112,959	0	1	1
2018	114597	0	1	1
2019	117258	0	1	1
2020	119971	0	1	1
2021	127022	0	1	1

Table 3.3: Demand for Doctors

Year	Population	Existing	Required	Backlog
2017	112959	0	5	5
2018	114597	0	5	5
2019	117258	0	5	5
2020	119971	0	5	5
2021	127022	0	6	6

From Table 3.3 above, the district is lacking in terms of medical doctors, as the district has no doctor at the moment, by the health standard of 1:20,000 the district will need about five doctors during the plan period in order to improve upon the health status of the people in the district.

Table 3.4: Demand for Nurses

Year	Population	Existing	Required	Backlog
2017	112957	92	188	96
2018	114597	92	190	98
2019	117258	92	195	103
2020	119971	92	199	107
2021	127022	92	211	119

As shown on Table 3.4 above, the district currently has a total of 92 nurses which comprises of all categories of nurses. The backlog of nurses is very high and so therefore the district needs to put in appropriate policy measures to address this issue.

3.2.2 EDUCATION

Under education, projection was made for number of teachers that will be required and also classrooms and desks to be provided to enhance quality teaching and learning in Basic Schools in the District. The following standards were taken into consideration during the projection.

Teacher-Pupil Ratio 1:35 Classroom-Pupil Ratio 1:35

Table 3.5 Demand for Teachers in Basic School

Year	Enrolment	Existing	Required	Backlog	Surplus
2017	15179	831	433		398
2018	15558	831	445		386
2019	15946	831	455		376

2020	16344	831	467	467
2021				

Source: DPCU, 2017

Table 3.5 depicts that the District has more teachers than required and therefore steps should be taken to transfer the surplus to other District where they needed.

Table 3.6: Demand for Classroom

Year	Existing	Required	Backlog	Surplus
2017	564	434		130
2018	564	445		119
2019	564	456		108
2020	564	467		97
2021				

3.3 DEVELOPMENT FOCUS

The District Assembly development focuses would be on enhancing access to basic social services and infrastructure as well as creating enabling environment for economic growth.

3.4 DISTRICT DEVELOPMENT GOAL

The goal of the district is to improve the standard of living of the people through enhanced access to basic social services and infrastructure as well as creation of enabling environment for economic growth.

To be able to achieve the Development goal, the Assembly has adopted the following sustainable prioritized issues which are categorized under the various themes of the National Development Policy Framework 2018-2021 as presented in Table 3.7 below.

Table: 3.7 Sustainable prioritised issues as categorised under themes and goals

		ADOPTED		
STRATEGIC	FOCUS AREAS	SUSTAINABLE		
GOAL	OF MTDP	PRIORITISED	OBJECTIVE	STRATEGIES
	2018-2021	ISSUES		
Build a	STRONG AND	Revenue	Ensure improved	Eliminate revenue collection
Prosperous	RESILIENT	underperformance due	fiscal performance	leakages
Society	ECONOMY	to leakages and	and sustainability	
		loopholes, among		Diversify sources of resource
		others		mobilization
		Weak expenditure		
		management and		Extend and strengthen the GIFMIS
		budgetary controls		system across all MDAs and
				MMDAs
	INDUSTRIAL	Inadequate and	Ensure energy	Ensure the necessary investment to
	TRANSFORM	unreliable electricity	availability and	upgrade, renew, and expand the
	ATION	Limited local	reliability	power transmission and
		participation in	Pursue flagship	distribution network
		economic development	industrial develop-	
			ment initiatives	Implement One district, one
				factory initiative

	1		
PRIVATE SECTOR DEVELOPME NT	Inadequate access to affordable credit Low domestic saving rate Limited access to credit by SMEs	Enhance Business Enabling Environ- ment Support Entrepreneurs-hip and SME Development	Reform the tax system to reduce the burden on businesses and create opportunities for business expansion Create an entrepreneurial culture, especially among the youth Mobilise resources from existing financial and technical sources to support MSMEs Provide opportunities for MSMEs to participate in all Public-Private Partnerships (PPPs) and local content arrangements
AGRICULTU RE AND RURAL DEVELOPME NT	Low application of technology especially among small holder farmers Erratic rainfall patterns Low level of irrigated agriculture Poor storage and transportation systems Poor farm-level practices, High cost of conventional storage solutions for smallholder farmers Low quality and inadequate agriculture infrastructure Inadequate disease monitoring and surveillance system Lack of credit for agriculture Inadequate development of and investment in processing and value addition	Improve production efficiency and yield Improve Post- Harvest Management Enhance the application of science, technology and innovation Promote agriculture as a viable business among the youth	Establish modalities and regulatory frameworks for production of seed/planting materials, and other agro inputs Increase investment in research and development of climate resilient, high yielding disease and pest resistant, short duration crop varieties, taking into account consumer health and safety Reinvigorate extension services Ensure effective implementation of the yield improvement programme Intensify and increase access to agricultural mechanization along the value chain Develop systems to harvest excess water for irrigation Develop and promote appropriate and affordable and modern irrigation technologies for all agro ecological zones Develop the capacity of farmers to use meteorological information Provide support for small- and medium-scale agro-processing enterprises through the One
	Weak extension	food security and income generation	Ensure continuous expansion and

TOURISM AND CREATIVE ARTS DEVELOPME	services delivery Inadequate agribusiness enterprises along the value chain Inadequate start-up capital for the youth Low productivity and poor handling of livestock/ poultry products Poor tourism infrastructure and Service Low skills development	Diversify and expand the tourism industry for economic development	upgrading of road infrastructure connecting farms to marketing center Support youth to go into agricultural enterprise along the value chain Develop and implement programmes to attract youth into off-farm activities such as handling, processing, packaging and transportation Provide financial support for youth by linking them to financial institutions for the provision of start-up capital Support the youth to have access to land Intensify disease control and surveillance especially for zoonotic and scheduled diseases Expanding the tourism sector through investment, innovation, the pursuit of service excellence Promote public private
NT	Unreliable utilities	development	partnerships for investment in the sector Mainstream tourism development
			in district development plans
EDUCATION AND TRAINING	Poor quality of education at all levels Inadequate funding Inadequate funding sources for education Teacher absenteeism and and low levels of commitment Inadequate use of Inadequate use of teacher-learner contact time in schools Low participation in non-formal education Low participation of females in learning of science, technology, engineering and	Enhance inclusive and equitable access to, and participation in quality education at all levels Strengthen school management systems	in district development plans Ensure inclusive education for all boys and girls with special needs Popularize and demystify the teaching and learning of science, technology, engineering and mathematics (STEM) and ICT education in basic and secondary education Expand infrastructure and facilities at all levels Enhance quality of teaching and learning Ensure adequate supply of teaching and learning materials
	AND CREATIVE ARTS DEVELOPME NT EDUCATION AND	Inadequate agribusiness enterprises along the value chainInadequate start-up capital for the youthLow productivity and poor handling of livestock/ poultry productsTOURISM AND CREATIVE ARTS DEVELOPME NTPoor tourism infrastructure ServiceEDUCATION AND TRAININGPoor quality of education at all levelsEDUCATION AND TRAININGPoor quality of education at all levelsInadequate for education for education treacher absenteeism and low levels of commitmentInadequate unreliable utilitiesLow participation in non-formal educationLow participation in non-formal education	Inadequate agribusiness enterprises along the value chainInadequate start-up capital for the youthLow productivity and poor handling of livestock/ poultry productsInadequate start-up capital for the youthTOURISM AND CREATIVE ARTS DEVELOPME NTPoor infrastructure and Service Low skills developmentDiversify and expand the tourism industry for economic developmentEDUCATION AND TRAININGPoor quality of education at all levels Inadequate funding sources for education Teacher absenteeism and low levels of commitmentEnhance inclusive and equitable access to, and participation in quality education at all levels Strengthen school management systemsInadequate use use of teacher-learner contact time in schoolsInadequate of participation in participation in participation in commitmentLow participation of females in learning ofInadequate participation in participation in

ſ			
HEAD	Inadequate inequitable acc education for and people with needs at all level LTH AND Poor JICES Inadequate inequitable disto of critical staff n Inadequate inequitable disto of critical staff n Inadequate capace Increased cos healthcare delive Inadequate finant the health sector High stigmatizati discrimination cand AIDs Lack of compre knowledge of H AIDS/STIs, esj among the vul groups High incidence and AIDS young persons	PWDs special s of Ensure affordat equitable, ea accessible and Universal and Universal es and Universal and Universal and Universal es and Universal ea coverage (UHC) isix system bealthcare management system weight cing of Ensure reduction of r HIV infections, especially ame the vulnera pecially nerable	sily Community-based Health Plannin and Services (CHPS) policy is ensure equity in access to quality health care Expand and equip health facilities Revamp emergency medice preparedness and response service the Strengthen the district and sul district health systems as the beer rock of the national primary healt care strategy Enhance efficiency in governance and management of the health system Improve production an distribution mix of critical staff Strengthen collaboration an partnership with the private sector to provide health services Strengthen capacity for monitorin and evaluation in the health sector Expand and intensify HI Counselling and Testing (HTC programmes Intensify education to reduce stigmatization Intensify behavioural chang strategies especially for high ris groups for HIV & AIDS and TB
			strategies especially for high ris
	Inadequate finan the health sector High stigmatizat discrimination of and AIDs Lack of compre knowledge of H AIDS/STIs, esp among the vul groups High incidence and AIDS	ion and AIDS/STIs ion and AIDS/STIs of HIV infections, especially and the vulnera groups IV and pecially nerable	 the Strengthen the district and su district health systems as the borock of the national primary hear care strategy Enhance efficiency in governar and management of the hear system Improve production and distribution mix of critical staff Strengthen collaboration and partnership with the private sect to provide health services Strengthen capacity for monitori and evaluation in the health sector Expand and intensify H Counselling and Testing (HT programmes) Intensify behavioural char strategies especially for high r groups for HIV & AIDS and TB Strengthen collaboration amon HIV & AIDs, TB, and sexual a reproductive health programmes

			Ensure access to Antiretroviral Therapy
FOOD AND NUTRITION SECURITY	Inadequate nutrition education	Ensure food and nutrition security	Promote healthy diets and lifestyles
POPULA- TION MANAGE- MENT	Inadequate coverage of reproductive health and family planning services Inadequate financial support for family planning programmes Inadequate sexual education for young people	Improve population management	Intensify public education on population issues at all levels of society Improve maternal and adolescent reproductive health Strengthen the integration of family planning and nutrition education into adolescent reproductive healthcare.
	High school drop-out rates among adolescent girls	Harness demographic dividend	Scale up educational campaigns to remove socio-cultural barriers against sexual and reproductive health services to young people.
	High youth unemployment		Expand technical and vocational education and training to address high school drop-out rate
WATER AND SANITATION	Pooragricultural practicespracticeswhich affect water qualityPoorplanningandimplementationimplementationof sanitation plansPoorquality of drinking waterIncreasing demandfor household water supplyInadequatefinancing of the waterInadequatefinancing of the waterHighprevalenceof opendefecationHighuserfeefor sanitation servicesPoor planningfor water at MMDAs	Promote sustainable water resource development and management Improve access to safe and reliable water supply services for all	Undertake tree planting along the banks of all major water bodies and their tributaries to reduce silting and pollution from human activities. Ensure sustainable financing of operations and maintenance of water supply systems Provide mechanized borehole and small town water systems Implement public-private partnership policy as alternative source of funding for water services delivery Revise and facilitate DWSPs within MMDAs Build capacity for the development and implementation of sustainable plans for all water facilities Set up mechanisms and measures to support, encourage and promote
	Inadequate	Promote efficient	water harvesting

	1		
	maintenance of facilities Poor sanitation and waste management	and sustainable wastewater management Improve access to improved and reliable environ- menttal sanitation services	Develop and implement sewerage masterplans, including faecal sludge management and waste treatment facilities for all human settlements Promote the use of waste-to- energy technologies Create space for private sector participation in the provision of sanitation services Increase and equip front line staff for sanitation Monitor and evaluate implementation of sanitation plan Provide public education on solid waste management Expand disability-friendly and gender-friendly sanitation facilities Review, gazette and enforce MMDAs' bye-laws on sanitation
			Improve the management of existing waste disposal sites to control GHGs emissions
POVERTY AND INEQUALITY	Unequal spatial distribution of the benefits of growth	Eradicate poverty in all its forms and dimensions	Empower the vulnerable to access basic necessities of life
CHILD AND FAMILY WELFARE	Low awareness of child protection laws and policies Weak enforcement of laws and rights of children	Ensure effective child protection and family welfare system Ensure the rights and entitlements of children	Mainstream child protection interventions into development plans and budgets of MDAs and MMDAs Expand social protection interventions to reach all categories of vulnerable children Institute a framework for developing the capacity of caregivers Promote implementation of policies that increase enrolment and retention in schools such as the School Feeding Programme and Capitation Grant
			Increase awareness on child protection

			Enhance inclusion of children with disability and special needs in all spheres of child development Increase access to education and education materials for orphans, vulnerable children and children with special needs Eliminate the worst forms of child labour by enforcing laws on child labour, child Strengthen the capacity of relevant institutions to enforce laws on
GENDER EQUALITY	Gender disparities in access to economic opportunities	Attain gender equality and equity in political, social and economic development systems and outcomes Promote economic empowerment of women	child abuse and child trafficking Introduce measures to promote change in the socio-cultural norms and values inhibiting gender equality. Mainstream gender topics educational curriculum at the basic level Re-introduce and enforce the administrative directive on the reservation of 30 percent of poverty alleviation funds of MMDAs to service women's enterprises Ensure at least, 50 percent of MASLOC funds allocation to female applicants Institute mentoring of girls' programme to create a pool of potential female leaders
SOCIAL PROTECTION	Weak social protection systems	Strengthen social protection, especially for children, women, persons with disability and the elderly	Mainstream social protection into sector plans and budgets Strengthen and effectively implement existing social protection intervention programmes and expand their coverage to include all vulnerable groups Strengthen education and awareness against stigma, abuse, discrimination, and harassment of the vulnerable Develop and implement productive

				and financial inclusion alongside the LEAP cash grant to facilitate the graduation of LEAP beneficiaries from the cash transfer
				programme
	DISABILITY AND DEVELOPME NT	Lack of physical access to public and private structures for PWDs	Promote full participation of PWDs in social and economic development of the country Ensure that PWDs enjoy all the benefits of Ghanaian citizenship	Ensure effective implementation of the 3 percent increase in District Assemblies Common Fund disbursements to PWDs Generate database on PWD Promote participation of PWDs in national development Create avenues for PWD to acquire credit or capital for self
				Facilitate the exercise of PWDs rights in the electoral process by addressing problems of accessibility to voting
				Promote advocacy in the inclusion of PWDs in politics, electoral process and governance
				Ensure the implementation of the Ghana Accessibility Standards to ensure access of PWDs to the built environment, goods, services and assistive devices
				Promote inclusive education and lifelong learning for PWDs
				Address special issues and concerns of women with disabilities (WWDs) and children with disability
	EMPLOYMEN T AND DECENT WORK	High levels of unemployment and under-employment amongst the youth	Improve human capital development and management	Promote and enforce deeper and wider application of local content and participation laws
				Create equal employment opportunities for PWDs
	SPORTS AND RECREATION	Inadequate and poor sports infrastructure	Enhance sports and recreational infrastructure	Develop and maintain sports and recreational infrastructure
				Promote partnerships with private sector in the development of sports and recreation infrastructure
Safeguard the natural	ENVIRONME NTAL	Improper disposal of solid and liquid waste	Reduce environmental	Promote the use of environmentally friendly methods

environment	POLLUTION		pollution	and products
and ensure a resilient built environment		Inadequate engineered landfill sites and waste water treatment plants		Protect sensitive areas from pollution and contamination, especially groundwater sources and intake of public water supplies
	DEFORESTAT ION, DESERTIFIC ATION AND SOIL EROSION	Inappropriate farming practices Indiscriminate use of weedicides Over exploitation and inefficient use of forest resources	Combat deforestation, desertification and Soil erosion	Strengthen implementation of Ghana forest Plantation Strategy and restore degraded areas within and outside forest reserves Improve incentives and other measures to encourage users of environmental resources to adopt less exploitative and non- degrading practices in agriculture Promote alternative livelihoods,
	CLIMATE VARIABILITY AND CHANGE	Low institutional capacity to adapt to climate change and undertake mitigation actions	Enhance climate change resilience	including eco-tourism in forest fringe communities Mainstreaming of climate change in national development planning and budgeting processes Collaborate with international partners to have more access to the Green Climate Fund (\$30
		Loss of trees and vegetative cover	Reduce greenhouse gases	billion Global Fund) for climate change purposes Initiate green Ghana campaign with Chiefs, Queen Mothers, Traditional Authorities, Civil Society, Religious bodies and other recognised groups Promote tree planting and green landscaping in communities
	TRANSPORT INFRASTRUC -TURE: ROAD, RAIL, WATER AND AIR	Poor quality and inadequate road transport network Rapid deterioration of roads	Improve efficiency and effectiveness of road transport infrastructure and services	Expand and maintain the national road network Provide bitumen surface for road networks in district capitals and areas of high agricultural production and tourism. Promote local content and participation in the provisions and award of contracts Develop standards for public transport vehicles in line with international best practices

			Mainstream climate change into the transport sector
			Provide adequate training for motorists
			Ensure implementation of the provisions on transportation under the PWDs Act, 2006, Act 715
INFORMA- TION COMMUNI-	Poor quality ICT services	Enhance application of ICT in national	Create opportunities for entrepreneurship in ICT
CATION TECHNOLOG Y (ICT)	Inadequate ICT infrastructure across the country	development	Increase citizens' accessibility to data platforms
			Accelerate investment in development of ICT infrastructure
			Improve the quality of ICT services, especially internet and telephony
			Develop and maintain online database for all categories of all properties and provide secured data access
			Provide real time information to all segments of the population and economy
			Deepen internet availability and accessibility nationally especially in schools (citizen digital index)
			Increase internet capacity and quality training in and out of school
DISASTER MANAGEME NT	Weak legal and policy frameworks for disaster prevention,	Promote proactive planning for disaster prevention	Educate public and private institutions on natural and man- made hazards and disaster risk
	preparedness and response	and mitigation	reduction
			Strengthen early warning and response mechanism on disasters
			Implement gender sensitivity in disaster management Strengthen the capacity of the
SCIENCE,	Limited collaboration	Mainstream	Apply science, technology and
TECHNOLOG	between public	science, technology	innovation in implementation of
Y AND	research institutions	and innovation in	policies, programmes and projects
INNOVATION	and businesses on	all socio-economic	r, programmes and projects
	product, service and	activities	Scale up investments in research
			•

		· · ·		
		process innovation Low application of technology especially among small holder farmers		and development to find local solution to challenges
	NERGY AND ETROLEUM	Difficulty in the extension of grid electricity to remote rural and isolated communities Limited capacities of local financial institutions to support Ghanaian investments in oil and gas industry development	Ensure availability of, clean, affordable and accessible energy Leverage oil and gas industry as a catalyst for national economic development	Renewables (mini hydro, solar, biomass, wind, tidal) Promote the conversion of waste to energy Facilitate universal access to adequate, reliable and cost effective petroleum products such as Liquefied Petroleum Gas (LPG), Promote value addition in the oil and gas industry
AN	RAINAGE ND FLOOD ONTROL	Poor waste disposal practices Poor drainage system	Address recurrent devastating floods	Construct storm drains in Accra and other cities and towns to address the recurrent devastating floods. Intensify public education on indiscriminate disposal of waste
-T	FRASTRUC URE AINTENAN E	Poor and inadequate maintenance of infrastructure	Promote proper maintenance culture	Establish timely and effective preventive maintenance plan for all public infrastructure Build capacity to ensure requisite skills for infrastructure maintenance
SE TS HC	OUSING	Weak enforcement of planning and building regulations Inadequate spatial plans for regions and MMDAs Inadequate human and institutional capacities for land use planning Scattered and unplanned human settlements	housing	Fully implement Land Use and Spatial Planning Act, 2016 (Act 925)Ensure proper urban and landscape design and implementationEnsure institutional, technological and legal reforms in support of land use planningStrengthen the human and institutional capacities for effective land use planning and management nationwideProvide technical assistance to communities to support basic house building skills training programmes
ZC	ONGOS AND	Limited investments in	Improve quality of	Promote investment in social

r		· •	1:0 : :	
	INNER CITIES DEVELOPME NT	social programmes in Zongos and inner cities	life in slums, Zongos and inner cities	programmes, including education and training, supporting local businesses, and culture and arts in Zongos
Maintain a stable, united and safe society	LOCAL GOVERNMEN T AND DECENTRALI SATION	Ineffective sub-district structures Poor linkage between planning and budgeting at national, regional and district levels Weak spatial planning capacity at the local level Inadequate exploitation of local opportunities for economic growth and job creation Limited capacity and opportunities for revenue mobilisation	Deepen political and administrative decentralization	Strengthen sub-district structuresStrengthen local level capacity for participatory planning and budgetingStrengthen local capacity for spatial planningCreate enabling environment for the implementation of the Local Economic Development (LED) and Public Private Partnership (PPP) policies at the district levelEnsure implementation of planning and budgeting provisions in LI 2232 and the Public Financial Management Act 2016 (Act 921)Enhance revenue mobilization capacity and capability of MMDAsStrengthen PPPs in IGF mobilizationImprove service delivery at the
	HUMAN SECURITY AND PUBLIC SAFETY	Weak relations between citizens and law enforcement agencies	Enhance security service delivery	MMDA level Improve relations between law enforcement agencies and the citizenry Enhance the proportion of security persons on frontline duties
Strengthenin g Ghana's role in international affairs	INTERNATIO NAL RELATIONS	Limited participation by the diaspora in development	Integrate Ghanaian Diaspora into National Development	Ensure participation of Ghanaians abroad in national development through the implementation of diaspora engagement policy Attract and retain mutually beneficial and sustainable partnerships with Ghanaians in the Diaspora

CHAPTER FOUR

COMPOSITE PROGRAMMES OF ACTION

4.0 DEVELOPMENT PROGRAMMES AND SUB-PROGRAMMES OF AFADZATO SOUTH DISTRICT ASSEMBLY

4.1 PROGRAMMES OF ACTION (POA) 2018-2021

Presented in the matrix below is the POA for all the programmes and sub-programmes for 2018 to 2021. The POA consists of the thematic area, adopted goals, sub-goals, adopted objectives, strategies, programmes and sub-programme. Others include the sets of projects or activities to address the adopted issues, outcome/impact indicators, time frame, indicative budget and implementing agencies (both lead and collaborating).

Adopted objective	Adopted strategies	Program mes	Sub- program	Projects/ activities	Outcome/ impact	,	Гіте	fram	e	Ind	icative Buo	lget	Implemen	ting Agencies
s	0		mes		indicators	20 18	20 19	20 20	20 21	GoG	IGF	Donor	Lead	Col'ng

1.6 AFADZATO SOUTH FUTURE STATE MAP

The future desired state map of Afadzato South District Assembly is very important. We want our District capital and its environs like Ve-Wudome, Ve-Agbome and Ve-Hoeme to become urbanised and Ve koleonu, Laiti sober, Teikrom, Liati Dafor, Worte, Logba, leklebi, Tafi and its environs zoned for agriculture activities. The Akwapim Togo range Wote range which is very sacred range should be preserved and used sustainably, Hence, alternative livelihood activities like mushroom farming, animal rearing, bee-keeping among others should be introduced to people in the communities.

Also, the lowlands of Have, Sadzikope, Woadze and old Kpeve should be reserved for cattle ranching. The banks of river Dayi and lake Volta at the southern part of the district would be used for fishing and other related activities. Afadzato South is noted for tourism, therefore, the two well-known sites thus mountain Afadza and Tafi Monkey Sanctuary would be developed to boost tourism and generate more revenue for the district. Below is the Desired Future State Map of the district.

Fig 4.1: The Desired Future State Map of the District

1.7 INDICATIVE FINANCIAL PLAN

The DMTDP (2017-2021) will be funded from the following sources:

1. Internally Generated Funds

- 2. District Assembly Common Fund (DA
- 3. District Development Facility (DDF)
- 4. Direct payment for projects (e.g. Get Fund Projects
- 5. Transfer to the District for the execution of projects/ activities of Ministries, Departments and
- Agencies (MDAs) by the sector ministries and agencies such a
- Ministry of Local Government and Rural Develop
- Ministry of Trades and Industry
- Ministry of Foods and Agriculture
- Ministry of Roads and Transport
- Ministry of the Interior
- Ministry of Education
- Ministry of Youth and Sports
- ✓ Ministry of Employment and Social Welfare
- Ministry of Children, Gender and Social Protection
- ✓ Ministry of Energy
- Ministry of Communication and Information
- Ministry of Justice

MONITORING AND EVALUATION ARRANGEMENTS

2. INTRODUCTION

This chapter deals with monitoring and evaluation arrangements for the implementation of the Medium-Term Development Plan (2017-2021). The details can be found in the monitoring and Evaluation plan that will follow this District Medium Term Development Plan (DMTDP).

2.1 MONITORING AND EVALUATION ARRANGEMENTS

District Medium Term Plans are aimed generally at improving the lives of the people whom it is intended for. The goals, objectives, strategies and the activities that will lead to the accomplishment of the goals must reflect positively on the lives of the people. To ensure that these goals and objectives are attained for well-being of the people, and to ensure that the plan do not fail, there must be a monitoring and evaluation process put in place to ensure that implementation of specific programmes and projects in the DMTDP are on track and its impact on the people seen in a positive way.

The DMTDP should be systematically monitored, evaluated and reported. These will show the extent of progress made towards the implementation of the Ghana shared Growth and Development Agenda.

2.2 MONITORING

At the management level, the plan will be monitored by a committee made up of the District Chief Executive (DCE), District Coordinating Director (DCD), District Works Engineer, the District Planning Officer(DPO), District Budget Analyst, Convener of Development Planning, Sub-Committee and the heads of the three key Departments which are members of the DPCU, namely education, health and agriculture.

This team will meet every quarter and review quarterly reports from a field team made up of the convener the works sub-committee, DPCU and Assembly member (for the relevant electoral areas where the project is to be executed.

There will also be committees to oversee projects under every sector-education, health ,agriculture, transportation, physical planning, gender issues etc.it will be made of the convener and a member of the relevant sub-committee and the heads of the relevant department and his or her technical team.

The committee will send their reports to the DPCU on monthly basis. The DCE and the DCD and the DPCU will carry out on the spot checks of the implementation of projects/programmes/activities under the plan.

2.3 EVALUATION

An ex-post technical evaluation by combined team of the DPCU and external evaluators will be undertaken at the end of each year. In respect of the following:

1. Relevance of the projects/programmes/activities in the plan in terms of response to the essential needs to the people of the District.

2.Adequacy of the plan for the overall development of the District and how much it has been able to bridge the gap with the more developed parts of the country.

3. Progress in terms of actual and planned activities, the identification of reasons for achievement or shortcomings and indications for remedies for the shortcomings.

4. Effectiveness: an assessment of the degree of attainment of the pre-determined objectives and targets of the programmes/projects. This will be done either in qualitative and quantitative terms.it will also include an assessment of the satisfaction or dissatisfaction expressed by the beneficiary communities regarding the effects of the programmes/projects of the plan.

Commented [u2]: Template for monitoring and evaluation should be included

CHAPTER SEVEN

COMMUNICATION STRATEGY

3. INTRODUCTION

Communication is very important in the preparation as well as the implementation of the District Medium Term Development Plan 2017-2021.it enables us to interact effectively with every stakeholder in the plan preparation.it also helps stakeholder and beneficiaries to give their inputs in the plan. 7.1.2 Communication strategies

For the dissemination of the 2017-2021 DMTDP as well as the Annual and Quarterly Progress Reports of its implementation, the following strategies will be used.

- 1. District Assembly Community Interfaces
- 2. Radio Talk Shows
- 3. Public Hearings
- 4. Use of information Van.
- 5. Use of Assembly Members
- 6. Photo Exhibition

3.1 District Assembly-Community Interfaces

There will be regular District Assembly – Community Interfaces where officials of the District Assembly will interact with community members on regular basis. At these meetings information on development in the District will be passed on to community members. Concerns raised by community members will also be noted down for further action and explanations. The Assembly will also take an opportunity during sod-cutting and inauguration of projects to interact with community members.

3.2 Radio Talk Shows

There is a popular saying that radio gets results. To this end there will be regular radio talk shows on local FM stations within the region and the District to interact with the people of the District. This will discuss activities outlined in the DMTDP as well as the progress of its implementation. During the airing of this programme there will be phone-in sessions for listeners to ask questions and make contributions.

3.3 Public Hearings

There will be public hearings at two stages in the plan preparation. First a public hearing will be held at the beginning stages of the plan preparation to solicit community needs and aspirations. This will be held at sub-district levels. At this stage members of the sub-district will be required to present their needs in order of priority. This will then form the core for the formulation of goals and objectives. Again there will be another public hearing to present the goals, objectives, strategies and activities outlined in the plan to community members.

3.4 Use of Information Van

Information van will also be used to propagate information relating to development in the District and to disseminate to the people, the activities outlined in the DMTDP.

3.5 Use of Assembly Members

Assembly members will be used as liaisons between the District Assembly and the general public. During General Assembly meetings members will be briefed about the progress of developmental activities in the district. They will be entreated to pass this information on to members of their electoral areas.

3.6 Photo Exhibition

Photo exhibition will be conducted on periodically to bring to the notice of the general public pictures of ongoing and completed development projects.

3.7 Others

These will include reports by the print media, quarterly and annual review meetings involving stakeholders - Heads of DAs, NGOs, Development partners, Chiefs and beneficiary community

members as well as the distribution of quarterly and annual reports on the implementation to stakeholders.
