CHAPTER ONE

1.0 INTRODUCTION

The 2020 Annual Progress Report (APR) on the implementation of the approved Annual Action Plan of the Bodi District Assembly is a compilation of implementation status of projects/programs from the 2020 Annual Action plan.

This report provides information on progress made by the Assembly and its Development Partners in the implementation of the Plan from 1st January to 31st December, 2020 to the stakeholders. The APR also identifies weaknesses which are likely to hinder the achievement of the objectives and overall goal of the projects and programs.

The report captures the results on national recommended core District indicators, specific indicators of the District, revenue and expenditures and critical development and poverty issues.

The report is structured in three chapters. Chapter one presents the summary of achievement of the implementation of the DMTDP 2018-2021, the purpose of the Monitoring and Evaluation, processes involved and challenges encountered. Chapter two also indicates the Monitoring and Evaluation activities. Chapter three ends the report with the Way forward where key issues addressed and those yet to be addressed are highlighted. Recommendations have also been made in this chapter.

1.1 Status of Implementation of the 2020 Annual Action Plan

A review of the status of implementation of the projects and programs outlined in the 2020 Action Plan revealed that the Assembly was able to execute a number of the planned projects/programs. A total of 154 Projects/programs comprising of 109 programs and 45 Projects are contained in the report with the inclusion of 5 Infrastructure for Poverty Eradication Project (IPEP) going on in the District which are also at various levels of completion. All the 109 programs and 16 of the projects were completed, 38 projects are still on going out of the 45 projects in the register. The Assembly needs to intensify the project implementation activities in order to be complete all projects in subsequent years. The table below gives detail of the projects fully implemented, ongoing and not implemented.

Table 1.1: status of project and programme implementation

1.2 Proportion of DMTDP Implemented

From the 2018-2021 Medium Term Development Plan, the Bodi District Assembly was able to implement significant number of projects and programs in 2020 plan period. The table below shows details implementation of the Plan.

Table 1.2: Proportion of the DMTDP Implemented

Indicators	<u>Baseline</u> <u>2017</u>	<u>Target</u> <u>2018</u>	<u>Actual</u> <u>2018</u>	<u>Target</u> <u>2019</u>	<u>Actual</u> <u>2019</u>	<u>Target</u> <u>2020</u>	<u>Actual</u> <u>2020</u>	<u>Target</u> <u>2021</u>	<u>Actual</u> <u>2021</u>

Source: DPCU, Jan., 2021

In the year under review (2020), a total of 155 projects and programs were planned for implementation. These cut across all the development dimensions; Economic Development, Social Development, Environment, Infrastructure and Human Settlements and Governance, corruption and public Accountability as contained in table 1.1. For the four year period the District did not plan for any project with relation to Ghana's Role in International Affairs. At the end of the year 154 of the activities were implemented with, only one project not implemented constituting 0.6%. The 154 projects and programs implemented comprise both physical and non-physical projects. In all, 81% of activities in the plan were implemented with 18.8% still on project. The percentage of interventions abandoned and interventions yet to start stand at 0.6% each. This indicates that only one project was awarded but not started at the end of the year.

1.2 The Purpose of Monitoring and Evaluation for 2020

The monitoring and evaluation objectives for the period under review included the following:

- i. To increase efficiency in the delivery of socio-economic services and outputs;
- ii. To ascertain and manage constraints and challenges which may hamper the achievement of development objectives and goal; and
- iii. To share best practices and use lessons learnt for decision making and re-planning.

1.3 Processes involved and difficulties encountered

The APR was compiled from outputs of quarterly monitoring and evaluation of development projects and programs specified in the Annual Action Plan. It also included findings from quarterly review meetings of the District Planning Coordinating Unit (DPCU) and other departments of the Assembly.

It is always challenging to collate departmental data into a comprehensive report in order to reflect the true state of affairs in the District. It is also difficult to get reports or data from the departments and units early enough to enable the compilation of report to meet the deadline per the regulation.

Another challenge is the limited resources for Monitoring and Evaluation to be carried out as expected.

CHAPTER TWO

2.0 MONITORING AND EVALUATION ACTIVITIES REPORT AS 31ST DECEMBER, 2020

DONOR GRANTS (IDA/SRWSP)	NAD					NAD	NAD	NAD	2,300
TOTAL REVENUE	5,618,930.00	5,552,278.41	5,265,139.48	4,519,121.51	2,306,645.66	5,496,469.72	2,103,358.86	7,151,986.22	2,578,091.83

The year under review saw an increase in Internal Generated Fund increase from GHC 86,013.24 to GHC396,457.14. This is as a result of the various revenue mobilization measures put in place by the revenue unit of the Bodi District Assembly. The introduction of a new programme in the District dubbed Ghana Productive Safety Project which seeks to reduce the poverty level of the people in the various community of implementation also increased the expected revenue in the District, This pro poor government intervention is helping to reduce the shocks that comes as a result of the exposure of people to consequences of poverty thereby increasing their safety net to withstand this external shocks.

2.5 EVALUATIONS CONDUCTED; THEIR FINDINGS AND RECOMMENDATIONS

In the period under review, Evaluation exercise was conducted on some projects as detailed in the table below

TYPES EVALUATION	PROJECT	FINDINGS	PERIOD OF EVALUATION	STAKEHOLDERS
After Implementation (ex Post)	Amoaya Health Center	The project is in used and benefiting several communities	End-September, 2020	Bodi District Assembly, traditional Authorities, Amoaya community, Unit Committee, Ghana Health Service
	Construction of 1no 3unit classroom block	The community has the need for the project because it was captured in the DMTDP as a first priority of the community. The site of the project was not favorable and has to be changed.	End-September, 2020	Bodi District Assembly, Traditional Authorities, Kankyiabo community, Unit Committee, GES
During implementation (Mid Term)	Construction Of 6 -Unit Classroom Block with Ancillary Facilities	The site is environmentally and Socially friendly. It was also captured in the DMTDP	End-September, 2020	Bodi District Assembly, Traditional Authorities, Datano community, Unit Committee

2.6 Poverty Situation in the District.

The Bodi District is predominantly an agricultural society. As a result the economic states of the farmers depend upon the pattern of the rainfall. The district was once leading in the production of cocoa in the country but due to spread of the swollen shoot disease the production has reduced drastically thereby putting the citizens who solely rely on it into a state of financial distress. The crop suffers from black pods disease and also suffers in post-harvest losses. Apart from the cocoa, food crops are also affected by the weather condition.

Another most frequently reported shocks are the price related shocks. As stated earlier, the farmers are mostly cocoa farmers whose produce are bought by the government, who in turn pay farmers according to a determined price. The fluctuation in the world cocoa price affects the local pricing as well. In most cases farmers do not get their expected incomes from their produce.

The poverty situation of these parents is often transferred or affects their children. Some of these children may be in school but work after school to support themselves. Unfortunately most of these children drop out of school thereby affecting the financial fortunes of the people hence worsening their poverty level.

2.7 IMPLEMENTATION OF GOVERNMENT FLAGSHIP PROGRAMS

2.7.1 Planting for Food and Jobs (PFJ)

The objective of the introduction of this programme by the government is to help address the declining growth of Ghana's agriculture sector. It is geared towards increasing food productivity and ensure food security for the country as well as reduce food import bills to the barest minimum. It seeks to supply improved seeds to farmers at subsidized prices, supply of fertilizers and extension services.

Under this initiative, Fertilizers and seeds prices are subsidized by 50% to enable farmers acquire them to increase yield.

Under the PFJ 181 bags from PEE FARMS and 50 bags from SPARKX FARMS So far 100% has been distributed, with a total of 2,161 farmers comprising of 1,558 males and 603 females actually benefitted as at the time this report was being compiled. More again 1,275 bags of seed Rice were received from SEEDPAG and SPARKX FARMS and distributed all to farmers. A total of 752 farmers comprising of 563 males and 189 females. Planting For Export And Rural Development

Under this initiative, the Government of Ghana has the vision of increasing agricultural products locally and improving export of agricultural products as well in Ghana by assisting farmers with farm inputs and providing training to them.

2.7.2 Implementation of Free Senior High School

With the introduction of this policy by the government of Ghana, all approved fees charged to students in public S.H.S and TVET institutions have been absorbed. This policy would address inequality and ensure equal opportunities for all students through the removal of cost barriers in public second cycle schools.

In order to accommodate the growing number of students under the programme, the Assembly is constructing a 4-unit classroom block at the only SHS in the District; Bodi Senior High School. Although the project is not completed, it is being occupied by student. A total of about 800 students are currently enrolled onto various programmes in the SHS.

One hot meal is being provided for all the year 1 students in the school under the programme at of GH¢ 1.6 per student per day

2.7.3. District Centre For Commerce, Agriculture and Technology (DCACT)

This government policy aims at attracting investment in agro processing at the Districts to add value to agriculture produce for domestic industrialization. The establishment of this centre helps maintain electronic database on all commercial entrepreneurial and agriculture initiatives.

The District committee was inaugurated in 2017. The crops chosen are RICE and PLANTAIN. Business Proposal has been written and submitted for sponsorship for implementation of all the components of the program. A technical committee has also been formed.

Under the projects, a special rice subproject has been rolled out in the District and several farmers across the District. Sensitization of farmers across the District has been carried out with targeting all farmers

2.7.4. Infrastructure for Poverty Eradication Programme (IPEP)

This programme aimed at radically improving the state of basic infrastructure at the constituency level It is designed to tackle the challenges of rural communities to serve as a vehicle through which capital expenditure will be directed at specific infrastructure and economic development priorities in the rural communities this is to be funded under the One Million dollars per Constituency per year.

This programme is to run with funding the One Million Dollars per Constituency per year. Under this programme, the District has done its Needs Assessment and all activities identified are captured in our 2018-2021 District Medium Term Development Plan to be implemented.

The following projects have also been awarded and under construction

- i. Construction of 40 units markets shed at Bodi market
- ii. Construction of 20-seater WC toilets at Bodi
- iii. Construction of CHPS compound and Nurses quarters at Kwafukaa
- iv. Construction of CHPS compound and Nurses quarters at Kama

- v. Construction of Solar powered mechanised boreholes are being constructed at Attaboka, Krayawkrom and Patakro
- vi. construction of 1no 3unit KG block and a clinic with nurses' quarters at Bodi,
- vii. Construction of 40unit market shed at Amoaya
- viii. Rehabilitation of slaughter house and water extension at Bodi (not started)

2.7.5. One District One Factory (1D1F)

The One-District-One Factory (1D1F) Programme is one of the Government of Ghana's Flagship programme which has the objective of industrializing the economy and providing employment for the youth. Under the programme, District Assemblies are supposed to link up with a Business Promoter to lead the process of establishing at least factory in the District.

It aims to transform the structures of economy from one dependent on production and export of raw materials to a value-added industrialized economy, driven primarily by private sector.

- The District Assembly has chosen the Production, Processing and Marketing of a branded rice.
- A business promoter has expressed an interest to lead the process
- Proposal has been written and submitted to the 1D1F secretariat for consideration
- The programme will be fully implemented by close of year

2.7.6. National Entrepreneurship and Innovation Plan (NEIP)

This is a flagship policy initiative of the government of Ghana with the primary objective of providing an integrated national support for start –ups and small businesses.it focuses on business development services; start-incubators and funding for young businesses to enable them grow and become successful.it build industry –driven economy capable of providing decent jobs that are suitable and sustainable for development. With Bodi District, a total number of 9 as male and 10 as female respectively are the beneficiaries under this initiative in the quarter under review.

2.7.7. Nation Building Corps (Nabco)

A total of 125 people are currently working the District in the models; Civic Ghana, Revenue, Ghana Feed Ghana, Educate Ghana, Heal Ghana, Digitized Ghana and Enterprise Ghana

2.7.8. Inner city and Zongo Development Initiative

There is an on-going construction of unit Classroom Block with Toilet and ICT lab at Bodi English and Arabic School. This is project is roofed and being plastered.

2.8. IMPLEMENTATION OF GHANA PRODUCTIVE SAFETYNET PROJECT (GPSNP)

The Government of Ghana through its quest to strengthen safety net systems that improve the productivity of the poor has set up the Ghana Safety Net Project (GPNP) as the extension of Ghana Social Opportunities Project (GSOP). Bodi District is the only district been selected from the Western North Region to benefit from this project.

The project aims to further improve the effectiveness of the two programs (LEAP and GSOP). The program is supposed to be implemented in some selected communities with LEAP beneficiaries been the main Target. Some Focal Areas of the project include Labour Intensive Public Works, Productive Inclusion and Livelihood Empowerment Against Poverty. Under this package the District is to receive an amount GH¢ GH¢ **1,592,541.79** Some interventions for the District would be Small Earth Dams, Afforestation and construction of Feeder Roads. A total of eight communities would be selected for the project.

Currently, three (3) communities namely, Krayawkrom, Attabokaa and Kwafukaa are benefiting from the project through the Labour Intensive Public Works (LIPW) arrangement with total beneficiaries of 275 peoples. These communities are cultivating Forty (40) hectares cumulatively to plant over about 10,000 coconut seedlings. About 100 more seedlings were received and distributed to all 5 beneficiary communities.

2.8.1. Employment Generation and expenditures

Total Person Days of Unskilled Labour employment generated for the kwafukaa, Krayawkrom, Attaboka, Denchemoasue and Datano subproject(s) within the month is **1,046, 1,404, 1,470, 1,425** and **1,356** respectively. This brings the Cumulative unskilled labour employment generation figure for the subproject(s) as at end of December 2020 to **69,722** person-days. The details are as shown on Table 3 below.

Table 3. Monthly and Cumulative Unskilled Labour Employment Generation and Payment

S/N	Name of Subproject	No. of Unskilled Participants	Total Person Days of Unskilled Labour Employment	Amount Paid to Unskilled Workers to Date (GH¢)
1.	Rehabilitation of fifteen (15)Ha degraded communal land using coconut trees at Denchemoasue	95	10118	139,901.08
2.	Rehabilitation of fifteen (15)Ha degraded communal land using coconut trees at Datano	91	10678	145,811.29
3.	Rehabilitation of fifteen (15)Ha degraded communal land using coconut trees at Krayawkrom	102	16207	220,151.91

4.	Rehabilitation of fifteen (15)Ha degraded communal land using coconut trees at Attaboka	98	15032	206,183.37
5.	Rehabilitation of ten (10)Ha degraded communal land using coconut trees at Kwafukaa	70	11031	150,929.91
6	Total		69,722	862,977.56
7	Cost of procurement and other related expenses			
8	First tranche			136,283.15
9	Second tranche			161,608.85
10	Total sum for procurement and others			297,892.00
11	Grand of expenditure to date			1,160,869.50

2.9. COVID-19 PANDEMIC

Introduction

COVID-19 is a deadly and contagious disease which was initially reported as an acute respiratory syndrome in December, 2019 by the public health authorities of China. The virus was named Severe Acute Respiratory Syndrome Coronavirus 2 (SARS CoV2). It is a new strain of coronavirus that has not been previously identified in humans and is linked to the same family of viruses as Severe Acute Respiratory Syndrome (SARS) and some types of common cold. The virus is transmitted through direct contact with respiratory droplets of an infected person (generated through coughing and sneezing), and touching surfaces contaminated with the virus. The COVID-19 virus may survive on surfaces for several hours, but simple disinfectants can kill it. Symptoms can include fever, cough and shortness of breath.

The disease was declared a pandemic by the WHO on 12th March, 2020, a declaration which got countries to renew and strengthen their efforts towards preventing and controlling the disease.

The Bodi District Health Directorate received a total amount of Fourteen Thousand, Four Hundred and Eighty Ghana Cedis, fourteen pesewas (GHC 14,480.14) in three tranches from the Ghana Health Service through the Western North Regional Health Directorate, to embark on a series of activities towards the prevention and containment of the disease in the district.

This report covers activities carried out towards the prevention, and containment of COVID19 in the Bodi District from March – August, 2020.

Activities Carried Out

Training and capacity development of front line health workers and Rapid Response Teams

As part of measures to prepare adequately in response to the COVID-19 pandemic, the Bodi District Health Directorate, with its own resources, organised a training workshop to enhance the capacity of the District Rapid Response Team and frontline healthcare workers to ensure immediate and appropriate response to COVID-19 in the district. The virus responsible for the outbreak is a new strain of coronavirus that was unknown before the outbreak began in Wuhan, China, in December, 2029.

Training overview

In line with the strategies outlined by the Western North Regional Health Directorate, districts were invited for a two-day Training-of-Trainers workshop on COVID-19. Subsequently, districts were tasked to cascade the training to all frontline healthcare workers. In that direction, the Bodi district as part of its preparedness activities for the pandemic organised a training workshop for the district rapid response team and frontline healthcare workers.

Thematic areas of the training

❖ Coordination/Team dynamics/psychosocial support

Participants were made to understand that adequate and effective structures are key to effective response and containment of Public Health Emergencies. Response should focus on some key areas including; Planning & Coordination, Surveillance, case management, social mobilisation and risk communication.

❖ Surveillance – case definition

Participants were taken through the case definitions for suspected and confirmed COVID19 cases as detailed in the table below.

Table 6.2 Covid-19 Suspected and Confirmed Cases

Suspected Case	Confirmed Case
A person with fever ($\geq 38^{\circ}\text{C}$) or history of fever and symptoms of respiratory tract illness e.g. cough, difficulty in breathing AND in the last 14 days before symptom onset, a history of travel from China or other affected countries. OR Fever ($\geq 38^{\circ}\text{C}$) or history of fever and symptoms of respiratory tract illness e.g cough, difficulty in breathing AND in the last 14 days before symptom onset, contact with a person who is under investigation or confirmed for COVID-19	A person with laboratory confirmation of COVID-19 infection, irrespective of clinical signs and symptoms.

❖ Surveillance – Contact tracing

A detailed presentation on the 3 key steps in Contact tracing was made to participants. The key steps in COVID-19 contact tracing were outlined as follows;

1. Contact identification
2. Contact listing
3. Contact follow-up

❖ **Screening & Triaging**

Participants were made to understand that screening and triaging are the taking of temperature and interviewing clients as and when they visit the facility and sorting them appropriately based on the severity of the symptoms they present.

❖ **Sample collection, Packaging and Transportation**

The Participants were taught that sample collection, packaging and transportation are done simultaneously at the point of sample collection and immediately transported to either Noguchi Memorial Institute for Medical Research (NMIMR) or Kumasi Centre for Collaborative Research (KCCR) and should be accompanied by the surveillance officer or any other Public Health Officer. Before any sample collection is carried out, the laboratory scientist must doff the full personal protective equipment. The sample must be triple packaged before transportation.

❖ **Clinical management of COVID-19 by DDHS**

Basically, participants were informed that there has not been any established treatment procedure for confirmed COVID-19 cases. The only available option is supportive treatment and monitoring.

❖ **IPC COVID-19 practice**

Demonstration on the donning and doffing of personal protective equipment including the use of the coverall, the gown, gum boot and the like was done in the full glare of all participants. Also, appropriate hand washing and the use of hand sanitizers were demonstrated to the public.

❖ **Organization of the treatment centre & Burial of the dead**

Participants were taken through the procedures for the burial of COVID-19 deaths such as; The doffing of PPEs, demarcation of special grave yard for burial, decontamination (the dead body, body bag, the dead person's room, etc). They were also told to avoid the use of commercial vehicles for the burial of COVID-19 deaths.

Challenges confronting the district

The key challenges at the end of the training were;

1. Inadequate funds
2. Inadequate Personal Protective Equipment

2.10 Report on 2020 General Election

Prior to the 2020 Voters' Registration exercise and subsequently, the 2020 General Election, the Assembly through its Departments and Units (E.g. Department of Social Welfare and Community Development), Agencies of Government (National Commission for Civic Education) together with other Non-Governmental Organizations embarked on a Districtwide advocacy on the need to ensure peace before, during and after the 2020 polls. The support of Assembly members, Community Information Centres (CICs) and some local radio stations were very critical to the success of both exercises. Security personnel were deployed to all Registration and Polling Centres whilst a patrol team moved across these centres to ensure compliance by all stakeholders. Meanwhile, the Assembly through some officers observed the processes of the Registration and Voting exercises at the various Centres. The District's Collation Centre was generally calm and peaceful. The following certified results were announced and publicized by the District Officer of the Electoral Commission of Ghana.

Table 7.1: Election results

Parliamentary Results		Presidential Results	
Political Party	No. of Votes	Political Party	No. of Votes
NPP	11,073	NPP	12,236
NDC	13,621	NDC	15,425
PNC	114	GUM	181
INDEPENDENT	3,564	CPP	19
Total Valid Votes	28,372	GFP	6
Invalid Votes	535	GCPP	11
-	-	APC	21
-	-	LPG	16
-	-	PNC	13
-	-	PPP	5
-	-	NDP	4
-	-	INDEPENDENT (A. WALKER)	31
		Total Valid Votes	27,965
		Invalid Votes	982

Due to the effective strategies adopted by the Assembly to disseminate the message of peace to the citizenry across the jurisdiction of the District, the atmosphere before, during and after the 2020 Voters' Registration and Polls were generally calm and peaceful irrespective of the pockets of violence recorded earlier during the Voters' Registration exercise, which were dealt with in accordance with the laws of Ghana.

Conclusion

Although the district was highly challenged in terms of its finances, the training was well organized. Participants were tasked to share the knowledge they had acquired with their colleagues so that together they all adequately prepare for the fight against COVID-19.

The District Director of Health Service encouraged participants to keep up the good works while they anticipate some personal protective equipment to adequately resource them.

Screening of passengers at entry points to the District

With support from the Bodi District Assembly, a team of health workers and Security personnel mounted checkpoints at the various entry points of the district to screen all passengers' on-board vehicles entering or going through the district via an entry point. Some Infrared thermometers and funds were provided by the District Assembly to the District Health Directorate for the screening exercise.

The screening exercise span through the period of May and June, 2020, with screening teams at the following communities which are entry points to the District;

1. Afere
2. Kwasikrom
3. Datano
4. Ahibenso
5. Denchemuosuo
6. Odumtankwa

Refresher training for Sub-District Rapid Response Teams

Refresher training was organized in June, 2020 for 3 Sub-District heads, and 2 Sub-district Surveillance focal persons to enhance their capacity in the areas of surveillance, rumor investigation, case detection, sample collection and transportation.

Risk communication

The risk communication team of the District Health Directorate with support from the District Assembly, and Member of Parliament, carried out a number of activities in the fight against Covid-19 pandemic in the district.

Purpose of risk communication

To heighten awareness among the general public about Covid-19 pandemic
Period of activity:
12th March, 2020 to date

Public Education/Sensitization

Radio Discussion

Radio discussion has been an essential component of action to increase awareness about Covid-19 pandemic among the general public. Radio discussions were organized at Akwaabah FM on every Thursday's and Saturday's. A total of Thirty-Two (32) radio discussions have been held with support from the District Assembly and Hon. Sampson Ahi. It is aimed at increasing the emphasis on the role of individual in assuming personal responsibility for health and obtaining adequate information necessary to make inform health choices.

Community Sensitization

Public education/sensitization has been strengthened in communities within the Bodi district. Public education/sensitization was conducted in Sixty-Four (64) communities in the district through the use of community information centers and megaphones. Education on community information centers were done by health staff at the health centers and CHPS compounds within their catchment areas. Sensitization was also done during market days, Child Welfare Clinics (CWC), Out Patient Department (OPD) and other channels encouraging individual to adhere to the preventive measures of Covid-19.

Education on WhatsApp Platform

Information on Covid-19 was shared on the district health WhatsApp platform to sensitize health staff about the disease. All other relevant information regarding the disease was also shared on the same platform.

Distribution of Covid-19 Announcement Letters

Letters were distributed to churches, community information canterers, Akwaabah FM and the health facilities for an announcement on Covid-19. This was to sensitize the general public on Covid-19 and encouraged them to take precautionary measures against Covid19.

Distribution of Covid-19 Posters

Covid-19 posters have been distributed to Seventeen (17) health facilities in the district. The posters were pasted at vantage points of the facilities to educate clients on Covid-19 precautionary measures.

Covid-19 Task Force

Covid-19 task force was formed to ensure that the general public adheres to the precautionary measures of Covid-19. The team consists of unit heads of the District Assembly, Health Directorate and the Assemble man. The task force ensures that hand washing facilities were available at various institutions in the district. The task force usually operates during market days to enforce the wearing of face mask and educate the market women/traders on Covid-19 precautionary measures.

Engagement Meeting

Engagement meeting was held with the leadership of GPRTU, drivers and passengers to educate them on Covid-19. Four (4) meetings have been held so far. The GPRTU union had provided hand washing station at their premises for drivers and passengers.

Meetings were also held with Hair dressers, barbers, tailors and seamstress to sensitize them on the precautionary measures of Covid-19. They were encouraged to provide hand hygiene facilities at their shops for customers.

Public Health Emergency Management Committee Meeting

A number of Public Health Emergency Management Committee Meeting had been organized to brief members about the district preparedness plan towards Covid-19. Risk communication messages were tailored to the committee and were also briefed on situational report.

Orientation of Schools on Covid-19

As part of measures to ensure preparation for the government's easing of covid-19 restriction on final year students, the risk communication team visited some schools in the district to orient both staff and final year students on the covid-19 safety and precautionary measures. The Bodi Senior High School (BOSEC) and some other basic schools comprising of both public and private were visited. At every school, the team meets with the staff to first discuss the protocols and also tries to engage with the students in groups.

Screening of Church Members

The risk team met the leaders of local council of churches and walked them through Covid19 screening and reporting tool. The team collates data on screening conducted by churches on Sunday's for onwards submission to Regional Health Directorate.

Routine surveillance for COVID-19 cases in health facilities

Surveillance for COVID-19 begun in earnest in all health facilities in the district following the declaration of the disease as a pandemic by the WHO on 12th March, 2020. Case definition of the COVID-19 was made available to all facilities to guide them in their case detection. Two hotlines were

designated as COVID-19 hotlines which health facility staff could call at any time when they suspected a client of having COVID-19.

The first suspected case of COVID-19 was identified at the Bishop Anglionby Memorial Clinic on 3rd June, 2020, of which a sample was taken to the KCCR for testing. Surveillance was intensified and more suspected cases were identified across all facilities.

At the time of compiling this report, the district had identified 80 suspected COVID-19 cases through routine surveillance, with samples taken for testing at the KCCR.

Surveillance is ongoing in call health facilities for COVID-19 cases.

Case management: Service delivery through network of District and Sub-district service providers

The district identified 3 health facilities to serve as holding bays for suspected COVID19 cases. The said facilities are;

- I. Bishop Anglionby Memorial clinic
- II. Suiano Health Centre
- III. Amoaya Health Centre

Suspected cases were held in these facilities until their results were released from the laboratory.

Facility heads and rapid response team were provided with airtime for quick reporting and response to all cases via effective communication.

A total of 23 heads of facilities and rapid response team officers benefited from the airtime for communication

Due to the lack of a hospital in the district, the Juaboso Government Hospital provided clinical care for the confirmed cases. All confirmed cases underwent self-isolation while arrangement was made to get their medication from the Juaboso Government Hospital for them at home.

The district recorded its first confirmed COVID-19 case on 3rd July, 2020.

At the time of compiling this report, a total of 31 confirmed cases had been recorded in the district, with all 31 treated and fully recovered.

Provision of Infection Prevention and Control (IPC) logistics

Infection prevention and control is one of the most cost-effective intervention against communicable diseases. In that regard, some IPC logistics were procured to augment the existing ones at the time. The following items were procured; Veronica buckets with stands, liquid soap, tissue paper, and dust bin liners.

The Western North Regional Health Directorate, the District Assembly, the Member of Parliament, and other philanthropist subsequently supported the district with additional

IPC logistics to enhance the facilities' preparedness towards the disease.

Logistics received from the Regional Health Directorate included the following; Veronica buckets with stands, infrared thermometers, gum boots, coveralls, disposable and surgical gloves, hand sanitizers, face shield, goggles, disinfectants, liquid soap, tissue paper, as well as food supplies.

All IPC logistics received were in turn distributed to all health facilities in the district to enhance their preparedness in fighting the pandemic.

Sample collection and transportation

All COVID-19 specimens were transported to the Kumasi Centre for Collaborative Research (KCCR) for testing. Samples were transported in the Directorate's official vehicle accompanied by the District Surveillance Officer.

At the time of compiling this report, a total of 148 samples had been collected and transported to the KCCR for testing. This figure comprised of the samples taken from routine surveillance and contacts of confirmed cases.

Community-Based Surveillance, Home Visits, And Contact Tracing

Following the detection of confirmed cases of COVID-19 in the district, there was the need for active contact tracing to isolate and test all contacts of confirmed cases in order to prevent the spread of the disease.

Community members had also been empowered to report all suspected COVID-19 cases through the district COVID-19 hotlines, while health workers in all health facilities were oriented to conduct home visits to provide health services as well as look out for possible COVID-19 cases.

Conclusion

The concerted efforts put in by the various stakeholders in the district has made the fight against the COVID-19 pandemic largely successful. Logistics supply has improved significantly coupled with technical assistance from both Regional and National levels.

Challenges

1. Inadequate funds for Risk communication, sample transportation, and contact tracing
2. Inadequate disposable gloves in health facilities
3. Lack of social and behaviour change communication materials for public sensitization
4. Dwindling compliance with the COVID-19 preventive protocols by the general public

Recommendations

1. Districts should be provided with additional funds to sustain risk communication activities as well as contact tracing
2. Disposable gloves should be included in the Personal Protective Equipment for districts
3. Posters on COVID-19 should be made available to all districts for health education purposes.

CHAPTER THREE

3.0 THE WAY FORWARD

KEY ISSUES ADDRESSED AND THOSE YET TO BE ADDRESSED

The mandate of DPCU to monitor programmes and projects has been successful in this quarter. However not all projects and programmes were monitored due to inadequate logistics.

The problem of inadequate logistical and financial support for Monitoring and Evaluation remains a major hindrance to effectively carry out the process. Where possible other departments assist with means of transport for monitoring.

There is the need to organize the necessary training on Participatory Monitoring and Evaluation and other related topics for the DPCU members and other key stakeholders. Members will then appreciate the need for a proper M&E process.

The delay in the preparation and submission of quarterly progress report by the Department to the DPCU for further compilation into a composite Quarterly Report for the District remains a challenge. Letters of reminders are often written severally to the Unit/Departmental Heads before data could be obtained.

The absence of some Departments such as Physical Planning in the District is a challenge as it makes it difficult for tracking the progress of work in such departments.

The lack of vehicle for Monitoring and Evaluation is a major setback in the achievement of the goals and objectives of the district.

Some other challenges include the following.

- The lack of District Hospital to take care of the critical health issues
- Low Internal Generated fund (IGF) of the District
- Early deterioration of roads and the breakdown of the Assembly Grader
- High level of youth unemployment
- Deplorable nature of the Bodi SHS, the only SHS in the District
- Inadequate Market infrastructure.

3.2. RECOMMENDATIONS

- Timely submission of departmental reports by HoDs and Unit heads to ensure early submission of quarterly and annual reports.
- Timely release of funds by central government for Monitoring and Evaluation activities
- The Assembly must continue to pursue actions to establish the remaining departments namely Physical Planning Unit to ensure the availability of the full complement of staff to execute its mandate.
- Management and NDPC should training workshop in data collection, storage, and management for departments/units of the Assembly would help provide significant information for development of the district.
- The provision of a dedicated vehicle my management for project supervision would facilitate monitoring and evaluation activities.

In order to increase revenue generation, there should be improved mechanism (i.e. digitization of valuation list) in mobilizing revenue internally including numbering of properties to improve property rates.

Focus of the Assembly will be on the following areas:

1. Increase internally generated revenue by 20%; recruitment of revenue staff, registration of local Cocoa Buying companies and intensify the collection of Building Permit and Property Rates
2. Set up and support small and medium scale enterprises as a way of reducing poverty.
3. Adopt a holistic approach towards waste management that is,
4. Target 80% coverage of the populace registering with the NHIS.
5. Enforce the construction of toilet facilities, bathrooms and properly constructed soak-away at all homes.
6. Enforce the acquisition of building permits and building regulations.
7. Improve on the District layouts.

3.3 CONCLUSION

The Assembly implemented central government projects/programmes as well its own programmes and projects to improve the quality of life of the people.

Although there were constraints and challenges to its development efforts, the Assembly managed to achieve some successes with the available human and financial resources.

Key areas such as infrastructure, provision of portable water & sanitation, Health and human capital investment development received significant attention. The peaceful environment provided by both the public, private and civil society also supported development activities.

The road sector received minimum attention in the quarter to take advantage of the whether before the heavy rainfalls set in.

The Assembly also implemented a special project dubbed “Ghana Productive Safety-Net Project (GPSNP)” in five (5) communities with several people benefitting.
